\* Associate Professor of Pharmacy, University of Washington College of Pharmacy.

† The dates of the revisions of the U. S. Pharmacopœia are given and the National Formulary which most closely correspond, thus the column under 1910 refers to N. F. IV and 1920 to N. F. V, etc. References to the U. S. P. titles are designated by numerals; those to the National Formulary by lower case letters, in neither case by superior numerals or letters. Other explanations will be found in Prefatory Remarks.

### ADDRESSES OF THE PRESIDING OFFICERS AT PHILADELPHIA.

In order to have all the addresses of the Presiding Officers, the address of Sir William S. Glyn-Jones, the discussion of the Headquarters project and the Minutes of the Council in this issue of the JOURNAL, it was found necessary to leave matter for this Department to be printed in a succeeding number of the JOURNAL.

### PRESENTATIONS TO FORMER SECRETARY WILLIAM B. DAY AND CHAIRMAN W. L. SCOVILLE OF THE N. F. REVISION COMMITTEE.

The former Secretary, William B. Day, was presented with a testimonial by members of the AMERICAN PHARMACEUTICAL ASSOCIATION, and Chairman Wilbur L. Scoville, of the N. F. Revision Committee, was remembered by the members of the Committee. Gold coin, in a purse, was added to the words of appreciation in paying tribute to the former, and the latter was given the means for visioning further opportunities through binoculars.

### AMERICAN PHARMACEUTICAL ASSOCIATION BANNER.

The Philadelphia A. PH. A. Local Committee has presented the AMERICAN PHARMACEUTICAL ASSOCIATION with the large, handsome banner which hung over the front of the Bellevue-Stratford during Convention Week. The banner will serve a like purpose at other annual meetings of the A. PH. A.

### PHARMACY WEEK.

The Maryland Pharmaceutical Association, as other State associations, sent out a letter of information relative to Pharmacy Week; the following paragraph therefrom is quoted:

The purpose of Pharmacy Week is to impress upon the public that pharmacy is a professional service, the purpose of which is to supply, *under proper safeguards*, the medicines and medicinal equipment which the community requires for its comfort, protection and good health, and that while many of its activities are commercial, they are based on and are related to the professional service of pharmacy. Many of the most successful pharmacists are realizing that their commercial opportunities are based upon their standing in the community as trained and responsible professional men, and all pharmacists are urged to join in this movement to show that they are equipped

and prepared to give the advice and service expected of them.

### LIST OF REGISTRANTS, A. PH. A. MEETING, PHILADELPHIA.

List of Registrants, members of the AMERICAN PHARMACEUTICAL ASSOCIATION, and members of their families in attendance at the Seventy-Fourth Annual Convention, A. PH. A., Philadelphia meeting. Corrections and additions respectfully requested; please address JOURNAL A. PH. A., 10 W. Chase St., Baltimore.

## BULLETINS OF THE DRUG TRADE BUREAU OF PUBLIC INFORMATION.

Director Robert P. Fischelis has issued Bulletins D-33 to D-41 inclusive of the Drug Trade Bureau of Public Information.

Bulletin D-33 relates to Pharmacy Week which was observed throughout the country from October 10 to 16. The bulletin recites that "committees will be formed in every State and exhibits illustrating pharmacy development as a science will be held in colleges. The AMERICAN PHARMACEUTICAL ASSOCIATION will give a special exhibit at the Sesqui-Centennial Exposition in Philadelphia."

Bulletin D-34 states that the National Wholesale Druggists Association at their annual meeting at French Lick, Ind., will urge honest merchandising legislation and that the reports of the Committee on Legislation and the Committee on Education and Research will feature the proceedings.

Bulletin D-35 relates to the address of President M. N. Ford of the National Association of Boards of Pharmacy. Reference is made to failures of candidates before various Boards of Pharmacy. The meeting in Philadelphia of the AMERICAN PHARMACEUTICAL ASSOCIATION and the National Association of Boards of Pharmacy received consideration in the Bulletin.

Bulletin D-36 presents a summary of a paper by Dr. Robert P. Fischelis on the service of pharmacy in connection with public health; he also refers to the large volume of merchandise sales in drug stores. The importance of periodic health examinations is emphasized. He states that the phar-

macist can be of great service in this connection, because he is in constant contact with the public and is often considered a source of information on health matters; thereby the pharmacist has an opportunity of rendering a professional service to the public, to the medical professions and to himself.

Bulletin D-37 presents the substance of portions of the address of President Frank T. Stone of the National Association of Retail Druggists in which there is an extended discussion of the price maintenance problem. President Stone commends the Kelly bill.

Reference is also made in this bulletin to a paper by J. H. Riemenschneider in which he discusses a prescription department and informs that a study of this has been made by the Executive Committee of the National Association of Retail Druggists. The purpose is to gather statistics in a free, impartial and open manner without any thought of engaging in a plan to fix prices.

Charles H. Huhn of Minneapolis, W. F. Baum of Danville, Ill., Thomas Stoddart of Buffalo, N. Y., E. B. Heimstreet, Lake Mills, Wis., F. W. Meissner, La Porte, Ind., Louis Emmanuel, Pittsburgh, Pa., and L. G. Heinritz, Holyoke, Mass., were elected to honorary life membership in the National Association of Retail Druggists.

Bulletin D-38 informs relative to legislative matters as presented by Paul Pearson of Washington before the National Association of Retail Druggists at their meeting in Philadelphia. Mr. Pearson said that if pharmacy must have a bureaucratic government it will submit to such government provided it is placed under the supervision of a member of the President's Cabinet. The report also favors placing the ownership of drug stores in the hands of qualified registered pharmacists, because public health demands this. The ASSOCIATION favored the Kelly Honest Merchandising Bill and the Chairman's conclusions are that unless this or a similar measure is enacted the public will eventually find itself at the mercy of department or chain stores. He concludes his remarks by saying: "The anti-trust laws and the public policy declared by Congress at the time of their enactment accomplished their purpose by dissolving the large combinations of industries in restraint of trade. The public to-day is menaced by more dangerous combinations in the form of retail distribution monopolies, which are growing

by leaps and bounds. The neighborhood store fast is disappearing, and with it the public more and more is being deprived of the benefit of competition so necessary for its welfare."

Bulletin D-39 concerns activities at the meeting of the National Wholesale Druggists Association at French Lick. A report by C. Mahlon Kline, Chairman of the Legislative Committee recites that the amount of denatured alcohol diverted is overestimated; that the larger use of the present day is due largely to more uses for denatured alcohol. The Bulletin reports that efforts may be made in the coming session of Congress to revive H. R. 11612; the provisions of which impose new burdens on druggists. This bill was postponed at the last session of Congress because of the protests urged against it.

Bulletin D-40 refers to the report on insurance in which it is stated that more fires in business houses occur from smoking and the careless use of matches than from any other single cause. The total fire loss in the U. S. of 1925 amounted to \$570,255,000.00, the largest that ever occurred and the report urges the members of the ASSOCIATION to cooperate with the National Fire Protection Association in its campaign to reduce this loss. The report states further that it is a source of great gratification to be able to record that none of the members of the ASSOCIATION have reported loss by fire during the past year. Rigid and frequent inspection is advocated.

Bulletin D-41 refers to the report of the Committee on Trade Marks of the N. W. D. A., in which it is stated that "dead" trade marks block applications for the registration of other similar marks which have a valid right for protection and seriously restrict the number of marks that may be adopted by the general public. The conclusions are that owners whose registered marks are no longer in use should apprise the Patent Office of the fact and consent to their cancellation.

The Bulletin also refers to causes of certain market conditions—The advance in the price of glycerin is attributed to its large use in anti-freeze compounds. An abundant crop of menthol has brought the price to a lower position than it has maintained for a number of years. The price of quinine has been reduced in order to meet that of foreign competitors.

The work of the U. S. Chamber of Commerce is commended and wholehearted support is urged.
