JOURNAL OF THE AMERICAN PHARMACEUTICAL ASSOCIATION

VOL. XVII APRIL, 1928 No. 4

ROBERT LINCOLN McNEIL.

The President of the American Pharmaceutical Manufacturers' Association, R. Lincoln McNeil, is a native of Philadelphia, the son of Mr. and Mrs. Robert McNeil. He was educated in the public schools of his home city, winning the 1900 free scholarship in the Northeast Manual Training High School; he graduated from the University of Pennsylvania with senior honors and the degree of B.S. in Economics and Business Administration. The business which father and son developed originated as a retail pharmacy and is now one of the large modern manufacturing establishments of the pharmaceutical industry.

President McNeil became a member of the American Pharmaceutical Manufacturers' Association in 1915 and during most of the years since then has served on the Board of Directors and as Chairman of important committees; his election to the presidency is responsive to the recognition of his services and devotion to duty.

Mr. McNeil was one of the organizers of the Kensington Board of Trade and has served on its Board of Directors since and as President from 1916–1919; he is interested in whatever promotes the welfare of the community—he was Vice-Chairman of the Kensington District Liberty Loan and War Chest campaigns; he is now and has been for a number of years Vice-President of the Law Enforcement League of Philadelphia. Mr. McNeil is an Elder and Trustee of the First Presbyterian Church of Germantown and a teacher of its Sunday School; a member of the Masonic Fraternity, Union League and North Hills Country Club. Two sons have added to the happiness of the home of Mr. and Mrs. McNeil.

His success is the result of the energy he gives to his work, after studying and arriving at an understanding of the problems before him. We conclude this brief sketch with a word of commendation and thanks for a recent message addressed to the membership of the A. P. M. A., in which President McNeil spoke in highest terms of appreciation of the valued work of the American Pharmaceutical Association and its helpfulness to the drug industries.
