OBITUARY.

WILLIAM EVANS BARD.

The death of William E. Bard in Naples, Italy, was announced by cablegram on March 11th. Mr. Bard had been a member of the American Pharmaceutical Association since 1901. Some days later another notice apprised the relatives and friends of the death of Mrs. Bard. Mr. and Mrs. Bard were on a world tour and had sailed from San Francisco last November, making stops at various points in the far East before coming to Europe.

Mr. Bard was born in Sedalia, Mo., 1866. After graduating from the St. Louis College of Pharmacy he became a partner in the business of his father and, after the latter's death, the sole proprietor of two drug stores in his home town.

The deceased are survived by an only daughter, Mrs. Estill Bard McNamara of Sedalia; to her and other members of the family sympathy is expressed.

Mr. Bard had been eminently successful in business life and was highly regarded by his fellow-pharmacists. He had been an active member of the Missouri Pharmaceutical Association for many years. We are indebted to Mrs. Minnie Whitney, friend of the deceased, for notice of the deaths.

J. FULLER FRAMES.

J. Fuller Frames, a life member of the AMERICAN PHARMACEUTICAL ASSOCIATION, died on June 24, 1930, aged sixty-eight years. Mr. Frames had not been well for several days and his trouble becoming acute, surgical treatment was found necessary.

Mr. Frames was a native of Baltimore and had been prominent in drug-trade activities for many years. He succeeded his father as proprietor of a pharmacy at the corner of Gay and Aisquith Sts., and continued the business until the time of his death.

He was secretary of the Calvert Drug Co. for twenty years and had served on the Maryland Board of Pharmacy for thirty years. He was a member of the Maryland Pharmaceutical Association and local drug-trade bodies, among them the Baltimore Veteran Druggists' Association.

The funeral services were attended by members of the drug-trade activities, including a representative number of the Veteran druggists.

The deceased is survived by his widow and

three children of a former marriage, to whom sympathy is expressed.

He was highly esteemed as a citizen and pharmacist, firm in his convictions but unafraid in performing duties, modest and always considerate of others.

HARVEY W. WILEY.

Dr. Harvey W. Wiley, of Washington, died June 30th, aged eighty-five years. He became a member of the American Pharmaceutical, Association in 1902.

He was known to pharmacists, not only through the department in "Good Housekeeping Magazine," which he conducted, but for his earlier work that brought him in close touch with them; through his lectures in Chautauqua and Lyceum Courses and through his connection with the Bureau of Chemistry for nearly thirty years. It was during his incumbency that the Food & Drugs Act was enacted in which the United States Pharmacopœia and National Formulary are recognized as standards. In 1920 he was elected President of the United States Pharmacopæial Convention. His work on "Foods and Their Adulteration" is an important book of reference for food chemists.

Dr. Wiley was born in Kent, Indiana, October 18, 1844, and educated at Hanover, Indiana Medical College, and Harvard, and also studied in Europe.

Dr. Wiley was the recipient of the decoration of the French Legion of Honor and of other distinctions and of honorary degrees of a number of universities. He was a member of many scientific societies in the United States and abroad and served on several juries of award in world expositions and international congresses.

He attended several of the annual meetings of the AMERICAN PHARMACEUTICAL ASSOCIATION and presided over the 1920 Pharmacopæial Convention. He was present and visited with friends at the recent Convention; however, he was in a very enfeebled condition, and those who had known him in earlier years when the vigor of his health was pronounced, were saddened by the changed condition brought about by advancing years.

Dr. Wiley was an outstanding figure in the activities with which he was associated; he is survived by his widow and two sons, Harvey W., Jr., and John Preston Wiley. A sketch of

him is printed in the May JOURNAL A. PH. A., 1920, page 465.

GEORGE ZOELLER.

George Zoeller, member of the AMERICAN PHARMACEUTICAL ASSOCIATION since 1919, died April 4th, aged sixty-five years.

Mr. and Mrs. Zoeller had been on a trip to Europe the early part of this year. Mr. Zoeller had been in poor health for a number of months and had sold out of business before going abroad. He is survived by his widow, Elizabeth K. Zoeller, to whom sympathy is expressed.

STEPHEN G. PORTER.

Hon. Stephen G. Porter, congressman from Pennsylvania, died June 27th in Allegheny General Hospital, Pittsburgh. Mr. Porter became ill about two months ago aboard ship en route from London. He was an outstanding figure in regulating the control and distribution of habit-forming drugs. The last contribution to this work was the bill to create in the Treasury Department a Bureau of Narcotics. Comments on "Tentative Draft of the Porter Narcotic Bill" are printed in the February JOURNAL, page 165, and the Bill appears in the March number, page 307; many years of Congressman Porter's life were given to this important subject.

For nearly fifteen years, as ranking minority member and then as chairman of the House Foreign Affairs Committee, Mr. Porter placed his mark on many resolutions affecting our foreign relations.

CONGRESSES OF PHARMACY.

A Congress of Pharmacy will convene at the International Exposition in Liege from August 6th to 11th. The Congress is under the direction of the Faculty of Pharmacy at the University of Liege; the secretaries of the Congress are M. M. Bohet and Bremen.

The subjects which will be considered are: General and Analytical Chemistry, Pharmaceutical and Toxicological Chemistry, Pharmacognosy and Practical Pharmacy, Biologic and Bacteriologic Chemistry and that relating to Hygiene and Foods, Colonial Pharmacy, Subjects of Professional Interest, History, Legislation, etc. Quite a number of names familiar to pharmacists are on the Organization Committee.

The International Pharmaceutical Federation is meeting in Stockholm this month.

CHICAGO WORLD'S FAIR.

States are beginning to show growing interest in the World's Fair which is to be held in Chicago in 1933. Considerable attention, in fact a large part of the Chicago exhibition, will be devoted to the progress of science.

NATIONAL COLOR SOCIETY.

In connection with the U. S. Pharmacopœial Convention held in Washington, on May 13th and 14th, a Special Report has been drawn up on "Color Names in the United States Pharmacopœia and in the Arts, Sciences and Industries," edited by Prof. E. N. Gathercoal, School of Pharmacy, University of Illinois, Chicago. (Copies of this comprehensive report can be obtained for the nominal sum (50¢ each) from A. F. O. Munsell, 10 East Franklin St., Baltimore, Md.) A splendid exhibit of color instruments and color charts gave a graphic visual demonstration of the subjects treated in the above report on color names.

At a special meeting of all those interested in the part played by color in the three fields of Industry, Art and Science, Prof. Gathercoal reviewed the keen interest and the hearty coöperation that he had experienced in obtaining contributions to the report and to the color exhibit, and asked those present at the meeting whether or not there was a need for a society or convention concerned primarily with color in Industry, Art and Science. Receiving a unanimous answer in the affirmative, steps were taken for the formation of an organization committee to promote this new society. The meeting elected the following members to this organization committee:

Chairman, Royal B. Farnum, Providence, R. I.; F. N. Gathercoal, Chicago, Ill.; Charles Bittinger, Washington, D. C.; M. Rea Paul, New York City; Dean B. Judd, Washington, D. C.; Heber W. Youngken, Boston, Mass.; Raymond P. Ensign, Newark, N. J.; Margaret H. Rorke, New York City; H. V. Arny, New York City; Wm. D. Appel, Washington, D. C.; A. E. O. Munsell, Baltimore, Md.; Frank F. Rupert, Pittsburgh, Pa.
