

JOURNAL OF THE AMERICAN PHARMACEUTICAL ASSOCIATION

VOL. XXI

AUGUST, 1932

No. 8

GEORGE DAVID ROSENGARTEN.

The subject of this brief sketch—Dr. George D. Rosengarten—a life member of the AMERICAN PHARMACEUTICAL ASSOCIATION, was born in Philadelphia, February 12, 1869—the son of Harry B. and Clara J. (née Knorr) Rosengarten. He received his early education in Dr. Faries' Classical Institute, and later, in 1884, studied under Prof. Henry Trimble at the Philadelphia College of Pharmacy. Thereafter, he entered the University of Pennsylvania in 1886, and received his B.Sc. degree in 1890. His studies were continued at the University of Jena, where he earned his Ph.D. degree, in 1892. In 1927, he was honored with the Sc.D. degree by the University of Pennsylvania.

During his University years he was treasurer during the Freshman year and was honor man in both terms of the Freshman and Sophomore years and has been class president from 1918 to date.

Dr. Rosengarten entered business with Rosengarten and Sons, Chemical Manufacturers, in 1892, and was elected vice-president of the corporation in 1901 and served in the same official capacity after the consolidation of Powers, Weightman, Rosengarten, Inc., from 1905 to 1927 and as director of Merck & Co., Inc., 1927–1929 (now retired).

He is a director of the Girard National Bank and of the Philadelphia National Bank, Philadelphia. Among his many affiliations with associations, clubs and societies are the following: American Institute of Chemical Engineers, of which he was president 1915–1917; American Chemical Society, former chairman of its Industrial Division, Councilor-at-Large, and its president in 1927, member of its Executive Committee; member of the Electro-Chemical Society; American Institute of Mining Engineers, Franklin Institute and of its board of managers to date; Society of Chemical Industry, German Chemical Society.

He is a member of the Historical Society of Pennsylvania, Academy of Fine Arts, Horticultural Society, Zoölogical Society, of Philadelphia; member of the

GEORGE D. ROSENGARTEN.

American Philosophical Society, fellow of the American Association for the Advancement of Sciences, and American Academy of Political and Social Science.

Dr. Rosengarten was a member of the Revision Committee of the U. S. Pharmacopœia IX and X, and chairman of the sub-committee of Organic Chemicals.

Mr. and Mrs. Rosengarten (née Susan Elizabeth Wright) were married in 1895; their home is in Malvern, Pa.

GREETINGS TO: THE AMERICAN PHARMACEUTICAL ASSOCIATION,
THE CANADIAN PHARMACEUTICAL ASSOCIATION, THE ONTARIO
RETAIL DRUGGISTS' ASSOCIATION.

WILLIAM J. STEWART.
Mayor of the City of Toronto.

“IT was with great pleasure that I learned that a joint Convention of your Associations will be held in Toronto in August next, and I assure the members of a right hearty welcome to our City on that occasion.

We will be especially glad to welcome the pharmacists of the United States, who, I understand, are meeting here for the first time since 1877. We entertain a very warm feeling for the citizens of the neighboring Republic, and are always glad to have them visit our City.

We readily recognize the high calibre of the members who compose these organizations, and we will count it an honour to have such a fine body of business and professional men in our midst.

We trust that a large number of your members will take advantage of this opportunity to come to Toronto, which offers every facility for a happy and interesting holiday. During August our City is at its best. Here is to be found every opportunity for summer sports and amusements, in range and variety to suit every taste. Well-paved highways lead to many summer resorts, including Muskoka, the ideal playground of our Province.

It is my sincere hope that it will be my good fortune to personally greet your members.”

 A handwritten signature in dark ink, appearing to read 'W. J. Stewart', written in a cursive style.

Mayor.

SURVEY SHOWS HEALTH OF NATION GENERALLY BETTER THAN YEAR AGO.

A survey of the effect of economic conditions upon the health of the Nation, based on statistical indices covering the first half of 1932 and questionnaires sent to state and local health officers, indicates that the state of the public health is generally favorable, although it is impossible to predict whether the record made thus far can be expected to continue through the depression, according to information made available July 28th by the Public Health Service.
