

Bankers and the Associated Chambers of Commerce. Both organizations gave their support to the scheme by a unanimous vote.

The bill provides for the continuance of the sovereign and the florin, the latter being one-tenth of the sovereign, or pound. A new coin, one-hundredth of a pound, will make its appearance, being practically equivalent to the American nickel. The new farthing will be worth slightly less than the present farthing (approximately one-half cent), being exactly one-thousandth of a pound. Five farthings (instead of four as now) will make up the new penny.

With such strong endorsement the prospects are bright for the passage of the measure, and once Great Britain has decimal coinage one of the great barriers to decimal weights and measures will have been removed. The decimal movement is not swift, but it seems to possess a most encouraging steadiness in the forward direction, and to enlist in its behalf men of intelligence, merit and sound judgment.—*The Valve World*.

Several of the departments of this Section are omitted from this issue on account of the inclusion of the annual index.

OBITUARY.

CHARLES WESLEY SNOW.

Charles W. Snow, vice-president of Gibson-Snow Drug Company, died at his home in Syracuse, N. Y., November 9, at the age of 82 years. The deceased was born at Peterboro, N. Y.; the parents moved to Syracuse when Charles was five years old and here he

CHARLES W. SNOW.

continued to reside. At the age of 15 years, Mr. Snow entered the employ of W. B. Tobey and four years later was admitted to partnership. In 1866 he established the firm of C. W. Snow & Co., which was continued by the consolidation of this firm with Walker-Gibson

Co., of Albany, and Gibson Drug Company, of Rochester, in the corporation of Gibson-Snow Drug Company, in 1916.

Mr. Snow was financially and officially interested in several banking institutions and other business organizations and identified with many charitable institutions and civic organizations. He was a 33° Mason; for many years a trustee of May Memorial Church, and a director of the Board of Associated Churches and Charities. He is survived by his widow, a daughter, Mrs. Irving S. Merrell, and a son, Nelson P. Snow.

Mr. Snow joined the American Pharmaceutical Association in 1876.

CHARLES FULLER.

Charles Fuller, vice-president of Fuller-Morrison Company, Chicago, died suddenly, of angina pectoris, while on a visit to the home of his father, Honorary President A. Ph. A., Oliver F. Fuller, who had just returned from a visit to New York. Charles Fuller was born in Peekskill, N. Y., August 12, 1868, where he was educated. After graduation from Peekskill Military Academy he went to El Paso, Texas, where he was engaged in the drug business for several years. Thereafter he returned to Chicago and has since been continuously associated in business with his father. Mr. Fuller married Miss Mary Antoinette Hait, of Peekskill, in 1892, who with two sons survive the deceased. Charles Fuller was a member of the American Pharmaceutical Association, of a number of civic and social organizations, among the latter the Chicago Veteran Druggists' Association, of which his aged father is honorary president.

A grandson of Honorary President Oliver F. Fuller, son of Frank F. Fuller, a Lieutenant in the U. S. Aviation Service, in France, was reported among the missing, September 29. We are indebted for these data to Fra. Wilhelm Bodemann, and express the sympathy of the Association to our honored member and family in these bereavements.

LIEUTENANT COLONEL E. F. HARRISON.

Many of our members may not have recognized in the announcement of his death, November 6, by Associated Press, that Lieut. Col. E. F. Harrison, head of the British Chemical Warfare Department, was the distinguished English pharmacist. He joined the British Army as a private in May 1915, and immediately became connected with the chemistry research bureau. He developed the protective apparatus against gas attacks and the whole organization has lately been in his hands. In this work he displayed brilliant resourcefulness. His death, doubtless, was hastened by his devotion to the work he was engaged in. The Council of the British Pharmaceutical Society passed the following resolution, which speaks of some of his activities as pharmacist:

"That this Council receives with profound sorrow the intelligence of the death of Lieut. Colonel E. F. Harrison, F.I.C., C.M.G., one of the most distinguished graduates of the School of Pharmacy, and a brilliant and consistent leader and worker in pharmaceutical and chemical science. As Bell Scholar, prizeman, demonstrator, investigator, examiner, teacher and adviser his career in pharmacy has been characterized by singular and unvarying excellence, and his services to his chosen profession will rank high in the records of pharmaceutical history. The council recalls with pride the immense value of Lieut. Colonel Harrison's knowledge, experience, and organizing ability to the nation at the crisis of its fate, and with mournful satisfaction records the recognition by His Majesty of those ungrudging and invaluable contributions to the defense of the realm. With the passing of this notable pharmacist the Pharmaceutical Society loses a loyal and able leader, his colleagues an honored associate and his friends a staunch and beloved personality."

LIEUTENANT CARL H. HEEBNER.

Aviator Carl H. Heebner, son of Prof. C. F. Heebner, dean of Ontario College of Phar-

macy, and member of the American Pharmaceutical Association, was killed in action and while engaged in battle. Lieutenant Heebner had been shot down three times before the final engagement, but managed on each of these occasions to make his way back to the lines. He was about to be gazetted as captain when he met his untimely end.

HENRY WILSON PEGG.

We have been advised by member John Lohmann, of Kingston, Pa., of the death of Henry W. Pegg. The deceased had been engaged in the drug business with Mr. Lohmann, and he speaks of him as a faithful, honest, conscientious clerk, who had the esteem and friendship of the patrons of the store. Mr. Pegg attended Scio College and later the Pittsburg College of Pharmacy. He joined the American Pharmaceutical Association in 1908.

CLIFFORD O. MILLER.

Clifford O. Miller, chemist of the Maryland State Board of Health, died at his home in Baltimore, October 31, of pneumonia following influenza. The deceased was born in Portsmouth, Ohio, in 1890. He came to Baltimore in 1907 to attend the Maryland College of Pharmacy, from which institution he graduated with high honors, receiving three of the four medals awarded by the college that year.

Dr. Miller became connected with the Maryland State Board of Health in 1913, and had been elected to the faculty of the Maryland College of Pharmacy last summer. He was a member of the Masonic bodies, both in the York and Scottish Rite.

He is survived by his widow, parents and one sister. The deceased joined the American Pharmaceutical Association in 1912.

LOUIS EMANUEL, JR.

Louis Emanuel, Jr., son of Louis Emanuel, member of the American Pharmaceutical Association, died November 4 of pneumonia. The father and mother are frequent attendants of the A. Ph. A. meetings and the former has held membership since 1878.

The deceased was 32 years of age, and was engaged in the drug business at Pittsburg, Pa. He is survived by his parents, wife and a daughter.

The strenuous work and constant attention to serve others during the recent influenza epidemic, exacted a further sacrifice, by death, of many devoted pharmacists.
