

CITING CHEMICAL ABSTRACTS

In 1967, *Chemical Abstracts* began a new system which assigns a number to each abstract and a number to each page, instead of assigning a number to each column and a letter to each subdivision of the column as had been done in the past. Some confusion has arisen about the proper manner of citing a reference to an abstract which appears in a volume carrying the new numbering system. In the interest of clarifying the situation for our authors and readers, and of providing the greatest possible reference value, the *Journal of Pharmaceutical Sciences* has adopted a policy which permits the use of volume number, column number, column subdivision letter, and year for all *Chem. Abstr.* volumes through 1966, but beginning with the 1967 volume of *Chem. Abstr.*, the volume number, abstract number, and year should be cited. This revision in *Journal* policy will affect references to *Chemical Abstracts* only, and is supplemental to the information concerning references in the "Notice to Authors."

Errata

In the article titled "Fenfluramine Metabolism" (1), the following corrections should be made:

The structures of fenfluramine and its deethylated derivatives on page 1173 should be as follows:

Fenfluramine (7%)

Deethylated Fenfluramine (3%)

In the article titled "Peyote Alkaloids II. Anhalotine, Lophotine, and Peyotine, the Quaternary Alkaloids of *Lophophora williamsii*" (1), the following corrections should be made:

1. On page 256, column 2, 5.95 (O—CH₂—O— - - -7,8) should read 5.95, 5.88 (O—CH₂—O— - - -7,8).

2. On page 257, column 1 under *Anal.*, N, 5.5 should read N, 5.15.

3. On page 257, column 1 after "Specific rotation," $[\alpha]_{589}^{26} = -62^\circ$; $[\alpha]_{436}^{26} = -111^\circ$; $[\alpha]_{350}^{26} = -187^\circ$ (*c* = 0.78, CHCl₃) should read $[\alpha]_{589}^{25} = -45^\circ$; $[\alpha]_{436}^{25} = -83.7^\circ$ (*c* = 0.82, CHCl₃).
