

Micromethods for the Clinical and Biochemical Laboratory. By HERMANN MATTENHEIMER. Ann Arbor Science Publishers, Inc., P. O. Box 1425, Ann Arbor, MI 48106, 1970. xii + 232 pp. 15.5 × 24 cm. Price \$18.75.

The advantages of using microliter techniques—less time consumed, less money spent, and less space required—have produced increased interest in this area of analysis. This book brings together for biochemists and clinical chemists current information, techniques, and instrumentation available and in use. The book covers chemical and enzymatic methods used in a modern clinical laboratory. Included is a chapter on the determination of enzymes with ultramicromethods.
