

Announcement

Eight Annual Frederick Conference on Capillary
Electrophoresis

Frederick, MD, USA,
20–22 October 1997

This conference will be held at Hood College in Frederick, MD. The format will include oral and poster presentations, invited speakers will provide an expert overview of the basic aspects and applications of CE, CEC, IEF, CGE, ITP, and MECC including instrument and column design, detection, optimization, and factors that influence mobility, selectivity, resolution, and the application of CE in the separation of small ions as well as large biomolecules with emphasis on clinical, pharmaceutical and biomedical applications. Investigators interested in presenting their work should send a 200 word abstract (accepted as 20-minute talks or poster displays) by Friday, 18 July 1997. Abstracts received after 18 July will be considered for a poster presentation. A one day CE course will be held on 19 October 1997.
