Aims and Scope

This journal is an international medium for the publication of original research reports and authoritative reviews on pharmaceutical and biomedical analysis, serving the needs of academic, clinical, government and industrial analysts. It presents a unique forum for the discussion of current developments at the interface between pharmaceutical, biochemical and clinical analysis. Full-length Research Papers and Short Communications should describe original and unpublished work. Reviews may vary from short accounts of specialized fields to major reports on important areas. Analytical Surveys are short treatments of a topical subject relevant to the fields of pharmaceutical and biomedical analysis.

The journal covers the interdisciplinary aspects of analysis in the pharmaceutical and biomedical sciences, including relevant developments in analytical methodology, instrumentation, computation and interpretation. Applications may be focused on individual drugs or groups of drugs, on drug stability studies, pharmacokinetics, therapeutic monitoring, metabolic profiling on drug-related aspects of analytical biochemistry and forensic toxicology; and on quality assurance and drug-related environmental impact and other topics on health and safety in the pharmaceutical industry.

Publication information: *Journal of Pharmaceutical and Biomedical Analysis* (ISSN 0731-7085). For 2003 volumes 30, 31 and 32 are scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website (<http://www.elsevier.com/locate/jpba>).
