

T. M. SHARP

## DISCUSSION

The paper was presented by DR. E. I. SHORT.

MR. A. F. CALDWELL (Singapore) said that as mercury diuretics were frequently used in cases involving kidney damage it would be of great value if the risk of further harm to the kidney could be reduced without affecting the diuretic effect.

---

## VOTE OF THANKS

The Chairman's proposition that a hearty vote of thanks be accorded to all the authors of the papers was carried with acclamation, as was a vote of thanks to the Editor of the *Journal of Pharmacy and Pharmacology* for advance proofs of the papers.
