

C-V (Carbon-Vanadium)

H. Okamoto

The V-C phase diagram in [Massalski2] was updated by [1991Oka] based on the thermodynamic assessment reported by [1991Hua]. This system was assessed by [1991Lee] also. Since then, new experimental phase boundary data were reported by [1998Wie] and [1999Lip].

[2006Hu] re-assessed the V-C system based on these new data as well as the old experimental data published before 1991. The result is shown in Fig. 1.

V-C crystal structure data are given in Table 1.
