Journal of Photochemistry and Photobiology A: Chemistry 117 (1998) 241–244

Journal of
Photochemistry
and
Photobiology
A: Chemistry

Subject Index of Volume 117

Adducts

Caffeine interaction with synthetic flavylum salts. A flash photolysis study for the adduct involving 4',7-dihydroxyflavylium, 51

Asymmetric cyanines

Influence of ion pair formation on the photochemistry of asymmetric cationic indobenzimidazolo cyanines, 35

Band-gap energy

On apparent contradictions in some photophysical properties of liquid water, 171

Benzyl ester derivatives

Steric effect on photochemistry of benzyl ester derivatives. 1. Photolysis of 1-(naphthyl)ethyl alkanoates in methanol, 91

Borate salts

Photochemistry and photophysics of novel photoinitiators: *N,N,N*-tributyl-*N*-(4-methylene-7-methoxycoumarine) ammonium borates, 67

t-butylhydroquinone

Relay of positive holes from photoirradiated Pt-loaded TiO₂ particles in an aqueous phase to *t*-butylhydroquinone in an oil phase, 143

Caffeine

Caffeine interaction with synthetic flavylum salts. A flash photolysis study for the adduct involving 4',7-dihydroxyflavylium, 51

Calcium

Magnesium and calcium chelation by a bis-spiropyran, 193

Catalytic oxidation

The photolysis of CF₃COCl in the presence of O₂ and CO: catalytic oxidation of CO to CO₂ and the formation of polyoxygenated intermediates, 163

Charge transfer

Nucleotides enhance the fluorescence of *trans*-4-(*p*-*N,N*-dimethylamino-*N*-vinylbenzylpyridinium chloride, 199

Chelation

Magnesium and calcium chelation by a bis-spiropyran, 193

Chemosensor

Nucleotides enhance the fluorescence of *trans*-4-(*p*-*N,N*-dimethylamino-*N*-vinylbenzylpyridinium chloride, 199

Coumarin

Photochemistry and photophysics of novel photoinitiators: *N,N,N*-tributyl-*N*-(4-methylene-7-methoxycoumarine) ammonium borates, 67

Cr(VI) photoreduction

Cr(VI) photoreduction catalysed by ion-exchangeable layered compounds, 105

Cyclodextrins

Photoinduced self-assembly of the supramolecular photochromic systems – photoinduced dimer formation of the inclusion complexes of an indolinispiropyran with CDs, 129

Dichalcogenides

Generation of electrophilic phenyltellurium and phenylselenium species via photochemical electron transfer, 99

Elsevier Science S.A.

4',7-Dihydroxyflavylium

Caffeine interaction with synthetic flavylum salts. A flash photolysis study for the adduct involving 4',7-dihydroxyflavylium, 51

Dimethylaminostyrylpyridinium dye

Nucleotides enhance the fluorescence of *trans*-4-(*p*-*N,N*-dimethylamino-*N*-vinylbenzylpyridinium chloride, 199

Dimethylsubstituted phenols

Investigations on the nature of non-radiative transitions from excited singlet and triplet states of dimethyl substituted phenols in the presence of acceptor 2-nitrofluorene at 77 K, 83

Dye-sensitized solid-state photovoltaic cells

Sensitization of nano-porous films of TiO₂ with santalin (red sandalwood pigment) and construction of dye-sensitized solid-state photovoltaic cells, 137

Electron transfer

Photoinduced electron transfer from indolic compounds to 1-pyrene-methanol in polystyrene latex dispersions, 111

Surface catalyzed electron transfer from polycyclic aromatic hydrocarbons (PAH) to methyl viologen dication: evidence for ground-state charge transfer complex formation on silica gel, 223

Electronic delocalization

Photophysical properties of Re(CO)₃L₃⁺ (L=monoazine) complexes. Electronic delocalization effect in metal-to-ligand charge transfer excited states, 185

Endoperoxides

Photochemistry of some 2,5-substituted tropone mesogens, 43

EPR spectroscopy

Photochemical reduction of water-soluble fullerene C₆₀(C₄H₁₀N⁺) in titanium dioxide suspensions (EPR-study): a comparison with radiolytically-induced reduction, 61

Europium ion

Time-resolved fluorescence spectroscopy of fulvic acid and fulvic acid complexed with Eu³⁺ – a comparative study, 175

Fast bimolecular processes

The kinetics of fast fluorescence quenching processes, 1

Fluorescence enhancement

Nucleotides enhance the fluorescence of *trans*-4-(*p*-*N,N*-dimethylamino-*N*-vinylbenzylpyridinium chloride, 199

Fluorescence quenching

The kinetics of fast fluorescence quenching processes, 1

Fluorescence

Excited-state intramolecular proton transfer (ESIPT) in 2-(2'-hydroxyphenyl)pyridine and some carbon-bridged derivatives, 209

Fluorescence probe properties of *N*-octadecamido compounds of tryptophan, 119

Influence of ion pair formation on the photochemistry of asymmetric cationic indobenzimidazolo cyanines, 35

Magnesium and calcium chelation by a bis-spiropyran, 193

Photoinduced electron transfer from indolic compounds to 1-pyrene-methanol in polystyrene latex dispersions, 111

- Fulvic acid
Time-resolved fluorescence spectroscopy of fulvic acid and fulvic acid complexed with Eu^{3+} – a comparative study, 175
- Hammett relationship
Substituent effect on superoxide elimination from peroxy radicals of adenine and methylated derivatives, 217
- Hydrogen bonding
Photochemistry and photophysics of novel photoinitiators: *N,N,N*-tributyl-*N*-(4-methylene-7-methoxycoumarine) ammonium borates, 67
- Hydrogen
Relay of positive holes from photoirradiated Pt-loaded TiO_2 particles in an aqueous phase to *t*-butylhydroquinone in an oil phase, 143
- α -Hydroxymethylbenzoin
Photoinitiators and photoinitiation, Part 14. *N*-substituted sulphamic esters of α -hydroxymethylbenzoin and α -hydroxymethylbenzoin ethers as multifunctional photo-initiators, 235
- α -Hydroxymethylbenzoin ethers
Photoinitiators and photoinitiation, Part 14. *N*-substituted sulphamic esters of α -hydroxymethylbenzoin and α -hydroxymethylbenzoin ethers as multifunctional photo-initiators, 235
- Ion pairs
Influence of ion pair formation on the photochemistry of asymmetric cationic indobenzimidazo cyanines, 35
- Ion-exchangeable
Cr(VI) photoreduction catalysed by ion-exchangeable layered compounds, 105
- Ketocoumarins
Photogeneration of reactive oxygen species from ketocoumarins, 21
- Kinetics
Magnesium and calcium chelation by a bis-spiropyran, 193
- Laser flash photolysis
Photochemistry and photophysics of novel photoinitiators: *N,N,N*-tributyl-*N*-(4-methylene-7-methoxycoumarine) ammonium borates, 67
- Layered compounds
Cr(VI) photoreduction catalysed by ion-exchangeable layered compounds, 105
- Liquid crystals
Photochemistry of some 2,5-substituted tropone mesogens, 43
- Liquid/liquid interface
Heterogeneous electron transfer reactions at liquid/liquid interfaces studied by time-resolved absorption spectroscopy, 27
- Low temperature measurements
Pulse radiolysis study on transient species produced in polydimethylsiloxane, 153
- Magnesium
Magnesium and calcium chelation by a bis-spiropyran, 193
- Metal-to-ligand charge transfer (MLCT)
Photophysical properties of $\text{Re}(\text{CO})_3\text{L}_3^+$ (*L*=monoazine) complexes. Electronic delocalization effect in metal-to-ligand charge transfer excited states, 185
- Methyl viologen dication
Surface catalyzed electron transfer from polycyclic aromatic hydrocarbons (PAH) to methyl viologen dication: evidence for ground-state charge transfer complex formation on silica gel, 223
- N*-Substituted sulphamic esters
Photoinitiators and photoinitiation, Part 14. *N*-substituted sulphamic esters of α -hydroxymethylbenzoin and α -hydroxymethylbenzoin ethers as multifunctional photo-initiators, 235
- Nano-porous film of TiO_2
Sensitization of nano-porous films of TiO_2 with santalin (red sandalwood pigment) and construction of dye-sensitized solid-state photovoltaic cells, 137
- Nanometer particle
Preparation and photoconductivity study of TiOPc nanometer particles, 149
- Naphthylmethyl
Steric effect on photochemistry of benzyl ester derivatives. 1. Photolysis of 1-(naphthyl)ethyl alkanoates in methanol, 91
- 2-Nitrofluorene
Investigations on the nature of non-radiative transitions from excited singlet and triplet states of dimethyl substituted phenols in the presence of acceptor 2-nitrofluorene at 77 K, 83
- Non-radiative transitions
Investigations on the nature of non-radiative transitions from excited singlet and triplet states of dimethyl substituted phenols in the presence of acceptor 2-nitrofluorene at 77 K, 83
- Nucleotides
Nucleotides enhance the fluorescence of *trans*-4-(*p*-*N,N*-dimethylaminostyryl)-*N*-vinylbenzylpyridinium chloride, 199
- N*-Octadecamidotryptophan
Fluorescence probe properties of *N*-octadecamido compounds of tryptophan, 119
- Optical absorption limit
On apparent contradictions in some photophysical properties of liquid water, 171
- Oxotitanium phthalocyanine
Preparation and photoconductivity study of TiOPc nanometer particles, 149
- Oxygen addition
Photochemistry of some 2,5-substituted tropone mesogens, 43
- Peroxy radicals
Substituent effect on superoxide elimination from peroxy radicals of adenine and methylated derivatives, 217
- Phenoxy and alkyl radicals
Coupling of phenoxy and alkyl radicals derived from the photolysis of phenol/ketone pairs: an intermolecular approach to the photo-Claisen rearrangement, 17
- Photo-Claisen rearrangement
Coupling of phenoxy and alkyl radicals derived from the photolysis of phenol/ketone pairs: an intermolecular approach to the photo-Claisen rearrangement, 17
- Photocatalyst
Relay of positive holes from photoirradiated Pt-loaded TiO_2 particles in an aqueous phase to *t*-butylhydroquinone in an oil phase, 143
- Photochemical electron transfer
Generation of electrophilic phenyltellurium and phenylselenium species via photochemical electron transfer, 99
- Photochemical energy conversion
Relay of positive holes from photoirradiated Pt-loaded TiO_2 particles in an aqueous phase to *t*-butylhydroquinone in an oil phase, 143
- Photochromic spiropyran
Photoinduced self-assembly of the supramolecular photochromic systems – photoinduced dimer formation of the inclusion complexes of an indolinospiropyran with CDs, 129
- Photoconductivity
Preparation and photoconductivity study of TiOPc nanometer particles, 149
- Photodecomposition
Photoinitiators and photoinitiation, Part 14. *N*-substituted sulphamic esters of α -hydroxymethylbenzoin and α -hydroxymethylbenzoin ethers as multifunctional photo-initiators, 235

- Photoinduced electron transfer
 Heterogeneous electron transfer reactions at liquid/liquid interfaces studied by time-resolved absorption spectroscopy, 27
 Photochemical reduction of water-soluble fullerene $C_{60}(C_4H_{10}N^+)$ in titanium dioxide suspensions (EPR-study): a comparison with radiolytically-induced reduction, 61
 Photochemistry and photophysics of novel photoinitiators: *N,N,N*-tributyl-*N*-(4-methylene-7-methoxycoumarine) ammonium borates, 67
- Photoinduced self-assembly
 Photoinduced self-assembly of the supramolecular photochromic systems – photoinduced dimer formation of the inclusion complexes of an indolinospiropyran with CDs, 129
- Photoinitiators
 Photochemistry and photophysics of novel photoinitiators: *N,N,N*-tributyl-*N*-(4-methylene-7-methoxycoumarine) ammonium borates, 67
- Photoionization threshold
 On apparent contradictions in some photophysical properties of liquid water, 171
- Photoisomerization
 Influence of ion pair formation on the photochemistry of asymmetric cationic indobenzimidazolo cyanines, 35
- Photolysis
 Coupling of phenoxy and alkyl radicals derived from the photolysis of phenol/ketone pairs: an intermolecular approach to the photo-Claisen rearrangement, 17
 Steric effect on photochemistry of benzyl ester derivatives. 1. Photolysis of 1-(naphthyl)ethyl alkanooates in methanol, 91
 The photolysis of CF_3COCl in the presence of O_2 and CO : catalytic oxidation of CO to CO_2 and the formation of polyoxygenated intermediates, 163
- Photooxygenation
 Photochemistry of some 2,5-substituted tropone mesogens, 43
- Photophysical properties
 Photophysical properties of $Re(CO)_3L_3^+$ (L =monoazine) complexes. Electronic delocalization effect in metal-to-ligand charge transfer excited states, 185
- Polycyclic aromatic hydrocarbons
 Surface catalyzed electron transfer from polycyclic aromatic hydrocarbons (PAH) to methyl viologen dication: evidence for ground-state charge transfer complex formation on silica gel, 223
- Polydimethylsiloxane
 Pulse radiolysis study on transient species produced in polydimethylsiloxane, 153
- Polyoxygenated intermediates
 The photolysis of CF_3COCl in the presence of O_2 and CO : catalytic oxidation of CO to CO_2 and the formation of polyoxygenated intermediates, 163
- Polystyrene latex
 Photoinduced electron transfer from indolic compounds to 1-pyrene-methanol in polystyrene latex dispersions, 111
- Proton transfer
 Excited-state intramolecular proton transfer (ESIPT) in 2-(2'-hydroxy-phenyl)pyridine and some carbon-bridged derivatives, 209
- Pulse radiolysis
 Pulse radiolysis study on transient species produced in polydimethylsiloxane, 153
- Pyrene excited states
 Pulse radiolysis study on transient species produced in polydimethylsiloxane, 153
- Pyrene ion recombination
 Pulse radiolysis study on transient species produced in polydimethylsiloxane, 153
- Pyrene radical ions
 Pulse radiolysis study on transient species produced in polydimethylsiloxane, 153
- Pyrene
 Pulse radiolysis study on transient species produced in polydimethylsiloxane, 153
- 1-Pyrenemethanol
 Photoinduced electron transfer from indolic compounds to 1-pyrene-methanol in polystyrene latex dispersions, 111
- Radical intermediates
 Photochemistry and photophysics of novel photoinitiators: *N,N,N*-tributyl-*N*-(4-methylene-7-methoxycoumarine) ammonium borates, 67
- γ -Radiolysis
 Photochemical reduction of water-soluble fullerene $C_{60}(C_4H_{10}N^+)$ in titanium dioxide suspensions (EPR-study): a comparison with radiolytically-induced reduction, 61
- Reactive oxygen species
 Photogeneration of reactive oxygen species from ketocoumarins, 21
- Santalín
 Sensitization of nano-porous films of TiO_2 with santalín (red sandalwood pigment) and construction of dye-sensitized solid-state photovoltaic cells, 137
- Semi-empirical calculations
 Excited-state intramolecular proton transfer (ESIPT) in 2-(2'-hydroxy-phenyl)pyridine and some carbon-bridged derivatives, 209
- Single-layer photoreceptor
 Preparation and photoconductivity study of $TiOPc$ nanometer particles, 149
- Singlet oxygen
 Photogeneration of reactive oxygen species from ketocoumarins, 21
- Smoluchowski–Collins–Kimball model
 The kinetics of fast fluorescence quenching processes, 1
- Solvatochromism
 Nucleotides enhance the fluorescence of *trans*-4-(*p*-*N,N*-dimethylaminostyryl)-*N*-vinylbenzylpyridinium chloride, 199
- Spin trapping
 Photochemical reduction of water-soluble fullerene $C_{60}(C_4H_{10}N^+)$ in titanium dioxide suspensions (EPR-study): a comparison with radiolytically-induced reduction, 61
- Spiropyran
 Magnesium and calcium chelation by a bis-spiropyran, 193
- Superoxide anion radical
 Photogeneration of reactive oxygen species from ketocoumarins, 21
- Superoxide elimination
 Substituent effect on superoxide elimination from peroxy radicals of adenine and methylated derivatives, 217
- Thermal back isomerization
 Influence of ion pair formation on the photochemistry of asymmetric cationic indobenzimidazolo cyanines, 35
- Thermal cyclization reaction
 Generation of electrophilic phenyltellurium and phenylselenium species via photochemical electron transfer, 99
- Time-resolved fluorescence
 Time-resolved fluorescence spectroscopy of fulvic acid and fulvic acid complexed with Eu^{3+} – a comparative study, 175
- TIR transient absorption
 Heterogeneous electron transfer reactions at liquid/liquid interfaces studied by time-resolved absorption spectroscopy, 27
- Titanium dioxide
 Photochemical reduction of water-soluble fullerene $C_{60}(C_4H_{10}N^+)$ in titanium dioxide suspensions (EPR-study): a comparison with radiolytically-induced reduction, 61
- Titanium dioxide
 Relay of positive holes from photoirradiated Pt-loaded TiO_2 particles in an aqueous phase to *t*-butylhydroquinone in an oil phase, 143

Tropon derivatives

Photochemistry of some 2,5-substituted tropon mesogens, 43

Tryptamine

Photoinduced electron transfer from indolic compounds to 1-pyrene-methanol in polystyrene latex dispersions, 111

Tryptophan

Fluorescence probe properties of *N*-octadecamido compounds of tryptophan, 119

Photoinduced electron transfer from indolic compounds to 1-pyrene-methanol in polystyrene latex dispersions, 111

Water-soluble fullerenes

Photochemical reduction of water-soluble fullerene $C_{60}(C_4H_{10}N^+)$ in titanium dioxide suspensions (EPR-study): a comparison with radiolytically-induced reduction, 61

Water/oil boundary

Relay of positive holes from photoirradiated Pt-loaded TiO_2 particles in an aqueous phase to *t*-butylhydroquinone in an oil phase, 143
