Journal of Photochemistry and Photobiology A: Chemistry 118 (1998) 213–215

Journal of  
Photochemistry  
and  
Photobiology  
A: Chemistry

## Subject Index of Volume 118

### Absorption

Adiabatic structural relaxation in heterocyclic nitrogen-containing cations. The structure, absorption and fluorescence of the 2,4,6-triarylsubstituted pyridinium cations, 151

### Acetazolamide

Photolysis and photosensitized degradation of the diuretic drug acetazolamide, 19

### Adiabatic structural relaxation

Adiabatic structural relaxation in heterocyclic nitrogen-containing cations. The structure, absorption and fluorescence of the 2,4,6-triarylsubstituted pyridinium cations, 151

### Adsorbed hydrocarbons

The excimer emission of aromatic hydrocarbons on clays, 205

### Alkylation

Benzophenone-photosensitized alkylation of arylalkenes with acetone, dimethyl sulfoxide, and their related compounds in the presence of *tert*-butylamine, 165

### Amino acid

Towards a better understanding of the initial steps in the photocatalyzed mineralization of amino acids at the titania/water interface. An experimental and theoretical examination of L-alanine, L-serine and L-phenylalanine, 123

### Benzene

Benzene and toluene gas-phase photocatalytic degradation over H<sub>2</sub>O and HCL pretreated TiO<sub>2</sub>: by-products and mechanisms, 197

### Benzophenone-photosensitization

Benzophenone-photosensitized alkylation of arylalkenes with acetone, dimethyl sulfoxide, and their related compounds in the presence of *tert*-butylamine, 165

### 2,2'-Bipyridyl-3,3'-diol

Global analysis of time-resolved emission – a powerful tool for the analytical discrimination of chemically similar Zn<sup>II</sup> and Cd<sup>II</sup> complexes, 143

### Bubble column reactor

The photo-oxidative degradation of sodium dodecyl sulphate in aerated aqueous TiO<sub>2</sub> suspension, 111

### Capped CdS

Nanosecond laser flash photolysis of thioglycerol-capped cadmium sulfide particles, 131

### Cd<sup>II</sup>

Global analysis of time-resolved emission – a powerful tool for the analytical discrimination of chemically similar Zn<sup>II</sup> and Cd<sup>II</sup> complexes, 143

### 4-Chlorophenol

Photomineralisation of 4-chlorophenol sensitised by TiO<sub>2</sub> thin films, 53

### Clay interactions

The excimer emission of aromatic hydrocarbons on clays, 205

### Cyclohexane

Evidence for nonemissive exciplexes in the singlet quenching of polycyclic aromatic hydrocarbons by polychlorobenzenes in cyclohexane, 157

### Cytochromes

Modelling intramolecular electron transfer reactions in cytochromes and in photosynthetic bacteria reaction centres, 173

### Decomposition

Continuous-flow photoreactor packed with titanium dioxide immobilized on large silica gel beads to decompose oxalic acid in excess water, 65

### Diuretic drug

Photolysis and photosensitized degradation of the diuretic drug acetazolamide, 19

### DMMP

Photocatalytic decomposition of DMMP on titania, 45

### Electron transfer reactions

Modelling intramolecular electron transfer reactions in cytochromes and in photosynthetic bacteria reaction centres, 173

### Electron transfer

Design of a new molecular fluorescent signalling system acting via both electron and energy transfer, 7

### Electrostatic potential of polar solvents

Evidence of the specific solvation of selected fluorescent dyes with methoxy group and its analogues derivatives of the 7H-indolo[1,2-a]quinolinium system, 81

### Energy transfer

Design of a new molecular fluorescent signalling system acting via both electron and energy transfer, 7

### Erythrosin B

Effects of oxygen and temperature on phosphorescence and delayed fluorescence of erythrosin B trapped in sol-gel silica, 25

### Excimer emission

The excimer emission of aromatic hydrocarbons on clays, 205

### Excited state H-bond transfer

Induced fluorescence of phenylpyridines by hydrogen bonding complexation, 1

### Flavonoids

Tautomerism of flavonol glucosides: relevance to plant UV protection and flower colour, 99

### Flower colour

Tautomerism of flavonol glucosides: relevance to plant UV protection and flower colour, 99

### Fluorescence chemosensor

Design of a new molecular fluorescent signalling system acting via both electron and energy transfer, 7

### Fluorescence quantum yield

Evidence of the specific solvation of selected fluorescent dyes with methoxy group and its analogues derivatives of the 7H-indolo[1,2-a]quinolinium system, 81

### Fluorescence

Global analysis of time-resolved emission – a powerful tool for the analytical discrimination of chemically similar Zn<sup>II</sup> and Cd<sup>II</sup> complexes, 143

### Formic acid

Photodissociation dynamics of formic acid at 193 nm, 71

- Frontier electron density  
Towards a better understanding of the initial steps in the photocatalyzed mineralization of amino acids at the titania/water interface. An experimental and theoretical examination of L-alanine, L-serine and L-phenylalanine, 123
- Hydrated electrons  
Nanosecond laser flash photolysis of thioglycerol-capped cadmium sulfide particles, 131
- Hydrogen abstraction  
Benzophenone-photosensitized alkylation of arylalkenes with acetone, dimethyl sulfoxide, and their related compounds in the presence of *tert*-butylamine, 165
- $\alpha$ -Hydroxymethylbenzoin (meth) acrylate  
The application of some polymeric type-I photoinitiators based on  $\alpha$ -hydroxymethylbenzoin and  $\alpha$ -hydroxymethylbenzoin methyl ether, 183
- Hypocrellin derivatives  
Photovoltaic and electrical properties of Langmuir–Blodgett films incorporating hypocrellins derivatives, 189
- Intersecting-state model  
Modelling intramolecular electron transfer reactions in cytochromes and in photosynthetic bacteria reaction centres, 173
- Ionic derivatives  
Spectral characteristics of probes based on ionic derivatives of pyrene in polar polymer matrices, 137
- Laser flash photolysis  
Mechanism of alkyl phenylglyoxylates photoreaction in the presence of oxygen, 75
- LB films  
Photovoltaic and electrical properties of Langmuir–Blodgett films incorporating hypocrellins derivatives, 189
- Lignins  
Singlet oxygen degradation of lignin in the pulp, 107
- Local dielectric constant  
Evidence of the specific solvation of selected fluorescent dyes with methoxy group and its analogues derivatives of the 7H-indolo[1,2-a]quinolinium system, 81
- p*-Methoxycinnamic acid  
The effect of molecular environment on the photochemistry of *p*-methoxycinnamic acid and its esters, 93
- Molecular environment  
The effect of molecular environment on the photochemistry of *p*-methoxycinnamic acid and its esters, 93
- Nanosecond spectroscopy  
Nanosecond laser flash photolysis of thioglycerol-capped cadmium sulfide particles, 131
- Nerve gas  
Photocatalytic decomposition of DMMP on titania, 45
- Organophosphorus  
Photocatalytic decomposition of DMMP on titania, 45
- Oxalic acid  
Continuous-flow photoreactor packed with titanium dioxide immobilized on large silica gel beads to decompose oxalic acid in excess water, 65
- Oxygen  
Effects of oxygen and temperature on phosphorescence and delayed fluorescence of erythrosin B trapped in sol–gel silica, 25  
Mechanism of alkyl phenylglyoxylates photoreaction in the presence of oxygen, 75  
Photocatalytic oxidation of water on TiO<sub>2</sub>-coated WO<sub>3</sub> particles by visible light using Iron(III) ions as electron acceptor, 41
- pH dependent fluorescence  
Induced fluorescence of phenylpyridines by hydrogen bonding complexation, 1
- Phenylglyoxylates  
Mechanism of alkyl phenylglyoxylates photoreaction in the presence of oxygen, 75
- Phenylpyridines  
Induced fluorescence of phenylpyridines by hydrogen bonding complexation, 1
- Phosphorescence  
Effects of oxygen and temperature on phosphorescence and delayed fluorescence of erythrosin B trapped in sol–gel silica, 25
- Photo-oxidation  
Photocatalytic decomposition of DMMP on titania, 45
- Photocatalysis  
Continuous-flow photoreactor packed with titanium dioxide immobilized on large silica gel beads to decompose oxalic acid in excess water, 65  
Photocatalytic decomposition of DMMP on titania, 45
- Photocatalytic oxidations  
Benzene and toluene gas-phase photocatalytic degradation over H<sub>2</sub>O and HCL pretreated TiO<sub>2</sub>: by-products and mechanisms, 197
- Photochemical energy conversion  
Photocatalytic oxidation of water on TiO<sub>2</sub>-coated WO<sub>3</sub> particles by visible light using Iron(III) ions as electron acceptor, 41
- Photochemical fixation  
Factors affecting the photoelectrochemical fixation of carbon dioxide with semiconductor colloids, 31
- Photodegradation  
Photolysis and photosensitized degradation of the diuretic drug acetazolamide, 19  
The photo-oxidative degradation of sodium dodecyl sulphate in aerated aqueous TiO<sub>2</sub> suspension, 111  
Towards a better understanding of the initial steps in the photocatalyzed mineralization of amino acids at the titania/water interface. An experimental and theoretical examination of L-alanine, L-serine and L-phenylalanine, 123
- Photodissociation dynamics  
Photodissociation dynamics of formic acid at 193 nm, 71
- Photoelectric effect  
Photovoltaic and electrical properties of Langmuir–Blodgett films incorporating hypocrellins derivatives, 189
- Photomineralisation  
Photomineralisation of 4-chlorophenol sensitised by TiO<sub>2</sub> thin films, 53
- Photooxidation  
Photolysis and photosensitized degradation of the diuretic drug acetazolamide, 19  
Towards a better understanding of the initial steps in the photocatalyzed mineralization of amino acids at the titania/water interface. An experimental and theoretical examination of L-alanine, L-serine and L-phenylalanine, 123
- Photosynthetic reaction centres  
Modelling intramolecular electron transfer reactions in cytochromes and in photosynthetic bacteria reaction centres, 173
- Point charge  
Towards a better understanding of the initial steps in the photocatalyzed mineralization of amino acids at the titania/water interface. An experimental and theoretical examination of L-alanine, L-serine and L-phenylalanine, 123
- Polychlorobenzenes  
Evidence for nonemissive exciplexes in the singlet quenching of polycyclic aromatic hydrocarbons by polychlorobenzenes in cyclohexane, 157
- Polycyclic aromatic hydrocarbons  
Evidence for nonemissive exciplexes in the singlet quenching of polycyclic aromatic hydrocarbons by polychlorobenzenes in cyclohexane, 157

- Polymeric type-I photoinitiators  
The application of some polymeric type-I photoinitiators based on  $\alpha$ -hydroxymethylbenzoin and  $\alpha$ -hydroxymethylbenzoin methyl ether, 183
- Porphyrazine  
Spectroelectrochemical and photophysical properties of a (3,4-pyridyl) porphyrazine supermolecule containing four [Ru(bipy)<sub>2</sub>Cl]<sup>+</sup> groups, 11
- Pulps  
Singlet oxygen degradation of lignin in the pulp, 107
- Pyrene  
Spectral characteristics of probes based on ionic derivatives of pyrene in polar polymer matrices, 137
- Q-particles  
Nanosecond laser flash photolysis of thioglycerol-capped cadmium sulfide particles, 131
- 5-(4-R-phenyl)-7,7-dimethyl-7H-indolo[1,2-a]quinolinium salts  
Evidence of the specific solvation of selected fluorescent dyes with methoxy group and its analogues derivatives of the 7H-indolo[1,2-a]quinolinium system, 81
- Semiconductor colloids  
Factors affecting the photoelectrochemical fixation of carbon dioxide with semiconductor colloids, 31
- Silica gel bead  
Continuous-flow photoreactor packed with titanium dioxide immobilized on large silica gel beads to decompose oxalic acid in excess water, 65
- Singlet oxygen degradation  
Singlet oxygen degradation of lignin in the pulp, 107
- Singlet oxygen  
Photolysis and photosensitized degradation of the diuretic drug acetazolamide, 19
- Sodium dodecyl sulphate  
The photo-oxidative degradation of sodium dodecyl sulphate in aerated aqueous TiO<sub>2</sub> suspension, 111
- Sol-gel  
Effects of oxygen and temperature on phosphorescence and delayed fluorescence of erythrosin B trapped in sol-gel silica, 25
- Solvates stability constants  
Evidence of the specific solvation of selected fluorescent dyes with methoxy group and its analogues derivatives of the 7H-indolo[1,2-a]quinolinium system, 81
- Solvent dipolar interaction  
Evidence of the specific solvation of selected fluorescent dyes with methoxy group and its analogues derivatives of the 7H-indolo[1,2-a]quinolinium system, 81
- Spectral characteristics  
Spectral characteristics of probes based on ionic derivatives of pyrene in polar polymer matrices, 137
- Supersensitization  
Photovoltaic and electrical properties of Langmuir-Blodgett films incorporating hypocrellins derivatives, 189
- Supramolecular photochemistry  
Spectroelectrochemical and photophysical properties of a (3,4-pyridyl) porphyrazine supermolecule containing four [Ru(bipy)<sub>2</sub>Cl]<sup>+</sup> groups, 11
- Tautomerism  
Tautomerism of flavonol glucosides: relevance to plant UV protection and flower colour, 99
- Temperature  
Effects of oxygen and temperature on phosphorescence and delayed fluorescence of erythrosin B trapped in sol-gel silica, 25
- Tetramethylammonium ions  
Factors affecting the photoelectrochemical fixation of carbon dioxide with semiconductor colloids, 31
- Time-resolved  
Global analysis of time-resolved emission – a powerful tool for the analytical discrimination of chemically similar Zn<sup>II</sup> and Cd<sup>II</sup> complexes, 143
- TiO<sub>2</sub> thin films  
Photomineralisation of 4-chlorophenol sensitised by TiO<sub>2</sub> thin films, 53  
Benzene and toluene gas-phase photocatalytic degradation over H<sub>2</sub>O and HCL pretreated TiO<sub>2</sub>: by-products and mechanisms, 197
- Titania  
Photocatalytic decomposition of DMMP on titania, 45  
The photo-oxidative degradation of sodium dodecyl sulphate in aerated aqueous TiO<sub>2</sub> suspension, 111
- Titanium dioxide  
Continuous-flow photoreactor packed with titanium dioxide immobilized on large silica gel beads to decompose oxalic acid in excess water, 65  
Photocatalytic oxidation of water on TiO<sub>2</sub>-coated WO<sub>3</sub> particles by visible light using Iron(III) ions as electron acceptor, 41  
Towards a better understanding of the initial steps in the photocatalyzed mineralization of amino acids at the titania/water interface. An experimental and theoretical examination of L-alanine, L-serine and L-phenylalanine, 123
- tert*-Butylamine  
Benzophenone-photosensitized alkylation of arylalkenes with acetone, dimethyl sulfoxide, and their related compounds in the presence of *tert*-butylamine, 165
- 2,4,6-triarylsubstituted pyridinium cations  
Adiabatic structural relaxation in heterocyclic nitrogen-containing cations. The structure, absorption and fluorescence of the 2,4,6-triarylsubstituted pyridinium cations, 151
- Toluene  
Benzene and toluene gas-phase photocatalytic degradation over H<sub>2</sub>O and HCL pretreated TiO<sub>2</sub>: by-products and mechanisms, 197
- Tubular photoreactor  
Continuous-flow photoreactor packed with titanium dioxide immobilized on large silica gel beads to decompose oxalic acid in excess water, 65
- Tungsten trioxide  
Photocatalytic oxidation of water on TiO<sub>2</sub>-coated WO<sub>3</sub> particles by visible light using Iron(III) ions as electron acceptor, 41
- UV protection  
Tautomerism of flavonol glucosides: relevance to plant UV protection and flower colour, 99
- UVB blocking compounds  
The effect of molecular environment on the photochemistry of *p*-methoxycinnamic acid and its esters, 93
- Vector correlations  
Photodissociation dynamics of formic acid at 193 nm, 71
- Vectorial energy transfer  
Spectroelectrochemical and photophysical properties of a (3,4-pyridyl) porphyrazine supermolecule containing four [Ru(bipy)<sub>2</sub>Cl]<sup>+</sup> groups, 11
- Water splitting  
Photocatalytic oxidation of water on TiO<sub>2</sub>-coated WO<sub>3</sub> particles by visible light using Iron(III) ions as electron acceptor, 41
- Weak bonding energy determination  
Evidence of the specific solvation of selected fluorescent dyes with methoxy group and its analogues derivatives of the 7H-indolo[1,2-a]quinolinium system, 81
- Zn<sup>II</sup>  
Global analysis of time-resolved emission – a powerful tool for the analytical discrimination of chemically similar Zn<sup>II</sup> and Cd<sup>II</sup> complexes, 143
