

Subject Index of Volume 130

- Ab initio calculations
Excited-state intramolecular proton transfer (ESIPT) in 2-(2'-hydroxyphenyl)-oxazole and -thiazole, 101
- Addition–fragmentation
Photoinitiation of cationic polymerization by using poly(methyl phenyl silane) in combination with addition–fragmentation agents, 71
- Adsorption effects
(Photo)electrochemical behavior of selected organic compounds on TiO₂ electrodes. Overall relevance to heterogeneous photocatalysis, 145
- Advanced oxidation processes
Photodegradation of the aminoazobenzene acid orange 52 by three advanced oxidation processes: UV/H₂O₂, UV/TiO₂ and VIS/TiO₂. Comparative mechanistic and kinetic investigations, 35
- AgCl nanoparticles
Photochemistry of a cyanine dye in reversed micelles, 139
- 8'-apo-β-caroten-8'-oic acid
Photocurrent generated on a carotenoid-sensitized TiO₂ nanocrystalline mesoporous electrode, 49
- Associates
Initial steps of photosynthetic water splitting by associates of porphyrin, 21
- Azo dye
Photodegradation of the aminoazobenzene acid orange 52 by three advanced oxidation processes: UV/H₂O₂, UV/TiO₂ and VIS/TiO₂. Comparative mechanistic and kinetic investigations, 35
- Bactericidal mode
Bactericidal mode of titanium dioxide photocatalysis, 163
- Benzophenone
Interaction of triplet-excited benzophenone with hindered amines and amino ethers. A laser flash photolysis study employing photoconductivity and light emission measurements, 119
- Blue light excitation.
Initial steps of photosynthetic water splitting by associates of porphyrin, 21
- Cadmium sulfide
Stability of colloidal solutions containing various surface-modified cadmium sulfide particles under stationary illumination, 63
- Capped CdS
Stability of colloidal solutions containing various surface-modified cadmium sulfide particles under stationary illumination, 63
- CdS
Studies on the kinetics of interfacial electron transfer sensitized by colloidal CdS, 57
- Chalcone
Spectrophotometric evidence for the existence of rotamers in solutions of some ketocyanine dyes, 133
- Chemical quenching
A pulse radiolysis and pulsed laser study of the pyromethene 567 triplet state, 127
- Chemiluminescence
Chemiluminescence of systems containing lanthanide ions, 75
- Colloids
Studies on the kinetics of interfacial electron transfer sensitized by colloidal CdS, 57
- Conformers
Spectrophotometric evidence for the existence of rotamers in solutions of some ketocyanine dyes, 133
- Counterions
Influence of redoxinert counterions on photoinduced intermolecular electron transfer rates in dichloromethane, 95
- Cross-linking pathways/mechanism
Photodynamic cross-linking of proteins IV. Nature of the His–His bond(s) formed in the rose bengal-photosensitized cross-linking of *N*-benzoyl-L-histidine, 1
- Cyanine dye
Photochemistry of a cyanine dye in reversed micelles, 139
- Cyclic voltammetry
(Photo)electrochemical behavior of selected organic compounds on TiO₂ electrodes. Overall relevance to heterogeneous photocatalysis, 145
- Cyclodextrin
Supramolecular sensitizer: complexation of *meso*-tetrakis(4-sulfonatophenyl)porphyrin with 2-hydroxypropyl-cyclodextrins, 13
- Degradation products
Photodegradation of the aminoazobenzene acid orange 52 by three advanced oxidation processes: UV/H₂O₂, UV/TiO₂ and VIS/TiO₂. Comparative mechanistic and kinetic investigations, 35
- Dichloromethane
Influence of redoxinert counterions on photoinduced intermolecular electron transfer rates in dichloromethane, 95
- Dimers
Initial steps of photosynthetic water splitting by associates of porphyrin, 21
- Donor–acceptor complexes
Initial steps of photosynthetic water splitting by associates of porphyrin, 21
- Dye fading
A pulse radiolysis and pulsed laser study of the pyromethene 567 triplet state, 127
- Electroluminescence
Chemiluminescence of systems containing lanthanide ions, 75
- Electron transfer
Influence of redoxinert counterions on photoinduced intermolecular electron transfer rates in dichloromethane, 95
- Electron transfer
Studies on the kinetics of interfacial electron transfer sensitized by colloidal CdS, 57
- Chemiluminescence of systems containing lanthanide ions, 75
- Excited-state proton transfer
Excited state (formal) intramolecular proton transfer (ESIPT) in *p*-hydroxyphenyl ketones mediated by water, 113

Fluorescence

- New asymmetric monomethine cyanine dyes for nucleic-acid labelling: absorption and fluorescence spectral characteristics, 7
- Excited-state intramolecular proton transfer (ESIPT) in 2-(2'-hydroxyphenyl)-oxazole and -thiazole, 101
- Spectrophotometric evidence for the existence of rotamers in solutions of some ketocyanine dyes, 133

Fluorescent dyes

- New asymmetric monomethine cyanine dyes for nucleic-acid labelling: absorption and fluorescence spectral characteristics, 7

Fluorescent label

- New asymmetric monomethine cyanine dyes for nucleic-acid labelling: absorption and fluorescence spectral characteristics, 7

Hindered amines

- Interaction of triplet-excited benzophenone with hindered amines and amino ethersA laser flash photolysis study employing photoconductivity and light emission measurements, 119

Hindered amino ethers

- Interaction of triplet-excited benzophenone with hindered amines and amino ethersA laser flash photolysis study employing photoconductivity and light emission measurements, 119

Hydroxy ketone

- Excited state (formal) intramolecular proton transfer (ESIPT) in *p*-hydroxyphenyl ketones mediated by water, 113

Indium tin oxide

- Photocurrent generated on a carotenoid-sensitized TiO₂ nanocrystalline mesoporous electrode, 49

Intercalating agents

- New asymmetric monomethine cyanine dyes for nucleic-acid labelling: absorption and fluorescence spectral characteristics, 7

Intermolecular

- Influence of redoxinert counterions on photoinduced intermolecular electron transfer rates in dichloromethane, 95

Ketocyanine

- Spectrophotometric evidence for the existence of rotamers in solutions of some ketocyanine dyes, 133

Kinetic

- Studies on the kinetics of interfacial electron transfer sensitized by colloidal CdS, 57
- Photodegradation of the aminoazobenzene acid orange 52 by three advanced oxidation processes: UV/H₂O₂, UV/TiO₂ and VIS/TiO₂. Comparative mechanistic and kinetic investigations, 35

Lanthanide complexes

- Chemiluminescence of systems containing lanthanide ions, 75

Luminescence

- Chemiluminescence of systems containing lanthanide ions, 75

Mathematical description of turnover quantities

- Turnovers and photocatalysis. A mathematical description, 83

Mechanism

- Photocatalysed degradation of uracil in aqueous titanium dioxide suspensions: mechanisms, pH and cadmium chloride effects, 157

Monomethine cyanine dyes

- New asymmetric monomethine cyanine dyes for nucleic-acid labelling: absorption and fluorescence spectral characteristics, 7

Nanoparticles

- Stability of colloidal solutions containing various surface-modified cadmium sulfide particles under stationary illumination, 63

Nucleic acids

- New asymmetric monomethine cyanine dyes for nucleic-acid labelling: absorption and fluorescence spectral characteristics, 7

ONPG assay

- Bactericidal mode of titanium dioxide photocatalysis, 163

Oxidation potentials

- (Photo)electrochemical behavior of selected organic compounds on TiO₂ electrodes. Overall relevance to heterogeneous photocatalysis, 145

Permeability

- Bactericidal mode of titanium dioxide photocatalysis, 163

Photo-aggregation

- Stability of colloidal solutions containing various surface-modified cadmium sulfide particles under stationary illumination, 63

Photo-dissolution

- Stability of colloidal solutions containing various surface-modified cadmium sulfide particles under stationary illumination, 63

Photobleaching

- Studies on the kinetics of interfacial electron transfer sensitized by colloidal CdS, 57

Photocatalysis

- (Photo)electrochemical behavior of selected organic compounds on TiO₂ electrodes. Overall relevance to heterogeneous photocatalysis, 145
- Photocatalysed degradation of uracil in aqueous titanium dioxide suspensions: mechanisms, pH and cadmium chloride effects, 157
- Turnovers and photocatalysis. A mathematical description, 83

Photocurrent

- Photocurrent generated on a carotenoid-sensitized TiO₂ nanocrystalline mesoporous electrode, 49

Photodegradation

- Photocatalysed degradation of uracil in aqueous titanium dioxide suspensions: mechanisms, pH and cadmium chloride effects, 157

Photodynamic effect

- Supramolecular sensitizer: complexation of *meso*-tetrakis(4-sulfonatophenyl)porphyrin with 2-hydroxypropyl-cyclodextrins, 13

Photoelectrochemical behavior

- (Photo)electrochemical behavior of selected organic compounds on TiO₂ electrodes. Overall relevance to heterogeneous photocatalysis, 145

Photoreactions

- Interaction of triplet-excited benzophenone with hindered amines and amino ethersA laser flash photolysis study employing photoconductivity and light emission measurements, 119

Poly(methyl phenyl silane)

- Photoinitiation of cationic polymerization by using poly(methyl phenyl silane) in combination with addition-fragmentation agents, 71

Polymerization

- Photoinitiation of cationic polymerization by using poly(methyl phenyl silane) in combination with addition-fragmentation agents, 71

Porphyrin

- Supramolecular sensitizer: complexation of *meso*-tetrakis(4-sulfonatophenyl)porphyrin with 2-hydroxypropyl-cyclodextrins, 13

Porphyrins

- Initial steps of photosynthetic water splitting by associates of porphyrin, 21

Proton transfer

- Excited-state intramolecular proton transfer (ESIPT) in 2-(2'-hydroxyphenyl)-oxazole and -thiazole, 101

Pyrromethane 567

- A pulse radiolysis and pulsed laser study of the pyromethane 567 triplet state, 127

Quinone methide

- Excited state (formal) intramolecular proton transfer (ESIPT) in *p*-hydroxyphenyl ketones mediated by water, 113

Reversed micelles

- Photochemistry of a cyanine dye in reversed micelles, 139

- Rotational isomers
Spectrophotometric evidence for the existence of rotamers in solutions of some ketocyanine dyes, 133
- Sensitizer
Supramolecular sensitizer: complexation of *meso*-tetrakis(4-sulfonatophenyl)porphyrin with 2-hydroxypropyl-cyclodextrins, 13
- Singlet oxygen
A pulse radiolysis and pulsed laser study of the pyromethene 567 triplet state, 127
Supramolecular sensitizer: complexation of *meso*-tetrakis(4-sulfonatophenyl)porphyrin with 2-hydroxypropyl-cyclodextrins, 13
- Singlet oxygen pathway
Photodynamic cross-linking of proteinsIV. Nature of the His–His bond(s) formed in the rose bengal-photosensitized cross-linking of *N*-benzoyl-L-histidine, 1
- TiO₂ mesoporous electrode
Photocurrent generated on a carotenoid-sensitized TiO₂ nanocrystalline mesoporous electrode, 49
- TiO₂ photocatalysis
Bactericidal mode of titanium dioxide photocatalysis, 163
- Titanium dioxide
Photocatalysed degradation of uracil in aqueous titanium dioxide suspensions: mechanisms, pH and cadmium chloride effects, 157
- Titania electrodes
(Photo)electrochemical behavior of selected organic compounds on TiO₂ electrodes. Overall relevance to heterogeneous photocatalysis, 145
- Triplet state
Supramolecular sensitizer: complexation of *meso*-tetrakis(4-sulfonatophenyl)porphyrin with 2-hydroxypropyl-cyclodextrins, 13
- Triplet states
A pulse radiolysis and pulsed laser study of the pyromethene 567 triplet state, 127
- Turnover frequency
Turnovers and photocatalysis. A mathematical description, 83
- Turnover number
Turnovers and photocatalysis. A mathematical description, 83
- Turnover rate
Turnovers and photocatalysis. A mathematical description, 83
- Uracil
Photocatalysed degradation of uracil in aqueous titanium dioxide suspensions: mechanisms, pH and cadmium chloride effects, 157
- Water splitting
Initial steps of photosynthetic water splitting by associates of porphyrin, 21
