Subject Index of Volume 139

- Ab initio**
Theoretical studies on the self-exchange electron-transfer reaction between 2,3-dicyano-5,6-dichloro-*p*-benzoquinone (DDQ) and its radical anion DDQ^{-•}, 97
- Absorption spectrum modeling**
Previtamin D conformations and the wavelength-dependent photoconversions of previtamin D, 125
- Adsorption**
Comparison between the reactivity of commercial and synthetic TiO₂ photocatalysts, 253
- AFM**
SNOM: a new photophysical tool, 93
- Aluminum**
Photosensitized transformation of 4-chlorophenol in the presence of aggregated and non-aggregated metallophthalocyanines, 217
- AM1 and PM3**
Theoretical studies on the self-exchange electron-transfer reaction between 2,3-dicyano-5,6-dichloro-*p*-benzoquinone (DDQ) and its radical anion DDQ^{-•}, 97
- 2-Aminoethanethiol hydrochloride**
The role of the triplet state on the photobleaching processes of xanthenes dyes in a poly(vinyl alcohol) matrix, 187
- 3-Aminophenol**
Prediction of primary intermediates and the photodegradation kinetics of 3-aminophenol in aqueous TiO₂ suspensions, 225
- Aniline oligomers**
Study of charge transition between interfaces of hetero-structured assemblies based on phenyl-capped aniline tetramer/n(p)-silicon, 175
- Anthracene**
Catalysis of a photochemical quantum chain process. Optimal conditions for catalyzed quantum chain *cis-trans* photoisomerizations of a styrylpyrene, 37
- Applied photochemistry**
Al-doped TiO₂ pigments: influence of doping on the photocatalytic degradation of alkyl resins, 243
- Band feature**
Hot bands of (f, f^{*}) emission from ytterbium(III) porphyrins in solution, 161
- Benzamide**
Comparison between the reactivity of commercial and synthetic TiO₂ photocatalysts, 253
- Binary solvents**
Site selectivity in excited-state intramolecular proton transfer in flavonols, 53
- Biological membranes**
Site selectivity in excited-state intramolecular proton transfer in flavonols, 53
- Biological toxicity test**
Study of photochemical oxidation of standard chlorinated paraffins and identification of degradation products, 205
- Bi-photochromes**
Photokinetic behaviour of biphotochromic supramolecular systems. Part 2. A bis-benzo-[2H]-chromene and a spirooxazine-chromene with a (Z)-ethenic bridge between each moiety, 133
- Bond-alternation**
Bond-length alternation in symmetrical cyanine dyes, 143
- Camphor**
Energetics of the 2 + 2 cyclization of limonene, 17
- Carvone**
Energetics of the 2 + 2 cyclization of limonene, 17
- Chlorinated paraffins**
Study of photochemical oxidation of standard chlorinated paraffins and identification of degradation products, 205
- Chlorophenol**
Photosensitized transformation of 4-chlorophenol in the presence of aggregated and non-aggregated metallophthalocyanines, 217
- Chromenes**
Photokinetic behaviour of biphotochromic supramolecular systems. Part 2. A bis-benzo-[2H]-chromene and a spirooxazine-chromene with a (Z)-ethenic bridge between each moiety, 133
- cis-trans* isomerization**
Catalysis of a photochemical quantum chain process. Optimal conditions for catalyzed quantum chain *cis-trans* photoisomerizations of a styrylpyrene, 37
- Conformational control**
Previtamin D conformations and the wavelength-dependent photoconversions of previtamin D, 125
- Crystal field**
Hot bands of (f, f^{*}) emission from ytterbium(III) porphyrins in solution, 161
- Crystal surface phenomena**
SNOM: a new photophysical tool, 93
- Cyanine dyes**
Bond-length alternation in symmetrical cyanine dyes, 143
- Cyclodextrin**
A quantum-chemical study on the molecular recognition of β-cyclodextrin with ground and excited xanthenes, 105
- DBPs**
Interaction between *E. coli* inactivation and DBP-precursors — dihydroxybenzene isomers — in the photocatalytic process of drinking-water disinfection with TiO₂, 233
- DDQ**
Theoretical studies on the self-exchange electron-transfer reaction between 2,3-dicyano-5,6-dichloro-*p*-benzoquinone (DDQ) and its radical anion DDQ^{-•}, 97
- Decarbonylation**
Conformational control of photoinduced decarboxylation of simple aryl esters. Enhancement by templating effects in polyethylene films, 79
- Delayed fluorescence**
Direct and oxygen-mediated triplet-triplet annihilation of tetraphenylporphyrin in multilayers of decanol on the external surface of NaA zeolite, 167

- Density function theory
A quantum-chemical study on the molecular recognition of β -cyclodextrin with ground and excited xanthenes, 105
- Density functional calculations
Previtamin D conformations and the wavelength-dependent photoconversions of previtamin D, 125
- DFT-B3LYP
Theoretical studies on the self-exchange electron-transfer reaction between 2,3-dicyano-5,6-dichloro-*p*-benzoquinone (DDQ) and its radical anion $\text{DDQ}^{\cdot-}$, 97
- Diethylenetriamine
The role of the triplet state on the photobleaching processes of xanthene dyes in a poly(vinyl alcohol) matrix, 187
- Dihydroxybenzenes
Interaction between *E. coli* inactivation and DBP-precursors — dihydroxybenzene isomers — in the photocatalytic process of drinking-water disinfection with TiO_2 , 233
- 4-*N,N*-dimethylamino cinnamaldehyde
Excited state photodynamics of 4-*N,N*-dimethylamino cinnamaldehyde: A solvent dependent competition of TICT and intermolecular hydrogen bonding, 5
- Disinfection by-products precursors
Interaction between *E. coli* inactivation and DBP-precursors — dihydroxybenzene isomers — in the photocatalytic process of drinking-water disinfection with TiO_2 , 233
- Doped titania
Al-doped TiO_2 pigments: influence of doping on the photocatalytic degradation of alkyl resins, 243
- Electrochemical cells
Photoelectrochemical processes at electrolyte–multinary layered semiconductors interfaces, 181
- Electron acceptors
Prediction of primary intermediates and the photodegradation kinetics of 3-aminophenol in aqueous TiO_2 suspensions, 225
- Excimer emission
Intramolecular excimer formation and complexing behavior of 1,*n*-bis(naphthalenecarboxy)oxaalkanes as fluorescent chemosensors for calcium and barium ions, 71
- Excited state intramolecular proton transfer
Photoinduced proton transfer in 3-hydroxy-2-naphthoic acid, 23
- Excited states
Hot bands of (f, f^{*}) emission from ytterbium(III) porphyrins in solution, 161
- Fatigue resistance
Improvements in the fatigue resistances of photochromic compounds, 63
- Flavonols
Site selectivity in excited-state intramolecular proton transfer in flavonols, 53
- Fluorescence emission
Spectroscopic properties of thiophene linked [2H]-chromenes, 1
- Fluorescent chemosensors
Intramolecular excimer formation and complexing behavior of 1,*n*-bis(naphthalenecarboxy)oxaalkanes as fluorescent chemosensors for calcium and barium ions, 71
- Fluorescent probes
Site selectivity in excited-state intramolecular proton transfer in flavonols, 53
- Fluorescent protein–dye conjugates
The photophysics of Lissamine rhodamine B sulphonyl chloride in aqueous solution: implications for fluorescent protein–dye conjugates, 151
- Fluorescent side-group polystyrene
Photophysical and photochemical properties of blue fluorescent polystyrene, 157
- Fuel
Energetics of the 2 + 2 cyclization of limonene, 17
- Fulgides
Improvements in the fatigue resistances of photochromic compounds, 63
- Fulgimides
Improvements in the fatigue resistances of photochromic compounds, 63
- GC/MS
Study of photochemical oxidation of standard chlorinated paraffins and identification of degradation products, 205
- Hetero-structure
Study of charge transition between interfaces of hetero-structured assemblies based on phenyl-capped aniline tetramer/*n*(p)-silicon, 175
- 2H-thiopyrans
Isolation and kinetic study of intermediates in photoisomerization of some tetrasubstituted 4-aryl-4-methyl-2,6-diphenyl-4H-thiopyrans, 45
- 4H-thiopyrans
Isolation and kinetic study of intermediates in photoisomerization of some tetrasubstituted 4-aryl-4-methyl-2,6-diphenyl-4H-thiopyrans, 45
- Hydration of phthalimide
SNOM: a new photophysical tool, 93
- Hydrogen bonding
Photoinduced proton transfer in 3-hydroxy-2-naphthoic acid, 23
- Hydrogen bonding interaction
Excited state photodynamics of 4-*N,N*-dimethylamino cinnamaldehyde: A solvent dependent competition of TICT and intermolecular hydrogen bonding, 5
- 3-Hydroxy-2-naphthoic acid
Photoinduced proton transfer in 3-hydroxy-2-naphthoic acid, 23
- 4-Hydroxypyridine
Modelling the natural photodegradation of water contaminants. A kinetic study on the light-induced aerobic interactions between riboflavin and 4-hydroxypyridine, 199
- Hyper-Rayleigh scattering
Bond-length alternation in symmetrical cyanine dyes, 143
- Interfacial charge transfer
Study of charge transition between interfaces of hetero-structured assemblies based on phenyl-capped aniline tetramer/*n*(p)-silicon, 175
- Intermediate products
Study of photochemical oxidation of standard chlorinated paraffins and identification of degradation products, 205
- Intermediates
Isolation and kinetic study of intermediates in photoisomerization of some tetrasubstituted 4-aryl-4-methyl-2,6-diphenyl-4H-thiopyrans, 45
- Intramolecular charge transfer
Excited state photodynamics of 4-*N,N*-dimethylamino cinnamaldehyde: A solvent dependent competition of TICT and intermolecular hydrogen bonding, 5
- Ion chromatography
Study of photochemical oxidation of standard chlorinated paraffins and identification of degradation products, 205
- E*-isomer
Catalysis of a photochemical quantum chain process. Optimal conditions for catalyzed quantum chain *cis*–*trans* photoisomerizations of a styrylpyrene, 37
- Kinetic study
Isolation and kinetic study of intermediates in photoisomerization of some tetrasubstituted 4-aryl-4-methyl-2,6-diphenyl-4H-thiopyrans, 45

- Limonene
Energetics of the 2 + 2 cyclization of limonene, 17
- Lissamine rhodamine B sulphonyl chloride
The photophysics of Lissamine rhodamine B sulphonyl chloride in aqueous solution: implications for fluorescent protein–dye conjugates, 151
- Local chemical contrast
SNOM: a new photophysical tool, 93
- Long-range molecular movements
SNOM: a new photophysical tool, 93
- Metal ion recognition
Intramolecular excimer formation and complexing behavior of 1,*n*-bis(naphthalenecarboxy)oxaalkanes as fluorescent chemosensors for calcium and barium ions, 71
- Molecular switches
Spectroscopic properties of thiophene linked [2H]-chromenes, 1
- Multinary semiconductors
Photoelectrochemical processes at electrolyte–multinary layered semiconductors interfaces, 181
- Nanosciences
SNOM: a new photophysical tool, 93
- Naphthalene derivatives
Intramolecular excimer formation and complexing behavior of 1,*n*-bis(naphthalenecarboxy)oxaalkanes as fluorescent chemosensors for calcium and barium ions, 71
- 1,8-Naphthalimides
Photophysical and photochemical properties of blue fluorescent polystyrene, 157
- Naphthopyrans
Photokinetic behaviour of biphotochromic supramolecular systems. Part 2. A bis-benzo-[2H]-chromene and a spirooxazine–chromene with a (*Z*)-ethenic bridge between each moiety, 133
- Oligothiophenic [2H]-chromenes
Spectroscopic properties of thiophene linked [2H]-chromenes, 1
- Phenylbenzoquinones
Mechanism of photocyclization of substituted phenylbenzoquinones, 111
- Photobleaching
The role of the triplet state on the photobleaching processes of xanthene dyes in a poly(vinyl alcohol) matrix, 187
- Photocatalysis
Comparison between the reactivity of commercial and synthetic TiO₂ photocatalysts, 253
- Photocatalytic degradation
Prediction of primary intermediates and the photodegradation kinetics of 3-aminophenol in aqueous TiO₂ suspensions, 225
- Photochromic systems
Spectroscopic properties of thiophene linked [2H]-chromenes, 1
- Photochromism
Improvements in the fatigue resistances of photochromic compounds, 63
- Photocyclization
Energetics of the 2 + 2 cyclization of limonene, 17
Mechanism of photocyclization of substituted phenylbenzoquinones, 111
- Photodegradation of polymers
Al-doped TiO₂ pigments: influence of doping on the photocatalytic degradation of alkyd resins, 243
- Photodestruction
Photophysical and photochemical properties of blue fluorescent polystyrene, 157
- Photoelectric properties
Photoelectrochemical processes at electrolyte–multinary layered semiconductors interfaces, 181
- Photoelectrochemistry
Al-doped TiO₂ pigments: influence of doping on the photocatalytic degradation of alkyd resins, 243
- Photo-Fries
Conformational control of photoinduced decarboxylation of simple aryl esters. Enhancement by templating effects in polyethylene films, 79
- Photoisomerization
Catalysis of a photochemical quantum chain process. Optimal conditions for catalyzed quantum chain *cis*–*trans* photoisomerizations of a styrylpyrene, 37
Isolation and kinetic study of intermediates in photoisomerization of some tetrasubstituted 4-aryl-4-methyl-2,6-diphenyl-4H-thiopyrans, 45
- Photokinetics
Photokinetic behaviour of biphotochromic supramolecular systems. Part 2. A bis-benzo-[2H]-chromene and a spirooxazine–chromene with a (*Z*)-ethenic bridge between each moiety, 133
- Photooxidation
Modelling the natural photodegradation of water contaminants. A kinetic study on the light-induced aerobic interactions between riboflavin and 4-hydroxypyridine, 199
Study of photochemical oxidation of standard chlorinated paraffins and identification of degradation products, 205
Improvements in the fatigue resistances of photochromic compounds, 63
- Photophysical properties
Photophysical and photochemical properties of blue fluorescent polystyrene, 157
Al-doped TiO₂ pigments: influence of doping on the photocatalytic degradation of alkyd resins, 243
- Photophysics
The photophysics of Lissamine rhodamine B sulphonyl chloride in aqueous solution: implications for fluorescent protein–dye conjugates, 151
- Photoreaction efficiency
Previtamin D conformations and the wavelength-dependent photoconversions of previtamin D, 125
- Photosensitization
Hot bands of (*f*, *f*^{*}) emission from ytterbium(III) porphyrins in solution, 161
Modelling the natural photodegradation of water contaminants. A kinetic study on the light-induced aerobic interactions between riboflavin and 4-hydroxypyridine, 199
Photosensitized transformation of 4-chlorophenol in the presence of aggregated and non-aggregated metallophthalocyanines, 217
- Phthalocyanine
Photosensitized transformation of 4-chlorophenol in the presence of aggregated and non-aggregated metallophthalocyanines, 217
- PM3
A quantum-chemical study on the molecular recognition of β-cyclodextrin with ground and excited xanthenes, 105
- Poly(vinyl alcohol)
The role of the triplet state on the photobleaching processes of xanthene dyes in a poly(vinyl alcohol) matrix, 187
- Polymer films
Improvements in the fatigue resistances of photochromic compounds, 63
- Polymerizable fluorescent brighteners
Photophysical and photochemical properties of blue fluorescent polystyrene, 157
- Potassium dichromate
The role of the triplet state on the photobleaching processes of xanthene dyes in a poly(vinyl alcohol) matrix, 187
- Previtamin D
Previtamin D conformations and the wavelength-dependent photoconversions of previtamin D, 125

- Reaction mechanism
Photokinetic behaviour of biphotochromic supramolecular systems. Part 2. A bis-benzo-[2H]-chromene and a spirooxazine-chromene with a (*Z*)-ethenic bridge between each moiety, 133
- Red-edge excitation
Site selectivity in excited-state intramolecular proton transfer in flavonols, 53
- Relaxation
Bond-length alternation in symmetrical cyanine dyes, 143
- Riboflavin
Modelling the natural photodegradation of water contaminants. A kinetic study on the light-induced aerobic interactions between riboflavin and 4-hydroxypyridine, 199
- Self-exchange electron transfer
Theoretical studies on the self-exchange electron-transfer reaction between 2,3-dicyano-5,6-dichloro-*p*-benzoquinone (DDQ) and its radical anion DDQ^{-•}, 97
- Semiconductor photocatalysis
Al-doped TiO₂ pigments: influence of doping on the photocatalytic degradation of alkyl resins, 243
- Semi-empirical PM3 method
Prediction of primary intermediates and the photodegradation kinetics of 3-aminophenol in aqueous TiO₂ suspensions, 225
- Silica sol-gel matrices
Improvements in the fatigue resistances of photochromic compounds, 63
- Singlet molecular oxygen
Modelling the natural photodegradation of water contaminants. A kinetic study on the light-induced aerobic interactions between riboflavin and 4-hydroxypyridine, 199
- Singlet oxygen
Direct and oxygen-mediated triplet-triplet annihilation of tetraphenylporphyrin in multilayers of decanol on the external surface of NaA zeolite, 167
Photosensitized transformation of 4-chlorophenol in the presence of aggregated and non-aggregated metallophthalocyanines, 217
- SNOM
SNOM: a new photophysical tool, 93
- Solar irradiation
Interaction between *E. coli* inactivation and DBP-precursors — dihydroxybenzene isomers — in the photocatalytic process of drinking-water disinfection with TiO₂, 233
- Sol-gel
Comparison between the reactivity of commercial and synthetic TiO₂ photocatalysts, 253
- Spirooxazines
Photokinetic behaviour of biphotochromic supramolecular systems. Part 2. A bis-benzo-[2H]-chromene and a spirooxazine-chromene with a (*Z*)-ethenic bridge between each moiety, 133
- Spiropyrans
Improvements in the fatigue resistances of photochromic compounds, 63
- SPS
Study of charge transition between interfaces of hetero-structured assemblies based on phenyl-capped aniline tetramer/*n*(*p*)-silicon, 175
- Strain
Energetics of the 2 + 2 cyclization of limonene, 17
- Superoxide anion
Modelling the natural photodegradation of water contaminants. A kinetic study on the light-induced aerobic interactions between riboflavin and 4-hydroxypyridine, 199
- Temperature dependence
Hot bands of (f, f^{*}) emission from ytterbium(III) porphyrins in solution, 161
- Temperature effects
Conformational control of photoinduced decarboxylation of simple aryl esters.. Enhancement by templating effects in polyethylene films, 79
- Tetraphenylporphyrin
Direct and oxygen-mediated triplet-triplet annihilation of tetraphenylporphyrin in multilayers of decanol on the external surface of NaA zeolite, 167
- TiO₂
Comparison between the reactivity of commercial and synthetic TiO₂ photocatalysts, 253
- TiO₂ photocatalysis
Interaction between *E. coli* inactivation and DBP-precursors — dihydroxybenzene isomers — in the photocatalytic process of drinking-water disinfection with TiO₂, 233
- Titanium dioxide
Prediction of primary intermediates and the photodegradation kinetics of 3-aminophenol in aqueous TiO₂ suspensions, 225
- Triplet state
A quantum-chemical study on the molecular recognition of β-cyclodextrin with ground and excited xanthenes, 105
Mechanism of photocyclization of substituted phenylbenzoquinones, 111
- Triplet state energy
Catalysis of a photochemical quantum chain process. Optimal conditions for catalyzed quantum chain *cis-trans* photoisomerizations of a styrylpyrene, 37
- T-T annihilation
Direct and oxygen-mediated triplet-triplet annihilation of tetraphenylporphyrin in multilayers of decanol on the external surface of NaA zeolite, 167
- Water disinfection
Interaction between *E. coli* inactivation and DBP-precursors — dihydroxybenzene isomers — in the photocatalytic process of drinking-water disinfection with TiO₂, 233
- Xanthene dyes
The role of the triplet state on the photobleaching processes of xanthene dyes in a poly(vinyl alcohol) matrix, 187
- Xanthone
A quantum-chemical study on the molecular recognition of β-cyclodextrin with ground and excited xanthenes, 105
- X-ray
Conformational control of photoinduced decarboxylation of simple aryl esters.. Enhancement by templating effects in polyethylene films, 79
- Zinc
Photosensitized transformation of 4-chlorophenol in the presence of aggregated and non-aggregated metallophthalocyanines, 217
