

Subject Index of Volume 142

- Adiabaticity
Comment on “A comparative study on electron transfer fluorescence quenching by aliphatic and aromatic amines” from Inada et al., J. Photochem. Photobiol. A 137 (2000) 93–97, 91
- Advanced oxidation process (AOP)
UV- and UV/Fe(III)-enhanced ozonation of nitrobenzene in aqueous solution, 79
Heterogeneous photocatalytic oxidation of polyvinyl alcohol in water, 85
- Aliphatic amines
Comment on “A comparative study on electron transfer fluorescence quenching by aliphatic and aromatic amines” from Inada et al., J. Photochem. Photobiol. A 137 (2000) 93–97, 91
- Aluminium–organic complexes
Photochemical formation of the electroluminescent image in polymer–silica gel nanoparticle composites, 67
- Antenna
The mechanism of energy transfer in the antenna of photosynthetic purple bacteria, 107
- Aromatic hydrocarbons
Singlet oxygen formation efficiencies following quenching of excited singlet and triplet states of aromatic hydrocarbons by molecular oxygen, 133
- Azo dye
Spectroscopic determination of very low quantum yield of singlet oxygen formation photosensitized by industrial dyes, 47
- Bacteriochlorophyll
Dynamic infrared band–band spectroscopy of peripheral light-harvesting complexes from *R. acidophila*, 121
- Band–band spectrum
Dynamic infrared band–band spectroscopy of peripheral light-harvesting complexes from *R. acidophila*, 121
- Chlorophenol
Photophysics and photochemistry of azole fungicides: triadimefon and triadimenol, 31
- Cu-phthalocyanine
Photothermal conversion dynamics in femtosecond and picosecond discrete laser etching of Cu-phthalocyanine amorphous film analysed by ultrafast UV–VIS absorption spectroscopy, 197
- 4-Dimethylaminobenzonitrile (DMABN)
Resonance Raman study of ring deuterated 4-dimethylaminobenzonitrile (DMABN-d₄): the ground, ICT and triplet states, 177
- Discrete etching
Photothermal conversion dynamics in femtosecond and picosecond discrete laser etching of Cu-phthalocyanine amorphous film analysed by ultrafast UV–VIS absorption spectroscopy, 197
- DNA damage
Role of iron ions in damage to DNA: influence of ionising radiation, UV light and H₂O₂, 9
- Duroquinone
Photoinduced electron transfer in non-aqueous microemulsions, 151
- Dye aggregates
Electrostatic interactions of cationic dyes with negatively charged polyelectrolytes in aqueous solution, 51
- Dye–polyelectrolyte complexes
Electrostatic interactions of cationic dyes with negatively charged polyelectrolytes in aqueous solution, 51
- EDTA
Role of iron ions in damage to DNA: influence of ionising radiation, UV light and H₂O₂, 9
- Electroluminescence
Photochemical formation of the electroluminescent image in polymer–silica gel nanoparticle composites, 67
- Electron transfer
Comment on “A comparative study on electron transfer fluorescence quenching by aliphatic and aromatic amines” from Inada et al., J. Photochem. Photobiol. A 137 (2000) 93–97, 91
Photoinduced electron transfer in non-aqueous microemulsions, 151
- Energy transfer
Modulation of vectorial energy transfer in the tetrakis[tris(bipyridine) ruthenium(II)]porphyrinate zinc complex, 25
Photophysics and photochemistry of azole fungicides: triadimefon and triadimenol, 31
- Energy transfer efficiency
Singlet oxygen formation efficiencies following quenching of excited singlet and triplet states of aromatic hydrocarbons by molecular oxygen, 133
- Exciplex
Comment on “A comparative study on electron transfer fluorescence quenching by aliphatic and aromatic amines” from Inada et al., J. Photochem. Photobiol. A 137 (2000) 93–97, 91
- Femtosecond laser ablation
Photothermal conversion dynamics in femtosecond and picosecond discrete laser etching of Cu-phthalocyanine amorphous film analysed by ultrafast UV–VIS absorption spectroscopy, 197
- Fenton-type reactions
Role of iron ions in damage to DNA: influence of ionising radiation, UV light and H₂O₂, 9
- Ferric ion
UV- and UV/Fe(III)-enhanced ozonation of nitrobenzene in aqueous solution, 79
- Flash-photolysis
Modulation of vectorial energy transfer in the tetrakis[tris(bipyridine) ruthenium(II)]porphyrinate zinc complex, 25
- Fluorescence lifetime imaging
Time-resolved fluorescence imaging of photosensitiser distributions in mammalian cells using a picosecond laser line-scanning microscope, 169
- Fluorescence microscopy
Time-resolved fluorescence imaging of photosensitiser distributions in mammalian cells using a picosecond laser line-scanning microscope, 169

- Fluorescence spectroscopy
The use of the fluorescence properties of indolocarbazole analogs of adenosine triphosphate as probes of the activating conformational change in protein kinase C, 163
- Fluorescent side-group copolymers
Copolymerization and photostabilization of methylmethacrylate with 1,8-naphthalimide fluorescent brighteners, 73
- Gold nanoparticles
Photochemical dissolution of gold nanoparticles by bromine containing trihalomethanes (THMs) in an aqueous triton X-100 medium and its analytical application, 59
- Gram-negative bacteria
The photosensitisation of *Escherichia coli* using disulphonated aluminium phthalocyanine, 145
- Ground-state atomic rubidium
Kinetic measurements of fluorine, bromine and iodine atom-abstraction reactions at elevated temperatures by ground-state atomic rubidium, Rb($5^2S_{1/2}$), studied by time-resolved laser-induced fluorescence, 1
- Halogen atom abstraction
Kinetic measurements of fluorine, bromine and iodine atom-abstraction reactions at elevated temperatures by ground-state atomic rubidium, Rb($5^2S_{1/2}$), studied by time-resolved laser-induced fluorescence, 1
- H₂O₂
Heterogeneous photocatalytic oxidation of polyvinyl alcohol in water, 85
- Indolocarbazoles
The use of the fluorescence properties of indolocarbazole analogs of adenosine triphosphate as probes of the activating conformational change in protein kinase C, 163
- InP quantum dots
Anomalies in the linear absorption, transient absorption, photoluminescence and photoluminescence excitation spectroscopies of colloidal InP quantum dots, 187
- Intermolecular interactions
Electrostatic interactions of cationic dyes with negatively charged polyelectrolytes in aqueous solution, 51
- Intramolecular charge transfer reaction
Resonance Raman study of ring deuterated 4-dimethylaminobenzonitrile (DMABN-d₄): the ground, ICT and triplet states, 177
- Iron ions
Role of iron ions in damage to DNA: influence of ionising radiation, UV light and H₂O₂, 9
- J-aggregate fluorescence
Electrostatic interactions of cationic dyes with negatively charged polyelectrolytes in aqueous solution, 51
- Kinetic measurements
Kinetic measurements of fluorine, bromine and iodine atom-abstraction reactions at elevated temperatures by ground-state atomic rubidium, Rb($5^2S_{1/2}$), studied by time-resolved laser-induced fluorescence, 1
- Laser-induced fluorescence
Kinetic measurements of fluorine, bromine and iodine atom-abstraction reactions at elevated temperatures by ground-state atomic rubidium, Rb($5^2S_{1/2}$), studied by time-resolved laser-induced fluorescence, 1
- Linear absorption
Anomalies in the linear absorption, transient absorption, photoluminescence and photoluminescence excitation spectroscopies of colloidal InP quantum dots, 187
- Methyl viologen
Photoinduced electron transfer in non-aqueous microemulsions, 151
- Methylviologen radical
Mechanism of formation of the MV^{•+} radical during the UV excitation of methylviologen, 19
- Microemulsions
Photoinduced electron transfer in non-aqueous microemulsions, 151
- Nitrobenzene
UV- and UV/Fe(III)-enhanced ozonation of nitrobenzene in aqueous solution, 79
- Nucleophile
Photochemical dissolution of gold nanoparticles by bromine containing trihalomethanes (THMs) in an aqueous triton X-100 medium and its analytical application, 59
- Ozone
UV- and UV/Fe(III)-enhanced ozonation of nitrobenzene in aqueous solution, 79
- P680
P680, the primary electron donor of photosystem II, 97
- PDT
Time-resolved fluorescence imaging of photosensitiser distributions in mammalian cells using a picosecond laser line-scanning microscope, 169
- Phenoxy radicals
Photophysics and photochemistry of azole fungicides: triadimefon and triadimenol, 31
- Phosphorescence
Spectroscopic determination of very low quantum yield of singlet oxygen formation photosensitized by industrial dyes, 47
- Photocatalytic degradation
Heterogeneous photocatalytic oxidation of polyvinyl alcohol in water, 85
- Photochemical dissolution of aluminium
Photochemical formation of the electroluminescent image in polymer-silica gel nanoparticle composites, 67
- Photodegradation
Spectroscopic determination of very low quantum yield of singlet oxygen formation photosensitized by industrial dyes, 47
- Photodestruction
Mechanism of formation of the MV^{•+} radical during the UV excitation of methylviologen, 19
- Photodynamic therapy
The photosensitisation of *Escherichia coli* using disulphonated aluminium phthalocyanine, 145
Time-resolved fluorescence imaging of photosensitiser distributions in mammalian cells using a picosecond laser line-scanning microscope, 169
- Photoluminescence
Anomalies in the linear absorption, transient absorption, photoluminescence and photoluminescence excitation spectroscopies of colloidal InP quantum dots, 187
- Photophysics
Modulation of vectorial energy transfer in the tetrakis[tris(bipyridine)ruthenium(II)]porphyrinate zinc complex, 25
- Photostabilization
Copolymerization and photostabilization of methylmethacrylate with 1,8-naphthalimide fluorescent brighteners, 73
- Photosynthesis
The mechanism of energy transfer in the antenna of photosynthetic purple bacteria, 107
- Photosystem II
P680, the primary electron donor of photosystem II, 97
Are the trapping dynamics in Photosystem II sensitive to Q_A redox potential?, 127

- Photothermal conversion
Photothermal conversion dynamics in femtosecond and picosecond discrete laser etching of Cu-phthalocyanine amorphous film analysed by ultrafast UV–VIS absorption spectroscopy, 197
- Phototransformation
Effect of oligomerization on the photochemical properties of silicon octaphenoxypthalocyanine, 39
- Phthalocyanine
Time-resolved fluorescence imaging of photosensitiser distributions in mammalian cells using a picosecond laser line-scanning microscope, 169
- Polymer light-sensitive layer
Photochemical formation of the electroluminescent image in polymer–silica gel nanoparticle composites, 67
- Polymerizable 1,8-naphthalimide
Copolymerization and photostabilization of methylmethacrylate with 1,8-naphthalimide fluorescent brighteners, 73
- Polymethylmethacrylate
Copolymerization and photostabilization of methylmethacrylate with 1,8-naphthalimide fluorescent brighteners, 73
- Polyvinyl alcohol (PVA)
Heterogeneous photocatalytic oxidation of polyvinyl alcohol in water, 85
- Primary electron donor
P680, the primary electron donor of photosystem II, 97
- Protein kinase C
The use of the fluorescence properties of indolocarbazole analogs of adenosine triphosphate as probes of the activating conformational change in protein kinase C, 163
- Purple bacteria
The mechanism of energy transfer in the antenna of photosynthetic purple bacteria, 107
- Quantum yield
Mechanism of formation of the $MV^{\bullet+}$ radical during the UV excitation of methylviologen, 19
Effect of oligomerization on the photochemical properties of silicon octaphenoxypthalocyanine, 39
Spectroscopic determination of very low quantum yield of singlet oxygen formation photosensitized by industrial dyes, 47
- Quenching
Singlet oxygen formation efficiencies following quenching of excited singlet and triplet states of aromatic hydrocarbons by molecular oxygen, 133
- Radiolysis
Role of iron ions in damage to DNA: influence of ionising radiation, UV light and H_2O_2 , 9
- Redox potential
Are the trapping dynamics in Photosystem II sensitive to Q_A redox potential?, 127
- Rhodospseudomonas acidophila*
Dynamic infrared band–band spectroscopy of peripheral light-harvesting complexes from *R. acidophila*, 121
- Ruthenium complexes
Modulation of vectorial energy transfer in the tetrakis[tris(bipyridine)ruthenium(II)]porphyrinate zinc complex, 25
- Silicon phthalocyanine
Effect of oligomerization on the photochemical properties of silicon octaphenoxypthalocyanine, 39
- Singlet oxygen
Effect of oligomerization on the photochemical properties of silicon octaphenoxypthalocyanine, 39
Spectroscopic determination of very low quantum yield of singlet oxygen formation photosensitized by industrial dyes, 47
Singlet oxygen formation efficiencies following quenching of excited singlet and triplet states of aromatic hydrocarbons by molecular oxygen, 133
- Strand breakage
Role of iron ions in damage to DNA: influence of ionising radiation, UV light and H_2O_2 , 9
- Supramolecular porphyrin
Modulation of vectorial energy transfer in the tetrakis[tris(bipyridine)ruthenium(II)]porphyrinate zinc complex, 25
- TICT
Resonance Raman study of ring deuterated 4-dimethylaminobenzonitrile (DMABN- d_4): the ground, ICT and triplet states, 177
- Titanium dioxide
Heterogeneous photocatalytic oxidation of polyvinyl alcohol in water, 85
- Transient absorption
Anomalies in the linear absorption, transient absorption, photoluminescence and photoluminescence excitation spectroscopies of colloidal InP quantum dots, 187
- Transient absorption spectroscopy
Photothermal conversion dynamics in femtosecond and picosecond discrete laser etching of Cu-phthalocyanine amorphous film analysed by ultrafast UV–VIS absorption spectroscopy, 197
- Trapping dynamics
Are the trapping dynamics in Photosystem II sensitive to Q_A redox potential?, 127
- Triadimefon
Photophysics and photochemistry of azole fungicides: triadimefon and triadimenol, 31
- Triadimenol
Photophysics and photochemistry of azole fungicides: triadimefon and triadimenol, 31
- Trihalomethane
Photochemical dissolution of gold nanoparticles by bromine containing trihalomethanes (THMs) in an aqueous triton X-100 medium and its analytical application, 59
- Triplet state
Resonance Raman study of ring deuterated 4-dimethylaminobenzonitrile (DMABN- d_4): the ground, ICT and triplet states, 177
- UV excitation
Mechanism of formation of the $MV^{\bullet+}$ radical during the UV excitation of methylviologen, 19
- UV radiation
UV- and UV/Fe(III)-enhanced ozonation of nitrobenzene in aqueous solution, 79
- Zinc tetraphenyl porphyrin
Photoinduced electron transfer in non-aqueous microemulsions, 151
