

Subject Index of Volume 154

- Ab initio**
Electronic properties of small model compounds that undergo excited-state intramolecular proton transfer as measured by electroabsorption spectroscopy, 69
- Acetylation**
Structure elucidation of the photoproducts obtained by the photolysis of *N*-acetyl-2-styrylpyrroles, 123
- Acid orange-7**
Influence of metallic species on TiO₂ for the photocatalytic degradation of dyes and dye intermediates, 189
- Ag/AgCl electrode**
Photoelectrochemical reduction of nitrite ions to ammonia on CdS photocatalysts, 299
- Ag/AgCl potentiometric detector electrode**
Probing the extent of [O₂] depletion and [Cl⁻] production simultaneously at an illuminated TiO₂ surface employing simple electrochemical methods, 229
- Alkyl aryl ketones**
Photochemistry of alkyl aryl ketones on alumina, silica-gel and water ice surfaces, 155
- Alumina**
Photochemistry of alkyl aryl ketones on alumina, silica-gel and water ice surfaces, 155
- Amitriptyline**
Photophysical and photochemical properties of amitriptyline and nortriptyline hydrochloride: a 266 nm nanosecond laser flash and theoretical study, 245
- Aniline**
Excited-state proton transfer to solvent of protonated aniline derivatives in aqueous solution: a remarkable effect of *ortho* alkyl group on the proton-dissociation rate, 53
- Anthracene**
Characterization of interpenetrating polymer-like network based on polyethylene/poly(styrene-co-butylmethacrylate) (PE/P(S-co-BMA)) by non-radiative energy transfer, 279
- Azo dye**
The novel use of NMR spectroscopy with in situ laser irradiation to study azo photoisomerisation, 179
- Betaines**
Steric substituent effects of new photochromic tetrahydroindolizines leading to tunable photophysical behavior of the colored betaines, 131
- Binary solvents**
Excited state intramolecular proton transfer in 2-(2'-hydroxyphenyl)-1H-imidazo[4,5-c]pyridine: effects of solvents, 81
- Carbazole**
A novel family of twisted molecular luminescent materials containing carbazole unit for single-layer organic electroluminescent devices, 169
- Carbon acid**
Excited state proton transfer to and from carbon: studies of enhanced excited state basicity of biphenyl derivatives and carbon acidity of dibenzosuberenes, 93
- Carbon base**
Excited state proton transfer to and from carbon: studies of enhanced excited state basicity of biphenyl derivatives and carbon acidity of dibenzosuberenes, 93
- CdS photocatalysts**
Photoelectrochemical reduction of nitrite ions to ammonia on CdS photocatalysts, 299
- CHARMm calculations**
Steric substituent effects of new photochromic tetrahydroindolizines leading to tunable photophysical behavior of the colored betaines, 131
- Chemical oxygen demand**
Photocatalytic destruction of potassium hydrogen phthalate using TiO₂ and sunlight: application for the treatment of industrial wastewater, 219
- Chemiluminescence**
Chemiluminescence as the energy transfer effect in the system Eu(III)-thenoyltrifluoroacetone-H₂O₂-NaOH, 273
- Chloronitrobenzenes**
Spectrophotometric study of photosensitized dechlorination of isomeric mono- and dichloronitrobenzenes, 303
- Chlorophenol**
Probing the extent of [O₂] depletion and [Cl⁻] production simultaneously at an illuminated TiO₂ surface employing simple electrochemical methods, 229
- 4-Chlorophenol**
Aqueous photochemistry of pesticides triadimefon and triadimenol, 293
- Chlorophenolate**
Aqueous photochemistry of pesticides triadimefon and triadimenol, 293
- 4-Chlorophenoxy radicals**
Aqueous photochemistry of pesticides triadimefon and triadimenol, 293
- Cis-trans isomerisation**
The novel use of NMR spectroscopy with in situ laser irradiation to study azo photoisomerisation, 179
- Copper**
Influence of metallic species on TiO₂ for the photocatalytic degradation of dyes and dye intermediates, 189
- Coronene**
Triplet state energy and electron transfer in coronene-doped polymethylmethacrylate, 267
- Degradation**
Photodegradation of lignin from black liquor using a UV/TiO₂ system, 211
- Deuterium exchange**
Excited state proton transfer to and from carbon: studies of enhanced excited state basicity of biphenyl derivatives and carbon acidity of dibenzosuberenes, 93
- Dipyrido[2,3-*a*:3',2'-*i*]carbazole**
In search for phototautomerization in solid dipyrido[2,3-*a*:3',2'-*i*]carbazole, 61
- Electroabsorption**
Electronic properties of small model compounds that undergo excited-state intramolecular proton transfer as measured by electroabsorption spectroscopy, 69

- Electrochemical detection
 Probing the extent of [O₂] depletion and [Cl⁻] production simultaneously at an illuminated TiO₂ surface employing simple electrochemical methods, 229
- Electron transfer
 Structure elucidation of the photoproducts obtained by the photolysis of *N*-acetyl-2-styrylpyrroles, 123
 Triplet state energy and electron transfer in coronene-doped polymethylmethacrylate, 267
- Electronic spectra
 Photooxidation of bis(diethyldithiocarbamato)dicarbonyliron(II) in chloroform, 289
- Electronic spectrum
 Excited-state intramolecular proton transfer in photochromic jet-cooled *N*-salicylideneaniline, 33
- Electronic structure
 Intermolecular photochemical proton transfer in solution: new insights and perspectives, 3
- Electronic structure calculations
 Electronic properties of small model compounds that undergo excited-state intramolecular proton transfer as measured by electroabsorption spectroscopy, 69
- Energy transfer
 Triplet state energy and electron transfer in coronene-doped polymethylmethacrylate, 267
 Chemiluminescence as the energy transfer effect in the system Eu(III)–thenoyltrifluoroacetone–H₂O₂–NaOH, 273
- Europium ions
 Chemiluminescence as the energy transfer effect in the system Eu(III)–thenoyltrifluoroacetone–H₂O₂–NaOH, 273
- Excitation energies
 Theoretical study of phototoxic reactions of psoralens, 235
- Excited state intramolecular proton transfer
 Excited state intramolecular proton transfer in 2-(2'-hydroxyphenyl)-1H-imidazo[4,5-c]pyridine: effects of solvents, 81
- Excited-state intramolecular proton transfer (ESIPT)
 Intersecting-state model calculations on fast and ultrafast excited-state proton transfers in naphthols and substituted naphthols, 13
 Nodal-plane model for excited-state intramolecular proton transfer of *o*-hydroxybenzaldehyde: substituent effect, 23
 Electronic properties of small model compounds that undergo excited-state intramolecular proton transfer as measured by electroabsorption spectroscopy, 69
 Excited state proton transfer to and from carbon: studies of enhanced excited state basicity of biphenyl derivatives and carbon acidity of dibenzosuberenes, 93
- Fluorescence
 Excited-state proton transfer to solvent of protonated aniline derivatives in aqueous solution: a remarkable effect of *ortho* alkyl group on the proton-dissociation rate, 53
 Excited state intramolecular proton transfer in 2-(2'-hydroxyphenyl)-1H-imidazo[4,5-c]pyridine: effects of solvents, 81
- Fluorescence and absorption spectra
 A comparison of the excited-state processes of nearly symmetrical perylene quinones: hypocrellin A and hypomycin B, 107
- Fluorescence probes
 Characterization of interpenetrating polymer-like network based on polyethylene/poly(styrene-co-butylmethacrylate) (PE/P(S-co-BMA)) by non-radiative energy transfer, 279
- Fluorescence quantum yield
 Nodal-plane model for excited-state intramolecular proton transfer of *o*-hydroxybenzaldehyde: substituent effect, 23
- Furocoumarins
 Theoretical study of phototoxic reactions of psoralens, 235
- GC–MS
 Photodegradation of lignin from black liquor using a UV/TiO₂ system, 211
- Heterogeneous photocatalysis
 Photocatalytic oxidation of oxalic acid enhanced by silver deposition on a TiO₂ surface, 195
- Hydrogen-bonded complexes
 Electronic and vibrational spectroscopy of jet-cooled complexes of *o*-cyanophenol, 41
- Hydrophobic effect
 Excited-state proton transfer to solvent of protonated aniline derivatives in aqueous solution: a remarkable effect of *ortho* alkyl group on the proton-dissociation rate, 53
- Hydroxyarene
 Intermolecular photochemical proton transfer in solution: new insights and perspectives, 3
- o*-Hydroxybenzaldehyde
 Nodal-plane model for excited-state intramolecular proton transfer of *o*-hydroxybenzaldehyde: substituent effect, 23
- Hypocrellin
 A comparison of the excited-state processes of nearly symmetrical perylene quinones: hypocrellin A and hypomycin B, 107
- Hypomycin
 A comparison of the excited-state processes of nearly symmetrical perylene quinones: hypocrellin A and hypomycin B, 107
- INDO/SCI
 Electronic properties of small model compounds that undergo excited-state intramolecular proton transfer as measured by electroabsorption spectroscopy, 69
- Intermolecular proton transfer mechanism
 Synthesis, structure and photochromic properties of 4-acyl pyrazolone derivatives, 117
- Internal conversion
 Excited-state intramolecular proton transfer in photochromic jet-cooled *N*-salicylideneaniline, 33
- Interpenetrating polymer-like network
 Characterization of interpenetrating polymer-like network based on polyethylene/poly(styrene-co-butylmethacrylate) (PE/P(S-co-BMA)) by non-radiative energy transfer, 279
- Intersecting-state model
 Intersecting-state model calculations on fast and ultrafast excited-state proton transfers in naphthols and substituted naphthols, 13
- Ionisation potentials
 Photoconductive molecular glasses consisting of twin molecules, 161
- IR emission
 Infrared multiphoton dissociation of propynal: time resolved observation of CO ($\nu \geq 1$) IR emission at 4.7 μm , 259
- Iron complexes
 Photooxidation of bis(diethyldithiocarbamato)dicarbonyliron(II) in chloroform, 289
- Iron–sulfur compounds
 Photooxidation of bis(diethyldithiocarbamato)dicarbonyliron(II) in chloroform, 289
- Kinetic isotope effects
 Intersecting-state model calculations on fast and ultrafast excited-state proton transfers in naphthols and substituted naphthols, 13
- Laser flash photolysis
 Photophysical and photochemical properties of amitriptyline and nor-triptyline hydrochloride: a 266 nm nanosecond laser flash and theoretical study, 245
 Aqueous photochemistry of pesticides triadimefon and triadimenol, 293
- Laser irradiation
 The novel use of NMR spectroscopy with in situ laser irradiation to study azo photoisomerisation, 179
- Lignin
 Photodegradation of lignin from black liquor using a UV/TiO₂ system, 211

- Low-molar-mass glasses
Photoconductive molecular glasses consisting of twin molecules, 161
- Luminescence
A novel family of twisted molecular luminescent materials containing carbazole unit for single-layer organic electroluminescent devices, 169
- Micelles
A comparison of the excited-state processes of nearly symmetrical perylene quinones: hypocrellin A and hypomycin B, 107
- Microwave
Photochemistry of alkyl aryl ketones on alumina, silica-gel and water ice surfaces, 155
- Molecular oxygen
Theoretical study of phototoxic reactions of psoralens, 235
- Multiphoton dissociation
Infrared multiphoton dissociation of propynal: time resolved observation of CO ($\nu \geq 1$) IR emission at 4.7 μm , 259
- Naphthalimide
A novel family of twisted molecular luminescent materials containing carbazole unit for single-layer organic electroluminescent devices, 169
- Naphthol
Intersecting-state model calculations on fast and ultrafast excited-state proton transfers in naphthols and substituted naphthols, 13
- 2-Naphthol
Spectrophotometric study of photosensitized dechlorination of isomeric mono- and dichloronitrobenzenes, 303
- 3-NBSA
Influence of metallic species on TiO₂ for the photocatalytic degradation of dyes and dye intermediates, 189
- NMR spectroscopy
The novel use of NMR spectroscopy with in situ laser irradiation to study azo photoisomerisation, 179
- Nodal-plane model
Nodal-plane model for excited-state intramolecular proton transfer of *o*-hydroxybenzaldehyde: substituent effect, 23
- Non-radiative energy transfer
Characterization of interpenetrating polymer-like network based on polyethylene/poly(styrene-co-butylmethacrylate) (PE/P(S-co-BMA)) by non-radiative energy transfer, 279
- Nortriptyline
Photophysical and photochemical properties of amitriptyline and nortriptyline hydrochloride: a 266 nm nanosecond laser flash and theoretical study, 245
- Oxalic acid
Photocatalytic oxidation of oxalic acid enhanced by silver deposition on a TiO₂ surface, 195
- Oxidation
Photocatalytic oxidation of oxalic acid enhanced by silver deposition on a TiO₂ surface, 195
- Oxidation potentials
Structure elucidation of the photoproducts obtained by the photolysis of *N*-acetyl-2-styrylpyrroles, 123
- Oxygen sensor
Probing the extent of [O₂] depletion and [Cl⁻] production simultaneously at an illuminated TiO₂ surface employing simple electrochemical methods, 229
- Phenanthrene
Characterization of interpenetrating polymer-like network based on polyethylene/poly(styrene-co-butylmethacrylate) (PE/P(S-co-BMA)) by non-radiative energy transfer, 279
- Photocatalysis
Influence of metallic species on TiO₂ for the photocatalytic degradation of dyes and dye intermediates, 189
- Decomposition of gas-phase octamethyltrisiloxane on TiO₂ thin film photocatalysts—catalytic activity, deactivation, and regeneration, 203
- Photocatalyst deactivation
Decomposition of gas-phase octamethyltrisiloxane on TiO₂ thin film photocatalysts—catalytic activity, deactivation, and regeneration, 203
- Photocatalyst regeneration
Decomposition of gas-phase octamethyltrisiloxane on TiO₂ thin film photocatalysts—catalytic activity, deactivation, and regeneration, 203
- Photocatalytic detoxification
Photocatalytic destruction of potassium hydrogen phthalate using TiO₂ and sunlight: application for the treatment of industrial wastewater, 219
- Photochemical proton transfer
Intermolecular photochemical proton transfer in solution: new insights and perspectives, 3
- Photochemistry
Structure elucidation of the photoproducts obtained by the photolysis of *N*-acetyl-2-styrylpyrroles, 123
Photochemistry of alkyl aryl ketones on alumina, silica-gel and water ice surfaces, 155
- Photochemistry and quantum theoretical calculations
Photophysical and photochemical properties of amitriptyline and nortriptyline hydrochloride: a 266 nm nanosecond laser flash and theoretical study, 245
- Photochromism
Excited-state intramolecular proton transfer in photochromic jet-cooled *N*-salicylideneaniline, 33
Synthesis, structure and photochromic properties of 4-acyl pyrazolone derivants, 117
Steric substituent effects of new photochromic tetrahydroindolizines leading to tunable photophysical behavior of the colored betaines, 131
- Photoconductivity
Photoconductive molecular glasses consisting of twin molecules, 161
- Photoelectrochemical reduction
Photoelectrochemical reduction of nitrite ions to ammonia on CdS photocatalysts, 299
- Photoisomerisation
The novel use of NMR spectroscopy with in situ laser irradiation to study azo photoisomerisation, 179
- Photolysis
Structure elucidation of the photoproducts obtained by the photolysis of *N*-acetyl-2-styrylpyrroles, 123
- Photomineralisation
Probing the extent of [O₂] depletion and [Cl⁻] production simultaneously at an illuminated TiO₂ surface employing simple electrochemical methods, 229
- Photooxidation
Decomposition of gas-phase octamethyltrisiloxane on TiO₂ thin film photocatalysts—catalytic activity, deactivation, and regeneration, 203
Photooxidation of bis(diethyldithiocarbamate)dicarbonyliron(II) in chloroform, 289
- Photoprotonation
Excited state proton transfer to and from carbon: studies of enhanced excited state basicity of biphenyl derivatives and carbon acidity of dibenzosuberenes, 93
- Photosensitized dechlorination
Spectrophotometric study of photosensitized dechlorination of isomeric mono- and dichloronitrobenzenes, 303
- Phototautomer
Excited state intramolecular proton transfer in 2-(2'-hydroxyphenyl)-1H-imidazo[4,5-c]pyridine: effects of solvents, 81
- Phototautomerization
In search for phototautomerization in solid dipyrido[2,3-*a*:3',2'-*i*]carbazole, 61

- Phototoxicity
Theoretical study of phototoxic reactions of psoralens, 235
- Phototransposition
Structure elucidation of the photoproducts obtained by the photolysis of *N*-acetyl-2-styrylpyrroles, 123
- Polymethylmethacrylate
Triplet state energy and electron transfer in coronene-doped polymethylmethacrylate, 267
- Poor man's model
Photocatalytic destruction of potassium hydrogen phthalate using TiO₂ and sunlight: application for the treatment of industrial wastewater, 219
- Propynal
Infrared multiphoton dissociation of propynal: time resolved observation of CO ($v \geq 1$) IR emission at 4.7 μm , 259
- Proton transfer
Excited-state intramolecular proton transfer in photochromic jet-cooled *N*-salicylideneaniline, 33
Electronic and vibrational spectroscopy of jet-cooled complexes of *o*-cyanophenol, 41
Excited-state proton transfer to solvent of protonated aniline derivatives in aqueous solution: a remarkable effect of *ortho* alkyl group on the proton-dissociation rate, 53
- Proton-transfer rates
Intersecting-state model calculations on fast and ultrafast excited-state proton transfers in naphthols and substituted naphthols, 13
- Psoralens
Theoretical study of phototoxic reactions of psoralens, 235
- Pump-probe absorption spectroscopy
A comparison of the excited-state processes of nearly symmetrical perylene quinones: hypocrellin A and hypomycin B, 107
- Pyrazolone
Synthesis, structure and photochromic properties of 4-acyl pyrazolone derivatives, 117
- 1-(*n*-Pyridyl)-2-(pentamethyldisilanyl)ethynes
Solvent effects on the photochemical behavior of 1-(*n*-pyridyl)-2-(pentamethyldisilanyl)ethynes ($n = 2, 3, \text{ or } 4$), aza analogs of 1-phenyl-2-(pentamethyldisilanyl)ethyne, 145
- Pyrroles
Structure elucidation of the photoproducts obtained by the photolysis of *N*-acetyl-2-styrylpyrroles, 123
- Quenching
Excited-state proton transfer to solvent of protonated aniline derivatives in aqueous solution: a remarkable effect of *ortho* alkyl group on the proton-dissociation rate, 53
- Rate of reaction
Spectrophotometric study of photosensitized dechlorination of isomeric mono- and dichloronitrobenzenes, 303
- N*-Salicylideneaniline
Excited-state intramolecular proton transfer in photochromic jet-cooled *N*-salicylideneaniline, 33
- 1-Sila-1,2-propadiene
Solvent effects on the photochemical behavior of 1-(*n*-pyridyl)-2-(pentamethyldisilanyl)ethynes ($n = 2, 3, \text{ or } 4$), aza analogs of 1-phenyl-2-(pentamethyldisilanyl)ethyne, 145
- Silacyclopentene
Solvent effects on the photochemical behavior of 1-(*n*-pyridyl)-2-(pentamethyldisilanyl)ethynes ($n = 2, 3, \text{ or } 4$), aza analogs of 1-phenyl-2-(pentamethyldisilanyl)ethyne, 145
- Silica-gel
Photochemistry of alkyl aryl ketones on alumina, silica-gel and water ice surfaces, 155
- Siloxane
Decomposition of gas-phase octamethyltrisiloxane on TiO₂ thin film photocatalysts—catalytic activity, deactivation, and regeneration, 203
- Silver
Influence of metallic species on TiO₂ for the photocatalytic degradation of dyes and dye intermediates, 189
- Silver deposition
Photocatalytic oxidation of oxalic acid enhanced by silver deposition on a TiO₂ surface, 195
- Single-layer OLED
A novel family of twisted molecular luminescent materials containing carbazole unit for single-layer organic electroluminescent devices, 169
- Spectrophotometric
Spectrophotometric study of photosensitized dechlorination of isomeric mono- and dichloronitrobenzenes, 303
- Spectroscopy in supersonic jet
Electronic and vibrational spectroscopy of jet-cooled complexes of *o*-cyanophenol, 41
- Stark
Electronic properties of small model compounds that undergo excited-state intramolecular proton transfer as measured by electroabsorption spectroscopy, 69
- Steric hindrance
Steric substituent effects of new photochromic tetrahydroindolizines leading to tunable photophysical behavior of the colored betaines, 131
- Substituent effect
Nodal-plane model for excited-state intramolecular proton transfer of *o*-hydroxybenzaldehyde: substituent effect, 23
Excited-state proton transfer to solvent of protonated aniline derivatives in aqueous solution: a remarkable effect of *ortho* alkyl group on the proton-dissociation rate, 53
- Supersonic jet
Excited-state intramolecular proton transfer in photochromic jet-cooled *N*-salicylideneaniline, 33
- Surface
Photochemistry of alkyl aryl ketones on alumina, silica-gel and water ice surfaces, 155
- Synthesis
Synthesis, structure and photochromic properties of 4-acyl pyrazolone derivatives, 117
- Tartrazine
Influence of metallic species on TiO₂ for the photocatalytic degradation of dyes and dye intermediates, 189
- TD-DFT
Theoretical study of phototoxic reactions of psoralens, 235
- Tetrahydroindolizines
Steric substituent effects of new photochromic tetrahydroindolizines leading to tunable photophysical behavior of the colored betaines, 131
- Thenoyltrifluoroacetone
Chemiluminescence as the energy transfer effect in the system Eu(III)–thenoyltrifluoroacetone–H₂O₂–NaOH, 273
- Time correlated single photon counting
A comparison of the excited-state processes of nearly symmetrical perylene quinones: hypocrellin A and hypomycin B, 107
- TiO₂
Photocatalytic oxidation of oxalic acid enhanced by silver deposition on a TiO₂ surface, 195
Photodegradation of lignin from black liquor using a UV/TiO₂ system, 211
- TiO₂ thin film
Probing the extent of [O₂] depletion and [Cl[−]] production simultaneously at an illuminated TiO₂ surface employing simple electrochemical methods, 229
- Titanium dioxide
Photocatalytic destruction of potassium hydrogen phthalate using TiO₂ and sunlight: application for the treatment of industrial wastewater, 219

- Triadimefon
Aqueous photochemistry of pesticides triadimefon and triadimenol, 293
- Triadimenol
Aqueous photochemistry of pesticides triadimefon and triadimenol, 293
- 1,2,4-Triazole
Aqueous photochemistry of pesticides triadimefon and triadimenol, 293
- Tricyclic antidepressive
Photophysical and photochemical properties of amitriptyline and nortriptyline hydrochloride: a 266 nm nanosecond laser flash and theoretical study, 245
- Triplet state
Triplet state energy and electron transfer in coronene-doped polymethylmethacrylate, 267
- Valerophenone
Photochemistry of alkyl aryl ketones on alumina, silica-gel and water ice surfaces, 155
- Vanadate
Influence of metallic species on TiO₂ for the photocatalytic degradation of dyes and dye intermediates, 189
- Wastewater
Photocatalytic destruction of potassium hydrogen phthalate using TiO₂ and sunlight: application for the treatment of industrial wastewater, 219
- X-ray analysis
In search for phototautomerization in solid dipyrro[2,3-*a*:3',2'-*i*]carbazole, 61
