

Subject Index of Volume 165

Acetaldehyde

Visible light induced photocatalytic activity for degradation of acetaldehyde using transition metal incorporated Al-MCM-41 (aluminum doped silica zeolitic material), 51

Acetone

The effect of delay time on the CO and CH₃ radicals resulting from the photolysis of acetone by 193 nm excimer laser, 187

Additive

Influence of quinoline derivatives in I⁻/I₃⁻ redox electrolyte solution on the performance of Ru(II)-dye-sensitized nanocrystalline TiO₂ solar cell, 157

Advanced oxidation

Application of photoactivated periodate to the decolorization of reactive dye: reaction parameters and mechanism, 35

Al-MCM-41

Visible light induced photocatalytic activity for degradation of acetaldehyde using transition metal incorporated Al-MCM-41 (aluminum doped silica zeolitic material), 51

Aniline

Photoinduced intra-molecular electron transfer in aniline-containing Ru(II) polypyridine complexes, 137

Antibiotic formulation effluent

Photo-Fenton-like and photo-fenton-like oxidation of Procaine Penicillin G formulation effluent, 165

Arenesulfinylethenyl group

Novel sulfoxide-introducing reaction and photochromic reactions of ethenylsulfinyl derivatives of dithienylethenes, 97

Artificial neural network

Neural computation to predict TiO₂ photocatalytic efficiency for nitrogen oxides removal, 91

Aspergillus niger

Solar photocatalytic disinfection of a group of bacteria and fungi aqueous suspensions with TiO₂, ZnO and Sahara desert dust, 103

Bacteriochlorophyll c

Photo-degradation of bacteriochlorophyll c in intact cells and extracts from *Chlorobium tepidum*, 75

Bichromophoric molecules

Bichromophoric fluorescent dyes with rigid molecular structure: fluorescence ability regulation by the photoinduced intramolecular electron transfer, 59

Biodegradability

Photo-Fenton-like and photo-fenton-like oxidation of Procaine Penicillin G formulation effluent, 165

2- Butylamino-2-demethoxy-hypocrellin B

The photophysical characteristics of 2- butylamino-2-demethoxy-hypocrellin B, 3

CAC

3-Benzoxazol-2-yl-7-(*N,N*-diethylamino)-chromen-2-one as a fluorescence probe for the investigation of micellar microenvironments, 109

Candida albicans

Solar photocatalytic disinfection of a group of bacteria and fungi aqueous suspensions with TiO₂, ZnO and Sahara desert dust, 103

CCl₄

Novel complexation between ferric ions and nonionic surfactants (Brij) and its visible light activity for CCl₄ degradation in aqueous micellar solutions, 43

Charge delocalization energy

Intramolecular dimer radical cations of α,ω -di(2-naphthyl)alkanes in solutions studied by near-IR transient absorption spectroscopy, 69

Charge resonance band

Intramolecular dimer radical cations of α,ω -di(2-naphthyl)alkanes in solutions studied by near-IR transient absorption spectroscopy, 69

Chemiluminescent probe

Evidence of superoxide radical formation in the photodegradation of pesticide on the dye modified TiO₂ surface using visible light, 19

Chlorobium tepidum

Photo-degradation of bacteriochlorophyll c in intact cells and extracts from *Chlorobium tepidum*, 75

Chlorophenols

Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229

CMC

3-Benzoxazol-2-yl-7-(*N,N*-diethylamino)-chromen-2-one as a fluorescence probe for the investigation of micellar microenvironments, 109

Coumarin derivative

3-Benzoxazol-2-yl-7-(*N,N*-diethylamino)-chromen-2-one as a fluorescence probe for the investigation of micellar microenvironments, 109

m-Cresol

An experimental and theoretical investigation of the photocatalytic degradation of *meta*-cresol in TiO₂ suspensions: a model for the product distribution, 119

Crystal structure

Tuning fluorescence properties of imidazole derivatives with thiophene and thiazole, 223

Dechlorination

Novel complexation between ferric ions and nonionic surfactants (Brij) and its visible light activity for CCl₄ degradation in aqueous micellar solutions, 43

Diarylethenes

Novel sulfoxide-introducing reaction and photochromic reactions of ethenylsulfinyl derivatives of dithienylethenes, 97

Diels-Alder reaction

Novel sulfoxide-introducing reaction and photochromic reactions of ethenylsulfinyl derivatives of dithienylethenes, 97

β -Diketonate complexes

Intraligand phosphorescence of lead(II) β -diketonates under ambient conditions, 115

Dye pollutant

UV or visible light induced photodegradation of AO7 on TiO₂ particles: the influence of inorganic anions, 201

- Dye-sensitized solar cell
Influence of quinoline derivatives in I^-/I_3^- redox electrolyte solution on the performance of Ru(II)-dye-sensitized nanocrystalline TiO_2 solar cell, 157
- Electrolytic solution
Influence of quinoline derivatives in I^-/I_3^- redox electrolyte solution on the performance of Ru(II)-dye-sensitized nanocrystalline TiO_2 solar cell, 157
- Environmental
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229
- Escherichia coli*
Solar photocatalytic disinfection of a group of bacteria and fungi aqueous suspensions with TiO_2 , ZnO and Sahara desert dust, 103
- External heavy-atom effect
The photophysical characteristics of 2-butylamino-2-demethoxy-hypocrellin B, 3
- Ferric ion
Novel complexation between ferric ions and nonionic surfactants (Brij) and its visible light activity for CCl_4 degradation in aqueous micellar solutions, 43
- Fluorescence
The fluorescent and photoelectric conversion properties of phthalocyanine–perylene tetracarboxylic complexes, 193
Tuning fluorescence properties of imidazole derivatives with thiophene and thiazole, 223
- Fluorescence quenching
Bichromophoric fluorescent dyes with rigid molecular structure: fluorescence ability regulation by the photoinduced intramolecular electron transfer, 59
- Fluorescent probe
3-Benzoxazol-2-yl-7-(*N,N*-diethylamino)-chromen-2-one as a fluorescence probe for the investigation of micellar microenvironments, 109
- Fluorescent whitening agents
The generation of superoxide and hydrogen peroxide by exposure of fluorescent whitening agents to UVA radiation and its relevance to the rapid photoyellowing of whitened wool, 177
- Hydrogen peroxide
The generation of superoxide and hydrogen peroxide by exposure of fluorescent whitening agents to UVA radiation and its relevance to the rapid photoyellowing of whitened wool, 177
- 1-Hydroxyanthraquinone
Mechanism of the photoamination of 1-hydroxyanthraquinone reaction in acetonitrile under air, 11
- Hydroxyl radicals
An experimental and theoretical investigation of the photocatalytic degradation of *meta*-cresol in TiO_2 suspensions: a model for the product distribution, 119
- Hypocrellin A
Surface binding and improved photodamage of the lanthanum ion complex of hypocrellin A to calf thymus DNA, 143
- Imidazole
Tuning fluorescence properties of imidazole derivatives with thiophene and thiazole, 223
- Iminochromenes
Bichromophoric fluorescent dyes with rigid molecular structure: fluorescence ability regulation by the photoinduced intramolecular electron transfer, 59
- Infrared multiphoton dissociation
Infrared multiphoton dissociation of SiF_4 : gas phase reactions of SiF_3 with F and H_2 , 209
- Inorganic anions
UV or visible light induced photodegradation of AO7 on TiO_2 particles: the influence of inorganic anions, 201
- Inter-/intra-molecular electron transfer
Photoinduced intra-molecular electron transfer in aniline-containing Ru(II) polypyridine complexes, 137
- Intramolecular dimer radical cation
Intramolecular dimer radical cations of α,ω -di(2-naphthyl)alkanes in solutions studied by near-IR transient absorption spectroscopy, 69
- Intramolecular electron transfer
Bichromophoric fluorescent dyes with rigid molecular structure: fluorescence ability regulation by the photoinduced intramolecular electron transfer, 59
- Intramolecular H-atom transfer
Photoreactions of 2-methyl-5-isopropyl-1,4-benzoquinone, 215
- Ionic liquids
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229
- Lanthanum ion complex
Surface binding and improved photodamage of the lanthanum ion complex of hypocrellin A to calf thymus DNA, 143
- Lead complexes
Intraligand phosphorescence of lead(II) β -diketonates under ambient conditions, 115
- Lophine
Tuning fluorescence properties of imidazole derivatives with thiophene and thiazole, 223
- Luminol
Evidence of superoxide radical formation in the photodegradation of pesticide on the dye modified TiO_2 surface using visible light, 19
- Mechanism
Mechanism of the photoamination of 1-hydroxyanthraquinone reaction in acetonitrile under air, 11
- Mechanochemical reaction
Preparation and characterization of nitrogen doped $SrTiO_3$ photocatalyst, 149
- Mesoporous
Visible light induced photocatalytic activity for degradation of acetaldehyde using transition metal incorporated Al-MCM-41 (aluminum doped silica zeolitic material), 51
- Metallophthalocyanine
Photodynamic applications of phthalocyanines, 131
- Micropolarity
3-Benzoxazol-2-yl-7-(*N,N*-diethylamino)-chromen-2-one as a fluorescence probe for the investigation of micellar microenvironments, 109
- Microviscosity
3-Benzoxazol-2-yl-7-(*N,N*-diethylamino)-chromen-2-one as a fluorescence probe for the investigation of micellar microenvironments, 109
- Microwave
Photodynamic applications of phthalocyanines, 131
The fluorescent and photoelectric conversion properties of phthalocyanine–perylene tetracarboxylic complexes, 193
- Naphthalene
Intramolecular dimer radical cations of α,ω -di(2-naphthyl)alkanes in solutions studied by near-IR transient absorption spectroscopy, 69
- Near-IR transient absorption spectroscopy
Intramolecular dimer radical cations of α,ω -di(2-naphthyl)alkanes in solutions studied by near-IR transient absorption spectroscopy, 69
- Nitrogen doping
Preparation and characterization of nitrogen doped $SrTiO_3$ photocatalyst, 149

- Nitrogen oxides removal
Neural computation to predict TiO₂ photocatalytic efficiency for nitrogen oxides removal, 91
- NO elimination
Preparation and characterization of nitrogen doped SrTiO₃ photocatalyst, 149
- Periodate
Application of photoactivated periodate to the decolorization of reactive dye: reaction parameters and mechanism, 35
- Persulfate
The photo-oxidation of water by sodium persulfate, and other electron acceptors, sensitised by TiO₂, 25
- Perylene
The fluorescent and photoelectric conversion properties of phthalocyanine–perylene tetracarboxylic complexes, 193
- Pesticide
Evidence of superoxide radical formation in the photodegradation of pesticide on the dye modified TiO₂ surface using visible light, 19
- Phosphorescence
Intraligand phosphorescence of lead(II) β -diketonates under ambient conditions, 115
- Photoamination
Mechanism of the photoamination of 1-hydroxyanthraquinone reaction in acetonitrile under air, 11
- Photocatalysis
The photo-oxidation of water by sodium persulfate, and other electron acceptors, sensitised by TiO₂, 25
Neural computation to predict TiO₂ photocatalytic efficiency for nitrogen oxides removal, 91
- Photocatalyst
Visible light induced photocatalytic activity for degradation of acetaldehyde using transition metal incorporated Al-MCM-41 (aluminum doped silica zeolitic material), 51
- Photocatalytic activity
Preparation and characterization of nitrogen doped SrTiO₃ photocatalyst, 149
- Photocatalytic degradation
An experimental and theoretical investigation of the photocatalytic degradation of *meta*-cresol in TiO₂ suspensions: a model for the product distribution, 119
- Photocatalytic disinfection
Solar photocatalytic disinfection of a group of bacteria and fungi aqueous suspensions with TiO₂, ZnO and Sahara desert dust, 103
- Photochromism
Novel sulfoxide-introducing reaction and photochromic reactions of ethenylsulfanyl derivatives of dithienylethenes, 97
- Photodamage of DNA
Surface binding and improved photodamage of the lanthanum ion complex of hypocrellin A to calf thymus DNA, 143
- Photodegradation
Evidence of superoxide radical formation in the photodegradation of pesticide on the dye modified TiO₂ surface using visible light, 19
Photo-degradation of bacteriochlorophyll c in intact cells and extracts from *Chlorobium tepidum*, 75
An experimental and theoretical investigation of the photocatalytic degradation of *meta*-cresol in TiO₂ suspensions: a model for the product distribution, 119
UV or visible light induced photodegradation of AO7 on TiO₂ particles: the influence of inorganic anions, 201
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229
- Photodynamic
Photodynamic applications of phthalocyanines, 131
- Photoelectric conversion
The fluorescent and photoelectric conversion properties of phthalocyanine–perylene tetracarboxylic complexes, 193
- Photo-Fenton-like oxidation
Photo-Fenton-like and photo-fenton-like oxidation of Procaine Penicillin G formulation effluent, 165
- Photolysis
The effect of delay time on the CO and CH₃ radicals resulting from the photolysis of acetone by 193 nm excimer laser, 187
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229
- Photolytic degradation
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229
- Photooxidation
Photo-degradation of bacteriochlorophyll c in intact cells and extracts from *Chlorobium tepidum*, 75
The generation of superoxide and hydrogen peroxide by exposure of fluorescent whitening agents to UVA radiation and its relevance to the rapid photoyellowing of whitened wool, 177
- Photoreduction
Photoreactions of 2-methyl-5-isopropyl-1,4-benzoquinone, 215
- Photosensitizer
Photodynamic applications of phthalocyanines, 131
- Phthalocyanine
Photodynamic applications of phthalocyanines, 131
The fluorescent and photoelectric conversion properties of phthalocyanine–perylene tetracarboxylic complexes, 193
- PM3 method
An experimental and theoretical investigation of the photocatalytic degradation of *meta*-cresol in TiO₂ suspensions: a model for the product distribution, 119
- Procaine Penicillin G
Photo-Fenton-like and photo-fenton-like oxidation of Procaine Penicillin G formulation effluent, 165
- Protolytic equilibria
Bichromophoric fluorescent dyes with rigid molecular structure: fluorescence ability regulation by the photoinduced intramolecular electron transfer, 59
- Pseudomonas aeruginosa*
Solar photocatalytic disinfection of a group of bacteria and fungi aqueous suspensions with TiO₂, ZnO and Sahara desert dust, 103
- Purification
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229
- Quantum yield
Novel sulfoxide-introducing reaction and photochromic reactions of ethenylsulfanyl derivatives of dithienylethenes, 97
- Quinolines
Influence of quinoline derivatives in I⁻/I₃⁻ redox electrolyte solution on the performance of Ru(II)-dye-sensitized nanocrystalline TiO₂ solar cell, 157
- Quinones
Photoreactions of 2-methyl-5-isopropyl-1,4-benzoquinone, 215
- Radical
The effect of delay time on the CO and CH₃ radicals resulting from the photolysis of acetone by 193 nm excimer laser, 187
Photoreactions of 2-methyl-5-isopropyl-1,4-benzoquinone, 215
- Reaction rate
Infrared multiphoton dissociation of SiF₄: gas phase reactions of SiF₃ with F and H₂, 209
- Reactive dye
Application of photoactivated periodate to the decolorization of reactive dye: reaction parameters and mechanism, 35
- Recyclability
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229

- Ring-closure probability
Intramolecular dimer radical cations of α,ω -di(2-naphthyl)alkanes in solutions studied by near-IR transient absorption spectroscopy, 69
- RTIL
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229
- Ruthenium complex
Photoinduced intra-molecular electron transfer in aniline-containing Ru(II) polypyridine complexes, 137
- Saccharomyces cerevisiae*
Solar photocatalytic disinfection of a group of bacteria and fungi aqueous suspensions with TiO₂, ZnO and Sahara desert dust, 103
- Sahara desert dust
Solar photocatalytic disinfection of a group of bacteria and fungi aqueous suspensions with TiO₂, ZnO and Sahara desert dust, 103
- Silicon tetrafluoride
Infrared multiphoton dissociation of SiF₄: gas phase reactions of SiF₃ with F and H₂, 209
- Singlet oxygen
The generation of superoxide and hydrogen peroxide by exposure of fluorescent whitening agents to UVA radiation and its relevance to the rapid photoyellowing of whitened wool, 177
- Singlet state
The photophysical characteristics of 2-butylamino-2-demethoxy-hypocrellin B, 3
- Solar photocatalysis
Titanium dioxide sol-gel deposited over glass and its application as a photocatalyst for water decontamination, 241
- SrTiO₃
Preparation and characterization of nitrogen doped SrTiO₃ photocatalyst, 149
- Stability
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229
- Staphylococcus aureus*
Solar photocatalytic disinfection of a group of bacteria and fungi aqueous suspensions with TiO₂, ZnO and Sahara desert dust, 103
- Superoxide radical anion
The generation of superoxide and hydrogen peroxide by exposure of fluorescent whitening agents to UVA radiation and its relevance to the rapid photoyellowing of whitened wool, 177
- Surface binding
Surface binding and improved photodamage of the lanthanum ion complex of hypocrellin A to calf thymus DNA, 143
- Surfactant micelle
Novel complexation between ferric ions and nonionic surfactants (Brij) and its visible light activity for CCl₄ degradation in aqueous micellar solutions, 43
- Thiazole
Tuning fluorescence properties of imidazole derivatives with thiophene and thiazole, 223
- Thionine and eosin Y
Evidence of superoxide radical formation in the photodegradation of pesticide on the dye modified TiO₂ surface using visible light, 19
- Thiophene
Tuning fluorescence properties of imidazole derivatives with thiophene and thiazole, 223
- TiO₂
The photo-oxidation of water by sodium persulfate, and other electron acceptors, sensitised by TiO₂, 25
Neural computation to predict TiO₂ photocatalytic efficiency for nitrogen oxides removal, 91
Solar photocatalytic disinfection of a group of bacteria and fungi aqueous suspensions with TiO₂, ZnO and Sahara desert dust, 103
UV or visible light induced photodegradation of AO7 on TiO₂ particles: the influence of inorganic anions, 201
- TiO₂ immobilization
Titanium dioxide sol-gel deposited over glass and its application as a photocatalyst for water decontamination, 241
- TiO₂ semiconductor
Evidence of superoxide radical formation in the photodegradation of pesticide on the dye modified TiO₂ surface using visible light, 19
- Titanium dioxide films
Titanium dioxide sol-gel deposited over glass and its application as a photocatalyst for water decontamination, 241
- Toxicity
Photo-Fenton-like and photo-fenton-like oxidation of Procaine Penicillin G formulation effluent, 165
- Trifluorosilyl
Infrared multiphoton dissociation of SiF₄: gas phase reactions of SiF₃ with F and H₂, 209
- Triplet state
The photophysical characteristics of 2-butylamino-2-demethoxy-hypocrellin B, 3
- Ultraviolet irradiation
Application of photoactivated periodate to the decolorization of reactive dye: reaction parameters and mechanism, 35
- UV
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229
- UV irradiation
Visible light induced photocatalytic activity for degradation of acetaldehyde using transition metal incorporated Al-MCM-41 (aluminum doped silica zeolitic material), 51
- UV light
UV or visible light induced photodegradation of AO7 on TiO₂ particles: the influence of inorganic anions, 201
- UV-absorbing impurities
Photolytic degradation of chlorinated phenols in room temperature ionic liquids, 229
- Visible light
UV or visible light induced photodegradation of AO7 on TiO₂ particles: the influence of inorganic anions, 201
- Visible light irradiation
Visible light induced photocatalytic activity for degradation of acetaldehyde using transition metal incorporated Al-MCM-41 (aluminum doped silica zeolitic material), 51
- Visible light photolysis
Novel complexation between ferric ions and nonionic surfactants (Brij) and its visible light activity for CCl₄ degradation in aqueous micellar solutions, 43
- Water oxidation
The photo-oxidation of water by sodium persulfate, and other electron acceptors, sensitised by TiO₂, 25
- Wool
The generation of superoxide and hydrogen peroxide by exposure of fluorescent whitening agents to UVA radiation and its relevance to the rapid photoyellowing of whitened wool, 177
- ZnO
Solar photocatalytic disinfection of a group of bacteria and fungi aqueous suspensions with TiO₂, ZnO and Sahara desert dust, 103
- Zwitterion
Photoreactions of 2-methyl-5-isopropyl-1,4-benzoquinone, 215
