

Subject Index of Volume 175

- Absorbance**
A wide-range fluorescent pH-indicator based on 3-hydroxyflavone structure, 226
- Absorption**
Influence of substituents in the phenyl ring on photophysical properties of 3-[2-(phenyl)benzoxazol-5-yl]alanine derivatives, 57
- Activation energy**
Solvent effects on the quenching of the equilibrating n,π^* and π,π^* triplet states of 9,10-phenanthrenequinone by 2-propanol, 154
- Adsorption**
On the mechanism of TiO₂-photocatalyzed degradation of aniline derivatives, 192
- Aniline**
On the mechanism of TiO₂-photocatalyzed degradation of aniline derivatives, 192
- Anilinium radical cation**
On the mechanism of TiO₂-photocatalyzed degradation of aniline derivatives, 192
- Aniliny radical**
On the mechanism of TiO₂-photocatalyzed degradation of aniline derivatives, 192
- Antraquinone**
Two new anthraquinone photoreactions, 118
- Antimalarial drugs**
Reaction of singlet molecular oxygen, O₂(¹Δ_g), with the *Cinchona* tree alkaloids. Effect of absolute configuration on the total rate constant, 146
- Antimicrobial activity**
Intramolecular 4π photocyclization of chalconoid-like compounds in solution and antimicrobial activities, 22
- Aromatic ketone**
Solvent effects on the quenching of the equilibrating n,π^* and π,π^* triplet states of 9,10-phenanthrenequinone by 2-propanol, 154
- Azobenzene**
Modulation of the catalytic mechanism of hen egg white lysozyme (HEWL) by photochromism of azobenzene, 100
- Benzoxazol-5-yl-alanine**
Influence of substituents in the phenyl ring on photophysical properties of 3-[2-(phenyl)benzoxazol-5-yl]alanine derivatives, 57
- Cinchona* tree alkaloids**
Reaction of singlet molecular oxygen, O₂(¹Δ_g), with the *Cinchona* tree alkaloids. Effect of absolute configuration on the total rate constant, 146
- Conducting materials**
New branched hydrazones as hole transporting materials, 39
- Correction of pileup error**
Abstracting reliable parameters from time-correlated single photon counting experiments. I. A consideration of how many photons need to be collected and a simple pileup error correction for poly-exponential decay profiles without convolution of the lamp profile, 221
- Cyclobutene**
Intramolecular 4π photocyclization of chalconoid-like compounds in solution and antimicrobial activities, 22
- Cyclodextrins**
Excited state intermolecular proton transfer and caging of salicylidine-3,4,7-methyl amine in cyclodextrins, 94
- Dibutyl phthalate**
Photocatalytic ozonation of dibutyl phthalate over TiO₂ film, 172
- Dicarboxylic acids**
Selectivity via insertion: Detection of dicarboxylic acids in water by a new film chemosensor with enhanced properties, 207
- Diffusion-controlled reaction**
Effects of long-chain alkyl substituents on the protolytic reactions of naphthols, 178
- Dihydrochalcone**
Intramolecular 4π photocyclization of chalconoid-like compounds in solution and antimicrobial activities, 22
- Dimethoate**
Photocatalytic oxidation of dimethoate in aqueous solutions, 29
- DNA**
Effects of DNA on driving force dependence of photoinduced electron transfer from the excited state of tris(2,2-bipyridine)ruthenium(II) to intercalators in DNA. Distinction between intra- and inter-DNA pathways, 79
- Doping**
Femtosecond to nanosecond spectroscopy of transition metal-doped TiO₂ particles, 8
- Dye-sensitized solar cells**
New low-temperature preparation method of the TiO₂ porous photoelectrode for dye-sensitized solar cells using UV irradiation, 165
- Electron transfer**
Effects of DNA on driving force dependence of photoinduced electron transfer from the excited state of tris(2,2-bipyridine)ruthenium(II) to intercalators in DNA. Distinction between intra- and inter-DNA pathways, 79
Two new anthraquinone photoreactions, 118
- Emulsion**
Heterogeneous photocatalysis in titania-stabilized perfluorocarbon-in-water emulsions: Urea photosynthesis and chloroform photodegradation, 249
- Excited-state proton transfer**
Effects of long-chain alkyl substituents on the protolytic reactions of naphthols, 178
- Expanded corrole**
Modified push-pull expanded corroles: Syntheses, structure and nonlinear optical properties, 108
- Femtosecond spectroscopy**
Femtosecond to nanosecond spectroscopy of transition metal-doped TiO₂ particles, 8
- Film sensor**
Selectivity via insertion: Detection of dicarboxylic acids in water by a new film chemosensor with enhanced properties, 207

- Flavonol
A wide-range fluorescent pH-indicator based on 3-hydroxyflavone structure, 226
- Fluorescence
Influence of substituents in the phenyl ring on photophysical properties of 3-[2-(phenyl)benzoxazol-5-yl]alanine derivatives, 57
Photophysics and photodimerization of 6,5'-dimethylangelicin in different solvents, 69
A wide-range fluorescent pH-indicator based on 3-hydroxyflavone structure, 226
Selectivity via insertion: Detection of dicarboxylic acids in water by a new film chemosensor with enhanced properties, 207
- Fluorescence lifetimes
Photooxidation quantum yield efficiencies of naphthalene diimides under concentrated sun light in comparisons with perylene diimides, 214
- Fluorescence quenching
Photooxidation quantum yield efficiencies of naphthalene diimides under concentrated sun light in comparisons with perylene diimides, 214
- Gas–solid reaction
Hydrogen evolution by photocatalysis of methanol vapor over Ti-beta, 89
- Hen egg white lysozyme
Modulation of the catalytic mechanism of hen egg white lysozyme (HEWL) by photochromism of azobenzene, 100
- Heterogeneous photocatalysis
On the mechanism of TiO₂-photocatalyzed degradation of aniline derivatives, 192
- Hole drift mobility
New branched hydrazones as hole transporting materials, 39
- Hybrids
Construction of lanthanide luminescent molecular-based hybrid material using modified functional bridge chemical bonded with silica, 159
- Hydrazones
New branched hydrazones as hole transporting materials, 39
- Hydrogen abstraction
Two new anthraquinone photoreactions, 118
Solvent effects on the quenching of the equilibrating n,π^* and π,π^* triplet states of 9,10-phenanthrenequinone by 2-propanol, 154
- Hydrogen evolution
Hydrogen evolution by photocatalysis of methanol vapor over Ti-beta, 89
- Hydrotropes
The photopolymerization of styrenesulfonate initiated by dyes. The effect of monomer aggregation, 15
- 3-Hydroxyflavone
A wide-range fluorescent pH-indicator based on 3-hydroxyflavone structure, 226
- Hydroxyl radical
Degradation of methylene blue under multibubble sonoluminescence condition, 45
- Intercalation
Effects of DNA on driving force dependence of photoinduced electron transfer from the excited state of tris(2,2-bipyridine)ruthenium(II) to intercalators in DNA. Distinction between intra- and inter-DNA pathways, 79
Photolysis of 1-pyrenemethylamine ion-exchanged into a zirconium phosphate framework, 201
- Intermolecular proton transfer
Excited state intermolecular proton transfer and caging of salicylidine-3,4,7-methyl amine in cyclodextrins, 94
- Intramolecular charge transfer
Experimental and theoretical study of the intramolecular charge transfer on the derivatives 4-methoxy and 4-acetamide 1,8-naphthalimide N-substituted, 1
- Intramolecular H-atom transfer
Photoreactions of 2,5-dibromo-3-methyl-6-isopropyl-1,4-benzoquinone, 138
- Kinetics
Effects of long-chain alkyl substituents on the protolytic reactions of naphthols, 178
- Lariat-type crown ethers
A novel photochemical approach to the synthesis of naphthalene-containing lariat-type crown ethers and an evaluation of their metal cation binding and fluorescence sensing properties, 232
- Locally excited state
Experimental and theoretical study of the intramolecular charge transfer on the derivatives 4-methoxy and 4-acetamide 1,8-naphthalimide N-substituted, 1
- Low-temperature film preparation
New low-temperature preparation method of the TiO₂ porous photoelectrode for dye-sensitized solar cells using UV irradiation, 165
- LSER
Reaction of singlet molecular oxygen, O₂(¹Δ_g), with the *Cinchona* tree alkaloids. Effect of absolute configuration on the total rate constant, 146
- Luminescence
Construction of lanthanide luminescent molecular-based hybrid material using modified functional bridge chemical bonded with silica, 159
Photolysis of 1-pyrenemethylamine ion-exchanged into a zirconium phosphate framework, 201
- Marcus theory
Effects of DNA on driving force dependence of photoinduced electron transfer from the excited state of tris(2,2-bipyridine)ruthenium(II) to intercalators in DNA. Distinction between intra- and inter-DNA pathways, 79
- Methanol
Hydrogen evolution by photocatalysis of methanol vapor over Ti-beta, 89
- Methylene blue (MB)
Degradation of methylene blue under multibubble sonoluminescence condition, 45
- Mineralization
Photocatalytic oxidation of dimethoate in aqueous solutions, 29
- Mineralization rate constants
Photocatalytic ozonation of dibutyl phthalate over TiO₂ film, 172
- Molecular-based
Construction of lanthanide luminescent molecular-based hybrid material using modified functional bridge chemical bonded with silica, 159
- Molecular glasses
New branched hydrazones as hole transporting materials, 39
- Monomer aggregation
The photopolymerization of styrenesulfonate initiated by dyes. The effect of monomer aggregation, 15
- Multibubble sonoluminescence (MBSL)
Degradation of methylene blue under multibubble sonoluminescence condition, 45
- N,N*-dimethylaniline
On the mechanism of TiO₂-photocatalyzed degradation of aniline derivatives, 192
- Naphthalene-containing
A novel photochemical approach to the synthesis of naphthalene-containing lariat-type crown ethers and an evaluation of their metal cation binding and fluorescence sensing properties, 232
- Naphthalene diimides
Photooxidation quantum yield efficiencies of naphthalene diimides under concentrated sun light in comparisons with perylene diimides, 214
- 1,8-Naphthalimides
Experimental and theoretical study of the intramolecular charge transfer on the derivatives 4-methoxy and 4-acetamide 1,8-naphthalimide N-substituted, 1

- Naphthol
Effects of long-chain alkyl substituents on the protolytic reactions of naphthols, 178
- Nifedipine
Nifedipine and nitrendipine reactivity toward singlet oxygen, 129
- Nitrendipine
Nifedipine and nitrendipine reactivity toward singlet oxygen, 129
- Nonlinear optics
Modified push-pull expanded corroles: Syntheses, structure and nonlinear optical properties, 108
- Number of photons necessary
Abstracting reliable parameters from time-correlated single photon counting experiments. I. A consideration of how many photons need to be collected and a simple pileup error correction for poly-exponential decay profiles without convolution of the lamp profile, 221
- Oxidant
Photocatalytic oxidation of dimethoate in aqueous solutions, 29
- Oxidative coupling reaction
Modified push-pull expanded corroles: Syntheses, structure and nonlinear optical properties, 108
- Pathogenic micro-organism
A comparison of the effectiveness of TiO₂ photocatalysis and UVA photolysis for the destruction of three pathogenic micro-organisms, 51
- Perfluorocarbon
Heterogeneous photocatalysis in titania-stabilized perfluorocarbon-in-water emulsions: Urea photosynthesis and chloroform photodegradation, 249
- pH-Indicator
A wide-range fluorescent pH-indicator based on 3-hydroxyflavone structure, 226
- Photocatalysis
Photocatalytic oxidation of dimethoate in aqueous solutions, 29
A comparison of the effectiveness of TiO₂ photocatalysis and UVA photolysis for the destruction of three pathogenic micro-organisms, 51
New low-temperature preparation method of the TiO₂ porous photoelectrode for dye-sensitized solar cells using UV irradiation, 165
Heterogeneous photocatalysis in titania-stabilized perfluorocarbon-in-water emulsions: Urea photosynthesis and chloroform photodegradation, 249
- Photocatalytic
Hydrogen evolution by photocatalysis of methanol vapor over Ti-beta, 89
- Photocatalytic ozonation
Photocatalytic ozonation of dibutyl phthalate over TiO₂ film, 172
- Photochemical behaviour
Photophysics and photodimerization of 6,5'-dimethylangelicin in different solvents, 69
- Photochromism
Modulation of the catalytic mechanism of hen egg white lysozyme (HEWL) by photochromism of azobenzene, 100
- Photocyclization
Intramolecular 4 π photocyclization of chalconoid-like compounds in solution and antimicrobial activities, 22
A novel photochemical approach to the synthesis of naphthalene-containing lariat-type crown ethers and an evaluation of their metal cation binding and fluorescence sensing properties, 232
- Photodegradation
On the mechanism of TiO₂-photocatalyzed degradation of aniline derivatives, 192
- Photographic developers
Role of sodium sulfite and β cyclodextrin as preservative of photographic developing agents, 242
- Photolysis
Photolysis of 1-pyrenemethylamine ion-exchanged into a zirconium phosphate framework, 201
- Photooxidation
Photooxidation quantum yield efficiencies of naphthalene diimides under concentrated sun light in comparisons with perylene diimides, 214
- Photoreactivity
On the mechanism of TiO₂-photocatalyzed degradation of aniline derivatives, 192
- Photoreduction
Photoreactions of 2,5-dibromo-3-methyl-6-isopropyl-1,4-benzoquinone, 138
- Photosensitized activity
Nifedipine and nitrendipine reactivity toward singlet oxygen, 129
- Phototoxicity
Nifedipine and nitrendipine reactivity toward singlet oxygen, 129
- Poly-exponential decay
Abstracting reliable parameters from time-correlated single photon counting experiments. I. A consideration of how many photons need to be collected and a simple pileup error correction for poly-exponential decay profiles without convolution of the lamp profile, 221
- Polymer synthesis
The photopolymerization of styrenesulfonate initiated by dyes. The effect of monomer aggregation, 15
- Poly(styrenesulfonate)
The photopolymerization of styrenesulfonate initiated by dyes. The effect of monomer aggregation, 15
- Preservative
Role of sodium sulfite and β cyclodextrin as preservative of photographic developing agents, 242
- Push-pull porphyrinoids
Modified push-pull expanded corroles: Syntheses, structure and nonlinear optical properties, 108
- Pyrene
Selectivity via insertion: Detection of dicarboxylic acids in water by a new film chemosensor with enhanced properties, 207
- 1-Pyrenemethylamine
Photolysis of 1-pyrenemethylamine ion-exchanged into a zirconium phosphate framework, 201
- Quantum yields
Photooxidation quantum yield efficiencies of naphthalene diimides under concentrated sun light in comparisons with perylene diimides, 214
- Quenching
Role of sodium sulfite and β cyclodextrin as preservative of photographic developing agents, 242
- Quinone
Photoreactions of 2,5-dibromo-3-methyl-6-isopropyl-1,4-benzoquinone, 138
Solvent effects on the quenching of the equilibrating n,π^* and π,π^* triplet states of 9,10-phenanthrenequinone by 2-propanol, 154
- Radical
Photoreactions of 2,5-dibromo-3-methyl-6-isopropyl-1,4-benzoquinone, 138
- Radical cyclization
Two new anthraquinone photoreactions, 118
- Rate constant
Solvent effects on the quenching of the equilibrating n,π^* and π,π^* triplet states of 9,10-phenanthrenequinone by 2-propanol, 154
- Ratiometric probe
A wide-range fluorescent pH-indicator based on 3-hydroxyflavone structure, 226
- Redox potentials
Photooxidation quantum yield efficiencies of naphthalene diimides under concentrated sun light in comparisons with perylene diimides, 214
- Reorganization energy
Effects of DNA on driving force dependence of photoinduced electron transfer from the excited state of tris(2,2-bipyridine)ruthenium(II) to intercalators in DNA. Distinction between intra- and inter-DNA pathways, 79
- Rotamer
Role of sodium sulfite and β cyclodextrin as preservative of photographic developing agents, 242

- Schiff base
Excited state intermolecular proton transfer and caging of salicylidine-3,4,7-methyl amine in cyclodextrins, 94
- Semi-empirical calculation
Experimental and theoretical study of the intramolecular charge transfer on the derivatives 4-methoxy and 4-acetamide 1,8-naphthalimide N-substituted, 1
Photophysics and photodimerization of 6,5'-dimethylangelicin in different solvents, 69
- Singlet oxygen
Nifedipine and nitrendipine reactivity toward singlet oxygen, 129
Reaction of singlet molecular oxygen, $O_2(^1\Delta_g)$, with the *Cinchona* tree alkaloids. Effect of absolute configuration on the total rate constant, 146
- Small colony variants
A comparison of the effectiveness of TiO_2 photocatalysis and UVA photolysis for the destruction of three pathogenic micro-organisms, 51
- Solution
Intramolecular 4π photocyclization of chalconoid-like compounds in solution and antimicrobial activities, 22
- Solvent effect
Reaction of singlet molecular oxygen, $O_2(^1\Delta_g)$, with the *Cinchona* tree alkaloids. Effect of absolute configuration on the total rate constant, 146
- Sonochemical reaction
Degradation of methylene blue under multibubble sonoluminescence condition, 45
- Steric restriction
Role of sodium sulfite and β cyclodextrin as preservative of photographic developing agents, 242
- Supramolecular chemistry
Modified push-pull expanded corroles: Syntheses, structure and nonlinear optical properties, 108
- TCSPC
Abstracting reliable parameters from time-correlated single photon counting experiments. I. A consideration of how many photons need to be collected and a simple pileup error correction for poly-exponential decay profiles without convolution of the lamp profile, 221
- Terbium ions
Construction of lanthanide luminescent molecular-based hybrid material using modified functional bridge chemical bonded with silica, 159
- Theoretical calculation
Influence of substituents in the phenyl ring on photophysical properties of 3-[2-(phenyl)benzoxazol-5-yl]alanine derivatives, 57
- Ti-beta
Hydrogen evolution by photocatalysis of methanol vapor over Ti-beta, 89
- Time resolved kinetics
Reaction of singlet molecular oxygen, $O_2(^1\Delta_g)$, with the *Cinchona* tree alkaloids. Effect of absolute configuration on the total rate constant, 146
- TiO_2
Photocatalytic oxidation of dimethoate in aqueous solutions, 29
A comparison of the effectiveness of TiO_2 photocatalysis and UVA photolysis for the destruction of three pathogenic micro-organisms, 51
- TiO_2 film
Photocatalytic ozonation of dibutyl phthalate over TiO_2 film, 172
- Titania
Heterogeneous photocatalysis in titania-stabilized perfluorocarbon-in-water emulsions: Urea photosynthesis and chloroform photodegradation, 249
- Titanium dioxide
On the mechanism of TiO_2 -photocatalyzed degradation of aniline derivatives, 192
- Titanium oxide
New low-temperature preparation method of the TiO_2 porous photoelectrode for dye-sensitized solar cells using UV irradiation, 165
- TOC removal
Photocatalytic ozonation of dibutyl phthalate over TiO_2 film, 172
- Toxicity
Photocatalytic oxidation of dimethoate in aqueous solutions, 29
- trans*-4-Hydroxy-2-nonenal
Two new anthraquinone photoreactions, 118
- Triplet state inversion
Solvent effects on the quenching of the equilibrating n,π^* and π,π^* triplet states of 9,10-phenanthrenequinone by 2-propanol, 154
- Ultrasound
Degradation of methylene blue under multibubble sonoluminescence condition, 45
- Unnatural amino acid
Influence of substituents in the phenyl ring on photophysical properties of 3-[2-(phenyl)benzoxazol-5-yl]alanine derivatives, 57
- UVA irradiation
A comparison of the effectiveness of TiO_2 photocatalysis and UVA photolysis for the destruction of three pathogenic micro-organisms, 51
- Zirconium phosphate
Photolysis of 1-pyrenemethylamine ion-exchanged into a zirconium phosphate framework, 201
- ZnO
Photocatalytic oxidation of dimethoate in aqueous solutions, 29
- Zwitterion
Photoreactions of 2,5-dibromo-3-methyl-6-isopropyl-1,4-benzoquinone, 138
