

## **Conference Announcement**

---

**International Symposium on Chemiluminescence, Athens, Georgia, U.S.A.,  
October 10–13, 1972**

The contributed papers will be grouped as follows:

1. Theoretical and gas phase reactions.
2. Radical ions.
3. Oxygen reactions.
4. Applications of chemiluminescence.
5. Gas reactions and applications.
6. Chemical mechanisms in bioluminescence.
7. Organic mechanisms in chemiluminescence.

Several sessions of short research contributions are also planned.

For further information write: International Symposium on Chemiluminescence, Department of Chemistry, University of Georgia, Athens, Ga. 30601, U.S.A.
