

Subject Index

- Absorption
triplet-triplet, extinction coefficients for, in ethanol solutions of anthracene, naphthalene, 2,5-diphenyloxazole, 7-diethylamino-4-methyl coumarin and 4-methyl-7-amino-carbostyryl, 329
- Absorption spectroscopy
atomic, kinetic study of lead atoms, Pb (6^3P_0), by, 247
photolysis of C_3O_2 by, kinetic study of $C(2^1S_0)$ in, 297
- Alkylphenols
stereochemical effects in fluorescence quenching of, 405
- Ammonia
far ultra-violet photolysis of, 49
- Anthracene
extinction coefficients for triplet-triplet absorption in ethanol solutions of, 329
- Anthraquinones
anthraquinone sensitized *cis-trans* photoisomerization of α and β styrylnaphthalenes, 361
- Argon atoms
metastable, violet and red emission bands of the CN radicals formed in the collision of, 409
- Aromatics-oxygen systems
excited, adsorbed on porous glass at low temperature, radiationless transitions in, 285
- Azomethane
extinction coefficients of, in the near ultra-violet, 465
- Bacterioviridin-660
intrinsic lifetimes of, in different solvents, 151
- Benzenes
substituted, radiative decay of: correlation with simple theory, 71
- Biacetyl
in photolysis of SO_2 , sensitized phosphorescence of, 119
- Bicyclo-(2.2.1)-heptadiene
photosensitization of, in the gas phase, 199
- Butanone
photochemistry of, 377
- Butene-2
photosensitization of, in the gas phase, 199
- SO_2 photosensitized *cis-trans* isomerization of, 1
- Caesium
electronically excited, direct observation of vibrationally excited hydrogen produced by collisional energy transfer from, 165
- Carbon
kinetic study of $C(2^1S_0)$ in photolysis of C_3O_2 by atomic absorption spectroscopy, 297
- Carbon disulphide
photooxidation of, at 2139 Å, 173
- Carbon monoxide
wavelength and temperature effects with, in photolysis of SO_2 , 31
- Carbon suboxide
photolysis of, by atomic absorption spectroscopy, kinetic study of $C(2^1S_0)$ in, 297
- Chlorophyll *a*
intrinsic lifetimes of, in different solvents, 151
- Computer simulation
of phase-shift measurements of the quenching and trapping of resonance radiation at large optical depths, 255
- Cyanides
violet and red emission bands of CN radicals formed in collision of metastable argon atoms with, 409
- Decay
radiative and nonradiative, in photophysics of halogenated ketones, 325
- Decomposition
Hg(6^3P_1) photosensitized, of triethylborane, 429
- 9,10-Dichloroanthracene
low-temperature fluorescence quantum yield of, 67
- Diethylamino-4-methyl coumarin
extinction coefficients for triplet-triplet absorption in ethanol solutions of, 329
- Dimethyl mercury
extinction coefficients of, in the near ultra-violet, 465
- Dimethylsulphoxide
flash photolysis of, 439
- 9,10-Diphenylanthracene
low-temperature fluorescence quantum yield of, 67

- Diphenyloxazole
extinction coefficients for triplet-triplet absorption in ethanol solutions of, 329
- Ectothiorhodospira shaposhniko VII*
laser-induced oxidoreductions in the photosynthetic reaction centre of, 371
- Emission
quenching of, by foreign gases in photolysis of SO_2 , 15
- Emission bands
violet and red, of the CN radicals formed in collision of metastable argon atoms with cyanides, 409
- Energy transfer
collisional, producing vibrationally excited hydrogen from electronically excited sodium, rubidium, caesium and mercury, 165
- Ethanol solutions
of anthracene, naphthalene, 2,5-diphenyloxazole, 7-diethylamino-4-methyl coumarin and 4-methyl-7-amino-carbostyryl, extinction coefficients for triplet-triplet absorption in, 329
rhodamine 6G-, photochemical characteristics of, 343
- Excitation wavelength
dependence of excimer fluorescence on, 405
- Extinction coefficients
of azomethane and dimethyl mercury in the near ultra-violet, 465
for triplet-triplet absorption in ethanol solutions of anthracene, naphthalene, 2,5-diphenyloxazole, 7-diethylamino-4-methyl coumarin and 4-methyl-7-amino-carbostyryl, 329
- Flash photolysis
of dimethylsulphoxide, 439
- Fluorescence
excimer, dependence on excitation wavelength, 405
of styrenes, quenching of by ground state oxygen, 401
- Fluorescence quantum yield
low-temperature, of 9,10-diphenylanthracene, 9,10-dichloroanthracene and phenanthrene in EPA solution, 67
- Fluorescence quenching
of alkylphenols, stereochemical effects in, 405
- Hydrogen
spin-orbit relaxation of $\text{HTe} (\text{X}^2\Pi_{1/2})$, 451
vibrationally excited, direct observation of, 165
- Hydrogen iodide
use as a radical scavenger in photolysis of propane, 267
- Hydroxyl radical
reaction of with O_3 , 309
- Intrinsic lifetimes
of bacterioviridin-660 and chlorophyll *a* in different solvents, 151
- Isomerization
cis-trans, SO_2 photosensitized, of butene-2, 1
- Ketones
halogenated, photophysics of, 325
intermolecular photoreductions of, 81
role of type II photo-elimination reactions from pentan-2-one and other ketones, 315
- Kinetics
of two-step selective photodissociation of molecules by laser radiation, 421
- Kinetic study
of $\text{C}(2^1\text{S}_0)$ in photolysis of C_3O_2 by atomic absorption spectroscopy, 297
of lead atoms, $\text{Pb}(6^3\text{P}_0)$, by atomic absorption spectroscopy, 247
- Laser radiation
kinetics of two-step selective photodissociation of molecules by, 421
- Lead atoms
kinetic study of, $\text{Pb}(6^3\text{P}_0)$, by atomic absorption spectroscopy, 247
- Luminescence study
quantitative, of deuterated naphthalenes, 75
- Mercury
electronically excited, direct observation of vibrationally excited hydrogen produced by collisional energy transfer from, 165
- 4-Methyl-7-amino-carbostyryl
extinction coefficients for triplet-triplet absorption in ethanol solutions of, 329
- Methyl butanone
photochemistry of, 377
- Naphthalene
extinction coefficients for triplet-triplet absorption in ethanol solutions of, 329
deuterated, quantitative luminescence study of, 75

- Nitric acid
vapour absorption cross-section spectrum and its photodissociation in the stratosphere, 139
- Nitroalkanes
photochemistry of, 183
- Nitrogen
temperature dependent $N_2(A^3\Sigma_u^+)$ quenching rate coefficients, 63
- Nitrogen difluoride
transient species in photolysis of, 459
- Nonradiative decay
in photophysics of halogenated ketones, 325
- Organometallics
group V, carbonyl triplet quenching by, 471
- Oxidoreductions
laser-induced, in the photosynthetic reaction centre of *ectothiorhodospira shaposhniko VII*, 371
- Oxygen
ground state, quenching of the fluorescence of styrenes by, 401
O (1D) production in ozone photolysis near 3100 Å, 161
- Ozone
mechanisms of the H_2O -catalyzed chain photodecomposition of, and the reaction of HO with O_3 , 309
O(1D) production in ozone photolysis near 3100 Å, 161
- Pentan-2-one
type II photoelimination reactions from, role of solvent and quencher, 315
- Phase-shift measurements
of quenching and trapping of resonance radiation at large optical depths, computer simulation of, 255
- Phenanthrene
low-temperature fluorescence quantum yield of, 67
- Phosphorescence
sensitized, of biacetyl in photolysis of SO_2 , 119
- Photochemical characteristics
of rhodamine 6G-ethanol solutions, 343
- Photochemical process
type II, competition between six and seven centre abstractions in, 321
- Photochemical reactor
elliptical, for preparative and quantitative studies in the liquid phase, 393
- Photochemistry
of butanone and methyl butanone, 377
of nitroalkanes, 183
of *o*-xylene solutions, 221, 231, 239
- Photodecomposition
 H_2O -catalyzed chain, of O_3 and the reaction of HO with O_3 , 309
- Photodissociation
in the stratosphere, nitric acid vapour absorption cross-section spectrum and its, 139
two-step selective, of molecules by laser radiation, 421
- Photoelimination reactions
type II, from pentan-2-one and other ketones, role of solvent and quencher in, 315
- Photoisomerization
cis-trans, direct and anthraquinone sensitized, of α and β styrylnaphthalenes, 361
in *o*-xylene solutions, 239
- Photolysis
of C_3O_2 by atomic absorption spectroscopy, kinetic study of $C(2^1S_0)$ in, 297
far ultra-violet, of ammonia, 49
flash, of dimethylsulphoxide, 439
of NF_2 , transient species in, 459
ozone, near 3100 Å, O (1D) production in, 161
of propane, primary process in: use of HI as a radical scavenger, 267
of SO_2 in the presence of foreign gases, 15, 31, 119
- Photooxidation
of CS_2 at 2139 Å, 173
- Photophysics
of halogenated ketones: radiative and non-radiative decay, 325
of *o*-xylene solutions, 221, 231, 239
- Photoreductions
intermolecular, of ketones, 81
- Photosensitization
of 2-butene and bicyclo-(2.2.1)-heptadiene by pyrazine in the gas phase, 199
- Photosynthetic reaction centre
of *ectothiorhodospira shaposhniko VII*, laser-induced oxidoreductions in, 371
- Propane
primary processes in photolysis of: use of HI as a radical scavenger, 267
- Quantum yield
determination of for the primary process:
 $NH_3(ND_3) \{ h\nu \rightarrow NH(ND) + H_2(D_2), 49$

- low-temperature fluorescence, of 9,10-diphenylanthracene, 9,10-dichloroanthracene and phenanthrene in EPA solution, 67
- Quencher
role of in type II photoelimination reactions from pentan-2-one and other ketones, 315
- Quenching
carbonyl triplet, by group V organometallics, 471
of emission by foreign gases in photolysis of SO₂, 15
fluorescence, of alkylphenols, stereochemical effects in, 405
of the fluorescence of styrenes by ground state oxygen, 401
of resonance radiation at large optical depths, computer simulation of phase-shift measurements of, 255
- Quenching rate coefficients
N₂(A³Σ_u⁺), temperature-dependent, 63
- Radiationless processes
in *o*-xylene solutions, 231
- Radiationless transitions
in the excited aromatics-oxygen systems adsorbed on porous glass at low temperature, 285
- Radiative decay
in photophysics of halogenated ketones, 325
of substituted benzenes: correlation with simple theory, 71
- Radiative processes
of the ¹B₁ state, in *o*-xylene solutions, 221
- Radicals
CN, formed in collision of metastable argon atoms with cyanides, violet and red emission bands of, 409
- Relaxation
spin-orbit, of HTe (X²Π_{1/2}), 451
- Resonance radiation
computer simulation of phase-shift measurements of quenching and trapping of, 247
- Rhodamine 6G-ethanol solutions
photochemical characteristics of, 343
- Rubidium
electronically excited, direct observation of vibrationally excited hydrogen produced by collisional energy transfer from, 165
- Scavenger
radical, use of HI in photolysis of propane, 267
- Sodium
electronically excited, direct observation of vibrationally excited hydrogen produced by collisional energy transfer from, 165
- Spin-orbit relaxation
of the HTe (X²Π_{1/2}), 451
- Stereochemical effects
in fluorescence quenching of alkylphenols and the dependence of excimer fluorescence on the excitation wavelength, 405
- Styrenes
quenching of fluorescence of, by ground state oxygen, 401
- Styrylnaphthalenes
α and β, direct and anthraquinone sensitized *cis-trans* photoisomerization of, 361
- Sulphur dioxide
photolysis of, in the presence of foreign gases, 15, 31, 119
SO₂ photosensitized *cis-trans* isomerization of, 1
- Temperature effects
with CO, in photolysis of SO₂, 31
- Transient species
in the photolysis of NF₂, 459
- Trapping
of resonance radiation at large optical depths, computer simulation of phase-shift measurements of, 255
- Triethylborane
Hg(6³P₁) photosensitized decomposition of, 429
- Vapor absorption cross-section spectrum
nitric acid, and its photodissociation in the stratosphere, 139
- Wavelength effect
with CO, in photolysis of SO₂, 31
- o*-Xylene solutions
photophysics and photochemistry of, 221, 231, 239
