

Conference Announcements

IX International conference on photochemistry

This conference is to be held in the Department of Physical Chemistry, University of Cambridge, during August 7 - 9, 1978. The session topics and invited lecturers are as follows:

Atmospheric photochemistry	P. J. Crutzen and R. A. Cox
Dynamics of photodissociation	R. Bersohn
Chemiluminescence	Ch. Ottinger and R. N. Zare
Infrared photochemistry	C. Bradley Moore and J. Wolfrum
Electronically excited states	D. W. Setser and E. W. Schlag

2nd International conference on the photochemical conversion and storage of solar energy

This conference, to follow the first conference, will take place in the Department of Physical Chemistry, University of Cambridge, during August 10 - 12, 1978. The session topics and invited lecturers are as follows:

Unimolecular energy storage	G. Jones
Chemical aspects of photovoltaic cells	K. W. Boer
Photoelectrochemistry at semiconductor electrodes	A. J. Bard
Photogalvanic cells	W. J. Albery
Synthetic molecular organisations	H. Kuhn

Details of both conferences may be obtained from:

Cambridge Photochemistry Conferences,
Department of Physical Chemistry,
Lensfield Road,
Cambridge CB2 1EP, Gt. Britain.
