

Subject Index

- Acetaldehyde**
rate coefficient for the reaction of CH_3O with CH_3CHO at 25 °C, 83
- Acetophenone**
and norbornene, evidence against reversible triplet energy transfer between, 11
- 1-Acetylcyclohexene**
2-cycloheptenone and 2-cyclohexenone, kinetic studies of transient photochemical isomers of, 29
- Acetyl radicals**
in the reaction of CH_3O with CH_3CHO at 25 °C, 83
- Active nitrogen**
excitation of chlorine in, 49
- Afterglow**
of nitric oxide, kinetics of β and γ band quenching in, 321
of nitric oxide, location of $\text{NO}(\text{b}^4\Sigma^-)$ and the excitation mechanism of NO β bands from observations of, 375
- Aggregates**
of rhodamine 6G, study of the photo-physics and primary photochemistry of, 285
- Alkanones**
and azoalkanes, activation parameters for the α cleavage of measured by temperature dependence of fluorescence, 299
- Alkyl bromides**
reactions of with ground state lead atoms $\text{Pb}(6^3\text{P}_0)$ studied by atomic absorption spectroscopy, 183
- Allene**
and oxygen, photolysis of SO_2 at 313.0 nm in the presence of, 167
- Allyl radicals**
in the photolysis of n-butene and isobutene at 174.3 - 174.5 nm (7.10 eV), 103
- α cleavage
of alkanones and azoalkanes, activation parameters for measured by temperature dependence of fluorescence, 299
- Aminopyridines**
flash photolysis study of, 125
- Aroylacetic esters**
the photoketonization of, 277
- Aryl amides**
and esters, variation of the quantum yields of in the photo-Fries reaction, 1
- Autoxidation**
photosensitized, of sulphite, effects of trace metals on, 391
- Azoalkanes**
and alkanones, activation parameters for the α cleavage of measured by temperature dependence of fluorescence, 299
- Benzyl chlorides**
encounter complexes in the singlet quenching of 2,6-dimethoxynaphthalene by, 67
- 2,2'-Bipyridyl**
photophysics of, 205
- Bromine**
as a scavenger in the gas phase photolysis of CF_2Cl_2 , CFCl_3 and CF_4 at 213.9, 163.3, 147.0 and 123.6 nm, 363
- Butenes**
normal and iso, photolysis of at 174.3 - 174.5 nm (7.10 eV), 103
- Carbon monoxide**
absolute quantum yields of CO for selected-state photodissociation, 307
- CF_2Cl_2**
pulsed laser photolysis of, 341
- CHFCl_2**
gas phase photolysis of, 17
- Chlorine**
excitation of in active nitrogen, 49
- 2H-Chromenes**
as models in the study of the photochemistry of the ring-opening reaction of the benzopyranic ring of photochromic spiropyrans, 145
representing the benzopyranic part of photochromic spiropyrans, study of the excited states of, 73

- Chemiluminescence**
 β and γ band, of nitric oxide, kinetics of the quenching of, 321
 indirect, of tetramethyl-1,2-dioxetane, 217
- Cross sections**
 absorption, of HONO and N_2O_3 in the 300 - 400 nm wavelength range, 193
- Cycloalkanones**
 the phosphorescent triplet state of, 263
- 2-Cycloheptenone**
 1-acetylcyclohexene and 2-cyclohexenone, kinetic studies of transient photochemical isomers of, 29
- 2,6-Dimethoxynaphthalene**
 encounter complexes in the singlet quenching of by benzyl chlorides, 67
- Dinitrogen trioxide**
 the near ultraviolet absorption spectrum of gaseous HONO and N_2O_3 , 193
- Dioxetane**
 indirect chemiluminescence of, 217
- Electron transfer**
 in the photophysics and primary photochemistry of rhodamine 6G aggregates, 285
- Emission**
 of the chlorine continuum due to excitation of chlorine in active nitrogen, 49
- Encounter complexes**
 in the singlet quenching of 2,6-dimethoxynaphthalene by benzyl chlorides, 67
- Energy transfer**
 reversible triplet, between acetophenone and norbornene, evidence against, 11
 from triplet state acetone to 9-bromoanthracene and 9,10-dichloroanthracene: an investigation under high pressure, 217
- Excimers**
 and monomers, aromatic, formation of singlet oxygen from, 39
- Exciplexes**
 in the singlet quenching of 2,6-dimethoxynaphthalene by benzyl chlorides, 67
- Flash photolysis**
 of aminopyridines, 125
 of 2,2'-bipyridyl, 205
 in the kinetic study of transient photochemical isomers of 2-cycloheptenone, 1-acetylcyclohexene and 2-cyclohexenone, 29
 laser, of aromatic hydrocarbons in the vapour phase applied to the study of the triplet states, 239
 of *o*-nitrosotoluene, 233
- Fluorescence**
 activation parameters for the α cleavage of alkanones and azoalkanes measured by temperature dependence of, 299
- Fluorescence quenching**
 of 2,6-dimethoxynaphthalene by benzyl chlorides, 67
- Fluorescence spectroscopy**
 of styrene vapour: further evidence for dual emission, 267
- Free radicals**
 in the pulsed CO_2 laser photolysis of CF_2Cl_2 , 341
- Glyoxal**
 absolute quantum yields of CO for selected-state photodissociation of, 307
- Halocarbene radicals**
 in the gas phase photolysis of $CHFCl_2$, 17
- Halomethanes**
 gas phase photolysis of CF_2Cl_2 , $CFCl_3$ and CCl_4 in the presence of bromine at 213.9, 163.3, 147.0 and 123.6 nm, 363
- HONO**
 the near ultraviolet absorption spectrum of gaseous HONO and N_2O_3 , 193
- Hydrocarbons**
 aromatic, laser flash photolysis studies of in the vapour phase, 239
- Hydrogen fluoride**
 evidence for HF elimination via a five-centred complex in the photodissociation of 3,3,3-trifluoropropyne near 200 nm, 337
- Insertion reactions**
 in the gas phase photolysis of $CHFCl_2$, 17
- Isomerization**
 photosensitized *cis-trans*, of nitro-

- stilbenes in solvents of different polarity, 91
- Isomers
 strained *trans*, of 2-cycloheptenone, 1-acetylcyclohexene and 2-cyclohexenone as photochemical intermediates, 29
- Ketones
 aliphatic, type I–type II competition in the photolysis of, 131
 aromatic, quenching of by simple olefins, 11
- Kinetic models
 validity and interpretation of in the solid state photochemistry of uranyl formate monohydrate, 117
- Kinetic studies
 of the reaction of ground state lead atoms $\text{Pb}(6^3\text{P}_0)$ with alkyl bromides, 183
 of transient photochemical isomers of 2-cycloheptenone, 1-acetylcyclohexene and 2-cyclohexenone, 29
- Laser
 hydrogen fluoride, evidence for a five-centred complex in the pumping reaction of, 337
- Laser photolysis
 in the kinetic study of transient photochemical isomers of 2-cycloheptenone, 1-acetylcyclohexene and 2-cyclohexenone, 29
- Lead
 reactions of ground state lead atoms $\text{Pb}(6^3\text{P}_0)$ with alkyl bromides studied by atomic absorption spectroscopy, 183
- Metals
 effects of traces of on the photosensitized autoxidation of sulphite, 391
- Methoxy radicals
 rate coefficient for the reaction of CH_3O with CH_3CHO at 25 °C, 83
- Methylene blue
 effects of trace metals on the autoxidation of sulphite sensitized by, 391
- Microwave double resonance
 applied to the phosphorescence of several cycloalkanones, 263
- Naphthalene
 and pyrene, formation of singlet oxygen through sensitization by monomers and excimers of, 39
- Nitric oxide
 kinetics of β and γ band quenching in the NO afterglow, 321
 location of $\text{NO}(b^4\Sigma^-)$ and the excitation mechanism of NO β bands, 375
- Nitrogen
 active, excitation of chlorine in, 49
- o*-Nitrosotoluene
 a flash photolytic study of, 233
- Nitrostilbenes
 photosensitized *cis*–*trans* isomerization of in solvents of different polarity, 91
- Nitrous acid
 the near ultraviolet absorption spectrum of gaseous HONO and N_2O_3 , 193
- Norbornene
 and acetophenone, evidence against reversible triplet energy transfer between, 11
- Olefins
 simple, quenching of aromatic ketones, by, 11
- Oxygen
 atomic, collisional quenching of $\text{O}(2^1\text{D}_2)$ by COCl_2 , COFCl and COF_2 using atomic absorption spectroscopy in the vacuum ultraviolet, 355
 molecular, the methylene-blue-sensitized photooxidation of sulphite by, 391
 revised quenching rate constants for metastable $\text{O}_2(a^1\Delta_g)$, 211
 singlet, formation of from aromatic excimers and monomers, 39
- $\text{Pb}(6^3\text{P}_0)$ atoms
 reactions of with alkyl bromides studied by atomic absorption spectroscopy, 183
- 2,4-Pentadione
 laser-induced time-resolved phosphorescence of, 273
- Phosgene derivatives
 collisional quenching of $\text{O}(2^1\text{D}_2)$ by using atomic absorption spectroscopy in the vacuum ultraviolet, 355
- Phosphorescence
 laser-induced, time-resolved, of 2,4-pentadione (a tautomeric system), 273

- of several cycloalkanones, 263
- of 1,1,1-trifluoroacetone vapour, collisional effects on, 247
- Photochemistry**
 - solid state, validity and interpretation of kinetic models of in the case of uranyl formate monohydrate, 117
- Photochromicity**
 - study of the excited states of 2H-chromenes representing the benzopyranic part of photochromic spiro-pyrans, 73
 - a study of the photochemistry of the ring-opening reaction of the benzopyranic ring of photochromic spiro-pyrans, 145
- Photodecomposition**
 - of the singlet and triplet states of tetramethyl-1,3-cyclobutanedione, 61
- Photodissociation**
 - selected-state, absolute quantum yields of CO for, 307
 - of 3,3,3-trifluoropropyne near 200 nm, evidence for HF elimination via a five-centred complex, 337
- Photo-Fries reaction**
 - variation of the quantum yields of aryl amides and esters in due to structure, 1
- Photoketonization**
 - of some esters of acetoacetic acids, 277
- Photolysis**
 - of aliphatic ketones, type I-type II competition in the, 131
 - of n-butene and isobutene at 174.3 - 174.5 (7.10 eV), 103
 - of CF₂Cl₂ using a pulsed CO₂ laser, 341
 - gas phase, of CF₂Cl₂, CFCl₃ and CCl₄ in the presence of bromine at 213.9, 163.3, 147.0 and 123.6 nm, 363
- Photooxidation**
 - of acetaldehyde in the reaction of CH₃O with CH₃CHO at 25 °C, 83
 - methylene-blue-sensitized, of sulphite by molecular oxygen, catalysis of by trace metals, 391
- Photophysics**
 - of 2,2'-bipyridyl, 205
- Photosensitization**
 - of the *cis-trans* isomerization of nitrostilbenes in solvents of different polarity, 91
- PPP calculations**
 - of excitation energies, use of in the study of the variation of the quantum yields of aryl amides and esters due to structure in the photo-Fries reaction, 1
- Pyrene**
 - and naphthalene, formation of singlet oxygen through sensitization by monomers and excimers of, 39
- Quantum yields**
 - of aryl amides and esters in the photo-Fries reaction, variation of due to structure, 1
 - for the formation of CF₂Cl, CFCl₂ and CCl₃ radicals in the gas phase photolysis of CF₂Cl₂, CFCl₃ and CCl₄ in the presence of bromine at 213.9, 163.3, 147.0 and 123.6 nm, 363
 - in the singlet and triplet state photodecomposition of tetramethyl-1,3-cyclobutanedione, 61
- Quenching**
 - β and γ band, kinetics of in the nitric oxide afterglow, 321
 - collisional, of O(²D₂) by COCl₂, COFCl and COF₂ using atomic absorption spectroscopy in the vacuum ultraviolet, 355
 - of metastable O₂(a¹ Δ_g) molecules, revised rate constants of, 211
 - of 2,4-pentadione as determined from the laser-induced time-resolved phosphorescence, 273
 - singlet, of 2,6-dimethoxynaphthalene by benzyl chlorides, encounter complexes in, 67
- Radiolysis**
 - pulsed laser, use of to monitor the decay of triplet acetophenone, 11
- Relaxation**
 - vibrational, effects of on the phosphorescence of 1,1,1-trifluoroacetone vapour, 247
- Rhodamine 6G**
 - study of the photophysics and primary photochemistry of aggregates of, 285
- Ring-opening reaction**
 - of the benzopyranic ring of photochromic spiro-pyrans, a study of the photochemistry of, 145
- Sensitization**
 - of singlet oxygen formation by aromatic excimers and monomers, 39

- Solvent influence
in the photosensitized *cis-trans* isomerization of nitrostilbenes, 91
- Spiropyrans
photochromic, study of the excited states of 2H-chromenes representing the benzopyranic part of, 73
photochromic, study of the photochemistry of the ring-opening reaction of the benzopyranic ring of, 145
- Strained *trans* isomers
of 2-cycloheptenone, 1-acetylcyclohexene and 2-cyclohexenone, kinetic studies of, 29
- Styrene
fluorescence excitation spectroscopy of in the vapour phase: further evidence of dual emission, 267
- Sulphite
effects of trace metals on the photosensitized autoxidation of SO_3^- , 391
- Sulphur dioxide
photolysis of SO_2 at 313.0 nm in the presence both allene and oxygen, 167
- Tautomerism
of 2,4-pentadione, effect of on self-quenching, 273
- Tetramethyl-1,3-cyclobutanedione
singlet and triplet state photodecomposition of, 61
- 1,1,1-Trifluoroacetone
collisional effects on the phosphorescence of in the vapour phase, 247
- 3,3,3-Trifluoropropyne
evidence for HF elimination via a five-centred complex in the photodissociation of near 200 nm, 337
- Triplet energy transfer
reversible, between acetophenone and norbornene, evidence against, 11
- Triplet state
of rhodamine 6G in aggregates, 285
- Twisted states
in the fluorescence of styrene vapour, 267
- Type I-type II competition
in the photolysis of aliphatic ketones, 131
- Uranyl formate monohydrate
validity and interpretation of kinetic models in the solid state photochemistry of, 117
- Vibrational numbering
of the $\text{NO}(b^4\Sigma^-)$ state from observations of the nitric oxide afterglow, 375
