

Announcement

The Chemical Society, Faraday Division, General Discussion No. 70:
Photoelectrochemistry, St. Catherine's College, Oxford, Gt. Britain,
8 - 10 September 1980

Organizing Committee

Professor W. J. Albery (Chairman)

Dr. M. D. Archer

Professor J. B. Goodenough

Professor G. J. Hills

Dr. L. Peter

The object of the discussion is to bring together workers in different disciplines who are interested in the effect of light on electrochemical reactions and in the behaviour of electrodes under illumination. The topics to be covered will include wet photovoltaic cells, photoassisted and photocatalysed electrode reactions, photogalvanic cells and photoelectrochemical effects in micellar systems. The design of systems and materials for photoelectrochemical solar energy conversion will also be discussed. The following have agreed to participate: A. J. Bard, J. O'M. Bockris, M. Calvin, H. Gerischer, W. P. Gomes, M. Grätzel, N. N. Lichtin, R. Memming, B. Miller, A. J. Nozik.

Contributions are invited and abstracts of about 300 words should be sent by 17 September 1979 to:

Professor W. J. Albery,
Department of Chemistry,
Imperial College,
South Kensington,
London SW7 2AY, Gt. Britain.
