

**Subject Index**

---

**Absorption spectra**

UV, of some halogenated methanes and ethanes of atmospheric interest, 93

**Acetone**

triplet state, energy transfer from to 9-bromoanthracene and 9,10-dichloroanthracene: an investigation under high pressure, 363

**Airglow**

of the terrestrial planets, on the excitation of oxygen emissions in, 179

**Alkenes**

quenching of biacetyl phosphorescence by: a dissection of rate effects on exciplex formation and exciplex decay for ketone triplet quenching, 267

**Amines**

effect of solvent in the photoreduction and quenching of benzophenone by triethylamine, 1-azabicyclo[2.2.2]octane and 1,4-diazabicyclo[2.2.2]octane, 41

saturated, structural effects on photo-physical processes in: intermolecular excimer formation, 167

**Aminoesters**

intramolecular excited state interactions in, 1

**Anthracenes**

energy transfer from triplet state acetone to 9-bromoanthracene and 9,10-dichloroanthracene: an investigation under high pressure, 363

**Anthraquinone dye**

possible emission from an upper triplet state of, 91

**Atmospheric chemistry**

UV absorption of some halogenated methanes and ethanes of atmospheric interest, 93

**1-Azabicyclo[2.2.2]octane**

triethylamine and 1,4-diazabicyclo[2.2.2]octane, effect of solvent in the photoreduction and quenching of benzophenone by, 41

**Azides**

photolysis of in glassy solutions: spectral and photochemical properties of nitrenes, 25

**Azulene**

derivatives of, temperature dependence of the fluorescence decay of, 115

**Benzhydrol**

mechanism of photoreduction of benzophenone by: photochemistry of ketones in solution, 333

**Benzophenone**

effect of solvent in the photoreduction and quenching of by triethylamine, 1-azabicyclo[2.2.2]octane and 1,4-diazabicyclo[2.2.2]octane, 41

mechanism of photoreduction of by benzhydrol: photochemistry of ketones in solution, 333

**Benzoyl moieties**

and naphthalene moieties, intramolecular energy transfer in polymers containing, 357

**Biacetyl phosphorescence**

quenching of by alkenes: a dissection of rate effects on exciplex formation and exciplex decay for ketone triplet quenching, 267

**Biradicals**

the formation of two photoenols via a common pathway in the photochemistry of 2-methylbenzophenone, 85

**Bromide ion quenching**

of micellized hydrocarbon fluorescence: search for effects of emitter lifetime on the quenching behaviour, 285

**9-Bromoanthracene**

and 9,10-dichloroanthracene, energy transfer from triplet state acetone to: an investigation under high pressure, 363

**Bromonaphthalene**

excitation energy transfer: photolysis of solid state clathrates, 147

- Carbonyl compounds**  
 intramolecular energy transfer in polymers containing benzoyl and naphthalene moieties, 357
- Charge transfer complexes**  
 effect of solvent in the photoreduction and quenching of benzophenone by triethylamine, 1-azabicyclo[2.2.2]-octane and 1,4-diazabicyclo[2.2.2]-octane, 41
- Chloroethanes**  
 photolysis of  $\text{CH}_3\text{CCl}_3$  in the near UV, 187
- Clathrates**  
 solid state, excitation energy transfer in the photolysis of, 147
- Conformers**  
 time-resolved fluorescence studies of *trans*-1,2-di-(2-naphthyl)ethylene, 173
- Crown ethers**  
 and various lanthanide salts, energy transfer in complexes between, 31
- Decay**  
 fluorescence, of azulene derivatives, temperature dependence of, 115  
 fluorescence, of rare earth ions in silicate glass as functions of temperature, 263  
 radiative, in vapour and solution phases, correction for refractive index in the comparison of, 139
- Diarylethylenes**  
 with 3-pyrenyl substituents, luminescent and photochemical behaviour of, 59
- 1,4-Diazabicyclo[2.2.2]octane**  
 triethylamine and 1-azabicyclo[2.2.2]-octane, effect of solvent in the photoreduction and quenching of benzophenone by, 41
- 9,10-Dibromoanthracene**  
 energy transfer from triplet state acetone to 9-bromoanthracene and 9,10-dichloroanthracene: an investigation under high pressure, 363
- 1,4-Dibromo-2,3-butanedione**  
 liquid phase photolysis of, 133
- 9,10-Dichloroanthracene**  
 and 9-bromoanthracene, energy transfer from to triplet state acetone: an investigation under high pressure, 363
- Dieckmann ester**  
 and related compounds, photochemistry of in solution, 305
- Dihalonaphthalenes**  
 crystals of, exciton trapping in, 161
- Dimers**  
 luminescent and photochemical behaviour of diarylethylenes with 3-pyrenyl substituents, 59
- 2,2-Dimethoxy 2-phenylacetophenone**  
 laser investigation of Norrish type I photoscission in, 17
- trans*-1,2-Di-(2-naphthyl)ethylene**  
 time-resolved fluorescence studies of, 173
- Emission**  
 of oxygen in the airglow of the terrestrial planets, on the excitation of, 179  
 possible, from an upper triplet state of an anthraquinone dye, 91  
 sensitized metal ion, in complexes between a crown ether and various lanthanide salts, 31
- Endoperoxides**  
 a new photochromic system of extraordinarily high thermal stability, 293
- Energy distribution**  
 excess, vacuum UV photolysis of *n*-1-hexene and 4-methyl-1-pentene, 249
- Energy transfer**  
 in complexes between a crown ether and various lanthanide salts, 31  
 intramolecular, in polymers containing benzoyl and naphthalene moieties, 357  
 from triplet state acetone to 9-bromoanthracene and 9,10-dichloroanthracene: an investigation under high pressure, 363
- Esters**  
 Dieckmann, and related compounds, photochemistry of in solution, 305
- Ethanes**  
 and methanes, halogenated, of atmospheric interest, UV absorption of, 93
- Ethylenes**  
 luminescent and photochemical behaviour of diarylethylenes with 3-pyrenyl substituents, 59
- Excimers**  
 intermolecular, formation of: structural effects on photophysical processes in saturated amines, 167

**Exciplexes**

- intramolecular excited state interactions in aminoesters, 1
- intramolecular, time-resolved spectra of, 11
- the quenching of biacetyl phosphorescence by alkenes: a dissection of rate effects on exciplex formation and exciplex decay for ketone triplet quenching, 267

**Excitation**

- of oxygen emissions in the airglow of the terrestrial planets, 179

**Excitation energy transfer**

- photochemical transformations: quenching experiments in the triplet-sensitized conversion of norbornadiene to quadricyclene, 207
- in the photolysis of solid state clathrates, 147

**Excited states**

- intramolecular, interactions of in aminoesters, 1
- photochemistry in solution: Dieckmann ester and related compounds, 305

**Excitons**

- trapping of in dihalonaphthalene crystals, 161

**Fluorescein**

- photoionization of via excited triplet and singlet states, 215

**Fluorescence**

- decay of azulene derivatives, temperature dependence of, 115
- decay times of of rare earth ions in silicate glass as functions of temperature, 263
- of excimers, structural effects on photophysical processes in saturated amines: intermolecular excimer formation, 167
- micellized hydrocarbon, bromide ion quenching of: search for effects of emitter lifetime on the quenching behaviour, 285
- of *trans*-stilbene, direct observation of effects of viscosity on, 127
- time-resolved, of *trans*-1,2-di(2-naphthyl)ethylene, 173

**Fluorescence lasers**

- direct measurements of  $\tilde{a}^1A_1$  CH<sub>2</sub> removal rates, 75

**Fluorides**

- opto-acoustic spectroscopy and the energy of photodissociation of UF<sub>6</sub>, 51

**Fluorocarbons**

- photolysis of CHFCl<sub>2</sub> in the near UV, 197

**Fluoroperoxo-zirconates**

- solid state decomposition studies of: photodecomposition of M<sub>2</sub>Zr<sub>2</sub>(O<sub>2</sub>)<sub>2</sub>·F<sub>6</sub>·2H<sub>2</sub>O (M = K<sup>+</sup>, Rb<sup>+</sup> and Cs<sup>+</sup>), 275

**Freons**

- photolysis of CHFCl<sub>2</sub> in the near UV, 197

**n-1-Hexene**

- and 4-methyl-1-pentene, vacuum UV photolysis of, 249

**Hydrogen transfer**

- formation of two photoenols via a common pathway in the photochemistry of 2-methylbenzophenone, 85

**Hydroxy alkylphenones**

- laser flash photolysis investigation of primary processes in the sensitized polymerization of vinyl monomers, 225

**Initiators**

- hydroxy alkylphenones as: laser flash photolysis investigation of primary processes in the sensitized polymerization of vinyl monomers, 225

**Interactions**

- intramolecular excited state, in aminoesters, 1

**Irgacure**

- (2,2-dimethoxy 2-phenylacetophenone) laser investigation of Norrish type I photoscission in, 17

**IR lasers**

- direct measurements of  $\tilde{a}^1A_1$  CH<sub>2</sub> removal rates, 75

**Ketones**

- effect of solvent in the photoreduction and quenching of benzophenone by triethylamine, 1-azabicyclo[2.2.2]-octane and 1,4-diazabicyclo[2.2.2]-octane, 41
- photochemistry of in solution: mechanism of photoreduction of benzophenone by benzhydrol, 333

**Ketone triplet quenching**

- a dissection of rate effects on exciplex formation and exciplex decay for: the quenching of biacetyl phosphorescence by alkenes, 267

## Kinetics

- direct measurements of  $\tilde{a}^1A_1 CH_2$  removal rates, 75
- of Kiton Red S photodecomposition under continuous working and flash photolytic conditions, 345
- photochemical transformations: quenching experiments in the triplet-sensitized conversion of norbornadiene to quadricyclene, 207

## Kiton Red S

- kinetic studies of photodecomposition of under continuous working and flash photolytic conditions, 345

## Lanthanide salts

- various, and a crown ether, energy transfer in complexes between, 31

## Laser flash photolysis

- of primary processes in the sensitized polymerization of vinyl monomers: experiments with hydroxy alkylphenones, 225

## Laser photolysis

- formation of two photoenols via a common pathway in the photochemistry of 2-methylbenzophenone, 85
- intramolecular energy transfer in polymers containing benzoyl and naphthalene moieties, 357

## Lasers

- $CH_3I$  photodissociation, influence of photochemistry on performance of, 235
- direct measurements of  $\tilde{a}^1A_1 CH_2$  removal rates, 75
- for an investigation of Norrish type I photoscission in the photoinitiator Irgacure (2,2-dimethoxy 2-phenylacetophenone), 17

## Lifetimes

- emitter, search for effects of on quenching behaviour: bromide ion quenching of micellized hydrocarbon fluorescence, 285
- fluorescence, of azulene derivatives, temperature dependence of, 115
- photochemistry in solution: Dieckmann ester and related compounds, 305
- picosecond, of *trans*-stilbene, direct observation of effects of viscosity on, 127
- radiative, in vapour and solution phases, correction for refractive index in the comparison of, 139

- time-resolved spectra of an intramolecular exciplex, 11

## Light-wasting processes

- effect of solvent in the photoreduction and quenching of benzophenone by triethylamine, 1-azabicyclo[2.2.2]-octane and 1,4-diazabicyclo[2.2.2]-octane, 41

## Luminescence

- photolysis of azides in glassy solutions: spectral and photochemical properties of nitrenes, 25

## Luminescent properties

- and photochemical behaviour of diarylethylenes with 3-pyrenyl substituents, 59

## Metastable intermediates

- in the formation of  $O_3$  by recombination, 67

## Methanes

- and ethanes, halogenated, of atmospheric interest, UV absorption of, 93

## 9-Methylanthracene

- correction for refractive index in the comparison of radiative lifetimes in vapour and solution phases, 139

## 2-Methylbenzophenone

- the formation of two photoenols via a common pathway in the photochemistry of, 85

## Methylene

- direct measurements of  $\tilde{a}^1A_1 CH_2$  removal rates, 75

- Methyl iodide photodissociation laser influence of photochemistry on performance of, 235

## 4-Methyl-1-pentene

- and n-1-hexene, vacuum UV photolysis of, 249

## Micellized hydrocarbon fluorescence

- bromide ion quenching of: search for effects of emitter lifetime on the quenching behaviour, 285

## Naphthalene moieties

- and benzoyl moieties, intramolecular energy transfer in polymers containing, 357

## Nickel(II) complex

- excitation energy transfer: photolysis of solid state clathrates, 147

## Nitrenes

- spectral and photochemical properties of: photolysis of azides in glassy solutions, 25

- Norbornadiene**  
triplet-sensitized conversion of to quadricyclene, quenching experiments in, 207
- Norrish type I photolysis**  
in the photoinitiator Irgacure (2,2-dimethoxy 2-phenylacetophenone), laser investigation of, 17
- Optically detected magnetic resonance exciton trapping in dihalonaphthalene crystals, 161**
- Opto-acoustic spectroscopy**  
and the energy of photodissociation of  $UF_6$ , 51
- Oxygen**  
emission of in the airglow of the terrestrial planets, on the excitation of, 179
- Ozone**  
metastable intermediates in the formation of  $O_3$  by recombination, 67
- 1-Pentene**  
gas phase photolysis of at 147 nm (8.4 eV), 321
- Phosphorescence**  
biacetyl, quenching of by alkenes: a dissection of rate effects on exciplex formation and exciplex decay for ketone triplet quenching, 267  
exciton trapping in dihalonaphthalene crystals, 161  
possible emission from an upper triplet state of an anthraquinone dye, 91
- Photochemical properties**  
and luminescent behaviour of diaryl-ethylenes with 3-pyrenyl substituents, 59  
and spectral properties of nitrenes: photolysis of azides in glassy solutions, 25
- Photochemical transformations**  
quenching experiments in the triplet-sensitized conversion of norbornadiene to quadricyclene, 207
- Photochemistry**  
influence of on  $CH_3I$  photodissociation laser performance, 235  
of ketones in solution: mechanism of photoreduction of benzophenone by benzhydrol, 333  
of 2-methylbenzophenone, formation of two photoenols via a common pathway in, 85  
in solution: Dieckmann ester and related compounds, 305  
the UV absorption of some halogenated methanes and ethanes of atmospheric interest, 93
- Photochromism**  
a new photochromic system of extraordinarily high thermal stability, 293
- Photodecomposition**  
of Kiton Red S, kinetic studies of under continuous working and flash photolytic conditions, 345  
of  $M_2Zr_2(O_2)_2F_6 \cdot 2H_2O$  ( $M = K^+, Rb^+$  and  $Cs^+$ ): solid state decomposition studies of fluoroperoxo species of transition metals, 275
- Photodissociation**  
of  $CH_3CCl_3$  in the near UV, 187  
energy of, and opto-acoustic spectroscopy of  $UF_6$ , 51
- Photodissociation laser**  
 $CH_3I$ , influence of photochemistry on performance of, 235
- Photoenolization**  
of 2-methylbenzophenone, the formation of two photoenols via a common pathway in, 85
- Photoinitiator**  
Irgacure (2,2-dimethoxy 2-phenylacetophenone), laser investigation of Norrish type I photolysis in, 17
- Photoionization**  
of fluorescein via excited triplet and singlet states, 215
- Photolysis**  
of azides in glassy solutions: spectral and photochemical properties of nitrenes, 25  
of  $CH_3CCl_3$  in the near UV, 187  
of  $CHFCl_2$  in the near UV, 197  
of fluoroperoxo species of transition metals: photodecomposition of  $M_2Zr_2(O_2)_2F_6 \cdot 2H_2O$  ( $M = K^+, Rb^+$  and  $Cs^+$ ), 275  
gas phase, of 1-pentene at 147 nm (8.4 eV), 321  
kinetic studies of Kiton Red S photodecomposition under continuous working and flash photolytic conditions, 345  
laser flash, of primary processes in the sensitized polymerization of vinyl monomers: experiments with hydroxy alkylphenones, 225

- laser, formation of two photoenols via a common pathway in the photochemistry of 2-methylbenzophenone, 85
- laser, intramolecular energy transfer in polymers containing benzoyl and naphthalene moieties, 357
- liquid phase, of 1,4-dibromo-2,3-butanedione, 133
- of solid state clathrates, excitation energy transfer in, 147
- of 1,1,2,2-tetrachloroethane, primary steps in, 109
- vacuum UV, of n-1-hexene and 4-methyl-1-pentene, 249
- Photooxidation**  
a new photochromic system of extraordinarily high thermal stability, 293
- Photophysical processes**  
in saturated amines, structural effects on: intermolecular excimer formation, 167
- Photorearrangement**  
photochemical transformations: quenching experiments in the triplet-sensitized conversion of norbornadiene to quadricyclene, 207
- Photoreduction**  
of benzophenone by benzhydrol: photochemistry of ketones in solution, 333  
photolysis of azides in glassy solutions: spectral and photochemical properties of nitrenes, 25  
and quenching of benzophenone by triethylamine, 1-azabicyclo[2.2.2]octane and 1,4-diazabicyclo[2.2.2]octane, effect of solvent in, 41
- Photoscission**  
Norrish type I, laser investigation of in the photoinitiator Irgacure (2,2-dimethoxy 2-phenylacetophenone), 17
- Planetary atmospheres**  
on the excitation of oxygen emissions in the airglow of the terrestrial planets, 179
- Polymerization**  
sensitized, of vinyl monomers, laser flash photolysis investigation of primary processes in: experiments with hydroxy alkylphenones, 225
- Polymers**  
containing benzoyl and naphthalene moieties, intramolecular energy transfer in, 357
- 3-Pyrenyl substituents**  
luminescent and photochemical behaviour of diarylethylenes with, 59
- Quadricyclene**  
quenching experiments in the triplet-sensitized conversion of norbornadiene to, 207
- Quantum yields**  
gas phase photolysis of 1-pentene at 147 nm (8.4 eV), 321
- Quenching**  
of biacetyl phosphorescence by alkenes: a dissection of rate effects on exciplex formation and exciplex decay for ketone triplet quenching, 267  
by bromide ions of micellized hydrocarbon fluorescence: search for effects of emitter lifetime on the quenching behaviour, 285  
intramolecular excited state interactions in aminoesters, 1  
and photoreduction of benzophenone by triethylamine, 1-azabicyclo[2.2.2]octane and 1,4-diazabicyclo[2.2.2]octane, effect of solvent in, 41  
time-resolved spectra of an intramolecular exciplex, 11  
in the triplet-sensitized conversion of norbornadiene to quadricyclene, 207
- Rare earth ions**  
fluorescence decay times of in silicate glass as functions of temperature, 263
- Recombination**  
metastable intermediates in the formation of O<sub>3</sub> by, 67
- Refractive index**  
correction for in the comparison of radiative lifetimes in vapour and solution phases, 139
- Silicate glass**  
fluorescence decay times of rare earth ions in as functions of temperature, 263
- Singlet oxygen**  
the formation of two photoenols via a common pathway in the photochemistry of 2-methylbenzophenone, 85  
a new photochromic system of extraordinarily high thermal stability, 293

- Singlet states**  
and triplet states, photoionization of fluorescein via, 215
- Solvent effect**  
in the photoreduction and quenching of benzophenone by triethylamine, 1-azabicyclo[2.2.2]octane and 1,4-diazabicyclo[2.2.2]octane, 41
- Spectra**  
time-resolved, of an intramolecular exciplex, 11  
UV absorption, of some halogenated methanes and ethanes of atmospheric interest, 93
- Spectral properties**  
and photochemical properties of nitrenes: photolysis of azides in glassy solutions, 25
- trans*-Stilbene**  
direct observation of effects of viscosity on the picosecond lifetimes of, 127
- Streak camera**  
direct observation of the effects of viscosity on the picosecond lifetimes of *trans*-stilbene, 127
- 1,1,2,2-Tetrachloroethane**  
primary steps in the photolysis of, 109
- Thermal stability**  
extraordinarily high, a new photochromic system of, 293
- Time-resolved fluorescence**  
of *trans*-1,2-di-(2-naphthyl)ethylene, 173
- Time-resolved spectra**  
of an intramolecular exciplex, 11
- Trapping**  
of excitons in dihalonaphthalene crystals, 161
- Triethylamine**  
1-azabicyclo[2.2.2]octane and 1,4-diazabicyclo[2.2.2]octane, effect of solvent in the photoreduction and quenching of benzophenone by, 41
- Triplet electron donor-acceptor**  
the quenching of biacetyl phosphorescence by alkenes: a dissection of rate effects on exciplex formation and exciplex decay for ketone triplet quenching, 267
- Triplet-sensitized conversion**  
of norbornadiene to quadricyclene, quenching experiments in, 207
- Triplet states**  
of acetone, energy transfer from to 9-bromoanthracene and 9,10-dichloroanthracene: an investigation under high pressure, 363  
exciton trapping in dihalonaphthalene crystals, 161  
and singlet states, photoionization of fluorescein via, 215  
upper, of an anthraquinone dye, possible emission from, 91
- Uranium**  
opto-acoustic spectroscopy and the energy of photodissociation of UF<sub>6</sub>, 51
- Vacuum UV photolysis**  
of n-1-hexene and 4-methyl-1-pentene, 249  
of 1-pentene at 147 nm (8.4 eV), 321
- Vinyl monomers**  
laser flash photolysis investigation of primary processes in the sensitized polymerization of: experiments with hydroxy alkylphenones, 225
- Viscosity**  
direct observation of effects of on the picosecond lifetimes of *trans*-stilbene, 127
