

Subject Index

- Acetate**
formate and oxalate in water, flash photolysis study of the photoionization of, 223
- Acridine**
protolytic reactions of in the triplet state, 75
- Adsorbed molecules**
photochemistry of: quantum yields of photoprocesses of molecules in the adsorbed state, 49
- Alcohols**
catalysed by benzophenone and colloidal Pt, photoinduced hydrogen evolution from, 257
- Alloxazinium cations**
N₅- and N₁₀-substituted, photochemistry of: photohydration in neutral and acidic solutions, 133
- Ammonia**
and methane, mixtures of, methylamine formation in the vacuum UV photolysis of, 353
- Aniline**
emission and intersystem crossing quantum yields of solutions of: photostationary state diagram, 67
excited state interaction between 2-*N*,-*N*-dimethylaminopyridine and *p*-nitroaniline, 215
- Anthraquinone**
photoreduction of in aqueous micellar solution, 325
- Arrhenius parameters**
for intermolecular triplet energy transfer from biacetyl to 1,3-butadiene, 175
- Aza-aromatics**
excited state reactivity of: relevance of the effects of protonation, oxygen and exciting wavelength on fluorescence and *trans* → *cis* photoisomerization of naphthylpyridylethylenes in aqueous solution, 165
- Azulene**
carbonyl derivatives of showing dual emission, fluorescence lifetimes of, 309
- Benzophenone**
and colloidal Pt, photoinduced hydrogen evolution from alcohols catalysed by, 257
- Biacetyl**
Arrhenius parameters for intermolecular triplet energy transfer from to 1,3-butadiene, 175
temperature dependence of the triplet lifetime of in the gas phase, 55
- Bipyridine**
photoracemization of Ru(bipyridine)₃²⁺, 123
- 1,3-Butadiene**
Arrhenius parameters for intermolecular triplet energy transfer from biacetyl to, 175
- 1-Butene**
reaction of photochemically generated hot hydrogen atoms with, 335
- Carbon atoms**
the dynamics of the C + NO reaction, 319
- Carbonyl derivatives**
of azulene showing dual emission, fluorescence lifetimes of, 309
- Chemiluminescence**
in the Cl-NO₂-O₃ system, a kinetic study of, 201
- Chlorine atoms**
a kinetic study of the chemiluminescence in the Cl-NO₂-O₃ system, 201
- Chlorine monoxide**
asymmetrical ClO₃: its possible formation from ClO and O₂ and its possible reactions, 243
- Chlorine trioxide**
asymmetrical ClO₃: its possible formation from ClO and O₂ and its possible reactions, 243
- 4-Cyanostilbenes**
in solution, singlet and triplet states in the *cis*-*trans* photoisomerization of, 269
- 3,3'-Diethyloxadicarbocyanine iodide**
dependence on the viscosity and the

- nature of the solvent of the relaxation pathways of the first singlet excited state of, 35
- 2-*N,N*-Dimethylaminopyridine and *p*-nitroaniline, excited state interaction between, 215
- Dimethylformamide
photolysis of $[\text{Mn}(\text{C}_2\text{O}_4)_3]\text{K}_3$ in, 181
- N*-Dioxides
heterocyclic, the photoreaction of pyrazine *N*-dioxide in aqueous solution, 261
- Emission
dual, the fluorescence lifetimes of carbonyl derivatives of azulene showing, 309
and intersystem crossing, quantum yields of of aniline solutions: photostationary state diagram, 67
- Emission lines
shapes of, and filtering by photochemical separation of Hg isotopes, 109
- Energy transfer
intermolecular triplet, from biacetyl to 1,3-butadiene, Arrhenius parameters for, 175
- Excited states
of aza-aromatics, reactivity of: relevance of the effects of protonation, oxygen and exciting wavelength on fluorescence and *trans* → *cis* photoisomerization of naphthylpyridylethylenes in aqueous solution, 165
of 2-*N,N*-dimethylaminopyridine and *p*-nitroaniline, interaction between, 215
first singlet, of 3,3'-diethyloxadicarbocyanine iodide, dependence on the viscosity and the nature of the solvent of the relaxation pathways of, 35
kinetics of between molecules linked by an inert chain, 253
- Exciting wavelength
protonation and oxygen, relevance of the effects of on fluorescence and *trans* → *cis* photoisomerization of naphthylpyridylethylenes in aqueous solution: excited state reactivity of aza-aromatics, 165
- Filtering
and emission line shapes by photochemical separation of Hg isotopes, 109
- Fluorescence
lifetimes of of carbonyl derivatives of azulene showing dual emission, 309
and *trans* → *cis* photoisomerization of naphthylpyridylethylenes in aqueous solution, relevance of the effects of protonation, oxygen and exciting wavelength on: excited state reactivity of aza-aromatics, 165
- Formaldehyde
the reactions of HO with CH_2O and of HCO with NO_2 , 189
- Formate
acetate and oxalate in water, flash photolysis study of the photoionization of, 223
- Formation
light-induced, of spiropyran-merocyanine complexes in solution, laser photolysis studies of, 89
possible, of asymmetrical ClO_3 from ClO and O_2 and its possible reactions, 243
- Formyl radical
the reactions of HO with CH_2O and of HCO with NO_2 , 189
- Hot hydrogen atoms
photochemically generated, reaction of with 1-butene, 335
- Hydrazones
mechanism of direct photoisomerization of pyridylhydrazones, 83
- Hydrogen evolution
photoinduced, from alcohols catalysed by benzophenone and colloidal Pt, 257
- Hydroxyl radical
the reactions of HO with CH_2O and of HCO with NO_2 , 189
- Inert chain
excited state kinetics between molecules linked by, 253
- Interaction
excited state, between 2-*N,N*-dimethylaminopyridine and *p*-nitroaniline, 215
- Intersystem crossing
and emission, quantum yields of of aniline solutions: photostationary state diagram, 67

Isotopes

of Hg, emission line shapes and filtering by photochemical separation of, 109

Kinetics

of the chemiluminescence in the Cl-NO₂-O₃ system, 201
excited state, between molecules linked by an inert chain, 253
of photobleaching: photogalvanic cells, 1
of the reaction of the methoxy radical with O₂: photolysis of methyl nitrite, 149

Laser photolysis

of the light-induced formation of spiropyran-merocyanine complexes in solution, 89

Lasers

IR laser multiple photon chemistry of nitromethane, 13
picosecond time resolution by a continuous wave laser amplitude modulation technique: a critical investigation, 21
picosecond time resolution by a continuous wave laser amplitude modulation technique: experimental basis, 295

Lifetimes

fluorescence, of carbonyl derivatives of azulene showing dual emission, 309
triplet, of biacetyl in the gas phase, temperature dependence of, 55

Manganese

photolysis of [Mn(C₂O₄)₃]K₃ in dimethylformamide, 181

Mercury

emission line shapes and filtering by photochemical separation of Hg isotopes, 109

Merocyanines

laser photolysis studies of the light-induced formation of spiropyran-merocyanine complexes in solution, 89

Methane

and ammonia, mixtures of, methylamine formation in the vacuum UV photolysis of, 353

Methoxy radical

kinetics of the reaction of with O₂: photolysis of methyl nitrite, 149

Methylamine

formation of in the vacuum UV photolysis of methane and ammonia mixtures, 353

Methyl nitrite

photolysis of: kinetics of the reaction of the methoxy radical with O₂, 149

4-Methylpentan-2-one

on the role of naphthalene in type II photocleavage of in solution, 99

Naphthalene

on the role of in type II photocleavage of 4-methylpentan-2-one in solution, 99

Naphthylpyridylethylenes

in aqueous solution, relevance of the effects of protonation, oxygen and exciting wavelength on fluorescence and *trans* → *cis* photoisomerization of: excited state reactivity of azaromatics, 165

Nitric oxide

the dynamics of the C + NO reaction, 319

***p*-Nitroaniline**

and 2-*N,N*-dimethylaminopyridine, excited state interaction between, 215

Nitrogen dioxide

a kinetic study of the chemiluminescence in the Cl-NO₂-O₃ system, 201
the reactions of HO with CH₂O and of HCO with NO₂, 189

Nitromethane

IR laser multiple photon chemistry of, 13

Oxalate

formate and acetate in water, flash photolysis study of the photoionization of, 223
photolysis of [Mn(C₂O₄)₃]K₃ in dimethylformamide, 181

Oxepane

liquid, photolysis at 185 nm of, 347

Oxygen

asymmetrical ClO₃: its possible formation from ClO and O₂ and its possible reactions, 243
photolysis of methyl nitrite: kinetics of the reaction of the methoxy radical with O₂, 149
protonation and exciting wavelength, relevance of the effects of on fluo-

- rescence and *trans* → *cis* photoisomerization of naphthylpyridylethylenes in aqueous solution: excited state reactivity of aza-aromatics, 165
- Ozone**
a kinetic study of the chemiluminescence in the Cl-NO₂-O₃ system, 201
- Pentafluoropyridine**
the gas phase photolysis of, 233
- Photobleaching**
kinetics of: photogalvanic cells, 1
- Photochemical separation**
of Hg isotopes, emission line shapes and filtering by, 109
- Photochemistry**
of adsorbed molecules: quantum yields of photoprocesses of molecules in the adsorbed state, 49
of N₅- and N₁₀-substituted alloxazinium cations: photohydration in neutral and acidic solutions, 133
- Photocleavage**
type II, of 4-methylpentan-2-one in solution, on the role of naphthalene in, 99
- Photogalvanic cells**
the kinetics of photobleaching, 1
- Photohydration**
in neutral and acidic solutions: photochemistry of N₅- and N₁₀-substituted alloxazinium cations, 133
- Photoionization**
of formate, acetate and oxalate anions in water, flash photolysis study of, 223
- Photoisomerization**
cis-trans, of 4-cyanostilbenes in solution, singlet and triplet states in, 269
direct, mechanism of of pyridylhydrazones, 83
trans → *cis*, and fluorescence of naphthylpyridylethylenes in aqueous solution, relevance of the effects of protonation, oxygen and exciting wavelength on: excited state reactivity of aza-aromatics, 165
- Photolysis**
at 185 nm of liquid oxepane, 347
flash, of the photoionization of formate, acetate and oxalate anions in water, 223
gas phase, of pentafluoropyridine, 233
laser, of the light-induced formation of spiropyran-merocyanine complexes in solution, 89
of methyl nitrite: kinetics of the reaction of the methoxy radical with O₂, 149
of [Mn(C₂O₄)₃]K₃ in dimethylformamide, 181
of sodium cyanide in aqueous solution, 207
vacuum UV, of methane and ammonia mixtures, methylamine formation in, 353
- Photoprocesses**
of molecules in the adsorbed state, quantum yields of: photochemistry of adsorbed molecules, 49
- Photoracemization**
of Ru(bipyridine)₃²⁺, 123
- Photoreaction**
of heterocyclic *N*-dioxides, studies on: photoreaction of pyrazine *N*-dioxide in aqueous solution, 261
- Photoreduction**
of anthraquinone in aqueous micellar solution, 325
- Photostationary state diagram**
emission and intersystem crossing quantum yields of aniline solutions, 67
- Picosecond time resolution**
by a continuous wave laser amplitude modulation technique: a critical investigation, 21
by a continuous wave laser amplitude modulation technique: experimental basis, 295
- Platinum**
photoinduced hydrogen evolution from alcohols catalysed by benzophenone and colloidal Pt, 257
- Protolytic reactions**
of acridine in the triplet state, 75
- Protonation**
oxygen and exciting wavelength, relevance of the effects of on fluorescence and *trans* → *cis* photoisomerization of naphthylpyridylethylenes in aqueous solution: excited state reactivity of aza-aromatics, 165
- Pyrazine *N*-dioxide**
in aqueous solutions: studies on the photoreaction of heterocyclic *N*-dioxides, 261
- Pyridine**
excited state interaction between 2-*N,N*-dimethylaminopyridine and

- p*-nitroaniline, 215
the gas phase photolysis of pentafluoropyridine, 233
- Pyridylhydrazones**
mechanism of direct photoisomerization of, 83
- Quantum yields**
of emission and intersystem crossing of aniline solutions: photostationary state diagram, 67
of photoprocesses of molecules in the adsorbed state: photochemistry of adsorbed molecules, 49
- Reactivity**
excited state, of aza-aromatics: relevance of the effects of protonation, oxygen and exciting wavelength on fluorescence and *trans* → *cis* photoisomerization of naphthylpyridylethylenes in aqueous solution, 165
- Relaxation pathways**
of the first singlet excited state of 3,3'-diethyloxadicyanone iodide, dependence on the viscosity and the nature of the solvent of, 35
- Ru(bipyridine)₃²⁺**
photoracemization of, 123
- Singlet states**
first excited, of 3,3'-diethyloxadicyanone iodide, dependence on the viscosity and the nature of the solvent of the relaxation pathways of, 35
and triplet states in the *cis-trans* photoisomerization of 4-cyanostilbenes in solution, 269
- Sodium cyanide**
photolysis of in aqueous solution, 207
- Solvent effect**
and viscosity, dependence on of the relaxation pathways of the first singlet excited state of 3,3'-diethyloxadicyanone iodide, 35
- Spiropyrans**
laser photolysis studies of the light-induced formation of spiropyran-merocyanine complexes in solution, 89
- Stilbene**
singlet and triplet states in the *cis-trans* photoisomerization of 4-cyanostilbenes in solution, 269
- Triplet states**
of biacetyl, temperature dependence of the lifetime of in the gas phase, 55
protolytic reactions of acridine in, 75
and singlet states in the *cis-trans* photoisomerization of 4-cyanostilbenes in solution, 269
- Viscosity**
and the nature of the solvent, dependence on of the relaxation pathways of the first singlet excited state of 3,3'-diethyloxadicyanone iodide, 35
