

Subject Index

- Absorption**
excited state, of the dye *p*-phenylenebis-(5-phenyl-2-oxazole) in liquid solution and in the vapour phase, 1
fluorescence quantum yield evaluation: corrections for re-absorption and re-emission, 97
triplet-triplet, extinction coefficients and quantum yields for using laser flash photolysis, 61
- Acetone**
triplet state, the energy transfer from to 9-bromoanthracene and 9,10-dichloroanthracene: an investigation under high pressure, 261
triplet state, quenching of by 1,3-dienes in fluid solution, 199
- Acrylonitrile**
laser intensity effects in the rotational distributions of CN radicals formed by IR multiple photon dissociation of C₂H₃CN, 85
- Aldehydes**
aliphatic, photochemistry of, 233
- Anthracenes**
the energy transfer from triplet state acetone to 9-bromoanthracene and 9,10-dichloroanthracene: an investigation under high pressure, 261
- Azines**
aryl-substituted acyclic, thermochromism and photochromism of: investigations on the mechanism of photochemical isomerization, 51
aryl-substituted acyclic, thermochromism and photochromism of: photochemistry, 39
- Benzaldehyde**
photolysis studies of *p*-isothiocyanatobenzaldehyde in solution, 145
- Benzophenone**
and its derivatives, impurity fluorescence in the irradiation of, 265
- Bromide ion quenching**
of micellized hydrocarbon fluorescence: a search for effects of emitter lifetime on the quenching behaviour, 345
- 9-Bromoanthracene**
and 9,10-dichloroanthracene, the energy transfer from triplet state acetone to: an investigation under high pressure, 261
- Bromochlorodifluoromethane**
atmospheric photochemistry of CF₂ClBr, 335
- Carbon tetrachloride**
quenching of excited 2,5-diphenyloxazole by CCl₄, 67
- Chlorine atoms**
the chlorine-atom-sensitized oxidation of chloroform, 19
Cl(3p⁵(²P_J)) in the gas phase, the diffusion coefficient of, 245
- Chlorine monoxide**
on the photooxidation of gaseous HCCl₃ and ClO radical formation, 157
- Chloroform**
the chlorine-atom-sensitized oxidation of, 19
gaseous, the photooxidation of and ClO radical formation, 157
- Cyanide radicals**
laser intensity effects in the rotational distributions of CN radicals formed by IR multiple photon dissociation of C₂H₃CN, 85
- Cyclohexanones**
photoreduction of by 2-propanol, involvement of an enol species in: selection of kinetic models in photochemistry, 269
- Dichloride ions**
evolution of Cl₂⁻ in aqueous NaCl solutions, 303
- 9,10-Dichloroanthracene**
and 9-bromoanthracene, the energy transfer from triplet state acetone to: an investigation under high pressure, 261
- 1,3-Dienes**
in fluid solution, quenching of acetone triplets by, 199

- Diffusion coefficient**
of chlorine atoms $\text{Cl}(3p^5(^2P_J))$ in the gas phase, 245
- Diffusion-controlled reactions**
partly, kinetics of: analyses of quenching involving energy transfer from two states, 177
partly, kinetics of: artefacts in sensitized photoreactions, 133
- 1,1-Diiodoethane**
and CH_2I_2 , photolysis of at 300 nm, 107
- Diiodomethane**
and 1,1- $\text{C}_2\text{H}_4\text{I}_2$, photolysis of at 300 nm, 107
- 2,5-Diphenyloxazole**
excited, quenching of by CCl_4 , 67
- Dyes**
p-phenylene-bis-(5-phenyl-2-oxazole), studies of excited state absorption of in liquid solution and in the vapour phase, 1
- Electron acceptors**
geometrical photoisomerization of β -styrylnaphthalene in the presence of, 11
- Emission**
fluorescence quantum yield evaluation: corrections for re-absorption and re-emission, 97
- Energy transfer**
from triplet state acetone to 9-bromoanthracene and 9,10-dichloroanthracene: an investigation under high pressure, 261
from two states, analyses of quenching involving: kinetics of partly diffusion-controlled reactions, 177
- Enol species**
involvement of in the photoreduction of cyclohexanones by 2-propanol: selection of kinetic models in photochemistry, 269
- 2-Ethoxynaphthalene**
quenching of fluorescence of by methyl benzoate: fluorescence enhancement at higher quencher concentrations, 167
- Evolution**
of Cl_2 in aqueous NaCl solutions, 303
- Exciplex**
intramolecular, in polymeric matrices, restricted internal rotation of, 77
- Excited states**
absorption of of the dye *p*-phenylene-bis-(5-phenyl-2-oxazole) in liquid solution and in the vapour phase, 1
- Extinction coefficients**
and quantum yields for triplet-triplet absorption using laser flash photolysis, 61
- Fluorescence**
do aromatic *C*-nitroso compounds fluoresce from their second excited singlet states?, 257
2-ethoxynaphthalene, quenching of by methyl benzoate: fluorescence enhancement at higher quencher concentrations, 167
evaluation of quantum yield of: corrections for re-absorption and re-emission, 97
impurity, in the irradiation of benzophenone and its derivatives, 265
micellized hydrocarbon, bromide ion quenching of: a search for effects of emitter lifetime on the quenching behaviour, 345
quantum yield of of pyrene-1-carboxaldehyde in protic solvents, 341
- Formation**
of ClO radicals and the photooxidation of gaseous HCCl_3 , 157
- Formic acid**
oxidation of by oxygen in an aqueous medium, photocatalysis of, 291
- Hydrazones**
sensitized photoisomerization of pyridylhydrazones, 125
- Hydrogen**
attempted photoproduction of using zinc(II) tetrasulphophthalocyanine, 253
- Impurities**
fluorescence of in the irradiation of benzophenone and its derivatives, 265
- IR multiple photon dissociation**
of $\text{C}_2\text{H}_3\text{CN}$, laser intensity effects in the rotational distributions of CN radicals formed by, 85
- Irradiation**
of benzophenone and its derivatives, impurity fluorescence in, 265

Isomerization

photochemical, investigations on the mechanism of: thermochromism and photochromism of aryl-substituted acyclic azines, 51

***p*-Isothiocyanatobenzaldehyde**

in solution, photolysis studies of, 145

Kinetic models

in photochemistry, selection of: involvement of an enol species in the photoreduction of cyclohexanones by 2-propanol, 269

Kinetics

of partly diffusion-controlled reactions: analyses of quenching involving energy transfer from two states, 177

of partly diffusion-controlled reactions: artefacts in sensitized photoreactions, 133

Laser flash photolysis

extinction coefficients and quantum yields for triplet-triplet absorption using, 61

Laser intensity

effects of in the rotational distributions of CN radicals formed by IR multiple photon dissociation of C_2H_3CN , 85

Lifetime

emitter, a search for effects of on the quenching behaviour: bromide ion quenching of micellized hydrocarbon fluorescence, 345

Matrices

polymeric, restricted internal rotation of an intramolecular exciplex in, 77

Methyl benzoate

quenching of 2-ethoxynaphthalene fluorescence by: fluorescence enhancement at higher quencher concentrations, 167

Methylsilane

the 147 nm photodecomposition of, 311

Micellized hydrocarbon fluorescence

bromide ion quenching of: a search for effects of emitter lifetime on the quenching behaviour, 345

Naphthalene

quenching of 2-ethoxynaphthalene fluorescence by methyl benzoate: fluorescence enhancement at higher quencher concentrations, 167

C-Nitroso compounds

aromatic, do they fluoresce from their second excited singlet states?, 257

Oxidation

chlorine-atom-sensitized, of chloroform, 19

of formic acid by oxygen in an aqueous medium, photocatalysis of, 291

Oxygen

photocatalysis of formic acid oxidation by in an aqueous medium, 291

1-Pentene

gas phase photolysis of at 123.7 nm (10.0 eV), 323

***p*-Phenylene-bis-(5-phenyl-2-oxazole)**

studies of excited state absorption of in liquid solution and in the vapour phase, 1

Photocatalysis

of formic acid oxidation by oxygen in an aqueous medium, 291

Photochemical mechanisms

for photogalvanic cells, stability of, 205

Photochemistry

of aliphatic aldehydes, 233

atmospheric, of CF_2ClBr , 335

selection of kinetic models in: involvement of an enol species in the photoreduction of cyclohexanones by 2-propanol, 269

Photochromism

and thermochromism of aryl-substituted acyclic azines: investigations on the mechanism of photochemical isomerization, 51

and thermochromism of aryl-substituted acyclic azines: photokinetics, 39

Photodecomposition

147 nm, of methylsilane, 311

Photogalvanic cells

stability of photochemical mechanisms for, 205

Photoisomerization

geometrical, of β -styrylnaphthalene in the presence of electron acceptors, 11

sensitized, of pyridylhydrazones, 125

Photokinetics

thermochromism and photochromism of aryl-substituted acyclic azines, 39

Photolysis

of CH_2I_2 and 1,1- $C_2H_4I_2$ at 300 nm, 107

- gas phase, of 1-pentene at 123.7 nm (10.0 eV), 323
- of *p*-isothiocyanatobenzaldehyde in solution, 145
- laser flash, extinction coefficients and quantum yields for triplet-triplet absorption using, 61
- Photooxidation**
- of gaseous HCCl_3 and ClO radical formation, 157
- Photoproduction**
- attempted, of hydrogen using zinc(II) tetrasulphophthalocyanine, 253
- Photoreactions**
- sensitized, artefacts in: kinetics of partly diffusion-controlled reactions, 133
- Photoreduction**
- of cyclohexanones by 2-propanol, involvement of an enol species in: selection of kinetic models in photochemistry, 269
- 2-Propanol**
- involvement of an enol species in the photoreduction of cyclohexanones by: selection of kinetic models in photochemistry, 269
- Pyrene-1-carboxaldehyde**
- in protic solvents, fluorescence quantum yield of, 341
- Pyridylhydrazones**
- sensitized photoisomerization of, 125
- Quantum yield**
- and extinction coefficients for triplet-triplet absorption using laser flash photolysis, 61
- fluorescence, evaluation of: corrections for re-absorption and re-emission, 97
- fluorescence, of pyrene-1-carboxaldehyde in protic solvents, 341
- Quenching**
- of acetone triplets by 1,3-dienes in fluid solution, 199
- bromide ion, of micellized hydrocarbon fluorescence: a search for effects of emitter lifetime on the quenching behaviour, 345
- of 2-ethoxynaphthalene fluorescence by methyl benzoate: fluorescence enhancement at higher quencher concentrations, 167
- of excited 2,5-diphenyloxazole by CCl_4 , 67
- involving energy transfer from two states, analyses of: kinetics of partly diffusion-controlled reactions, 177
- Rotation**
- restricted internal, of an intramolecular exciplex in polymeric matrices, 77
- Rotational distributions**
- of CN radicals formed by IR multiple photon dissociation of $\text{C}_2\text{H}_3\text{CN}$, laser intensity effects in, 85
- Singlet states**
- second excited, do aromatic C-nitroso compounds fluoresce from?, 257
- Sodium chloride**
- evolution of Cl_2^- in aqueous NaCl solutions, 303
- Stability**
- of photochemical mechanisms for photogalvanic cells, 205
- β -Styrylnaphthalene**
- geometrical photoisomerization of in the presence of electron acceptors, 11
- Thermochromism**
- and photochromism of aryl-substituted acyclic azines: investigations on the mechanism of photochemical isomerization, 51
- and photochromism of aryl-substituted acyclic azines: photokinetics, 39
- Triplet states**
- of acetone, the energy transfer from to 9-bromoanthracene and 9,10-dichloroanthracene: an investigation under high pressure, 261
- of acetone, quenching of by 1,3-dienes in fluid solution, 199
- Zinc(II) tetrasulphophthalocyanine**
- attempted photoproduction of hydrogen using, 253
