

INDEX OF NAMES

Notes

In the lab group descriptions, titles are used in a very inconsistent way. When compiling the name index, all titles were removed, using the symbols '=' and '-' to indicate whether the name is found as a 'research team head' or as a 'staff member'.

Also, all diacritics (i e dots, circles, accents etc in names like 'Åquist', 'Finnström', and 'Tegnér') were removed. - The computer used for the compilation has the peculiar rule of regarding the comma as 'higher' than any of the letters, placing 'Gal, D' after 'Galaup', etc. It is hoped that this will not cause undue inconvenience.
