

## Subject Index

---

- Absorption profiles  
of the light in a photochemical reactor,  
measurement of for industrial photo-  
chemistry, 47
- Acridine  
in solution, radicals produced from the  
laser-induced photoionization of, 81
- Activation barrier  
in the process of hydrogen abstraction,  
origin of, and the perturbation treat-  
ment, 151
- Analysis  
of Kiton Red S dye degradation effects  
on the output energy of the pulsed  
organic dye laser, 251
- Anions  
inorganic, intersystem crossing of  
stilbene-like molecules induced by,  
and the role of charge transfer  
interactions in photoreactions, 211
- Arylvinylethioamides  
mechanism of photochemical reactions  
of, and the photoisomerization of  
 $\alpha$ -thienylvinylethioamide, 307
- Benzofluoranthenes  
photophysical properties of fluoran-  
thene and its benzo analogues, 9
- Butenedioic acid  
derivatives of, the triplet energies of,  
391
- Carbenes  
formation of during H<sub>2</sub> elimination  
from excited cyclo-octane mol-  
ecules, 273
- $\beta$ -Carboline  
excited state proton transfer in, 1
- Carbon disulphide  
two-photon dissociation of with a KrF  
laser ( $\lambda = 248$  nm), 245
- Carbon tetrachloride  
and active nitrogen mixtures, on the  
CN(B  $^2\Sigma \rightarrow X$   $^2\Sigma$ ) emission intensity  
in, 301  
quenching and photobleaching of  
excited polycyclic aromatic hydro-  
carbons by, 137
- Catalyst poisoning  
by petroleum trace metals, photo-  
acoustic monitoring of, 277
- Charge transfer  
role of in photoreactions, and inor-  
ganic anion-induced intersystem  
crossing of stilbene-like molecules,  
211
- Chemiluminescence  
in oriented systems, and chemilumi-  
nescence of 10,10'-dimethyl-9,9'-  
biacridinium nitrate in micellar  
media, 327
- Chlorine  
the reaction of Cl( $3^2P_J$ ) with nitric  
acid in the gas phase, 39
- Chlorine azide  
the UV photolysis of, 125
- Cobalt  
light-induced formation of a reversible  
dioxygen complex of Co(II) tetra-  
phenylporphyrin at a micellar inter-  
face, 193
- Combination reactions  
radical, effect of micelle size on in the  
photolysis of diphenylmercury in  
micellar solution, 269
- Complexes  
reversible dioxygen, of Co(II) tetra-  
phenylporphyrin, light-induced for-  
mation of at a micellar interface,  
193
- Cyanide  
on the CN(B  $^2\Sigma \rightarrow X$   $^2\Sigma$ ) emission  
intensity in active nitrogen and  
Cl<sub>4</sub>C mixtures, 301
- Cyclo-octane  
excited molecules of, carbene forma-  
tion during H<sub>2</sub> elimination from,  
273
- Decay processes  
of singlet excited phenol in solution,  
19
- Decomposition  
of C<sub>2</sub>H<sub>5</sub>OH vapour by IR radiation  
from a pulsed CO<sub>2</sub> laser, 241  
Hg-photosensitized, of 1,2-epoxybutane,  
383

**Deuterium**

isotopic selectivity controlled by radical reactions after  $\text{CO}_2$  laser photolysis of  $\text{CF}_3\text{CDCl}_2$ , 231

**Dimerization**

isophorone, concentration effects on, and chemical photochemical reactivity in micellar media and microemulsions, 101

***p*-Dimethylaminobenzonitrile**

dynamics of the dual fluorescences of, 89

10,10'-Dimethyl-9,9'-biacridinium nitrate chemiluminescence of in micellar media, and chemiluminescence in oriented systems, 327

**Dimethyl sulphite**

gaseous, and  $\text{CH}_3\text{SO}_2\text{Cl}$ ,  $\text{CCl}_3\text{SCl}$  and  $\text{SO}_2\text{ClF}$ , photoabsorption spectra of, 117

**1,4-Dioxan**

remarks on the anomalous polarity of in photophysics and photochemistry, 289

**Diphenylmercury**

photolysis of in micellar solution, and the effect of micelle size on radical combination reactions, 269

**Dissociation**

two-photon, of  $\text{CS}_2$  with a KrF laser ( $\lambda = 248 \text{ nm}$ ), 245

**Dodecylammonium propionate**

fluorescence quenching in reversed micelles of, 223

**Dyes**

halofluorescein, fluorescence self-quenching of, 161

Kiton Red S, analysis of degradation effects on the output energy of the pulsed organic dye laser containing, 251

**Dynamics**

of the dual fluorescences of *p*-dimethylaminobenzonitrile, 89

**Efficiency**

of singlet oxygen production by thio-carbonyls, 293

**Electron transfer**

in the quenching of protonated triplet thionine and methylene blue by ground state thionine, 197

**Elimination**

of  $\text{H}_2$  from excited cyclo-octane molecules, carbene formation during, 273

**Emission**

$\text{CN}(\text{B } ^2\Sigma \rightarrow \text{X } ^2\Sigma)$ , intensity of in active nitrogen and  $\text{Cl}_4\text{C}$  mixtures, 301

**Emission data**

in quenching experiments, correction of, 281

**1,2-Epoxybutane**

Hg-photosensitized decomposition of, 383

**Ethanol**

gaseous, decomposition of by IR radiation from a pulsed  $\text{CO}_2$  laser, 241

**Filter**

new chemical, for the isolation of the 366 nm Hg emission line, 185

**Flash techniques**

comment on the publication of transient spectra obtained using, 395

**Fluoranthene**

and its benzo analogues, photophysical properties of, 9

**Fluorescence**

dual, of *p*-dimethylaminobenzonitrile, dynamics of, 89

methyl anthroate, studies on the temperature dependence of, 355

quenching of in dodecylammonium propionate reversed micelles, 223

**Foam**

polyurethane rigid, a study of natural weathering of by photoacoustic spectroscopy, 347

**Formation**

light-induced, of a reversible dioxygen complex of Co(II) tetraphenylporphyrin at a micellar interface, 193

**Halofluorescein dyes**

fluorescence self-quenching of, 161

**Halogenated alkanes**

isotopic selectivity controlled by radical reactions after  $\text{CO}_2$  laser photolysis of  $\text{CF}_3\text{CDCl}_2$ , 231

**Hydrocarbons**

excited polycyclic aromatic, quenching and photobleaching of by  $\text{Cl}_4\text{C}$ , 137

**Hydrogen**

carbene formation during  $\text{H}_2$  elimination from excited cyclo-octane molecules, 273

- reactivity of H atoms with liquid water, 29
- Hydrogen abstraction  
origin of the activation barrier in the process of, and the perturbation treatment, 151
- Interface  
micellar, light-induced formation of a reversible dioxygen complex of Co(II) tetraphenylporphyrin at a, 193
- Intersystem crossing  
inorganic anion-induced, of stilbene-like molecules, and the role of charge transfer interactions in photoreactions, 211
- Ions  
and other transient species in low temperature matrices, photochemistry and spectroscopy of, 97
- Isophorone  
dimerization of, concentration effects on, and chemical photochemical reactivity in micellar media and microemulsions, 101
- Isotopic selectivity  
controlled by radical reactions after CO<sub>2</sub> laser photolysis of CF<sub>3</sub>CDCl<sub>2</sub>, 231
- Kinetics  
of long chain photochemical reactions, influence of the stirring of unstable radical species on in industrial photochemistry, 57
- Kiton Red S  
analysis of degradation effects on the output energy of the pulsed organic dye laser containing, 251
- Laser  
KrF ( $\lambda = 248$  nm), two-photon dissociation of CS<sub>2</sub> with a, 245  
pulsed CO<sub>2</sub>, the decomposition of C<sub>2</sub>H<sub>5</sub>OH vapour by IR radiation from a, 241  
pulsed organic dye, analysis of Kiton Red S dye degradation effects on the output energy of a, 251
- Laser photolysis  
CO<sub>2</sub>, of CF<sub>3</sub>CDCl<sub>2</sub>, isotopic selectivity controlled by radical reactions after, 231
- Matrices  
low temperature, photochemistry and spectroscopy of ions and other transient species in, 97
- Mechanisms  
of photochemical reactions of aryl-vinylenethioamides, and the photoisomerization of  $\alpha$ -thienylvinylenethioamide, 307
- Mercury  
Hg-photosensitized decomposition of 1,2-epoxybutane, 383
- Mercury lines  
366 nm emission, a new chemical filter for the isolation of, 185
- m*-Methoxybenzylacetates  
in micellar solutions, photohydrolysis of, and the substitution of organic solvents, 285
- Methyl anthroate  
studies on the temperature dependence of the fluorescence of, 355
- Methylene blue  
and protonated triplet thionine, electron transfer in the quenching of by ground state thionine, 197
- Methyl sulphonyl chloride  
gaseous, and CCl<sub>3</sub>SCl, SO<sub>2</sub>ClF and (CH<sub>3</sub>O)<sub>2</sub>SO, photoabsorption spectra of, 117
- Micellar media  
chemiluminescence of 10,10'-dimethyl-9,9'-biacridinium nitrate in, and chemiluminescence in oriented systems, 327  
and microemulsions, chemical photochemical reactivity in, and concentration effects on isophorone dimerization, 101  
photohydrolysis of *m*-methoxybenzylacetates in, and the substitution of organic solvents, 285
- Micelles  
dodecylammonium propionate reversed, fluorescence quenching in, 223  
effect of the size of on radical combination reactions in the photolysis of diphenylmercury in micellar solutions, 269
- Microemulsions  
and micellar media, chemical photochemical reactivity in, and concentration effects on isophorone dimerization, 101

- Nitric acid**  
the reaction of Cl atoms ( $\text{Cl}(3^2\text{P}_J)$ ) with in the gas phase, 39
- Nitrogen**  
on the  $\text{CN}(\text{B } ^2\Sigma \rightarrow \text{X } ^2\Sigma)$  emission intensity in active nitrogen and  $\text{Cl}_4\text{C}$  mixtures, 301
- Oriented systems**  
chemiluminescence in, and chemiluminescence of 10,10'-dimethyl-9,9'-biacridinium nitrate in micellar media, 327
- Oxidation**  
of thioketones by singlet oxygen, rates of, 109
- Oxygen**  
a direct determination of the rate constant for the quenching of  $\text{O}(^1\text{S})$  by  $\text{O}_2(\text{a } ^1\Delta_g)$ , 379  
efficiency of singlet oxygen production by thiocarbonyls, 293  
light-induced formation of a reversible dioxygen complex of Co(II) tetraphenylporphyrin at a micellar interface, 193  
rates of oxidation of thioketones by singlet oxygen, 109
- Perturbation treatment**  
of the origin of the activation barrier in the process of hydrogen abstraction, 151
- Petroleum**  
trace metals in, photoacoustic monitoring of catalyst poisoning by, 277
- Phenol**  
singlet excited, in solution, decay processes of, 19
- $\alpha$ -Phenyl- $\beta$ -(2-thienyl)-acrylonitrile  
direct and sensitized *cis-trans* photoisomerization of, 317
- Photoabsorption spectra**  
of gaseous  $\text{CH}_3\text{SO}_2\text{Cl}$ ,  $\text{CCl}_3\text{SCl}$ ,  $\text{SO}_2\text{ClF}$  and  $(\text{CH}_3\text{O})_2\text{SO}$ , 117
- Photoacoustic study**  
of catalyst poisoning by petroleum trace metals, 277  
of natural weathering of polyurethane rigid foam, 347
- Photobleaching**  
and quenching of excited polycyclic aromatic hydrocarbons by  $\text{Cl}_4\text{C}$ , 137
- Photochemical reactions**  
of arylvinyleneethioamides, mechanism of, and the photoisomerization of  $\alpha$ -thienylvinyleneethioamide, 307  
long chain, influence of the stirring of unstable radical species on the kinetics of in industrial photochemistry, 57
- Photochemical reactors**  
measurement of the absorption profile of the light in for industrial photochemistry, 47
- Photochemistry**  
industrial, influence of the stirring of unstable radical species on the kinetics of long chain photochemical reactions in, 57  
industrial, measurement of the absorption profile of the light in a photochemical reactor in, 47  
and photophysics, remarks on the anomalous polarity of 1,4-dioxan in, 289  
and spectroscopy of ions and other transient species in low temperature matrices, 97
- Photohydrolysis**  
of *m*-methoxybenzylacetates in micellar solutions, and the substitution of organic solvents, 285
- Photoionization**  
laser-induced, of acridine in solution, radicals produced from, 81
- Photoisomerization**  
of  $\alpha$ -thienylvinyleneethioamide, and the mechanism of photochemical reactions of arylvinyleneethioamides, 307  
direct and sensitized *cis-trans*, of  $\alpha$ -phenyl- $\beta$ -(2-thienyl)-acrylonitrile, 317
- Photolysis**  
 $\text{CO}_2$  laser, of  $\text{CF}_3\text{CDCl}_2$ , isotopic selectivity controlled by radical reactions after, 231  
of diphenylmercury in micellar solution, and the effect of micelle size on radical combination reactions, 269  
UV, of  $\text{ClN}_3$ , 125
- Photo-oxidation**  
of  $\text{C}_2\text{H}_5\text{CHO}$ , 169  
reversible, the development of a new photochromic structure principle based on, 365
- Photophysics**  
of fluoranthene and its benzo analogues, 9

- and photochemistry, remarks on the anomalous polarity of 1,4-dioxan in, 289
- of rhodamine B, 335
- Photoreactions**  
role of charge transfer interactions in, and inorganic anion-induced inter-system crossing of stilbene-like molecules, 211
- Photosensitization**  
Hg, decomposition of 1,2-epoxybutane by, 383
- Poisoning**  
catalyst, by petroleum trace metals, photoacoustic monitoring of, 277
- Polarity**  
anomalous, of 1,4-dioxan in photo-physics and photochemistry, remarks on the, 289
- Polyurethane**  
rigid foam, study of natural weathering of by photoacoustic spectroscopy, 347
- Propionaldehyde**  
the photo-oxidation of, 169
- Proton transfer**  
excited state, in  $\beta$ -carboline, 1
- Quenching**  
experiments on, correction of emission data in, 281  
fluorescence, in dodecylammonium propionate reversed micelles, 223  
 $O(^1S)$ , by  $O_2(a^1\Delta_g)$ , a direct determination of the rate constant for, 379  
and photobleaching of excited polycyclic aromatic hydrocarbons by  $Cl_4C$ , 137  
of protonated triplet thionine and methylene blue by ground state thionine, electron transfer in the, 197
- Rate constant**  
quenching, of  $O(^1S)$  by  $O_2(a^1\Delta_g)$ , a direct determination of the, 379
- Reactivity**  
chemical photochemical, in micellar media and microemulsions, and concentration effects on isophorone dimerization, 101
- Rhodamine B**  
the photophysics of, 335
- Self-quenching**  
fluorescence, of halofluorescein dyes, 161
- Singlet states**  
decay processes of singlet excited phenol in solution, 19  
efficiency of singlet oxygen production by thiocarbonyls, 293
- Spectroscopy**  
and photochemistry of ions and other transient species in low temperature matrices, 97
- Structure principle**  
new photochromic, based on reversible photo-oxidation, the development of a, 365
- Sulphuryl halides**  
photoabsorption spectra of gaseous  $CH_3SO_2Cl$ ,  $CCl_3SCl$ ,  $SO_2ClF$  and  $(CH_3O)_2SO$ , 117
- Temperature**  
studies on the dependence on of methyl anthroate fluorescence, 355
- Tetraphenylporphyrin**  
Co(II), light-induced formation of a reversible dioxygen complex of at a micellar interface, 193
- $\alpha$ -Thienylvinylethioamide**  
the photoisomerization of, and the mechanism of photochemical reactions of arylvinylethioamides, 307
- Thiocarbonyls**  
efficiency of singlet oxygen production by, 293
- Thioketones**  
rates of oxidation of by singlet oxygen, 109
- Thionine**  
protonated triplet, and methylene blue, electron transfer in the quenching of by ground state thionine, 197
- Trace metals**  
petroleum, photoacoustic monitoring of catalyst poisoning by, 277
- Transients**  
and ions in low temperature matrices, photochemistry and spectroscopy of, 97  
spectra of, obtained using flash techniques, comment on the publication of, 395
- Trichloromethyl sulphur chloride**  
gaseous, and  $CH_3SO_2Cl$ ,  $SO_2ClF$  and  $(CH_3O)_2SO$ , photoabsorption spectra of, 117

**Triplet states**

- electron transfer in the quenching of protonated triplet thionine and methylene blue by ground state thionine, 197
- the triplet energies of butenedioic acid derivatives, 391

**Water**

- reactivity of H atoms with liquid water, 29

**Weathering**

- natural, of polyurethane rigid foam by photoacoustic spectroscopy, a study of, 347
