

Subject Index

- Absorption saturation**
measurements of, determination of the quantum yields of photochemical reactions by means of, and quantum yields of photochemical intramolecular proton transfer reactions in 2-(2',4'-dinitrobenzyl)pyridine solutions, 25
- Acceptors**
various electron, photo-oxidation of 1,4-dihydropyridines by, and a laser flash photolysis study, 99
- Acetonitrile**
dry, investigation of the mechanism of phenanthrene photocyanation by flash photolysis in, 115
- Acids**
carboxylic, ferrocenyl-substituted, the role of aliphatic alcohols in inhibiting the photo-oxidation of, 157
coumaric, solvent effects on the fluorescence of, 373
- Additives**
influence of on the selectivity of successive photochemical reactions in industrial photochemistry, 137
- Alcohols**
aliphatic, the role of in inhibiting the photo-oxidation of ferrocenyl-substituted carboxylic acids, 157
or ethers, the effects of the addition of on the photolysis of the *n*-butyl-*o*-titanate-H₂O system, 189
- Amplitude modulation**
continuous-wave laser, development of picosecond time-resolved techniques by, and systematic errors, 297
- Analysis**
computer, of mixing problems arising in consecutive photochemical reactions, 213
- Annelides**
Ru, luminescence properties of amphiphilic complexes of in micellar phases, 275
- Anthraquinone-2-sulphonate**
aqueous, primary process in the photochemistry of by flash photolysis, 361
- D-"Arabino"-hexulose phenylosazone**
direct and sensitized photoisomerization of, and photochemistry and photophysics of osazones, 165
- Azines**
aryl-substituted acyclic, thermochromism and photochromism of, and quenching of the photochemical *E-Z* isomerization via Förster energy transfer, 263
- Benzocyclobutanone**
and 2,2-dihydrocyclobuta[1]phenanthrenone, low temperature photolysis of, and evidence for photochromic behaviour, 131
- Benzophenone**
quenching effect of five-membered ring heterocycles on the photo-reduction and photocycloaddition reactions of, 91
- Benzyl chloride**
cage effect in the photolysis of, and kinetics of partly diffusion-controlled reactions, 223
- n*-Butyl-*o*-titanate**
and H₂O system, effects of the addition of alcohols or ethers on the photolysis of the, 189
- Cage effect**
in the photolysis of benzyl chloride, and kinetics of partly diffusion-controlled reactions, 223
- Carbonyl(3,5-di-*tert*-butyl-*o*-quinone)-rhenium radical**
fluorescence lifetime and quantum yield measurements of in solution, 87
- Charge separation**
photoinduced, in aqueous solution, temperature dependence of the efficiency of, 1
- Chromatography**
high pressure liquid, in photokinetics, 285

Complexes

Ru amphiphilic (annelides), in micellar phases, luminescence properties of, 275

Coronene

the rate constant for the reaction of the singlet state of with O₂ in non-polar solvents, 51

Development

of picosecond time-resolved techniques by continuous-wave laser amplitude modulation, and systematic errors, 297

Diffusion

kinetics of reactions partly controlled by, and the cage effect in the photolysis of benzyl chloride, 223

2,2-Dihydrocyclobuta[1]phenanthrene and benzocyclobutanone, low temperature photolysis of, and evidence for photochromic behaviour, 131

1,4-Dihydropyridines

photo-oxidation of by various electron acceptors studied by laser flash photolysis, 99

4-Dimethylamino-4'-nitroazobenzene

a flash spectroscopy study of the thermal *cis* → *trans* isomerization of in the vapour phase, 245

Dimethyl norbornadiene-2,3-dicarboxylate evidence for triplet participation in the 2-methoxynaphthalene-sensitized isomerization of, 379

2-(2',4'-Dinitrobenzyl)pyridine

solutions of, quantum yields of photochemical intramolecular proton transfer reactions in, and determination of the quantum yields of photochemical reactions by means of absorption saturation measurements, 25

Donor

quenching and reversible energy transfer kinetics involving two excited states of a, 233

Efficiency

of photoinduced charge separation in aqueous solution, temperature dependence of the, 1

Electron acceptors

various, photo-oxidation of 1,4-dihydropyridines by, and a laser flash photolysis study, 99

Electron spin resonance

investigation of the photoinduced fragmentation of β-hydroxyalkyl-*tert*-butyl peroxides using, 123

Energy transfer

Förster, quenching of the photochemical *E*-*Z* isomerization via, and thermochromism and photochromism of aryl-substituted acyclic azines, 263

intermolecular and intramolecular electronic, in solution, novel aspects of, 195

reversible, and quenching, kinetics of involving two excited donor states, 233

Errors

systematic, and development of picosecond time-resolved techniques by continuous-wave laser amplitude modulation, 297

Ethers

or alcohols, the effects of the addition of on the photolysis of the *n*-butyl-*o*-titanate-H₂O system, 189

Excited states

dual fluorescence from an aromatic monoazine with close-lying ¹n,π* and ¹π,π* states, 41

quenching and reversible energy transfer kinetics involving two excited donor states, 233

Ferrocenyl ion

the role of aliphatic alcohols in inhibiting the photo-oxidation of carboxylic acids containing the, 157

Fluorescence

of coumaric acids, solvent effects on the, 373

dual, from an aromatic monoazine with close-lying ¹n,π* and ¹π,π* states, 41

lifetime of and quantum yield measurements of the carbonyl(3,5-di-*tert*-butyl-*o*-quinone)rhodium radical in solution, 87

Fragmentation

photoinduced, of β-hydroxyalkyl-*tert*-butyl peroxides, and an electron spin resonance investigation, 123

2-(*o*-Hydroxyaryl)azole

solutions of, quantum yields of photochemical intramolecular proton

- transfer reactions in, and determination of the quantum yields of photochemical reactions by means of absorption saturation measurements, 33
- 4-Hydroxyazobenzene**
a flash spectroscopy study of the thermal *cis* → *trans* isomerization of in the vapour phase, 255
- Inhibition**
of the photo-oxidation of ferrocenyl-substituted carboxylic acids, role of aliphatic alcohols in, 157
- Isomerization**
2-methoxynaphthalene-sensitized, of dimethyl norbornadiene-2,3-dicarboxylate, evidence for triplet participation in the, 379
photochemical *E-Z*, quenching of via Förster energy transfer, and thermochromism and photochromism of aryl-substituted acyclic azines, 263
thermal *cis* → *trans*, of 4-hydroxyazobenzene in the vapour phase, a flash spectroscopy study of the, 255
thermal *cis* → *trans*, in the vapour phase of 4-dimethylamino-4'-nitroazobenzene, a flash spectroscopy study of the, 245
- Kinetics**
of partly diffusion-controlled reactions, and the cage effect in the photolysis of benzyl chloride, 223
quenching and reversible energy transfer, involving two excited donor states, 233
and selectivity of consecutive long-chain photochemical reactions, influence of the stirring of reactants on in industrial photochemistry, 7
- Laser**
continuous-wave, amplitude modulation of a, development of picosecond time-resolved techniques by, and systematic errors, 297
flash photolysis study of the photo-oxidation of 1,4-dihydropyridines by various electron acceptors using a, 99
- Lifetime**
fluorescence, and quantum yield measurements of the carbonyl(3,5-di-*tert*-butyl-*o*-quinone)rhenium radical in solution, 87
- Luminescence**
of amphiphilic complexes of Ru in micellar phases (annelides), 275
- Mechanism**
of phenanthrene photocyanation, investigation of by flash photolysis in dry CH₃CN, 115
- 2-Methoxynaphthalene**
evidence for triplet participation in the isomerization of dimethyl norbornadiene-2,3-dicarboxylate sensitized by, 379
- 9-Methylanthracene**
regioselective photodimerization of in homogeneous and micellar solutions, 61
- Micelles**
luminescence properties of amphiphilic complexes of Ru (annelides) in, 275
solutions of, regioselective photodimerization of 9-methylanthracene in, and in homogeneous solutions, 61
- Mixing**
problems of, arising in consecutive photochemical reactions, computer analysis of, 213
- Modelling**
and trial runs of a reactor with separate photochemical and thermal steps in industrial photochemistry, 313
- Modulation**
continuous-wave laser amplitude, development of picosecond time-resolved techniques by, and systematic errors, 297
- Monoazines**
aromatic, with close-lying ¹n,π* and ¹π,π* states, dual fluorescence from, 41
- Nitrous oxide**
laboratory studies on relevant to stratospheric processes, 369
- Non-polar solvents**
rate constant for the reaction of the singlet state of coronene with O₂ in, 51

- Osazones**
photochemistry and photophysics of, and direct and sensitized photoisomerization of D-"arabino"-hexulose phenylosazone, 165
- Oscillatory reactions**
observed in flash photolysis — an artefact?, 289, 293
- Oxalic acid**
in aqueous suspensions of semiconductors illuminated with UV or visible light, oxidation of, 333
- Oxidation**
of oxalic acid in aqueous suspensions of semiconductors illuminated with UV or visible light, 333
- Oxygen**
the rate constant for the reaction of the singlet state of coronene with O₂ in non-polar solvents, 51
- Peroxides**
 β -hydroxyalkyl-*tert*-butyl, photoinduced fragmentation of, and an electron spin resonance investigation, 123
- Phenanthrene**
photocyanation of, investigation of the mechanism of by flash photolysis in dry CH₃CN, 115
- Photochemical reactions**
consecutive, computer analysis of mixing problems arising in, 213
consecutive long-chain, influence of the stirring of reactants on the kinetics and selectivity of in industrial photochemistry, 7
determination of the quantum yields of by means of absorption saturation measurements, 25, 33
successive, influence of additives on the selectivity of in industrial photochemistry, 137
- Photochemistry**
of aqueous anthraquinone-2-sulphonate by flash photolysis, primary process in the, 361
industrial, and influence of additives on the selectivity of successive photochemical reactions, 137
industrial, and the influence of the stirring of reactants on the kinetics and selectivity of consecutive long-chain photochemical reactions, 7
industrial, modelling and trial runs of a reactor with separate photochemical and thermal steps in, 313
and photophysics of osazones, and direct and sensitized photoisomerization of D-"arabino"-hexulose phenylosazone, 165
- Photochromism**
evidence for in the low temperature photolysis of benzocyclobutanone and 2,2-dihydrocyclobuta[1]phenanthrene, 131
and thermochromism of aryl-substituted acyclic azines, and quenching of the photochemical *E-Z* isomerization via Förster energy transfer, 263
- Photoconductivity**
electrical, of aromatic nitro halogen compounds in solution, 345
- Photocyanation**
phenanthrene, investigation of the mechanism of by flash photolysis in dry CH₃CN, 115
- Photocycloaddition**
and photoreduction, benzophenone, quenching effect of five-membered ring heterocycles on, 91
- Photodimerization**
regioselective, of 9-methylanthracene in homogeneous and micellar solutions, 61
- Photoisomerization**
direct and sensitized, of D-"arabino"-hexulose phenylosazone, and photochemistry and photophysics of osazones, 165
- Photokinetics**
high pressure liquid chromatography in, 285
- Photolysis**
of benzyl chloride, cage effect in the, and kinetics of partly diffusion-controlled reactions, 223
flash, in dry CH₃CN, investigation of the mechanism of phenanthrene photocyanation by, 115
flash, oscillatory reactions observed in — an artefact?, 289, 293
flash, primary process in the photochemistry of aqueous anthraquinone-2-sulphonate by, 361
laser flash, study of the photo-oxidation of 1,4-dihydropyridines by various electron acceptors using, 99

- low temperature, of benzocyclobutanone and 2,2-dihydrocyclobuta[1]phenanthrenone, and evidence for photochromic behaviour, 131
- of the *n*-butyl-*o*-titanate-H₂O system, effects of the addition of alcohols or ethers on the, 189
- 185 nm, of liquid sulpholan, 55
- Photo-oxidation**
 - of ferrocenyl-substituted carboxylic acids, role of aliphatic alcohols in inhibiting the, 157
 - of 1,4-dihydropyridines by various electron acceptors, and a laser flash photolysis study, 99
- Photophysics**
 - and photochemistry of osazones, and direct and sensitized photoisomerization of D-"arabino"-hexulose phenylosazone, 165
- Photoreduction**
 - and photocycloaddition, benzophenone, quenching effect of five-membered ring heterocycles on, 91
- Primary process**
 - in the photochemistry of aqueous anthraquinone-2-sulphonate by flash photolysis, 361
- Proton transfer**
 - photochemical intramolecular, quantum yields of reactions by in 2-(*o*-hydroxyaryl)azole solutions, and determination of the quantum yields of photochemical reactions by means of absorption saturation measurements, 33
 - photochemical intramolecular, quantum yields of reactions by in 2-(2',4'-dinitrobenzyl)pyridine solutions, and determination of the quantum yields of photochemical reactions by means of absorption saturation measurements, 25
- Quantum yield**
 - and fluorescence lifetime of the carbonyl(3,5-di-*tert*-butyl-*o*-quinone)rhenium radical in solution, 87
 - of photochemical intramolecular proton transfer reactions in 2-(*o*-hydroxyaryl)azole solutions, and determination of the quantum yields of photochemical reactions by means of absorption saturation measurements, 33
 - of photochemical intramolecular proton transfer reactions in 2-(2',4'-dinitrobenzyl)pyridine solutions, and determination of the quantum yields of photochemical reactions by means of absorption saturation measurements, 25
- Quenching**
 - by five-membered ring heterocycles, effect of on the photoreduction and photocycloaddition reactions of benzophenone, 91
 - of the photochemical *E-Z* isomerization via Förster energy transfer, and thermochromism and photochromism of aryl-substituted acyclic azines, 263
 - and reversible energy transfer kinetics involving two excited donor states, 233
- Rate constant**
 - for the reaction of the singlet state of coronene with O₂ in non-polar solvents, 51
- Rhenium**
 - fluorescence lifetime and quantum yield measurements of the carbonyl-(3,5-di-*tert*-butyl-*o*-quinone)rhenium radical in solution, 87
- Ruthenium**
 - annelides: luminescence properties of amphiphilic complexes of Ru in micellar phases, 275
- Selectivity**
 - and kinetics of consecutive long-chain photochemical reactions, influence of the stirring of reactants on in industrial photochemistry, 7
 - of successive photochemical reactions, influence of additives on in industrial photochemistry, 137
- Semiconductors**
 - illuminated with UV or visible light, oxidation of oxalic acid in aqueous suspensions of, 333
- Singlet states**
 - the rate constant for the reaction of the singlet state of coronene with O₂ in non-polar solvents, 51
- Solvent effects**
 - on the fluorescence of coumaric acids, 373

Spectroscopy

- flash, study of the thermal *cis* → *trans* isomerization of 4-hydroxyazobenzene in the vapour phase using, 255
- flash, study of the thermal *cis* → *trans* isomerization in the vapour phase of 4-dimethylamino-4'-nitroazobenzene using, 245

Spirooxiranes

- pyrazolinone, generation and characterization of carbonyl ylides from, 71

Stratospheric processes

- laboratory studies on N₂O relevant to, 369

Sulpholan

- liquid, 185 nm photolysis of, 55

Suspensions

- aqueous, of semiconductors illuminated with UV or visible light, oxidation of oxalic acid in, 333

Temperature

- dependence of the efficiency of photoinduced charge separation in aqueous solution on, 1
- low, photolysis of benzocyclobutanone and 2,2-dihydrocyclobuta[1]phenanthrenone at, and evidence for photochromic behaviour, 131

Thermochromism

- and photochromism of aryl-substituted acyclic azines, and quenching of the photochemical *E-Z* isomerization via Förster energy transfer, 263

Trials

- and modelling of a reactor with separate photochemical and thermal steps in industrial photochemistry, 313

Triplet states

- evidence for triplet participation in the 2-methoxynaphthalene-sensitized isomerization of dimethyl norbornadiene-2,3-dicarboxylate, 379

UV light

- or visible light, oxidation of oxalic acid in aqueous suspensions of semiconductors illuminated with, 333

Vibrational numbering

- of bands in the spectra of polyatomic molecules, 295

Visible light

- or UV light, oxidation of oxalic acid in aqueous suspensions of semiconductors illuminated with, 333

Water

- the effects of the addition of alcohols or ethers on the photolysis of the *n*-butyl-*o*-titanate-H₂O system, 189

Ylides

- carbonyl, generation and characterization of from pyrazolinone spirooxiranes, 71
