

## Subject Index

- Absorption**  
transient, in optically dense materials, the study of by diffuse reflectance laser flash photolysis, 229
- Abstraction**  
deuterium, reactions of of hot hydrogen atoms, apparent and true threshold energies in, 1
- Adenine**  
photochemistry of, and some of its derivatives in aqueous glasses at low temperatures: reactive intermediates and quantum yields, 111
- Alkenes**  
electron-rich, photoreactions of fluorone with: radical ion pair formation in polar and non-polar solvents, 405
- Amino-9 acridine**  
derivatives of, application of phase modulation fluorometry to studies of solute-solvent interactions of, 71
- Arene diazonium salts**  
dediazonation of by triplet excited aromatic ketones: electron or energy transfer?
- Association**  
phenomena and enhancement of light-induced charge separation in the  $\text{Ru}[(\text{C}_{13}\text{H}_{27})_2\text{bpy}]_3^{2+}$ -methyl viologen system (bpy  $\equiv$  2,2'-bipyridyl) in large sodium dodecylsulphate micelles, 297
- Biacetyl**  
in various solvents, correlation between phosphorescence lifetimes and ratios of steady state phosphorescence to fluorescence intensity for, 53
- 1,1'-Bicyclohexenyl**  
a strained ground state intermediate in the photocyclization of to its isomeric *cis*-cyclobutene: *cis,trans*-1,1'-bicyclohexenyl, 367
- 1,2-Bis(trimethylsiloxy)cyclobutene**  
photoaddition with: a versatile entry to the stereocontrolled total synthesis of various sesquiterpenes and diterpenes, 165
- Carboxylate**  
anions, aromatic, in aqueous solution, relationship between the quantum yields of electron photoejection and fluorescence of, 383
- Charge relays**  
multielectron, transformation of single-electron transfer photoproducts into: the functions of water-oil two-phase systems and enzyme catalysis, 215
- Charge separation**  
in direct and reverse micelles, comparison of, 273  
light-induced, enhancement of and association phenomena in the  $\text{Ru}[(\text{C}_{13}\text{H}_{27})_2\text{bpy}]_3^{2+}$ -methyl viologen system (bpy  $\equiv$  2,2'-bipyridyl) in large sodium dodecylsulphate micelles, 297
- Chloride ion**  
electron transfer from, to the triplet state of 5-nitroindole, 131
- Chlorpromazine**  
photoaddition of to calf thymus deoxyribonucleic acid, influence of prior complex formation on, 197
- Cis-cyclobutene**  
isomeric, a strained ground state intermediate in the photocyclization of 1,1'-bicyclohexenyl to its: *cis,trans*-1,1'-bicyclohexenyl, 367
- Cis,trans-1,1'-bicyclohexenyl**  
a strained ground state intermediate in the photocyclization of 1,1'-bicyclohexenyl to its isomeric *cis*-cyclobutene, 367
- Clay**  
oscillatory gas evolution during the visible-light-induced cleavage

- of water in platinum-free clay-hydroxide suspensions, 255
- Cleavage**  
visible-light-induced, of water in platinum-free clay-hydroxide suspensions, 255
- Colloidal systems**  
photoelectrochemistry in: interfacial electron transfer between colloidal  $\text{TiO}_2$  and thionine in acetonitrile, 513
- Collisional behaviour**  
of atomic silicon in the electronic states  $\text{Si}(3p^2(^3P_J, ^1D_2, ^1S_0))$  with  $\text{SF}_6$  by time-resolved atomic resonance absorption spectroscopy, 447
- Complex formation**  
prior, influence of on the photo-addition of chlorpromazine to calf thymus deoxyribonucleic acid, 197
- Deactivation**  
radiationless, of electronically excited molecules in rigid media, transient local heating effects resulting from, 31
- Decafluorocyclohexene**  
sensitized decomposition of by IR-multiphoton-excited  $\text{SF}_6$  in a  $\text{CO}_2$  laser field, 503
- Decay**  
intramolecular monomer and excimer fluorescence with dipyranylpropanes: double-exponential *versus* triple-exponential, 237  
kinetics of and transient spectra of semithionine radicals in sodium dodecylsulphate micellar media, 37
- Decomposition**  
sensitized, of decafluorocyclohexene by IR-multiphoton-excited  $\text{SF}_6$  in a  $\text{CO}_2$  laser field, 503
- Deiazonation**  
of arene diazonium salts by triplet excited aromatic ketones: electron or energy transfer?, 393
- Deoxyribonucleic acid**  
calf thymus, influence of prior complex formation on the photo-addition of chlorpromazine to, 197
- Deuterium**  
apparent and true threshold energies in deuterium abstraction reactions of hot hydrogen atoms, 1
- 4-Dialkylamino-4'-azastilbenes**  
photophysical properties of quaternary salts of and their quinolinium analogues in solution, 329
- Dialkylanilines**  
*p*-substituted, the kinetics of formation of twisted intramolecular charge transfer (TICT) states in: consequences of conical intersections along the reaction coordinate, 351
- Dianions**  
of  $\alpha$ - and  $\beta$ -naphthylamines, the fluorescence spectra of, 87
- 9,10-Dicyanoanthracene**  
electron donor and acceptor quenching of the fluorescence of in polar and non-polar solvents, 61
- Diels-Alder reaction**  
photochemical, of *N*-methyltriazolinedione, 205
- N,N'*-dimyristoylindigo**  
fluorescence yields of, effect of solvent polarity on, 559
- Dipyranylpropanes**  
intramolecular monomer and excimer fluorescence with: double-exponential *versus* triple-exponential decays, 237
- Diterpenes**  
and sesquiterpenes, various, a versatile entry to the stereocontrolled total synthesis of: photoaddition with 1,2-bis(trimethylsiloxy)cyclobutene, 165
- N*-(3,5-di-*tert*-butyl-salicylidene) amines**  
unusual photochromism of: photoisomerization and thermoisomerization, 103
- Donor properties**  
of polystyrene, some remarks on, 135
- Electronic states**  
 $\text{Si}(3p^2(^3P_J, ^1D_2, ^1S_0))$ , the collisional behaviour of atomic silicon in, with  $\text{SF}_6$  by time-resolved atomic resonance absorption spectroscopy, 447

- Electronic structure**  
of exciplexes in  $\alpha$ -(1- or 2-naphthyl)- $\omega$ -*N,N*-dialkylaminoalkanes, 315
- Electron transfer**  
from chloride ion to the triplet state of 5-nitroindole, 131  
or energy transfer? Dediazoni-ation of arene diazonium salts by triplet excited aromatic ketones, 393  
interfacial, between colloidal TiO<sub>2</sub> and thionine in acetonitrile: photo-electrochemistry in colloidal systems, 513  
single, photoproducts, transformation of into multielectron charge relays: the functions of water-oil two-phase systems and enzyme catalysis, 215
- Energy transfer**  
or electron transfer? Dediazoni-ation of arene diazonium salts by triplet excited aromatic ketones, 393
- Enzyme catalysis**  
and water-oil two-phase systems, the functions of: transformation of single-electron transfer photo-products into multielectron charge relays, 215
- Excimer**  
and intramolecular monomer fluorescence with dipyranylpropanes: double-exponential *versus* triple-exponential decays, 237
- Exciplexes**  
electronic structure of in  $\alpha$ -(1- or 2-naphthyl)- $\omega$ -*N,N*-dialkylaminoalkanes, 315  
intramolecular, formation of in 1-(1-pyrenyl)-3-(*N*-skatolyl)propane, 419
- Excited state**  
interactions of of porphyrin-quinone, in reversed micelles, 153  
ligand field, selective perturbation of, 143  
reactive, of naphthvalene and its photochemistry: a qualitative and quantitative theoretical investigation, 373  
sensitized decomposition of deca-fluorocyclohexene by IR-multi-photon-excited SF<sub>6</sub> in a CO<sub>2</sub> laser field, 503
- Fluorenone**  
with electron-rich alkenes, photo-reactions of: radical ion pair formation in polar and non-polar solvents, 405
- Fluorescence**  
of dianions of  $\alpha$ - and  $\beta$ -naphthylamines, spectra of, 87  
intensity to steady state phosphorescence, ratios of, and phosphorescence lifetimes for biacetyl in various solvents, correlation between, 53  
intramolecular monomer and excimer, with dipyranylpropanes: double-exponential *versus* triple-exponential decays, 237  
of 9,10-dicyanoanthracene in polar and non-polar solvents, electron donor and acceptor quenching in, 61  
and quantum yields of electron photo-ejection of aromatic carboxylate anions in aqueous solution, relationship between, 383  
quenching of of methoxybenzyl alcohols by the hydronium ion in aqueous solution. Acid-catalyzed formation of methoxybenzyl cations from the singlet excited state, 93  
wavelength-dependent, decay of: an investigation by multiple-frequency picosecond phase fluorometry, 457  
yields of *N,N'*-dimyristoylindigo: effect of solvent polarity, 559
- Fluorine**  
the kinetics and mechanism of the photochemical reaction between SF<sub>4</sub> and fluorine at 365 nm, 491
- Fluorometry**  
multiple-frequency picosecond phase, an investigation by of wavelength-dependent fluorescence decay, 457  
phase modulation, application of to the study of solute-solvent interactions of four amino-9 acridine derivatives, 71
- Formation**  
acid-catalyzed, of methoxybenzyl cations from the singlet excited state. Fluorescence quenching of methoxybenzyl alcohols by the hydronium ion in aqueous solution, 93

- kinetics of, of twisted intramolecular charge transfer (TICT) states in *p*-substituted dialkylanilines: consequences of conical intersections along the reaction coordinate, 351
- of metallic patterns on polymers, photochemical imaging processes for the, 175
- Förster cycle**  
a completely time-resolved: thionine triplet relaxation in pyridine, 433
- Fragmentation**  
photochemical type I, of the a ring in methyl-7 $\alpha$ ,12 $\alpha$ -dihydroxy-3-oxo-5 $\beta$ -cholan-24-oate, 443
- Gas evolution**  
oscillatory, during the visible-light-induced cleavage of water in platinum-free clay-hydroxide suspensions, 255
- Ground state**  
strained, intermediate in the photocyclization of 1,1'-bicyclohexenyl to its isomeric *cis*-cyclobutene: *cis,trans*-1,1'-bicyclohexenyl, 367
- Heating effects**  
transient local, resulting from radiationless deactivation of electronically excited molecules in rigid media, 31
- 1,2,3,10,11,11b-Hexahydro-5*H*-pyrrolo-[2,3-*b*] [2]-benzazepine-5,10-dione, 571
- Hydrogen**  
apparent and true threshold energies in deuterium abstraction reactions of hot hydrogen atoms, 1  
the utilization of tunnel effects for mechanistic studies of hydrogen transfer reactions, 187
- Hydronium**  
in aqueous solution, fluorescence quenching of methoxybenzyl alcohols by. Acid-catalyzed formation of methoxybenzyl cations from the singlet excited state, 93
- Hydroxide**  
oscillatory gas evolution during the visible-light-induced cleavage of water in platinum-free clay-hydroxide suspensions, 255
- Ion**  
hydronium, in aqueous solution, fluorescence quenching of methoxybenzyl alcohols by. Acid-catalyzed formation of methoxybenzyl cations from the singlet excited state, 93
- Ion pair**  
radical, formation in polar and non-polar solvents: photoreactions of fluorenone with electron-rich alkenes, 405
- Kinetics**  
in a continuously stirred photochemical tank reactor, 261  
decay, and transient spectra of semithionine radicals in sodium dodecylsulphate micellar media, 37  
of formation of twisted intramolecular charge transfer (TICT) states in *p*-substituted dialkylanilines: consequences of conical intersections along the reaction coordinate, 351  
and mechanism of the photochemical reaction between SF<sub>4</sub> and fluorine at 365 nm, 491  
and mechanism of the photo-oxidation of propionaldehyde under simulated atmospheric conditions, 475
- Kinetic properties**  
of the triplet excited state of a linearly conjugated steroid dienone studied by laser flash photolysis, 413
- Ketones**  
triplet excited aromatic, dediazonation of arene diazonium salts by: electron or energy transfer?, 393
- Laser**  
CO<sub>2</sub>, sensitized decomposition of decafluorocyclohexene by IR-multiphoton-excited SF<sub>6</sub> in the field of a, 503  
flash photolysis using, diffuse reflectance, the study of transient absorptions in optically dense materials by, 229  
flash photolysis using, kinetic properties of the triplet excited state of a linearly conjugated steroid dienone studied by, 413

- nanosecond, primary processes in the photochromism of a sterically crowded piperidinospiropyran studied by photolysis using, 547
- Ligand field**  
excited states, selective perturbation of, 143
- Light**  
distribution of in a diffusing medium of titanium dioxide in water: industrial photochemistry, 13
- Mechanistic studies**  
of hydrogen transfer reactions, the utilization of tunnel effects for, 187
- Methoxybenzyl alcohols**  
fluorescence quenching of by the hydronium ion in aqueous solution. Acid-catalyzed formation of methoxybenzyl cations from the singlet excited state, 93
- Methoxybenzyl cations**  
acid-catalyzed formation of from the singlet excited state. Fluorescence quenching of methoxybenzyl alcohols by the hydronium ion in aqueous solution, 93
- 1,-Methylpiperidin-6-one-2-spiro-2'-(3',3'-dimethyloxetane), 573
- Methyl-7 $\alpha$ ,12 $\alpha$ -dihydroxy-3-oxo-5 $\beta$ -cholan-24-oate  
photochemical type I fragmentation of the a ring in, 443
- 11-Methyl-6*H*-isoindolo[2,1-*a*]indol-6-one synthesis of, 575
- N*-methyltriazolinedione  
a photochemical Diels–Alder reaction of, 205
- Micelles**  
direct and reverse, comparison of charge separation in, 273  
large sodium dodecylsulphate, association phenomena and enhancement of light-induced charge separation in the Ru[(C<sub>13</sub>H<sub>27</sub>)<sub>2</sub>bpy]<sub>3</sub><sup>2+</sup>-methyl viologen system (bpy = 2,2'-bipyridyl) in, 297  
reversed, porphyrin-quinone excited state interactions in, 153  
transient spectra and decay kinetics of semithionine radicals in sodium dodecylsulphate micellar media, 37
- Molecules**  
electronically excited, in rigid media, transient local heating effects resulting from radiationless deactivation of, 31
- Monomer**  
intramolecular, and excimer fluorescence with dipyrenylpropanes: double-exponential *versus* triple-exponential decays, 237
- Naphthalene**  
the reactive excited state of, and its photochemistry: a qualitative and quantitative theoretical investigation, 373
- Naphthylamines**  
the fluorescence spectra of dianions of  $\alpha$ - and  $\beta$ -naphthylamines, 87  
 $\alpha$ -(1- or 2-Naphthyl)- $\omega$ -*N,N*-dialkyl-aminoalkanes  
on the electronic structure of exciplexes in, 315
- 5-Nitroindole  
electron transfer from chloride ion to the triplet state of, 131
- Pair formation**  
radical ion, in polar and non-polar solvents: photoreactions of fluorone with electron-rich alkenes, 405
- Perturbation**  
selective, of ligand field excited states, 143
- Phosphorescence**  
steady state, to fluorescence intensity, ratios of, and phosphorescence lifetimes for biacetyl in various solvents, correlation between, 53
- Phosphorescence lifetimes**  
and ratios of steady state phosphorescence to fluorescence intensity for biacetyl in various solvents, correlation between, 53
- Photoacoustics**  
a study of photochromic reactions in the crystalline and absorbed states using, 309
- Photoaddition**  
with 1,2-bis(trimethylsiloxy)cyclobutene: a versatile entry to the stereocontrolled total synthesis of various sesquiterpenes and diterpenes, 165

- of chlorpromazine to calf thymus deoxyribonucleic acid, influence of prior complex formation on the, 197
- Photochemical imaging**  
processes of for the formation of metallic patterns on polymers, 175
- Photochemical reaction**  
between SF<sub>4</sub> and fluorine at 365 nm, the kinetics and mechanism of, 491  
carried out within a silica gel matrix, 285
- Photochemistry**  
of adenine and some of its derivatives in aqueous glasses at low temperatures: reactive intermediates and quantum yields, 111  
industrial: light distribution in a diffusing medium of titanium dioxide in water, 13  
the reactive excited state of naphthalene and its: a qualitative and quantitative theoretical investigation, 373  
of transition metal cyano complex ions in poly(vinyl alcohol) film matrices at 77 - 293 K, 525
- Photochromic reactions**  
in the crystalline and absorbed states, a photoacoustic study of, 309
- Photochromism**  
of a sterically crowded piperidinospiropyran studied by nanosecond laser photolysis, primary processes in, 547  
unusual, of *N*-(3,5-di-*tert*-butyl-salicylidene) amines: photoisomerization and thermoisomerization, 103
- Photocyclization**  
of 1,1'-bicyclohexenyl to its isomeric *cis*-cyclobutene, a strained ground state intermediate in the: *cis,trans*-1,1'-bicyclohexenyl, 367
- Photoejection**  
electron, from donor-aryl-acceptor molecules in aqueous solution, 537  
electron, quantum yields of, and fluorescence of aromatic carboxylate anions in aqueous solution, relationship between, 383
- Photoelectrochemistry**  
in colloidal systems: interfacial electron transfer between colloidal TiO<sub>2</sub> and thionine in acetonitrile, 513
- Photoisomerization**  
and thermoisomerization: unusual photochromism of *N*-(3,5-di-*tert*-butyl-salicylidene) amines, 103
- Photolysis**  
diffuse reflectance laser flash, the study of transient absorptions in optically dense materials by, 229  
laser flash, kinetic properties of the triplet excited state of a linearly conjugated steroid dienone studied by, 413  
nanosecond laser, primary processes in the photochromism of a sterically crowded piperidinospiropyran studied by, 547
- Photo-oxidation**  
of propionaldehyde under simulated atmospheric conditions, the kinetics and mechanism of, 475
- Photophysical properties**  
of quaternary salts of 4-dialkylamino-4'-azastilbenes and their quinolinium analogues in solution, 329  
of some pyrichromine derivatives, 529
- Photoreactions**  
of fluorenone with electron-rich alkenes: radical ion pair formation in polar and non-polar solvents, 405
- Piperidinospiropyran**  
sterically crowded, primary processes in the photochromism of studied by nanosecond laser photolysis, 547
- Polymers**  
photochemical imaging processes for the formation of metallic patterns on, 175
- Polystyrene**  
some remarks on donor properties of, 135
- Poly(vinyl alcohol)**  
film matrices, photochemistry of transition metal cyano complex ions in at 77 - 293 K, 525
- Porphyry-quinone**  
excited state interactions in reversed micelles, 153
- Propionaldehyde**  
the kinetics and mechanism of the photo-oxidation of under simulated atmospheric conditions, 475
- 1-(1-Pyrenyl)-3-(*N*-skatolyl)propane intramolecular exciplex formation in, 419

- Pyrichromine**  
some derivatives of, photophysical properties of, 529
- Pyridine**  
thionine triplet relaxation in: a completely time-resolved Förster cycle, 433
- Quantum yields**  
of electron photoejection and fluorescence of aromatic carboxylate anions in aqueous solution, relationship between, 383  
and reactive intermediates: the photochemistry of adenine and some of its derivatives in aqueous glasses at low temperatures, 111
- Quaternary salts**  
of 4-dialkylamino-4'-azastilbenes and their quinolinium analogues in solution, photophysical properties of, 329
- Quenching**  
electron donor and acceptor, of the fluorescence of 9,10-dicyanoanthracene in polar and non-polar solvents, 61  
fluorescence, of methoxybenzyl alcohols by the hydronium ion in aqueous solution. Acid-catalyzed formation of methoxybenzyl cations from the singlet excited state, 93
- Quinolinium**  
analogues in solution, photophysical properties of quaternary salts of 4-dialkylamino-4'-azastilbenes and their, 329
- Reactor**  
continuously stirred photochemical tank, kinetics in, 261
- Relaxation**  
thionine triplet, in pyridine: a completely time-resolved Förster cycle, 433
- Ruthenium**  
association phenomena and enhancement of light-induced charge separation in the  $\text{Ru}[(\text{C}_{13}\text{H}_{27})_2\text{bpy}]_3^{2+}$ -methyl viologen system (bpy = 2,2'-bipyridyl) in large sodium dodecylsulphate micelles, 297
- Semithionine radicals**  
in sodium dodecylsulphate micellar media, transient spectra and decay kinetics of, 37
- Sesquiterpenes**  
and diterpenes, various, a versatile entry to the stereocontrolled total synthesis of: photoaddition with 1,2-bis(trimethylsiloxy)cyclobutene, 165
- Silica gel**  
matrix, photochemical reactions carried out within, 285
- Silicon**  
the collisional behaviour of atomic silicon in the electronic states  $\text{Si}(3p^2(^3P_J, ^1D_2, ^1S_0))$  with  $\text{SF}_6$  by time-resolved atomic resonance absorption spectroscopy, 447
- Silicon hexafluoride**  
the collisional behaviour of atomic silicon in the electronic states  $\text{Si}(3p^2(^3P_J, ^1D_2, ^1S_0))$  with  $\text{SF}_6$  by time-resolved atomic resonance absorption spectroscopy, 447
- Singlet excited state**  
acid-catalyzed formation of methoxybenzyl cations from the. Fluorescence quenching of methoxybenzyl alcohols by the hydronium ion in aqueous solution, 93
- Sodium dodecylsulphate**  
micelles, large, association phenomena and enhancement of light-induced charge separation in the  $\text{Ru}[(\text{C}_{13}\text{H}_{27})_2\text{bpy}]_3^{2+}$ -methyl viologen system (bpy = 2,2'-bipyridyl) in, 297  
micellar media, transient spectra and decay kinetics of semithionine radicals in, 37
- Solute-solvent interactions**  
application of phase modulation fluorometry to, of four amino-9-acridine derivatives, 71
- Spectra**  
transient, and decay kinetics of semithionine radicals in sodium dodecylsulphate micellar media, 37
- Spectroscopy**  
time-resolved atomic resonance absorption, the collisional behaviour of atomic silicon in the electronic states  $\text{Si}(3p^2(^3P_J, ^1D_2, ^1S_0))$  with  $\text{SF}_6$  by, 447

- Steroid dienone**  
linearly conjugated, kinetic properties of the triplet excited state of, studied by laser flash photolysis, 413
- Sulphur hexafluoride**  
sensitized decomposition of decafluorocyclohexene by IR-multiphoton-excited SF<sub>6</sub> in a CO<sub>2</sub> laser field, 503
- Sulphur tetrafluoride**  
the kinetics and mechanism of the photochemical reaction between SF<sub>4</sub> and fluorine at 365 nm, 491
- Synthesis**  
1,2,3,10,11,11b-hexahydro-5*H*-pyrrolo[2,3-*b*][2]-benzazepine-5,10-dione, 571  
1-methylpiperidin-6-one-2-spiro-2'-(3',3'-dimethyl)oxetane), 573  
11-methyl-6*H*-isoindolo[2,1-*a*]indol-6-one, 575  
stereocontrolled total, of various sesquiterpenes and diterpenes, a versatile entry to the: photoaddition with 1,2-bis(trimethylsiloxy)cyclobutene, 165  
tetrahydro-1*H*-azepine-2,5-dione, 569
- Tetrahydro-1*H*-azepine-2,5-dione**  
synthesis of, 569
- Thermoisomerization**  
and photoisomerization: unusual photochromism of *N*-(3,5-di-*tert*-butyl-salicylidene) amines, 103
- Thionine**  
and colloidal TiO<sub>2</sub>, interfacial electron transfer between in acetonitrile: photoelectrochemistry in colloidal systems, 513  
triplet, relaxation in pyridine: a completely time-resolved Förster cycle, 433
- Titanium dioxide**  
industrial photochemistry: light distribution in a diffusing medium of titanium dioxide in water, 13  
photoelectrochemistry in colloidal systems: interfacial electron transfer between colloidal TiO<sub>2</sub> and thionine in acetonitrile, 513
- Transition metal**  
cyano complex ions in poly(vinyl alcohol) film matrices, photochemistry of at 77 - 293 K, 525
- Triplet excited state**  
of a linearly conjugated steroid dienone studied by laser flash photolysis, kinetic properties of, 413
- Triplet states**  
dediazonation of arene diazonium salts by triplet excited aromatic ketones: electron or energy transfer?, 393  
of 5-nitroindole, electron transfer from chloride ion to the, 131  
thionine, relaxation in pyridine: a completely time-resolved Förster cycle, 433
- Tunnel effects**  
the utilization of for mechanistic studies of hydrogen transfer reactions, 187
- Twisted intramolecular charge transfer states**  
the kinetics of formation of twisted intramolecular charge transfer (TICT) states in *p*-substituted dialkylanilines: consequences of conical intersections along the reaction coordinate, 351
- Viologen**  
association phenomena and enhancement of light-induced charge separation in the Ru[(C<sub>13</sub>H<sub>27</sub>)<sub>2</sub>bpy]<sub>3</sub><sup>2+</sup>-methyl viologen system (bpy = 2,2'-bipyridyl) in large sodium dodecylsulphate micelles, 297
- Water-oil systems**  
transformation of single-electron transfer photoproducts into multi-electron charge relays: the functions of water-oil two-phase systems and enzyme catalysis, 215
- Yields**  
quantum, and reactive intermediates: the photochemistry of adenine and some of its derivatives in aqueous glasses at low temperatures, 111
