

## Subject Index

---

- Absorption**  
 frequency and pressure dependence of absorption of pulsed CO<sub>2</sub> laser radiation by phosphine, 285
- Annelides**  
 annelides: photochemical association properties of phthalocyanine-based discogens, 445
- Association**  
 annelides: photochemical association properties of phthalocyanine-based discogens, 445
- Back electron transfer**  
 problems of back electron transfer in electron transfer sensitization, 123
- Cadmium**  
 recent progress at the Weizmann Institute in the photoelectrochemistry of cadmium chalcogenides and CuIn chalcogenides, 243
- $\beta$ -Carbolines**  
 fluorescence and phosphorescence of aromatic  $\beta$ -carbolines on dispersed solid phase at 77 K and room temperatures, 405
- Catalysis**  
 polymer-modified electrodes, catalysis and water-splitting reactions, 195
- Catalyst systems**  
 electrode-confined catalyst systems for use in optical-to-chemical energy conversion, 71
- Chalcogenides**  
 recent progress at the Weizmann Institute in the photoelectrochemistry of cadmium chalcogenides and CuIn chalcogenides, 243
- Characterization**  
*in situ* characterization of semiconductor-liquid junctions: surface optimization of n-CuInSe<sub>2</sub>, 165
- Charge separation**  
 artificial photosynthesis: liposome charge separation aided by phase transfer of electron carrier, 217  
 synthetic system mimicking the energy transfer and charge separation of natural photosynthesis, 173
- Copper**  
 recent progress at the Weizmann Institute in the photoelectrochemistry of cadmium chalcogenides and CuIn chalcogenides, 243
- n-CuInSe<sub>2</sub>**  
*in situ* characterization of semiconductor-liquid junctions: surface optimization of n-CuInSe<sub>2</sub>, 165
- Deactivation**  
 solvent effect on the deactivation of excited naphthalene derivatives by unsaturated compounds, 385
- Deuterium**  
 IR laser photolysis of CDF<sub>3</sub>: rôle of buffer gas on selectivity and yield for deuterium enrichment in fluoroform, 333
- 4-Dicyanomethylene-2-methyl-6-dimethylaminostyryl-4H-pyran**  
 behaviour of the laser dye 4-dicyanomethylene-2-methyl-6-dimethylaminostyryl-4H-pyran in the excited singlet state, 397
- Dimethyl sulphide**  
 oxidation of sulphur compounds: the photolysis of (CH<sub>3</sub>S)<sub>2</sub> in the presence of O<sub>2</sub>, 297
- 3,5-Dinitroanisole**  
 spectroscopic and kinetic study of the photoinduced methoxy substitution of 3-nitroanisole and 3,5-dinitroanisole, 415
- Discogens**  
 annelides: photochemical association properties of phthalocyanine-based discogens, 445
- Dye**  
 behaviour of the laser dye 4-dicyanomethylene-2-methyl-6-dimethylaminostyryl-4H-pyran in the excited singlet state, 397

**Electrodes**

- polymer-modified electrodes, catalysis and water-splitting reactions, 195
- structures and functions of thin metal layers on semiconductor electrodes, 257

**Electron carrier**

- artificial photosynthesis: liposome charge separation aided by phase transfer of electron carrier, 217

**Electronic interactions**

- interfacial processes involving strong electronic interactions in solar energy conversion and storage, 89

**Electron transfer**

- kinetics of electron transfer at semiconductor-electrolyte interfaces, 151
- problems of back electron transfer in electron transfer sensitization, 123

**Energy conversion**

- electrode-confined catalyst systems for use in optical-to-chemical energy conversion, 71
- interfacial processes involving strong electronic interactions in solar energy conversion and storage, 89
- problems and potential in the semiconductor/electrolyte approach to solar conversion, 55

**Energy storage**

- new molecular energy storage systems, 27

**Energy transfer**

- a synthetic system mimicking the energy transfer and charge separation of natural photosynthesis, 173

**Fluorescence**

- fluorescence and phosphorescence of aromatic  $\beta$ -carboline on dispersed solid phase at 77 K and room temperatures, 405

**Fluoroform**

- IR laser photolysis of  $\text{CDF}_3$ : role of buffer gas on selectivity and yield for deuterium enrichment in fluoroform, 333

**Hydrogen**

- metalloporphyrin-photosensitized formation of hydrogen from organic and inorganic substrates, 139
- photochemical production of hydrogen from water, 227

**2-Hydroxybenzimidazole**

- prototropic equilibria in the lowest excited singlet state of 2-hydroxybenzimidazole (2-(3*H*)-benzimidazolone), 435

**Indium**

- recent progress at the Weizmann Institute in the photoelectrochemistry of cadmium chalcogenides and  $\text{CuIn}$  chalcogenides, 243

**Interfaces**

- interfacial processes involving strong electronic interactions in solar energy conversion and storage, 89
- kinetics of electron transfer at semiconductor-electrolyte interfaces, 151

**Japan**

- solar energy development in Japan, 115

**Junctions**

- in situ* characterization of semiconductor-liquid junctions: surface optimization of  $\text{n-CuInSe}_2$ , 165

**Kinetics**

- kinetics of electron transfer at semiconductor-electrolyte interfaces, 151
- kinetic studies of the ground state lead atoms  $\text{Pb}(6^3\text{P}_0)$  generated by pulsed irradiation and monitored by time-resolved fluorescence at  $\lambda = 405.78$  nm ( $\text{Pb}(7^3\text{P}_1) \rightarrow \text{Pb}(6^3\text{P}_2)$ ) following optical excitation at  $\lambda = 283.31$  nm ( $\text{Pb}(7^3\text{P}_1) \leftarrow \text{Pb}(6^3\text{P}_0)$ ), 267
- spectroscopic and kinetic study of the photoinduced methoxy substitution of 3-nitroanisole and 3,5-dinitroanisole, 415

**Laser**

- frequency and pressure dependence of the absorption of pulsed  $\text{CO}_2$  laser radiation by phosphine, 285

**Laser photolysis**

- IR laser photolysis of  $\text{CDF}_3$ : role of buffer gas on selectivity and yield for deuterium enrichment in fluoroform, 333

**Lead**

- kinetic studies of the ground state lead atoms  $\text{Pb}(6^3\text{P}_0)$  generated by pulsed irradiation and monitored by time-

- resolved fluorescence at  $\lambda = 405.78$  nm ( $\text{Pb}(7^3\text{P}_1) \rightarrow \text{Pb}(6^3\text{P}_2)$ ) following optical excitation at  $\lambda = 283.31$  nm ( $\text{Pb}(7^3\text{P}_1) \leftarrow \text{Pb}(6^3\text{P}_0)$ ), 267
- Liposome**  
artificial photosynthesis: liposome charge separation aided by phase transfer of electron carrier, 217
- Mercury**  
monomerization of thymine dimers by irradiation of the complex thymine- $\text{Hg}^{2+}$ , 375
- Metalloporphyrin**  
metalloporphyrin-photosensitized formation of hydrogen from organic and inorganic substrates, 139
- Methanethiol**  
oxidation of sulphur compounds: the photo-oxidation of  $\text{CH}_3\text{SH}$ , 311
- Methoxy substitution**  
spectroscopic and kinetic study of the photoinduced methoxy substitution of 3-nitroanisole and 3,5-dinitroanisole, 415
- Methylene blue**  
the primary processes of the photosensitized reduction of methylene blue in an aqueous sodium dodecylsulphate micellar solution, 363
- Molecular assemblies**  
roles of organized molecular assemblies in artificial photosyntheses, 41
- Monomerization**  
monomerization of thymine dimers by irradiation of the complex thymine- $\text{Hg}^{2+}$ , 375
- Naphthalene**  
solvent effect on the deactivation of excited naphthalene derivatives by unsaturated compounds, 385
- 3-Nitroanisole**  
spectroscopic and kinetic study of the photoinduced methoxy substitution of 3-nitroanisole and 3,5-dinitroanisole, 415
- Nitromethane**  
photolysis quantum yield of nitromethane, 343
- Oxygen**  
oxidation of sulphur compounds: the photolysis of  $(\text{CH}_3\text{S})_2$  in the presence of  $\text{O}_2$ , 297
- Phase transfer**  
artificial photosynthesis: liposome charge separation aided by phase transfer of electron carrier, 217
- Phosphine**  
the frequency and pressure dependence of the absorption of pulsed  $\text{CO}_2$  laser radiation by phosphine, 285
- Phosphorescence**  
fluorescence and phosphorescence of aromatic  $\beta$ -carboline on dispersed solid phase at 77 K and room temperatures, 405
- Photocatalysis**  
optimization of the photocatalytic properties of titanium dioxide, 353  
photocatalysis of irradiated semiconductor surfaces: its application to water splitting and some organic reactions, 205
- Photochemical association**  
annelides: photochemical association properties of phthalocyanine-based discogens, 445
- Photoelectrochemistry**  
recent progress at the Weizmann Institute in the photoelectrochemistry of cadmium chalcogenides and  $\text{CuIn}$  chalcogenides, 243
- Photolysis**  
oxidation of sulphur compounds: the photolysis of  $(\text{CH}_3\text{S})_2$  in the presence of  $\text{O}_2$ , 297  
photolysis quantum yield of nitromethane, 343
- Photo-oxidation**  
oxidation of sulphur compounds: the photo-oxidation of  $\text{CH}_3\text{SH}$ , 311
- Photoredox products**  
separation of photoredox products by local potential fields, 7
- Photosensitized reduction**  
the primary processes of the photosensitized reduction of methylene blue in an aqueous sodium dodecylsulphate micellar solution, 363
- Photosynthesis**  
artificial photosynthesis: liposome charge separation aided by phase transfer of electron carrier, 217  
bridging the gap between natural and artificial photosynthesis, 185  
roles of organized molecular assemblies in artificial photosyntheses, 41

- synthetic system mimicking the energy transfer and charge separation of natural photosynthesis, 173
- Phthalocyanine**  
annelides: photochemical association properties of phthalocyanine-based discogens, 445
- Potential fields**  
separation of photoredox products by local potential fields, 7
- Prototropic equilibria**  
prototropic equilibria in the lowest excited singlet state of 2-hydroxybenzimidazole (2-(3*H*)-benzimidazolone), 435
- Quantum yield**  
photolysis quantum yield of nitromethane, 343
- Separation**  
separation of photoredox products by local potential fields, 7
- Sodium dodecylsulphate**  
the primary processes of the photosensitized reduction of methylene blue in an aqueous sodium dodecylsulphate micellar solution, 363
- Solar energy**  
interfacial processes involving strong electronic interactions in solar energy conversion and storage, 89  
problems and potential in the semiconductor/electrolyte approach to solar conversion, 55  
solar energy development in Japan, 115
- Spectroscopy**  
spectroscopic and kinetic study of the photoinduced methoxy substitution of 3-nitroanisole and 3,5-dinitroanisole, 415
- Storage**  
interfacial processes involving strong electronic interactions in solar energy conversion and storage, 89
- Sulphur**  
oxidation of sulphur compounds: the photolysis of  $(\text{CH}_3\text{S})_2$  in the presence of  $\text{O}_2$ , 297  
oxidation of sulphur compounds: the photo-oxidation of  $\text{CH}_3\text{SH}$ , 311
- Surfaces**  
photocatalysis of irradiated semiconductor surfaces: its application to water splitting and some organic reactions, 205
- Thin metal layers**  
structures and functions of thin metal layers on semiconductor electrodes, 257
- Thymine**  
monomerization of thymine dimers by irradiation of the complex thymine- $\text{Hg}^{2+}$ , 375
- Time-resolved fluorescence**  
kinetic studies of the ground state lead atoms  $\text{Pb}(6^3\text{P}_0)$  generated by pulsed irradiation and monitored by time-resolved fluorescence at  $\lambda = 405.78$  nm ( $\text{Pb}(7^3\text{P}_1) \rightarrow \text{Pb}(6^3\text{P}_2)$ ) following optical excitation at  $\lambda = 283.31$  nm ( $\text{Pb}(7^3\text{P}_1) \leftarrow \text{Pb}(6^3\text{P}_0)$ ), 267
- Titanium dioxide**  
optimization of the photocatalytic properties of titanium dioxide, 353
- Water**  
photocatalysis of irradiated semiconductor surfaces: its application to water splitting and some organic reactions, 205  
photochemical production of hydrogen from water, 227  
polymer-modified electrodes, catalysis and water-splitting reactions, 195
- Weizmann Institute**  
recent progress at the Weizmann Institute in the photoelectrochemistry of cadmium chalcogenides and CuIn chalcogenides, 243
