

Subject Index

- Actinometers**
a new liquid phase actinometer: quantum yield and photo-CIDNP study of phenylglyoxylic acid in aqueous solution, 237
- Activation barriers**
photochemistry of phenylfulgides XX: absence of activation barriers for photoisomerization reactions in the excited singlet state of extremely sterically hindered α,δ -di-(4-alkoxyphenyl)-fulgide isomers, 333
- Activation parameters**
solvent effect and activation parameters for the photoinduced electron transfer between $\text{Ru}(\text{bpy})_3^{2+}$ and aromatic amines, 257
- Adenine**
an electron paramagnetic resonance study of the excited triplet states of adenine and some of its derivatives in aqueous glasses at 77 K, 89
- Alkenes**
laser flash photolysis of 1-alkenes at 193 nm in the gas phase: effect of molecular size on the formation yield of allyl radical, 279
- Allene**
laser flash photolysis of 1-alkenes at 193 nm in the gas phase: effect of molecular size on the formation yield of allyl radical, 279
- Amines**
photoisomerization and thermoisomerization II: steric requirements for photochromism and thermochromism of N,N' -bis(salicylidene)diamines, 199
solvent effect and activation parameters for the photoinduced electron transfer between $\text{Ru}(\text{bpy})_3^{2+}$ and aromatic amines, 257
- Anthraquinones**
photoreductions of α -chloroanthraquinones followed by photochemical dehydrochlorination in ethanol at room temperature, 99
- Aromatic compounds**
ground state association and fluorescence quenching of aromatic molecules by uranyl ion in alcohols, 209
solvent effect and activation parameters for the photoinduced electron transfer between $\text{Ru}(\text{bpy})_3^{2+}$ and aromatic amines, 257
- Association**
ground state association and fluorescence quenching of aromatic molecules by uranyl ion in alcohols, 209
- Benzil**
solvent shift and excited state geometries of benzil, 61
- Benzophenone**
phosphorescence and photochemical studies of some benzophenone dicarboxylic acid esters, 291
- Biacetyl**
vibrational relaxation of triplet dichlorobenzenes studied by photosensitized phosphorescence of biacetyl, 49
- Butene**
decomposition of highly excited butenyl and pentenyl radicals, 145
- Cadmium sulphide**
efficient photochemical conversion of aqueous sulphides and sulphites to hydrogen using a rhodium-loaded CdS photocatalyst, 35
- β -Carboline**
photodissociation of β -carboline, 219
- Carbonyl compounds**
the importance of photoenolization as a route for radiationless decay in β -alkyl- α,β -unsaturated carbonyl compounds, 113
- Carboxylic acids**
phosphorescence and photochemical studies of some benzophenone dicarboxylic acid esters, 291
- Chemiluminescence**
the chemiluminescence reaction of ozone with ketene, 137
- Chromenes**
photophysics, photochemistry and kinetics of photochromic 2H-pyrans and chromenes, 187

Conversion

efficient photochemical conversion of aqueous sulphides and sulphites to hydrogen using a rhodium-loaded CdS photocatalyst, 35

1,2-Cyclobutanedione

the photochemistry of 1,2-cyclobutanedione in the gas phase, 161

Cyclodextrins

selectivity in the photochemistry of β -ionyl and β -ionylidene derivatives in β -cyclodextrin: microsolvent effect, 123

Decomposition

decomposition of highly excited butenyl and pentenyl radicals, 145

Dehydrochlorination

photoreductions of α -chloroanthraquinones followed by photochemical dehydrochlorination in ethanol at room temperature, 99

Dibenzothiophene

emission spectra of dibenzothiophene in a Shpol'skii matrix at 10 K, 67

Dichlorobenzenes

triplet lifetime of dichlorobenzenes in the vapour phase studied by time-resolved and stationary observations of photosensitized phosphorescence, 173

vibrational relaxation of triplet dichlorobenzenes studied by photosensitized phosphorescence of biacetyl, 49

Diffuse reflectance

optical detection of a photoinduced thermal transient in titanium dioxide powder by diffuse reflectance laser flash photolysis, 273

Diffusion-controlled reactions

kinetics of partly diffusion-controlled reactions XV: non-uniform quencher distribution function resulting from double energy transfer, 13

Electron paramagnetic resonance

an electron paramagnetic resonance study of the excited triplet states of adenine and some of its derivatives in aqueous glasses at 77 K, 89

Electron transfer

solvent effect and activation parameters for the photoinduced electron transfer between $\text{Ru}(\text{bpy})_3^{2+}$ and aromatic amines, 257

Emission spectra

emission spectra of dibenzothiophene in a Shpol'skii matrix at 10 K, 67

Energy transfer

kinetics of partly diffusion-controlled reactions XV: non-uniform quencher distribution function resulting from double energy transfer, 13

Esters

phosphorescence and photochemical studies of some benzophenone dicarboxylic acid esters, 291

Ethylenes

photoisomerization and photocyclization of styrylphenanthrenes, as compared with dinaphthylethylenes, yielding identical photo-oxidation products, 297

Fluorescence

ground state association and fluorescence quenching of aromatic molecules by uranyl ion in alcohols, 209

Fourier transform IR spectroscopy

applications of Fourier transform IR spectroscopy to the determination of photo-oxidation quantum yields for halocarbons, 1

Fulgides

photochemistry of phenylfulgides XX: absence of activation barriers for photoisomerization reactions in the excited singlet state of extremely sterically hindered α, δ -di-(4-alkoxyphenyl)-fulgide isomers, 333

photochemistry of phenylfulgides XXI: ultrafast photoisomerization and radiationless deactivation processes in α, δ -di-(4-alkoxyphenyl)-fulgides and α, δ -bifluorenylfulgides, 349

Geometry

solvent shift and excited state geometries of benzil, 61

Glasses

an electron paramagnetic resonance study of the excited triplet states of adenine and some of its derivatives in aqueous glasses at 77 K, 89

Halocarbons

applications of Fourier transform IR spectroscopy to the determination of photo-oxidation quantum yields for halocarbons, 1

Hydrogen

efficient photochemical conversion of aqueous sulphides and sulphites to hydrogen using a rhodium-loaded CdS photocatalyst, 35

 β -Ionyl derivatives

selectivity in the photochemistry of β -ionyl and β -ionylidene derivatives in β -cyclodextrin: microsolvent effect, 123

 β -Ionylidene derivatives

selectivity in the photochemistry of β -ionyl and β -ionylidene derivatives in β -cyclodextrin: microsolvent effect, 123

Isomers

photochemistry of phenylfulgides XX: absence of activation barriers for photoisomerization reactions in the excited singlet state of extremely sterically hindered α,δ -di-(4-alkoxyphenyl)-fulgide isomers, 333

Ketene

the chemiluminescent reaction of ozone with ketene, 137

Kinetics

kinetics of partly diffusion-controlled reactions XV: non-uniform quencher distribution function resulting from double energy transfer, 13

photophysics, photochemistry and kinetics of photochromic 2*H*-pyrans and chromenes, 187

the 1-hydro-2,6-dimethyl-3,5-dicyanopyridinyl radical in solution: mechanisms of photochemical formation and kinetics of disappearance by self-combination, 321

Laser flash photolysis

laser flash photolysis of 1-alkenes at 193 nm in the gas phase: effect of molecular size on the formation yield of allyl radical, 279

optical detection of a photoinduced thermal transient in titanium dioxide powder by diffuse reflectance laser flash photolysis, 273

Microsolvent effects

selectivity in the photochemistry of β -ionyl and β -ionylidene derivatives in β -cyclodextrin: microsolvent effect, 123

Molecular size

laser flash photolysis of 1-alkenes at 193 nm in the gas phase: effect of molecular size on the formation yield of allyl radical, 279

Naphthyl compounds

photoisomerization and photocyclization of styrylphenanthrenes, as compared with dinaphthylethylenes, yielding identical photo-oxidation products, 297

Optical detection

optical detection of a photoinduced thermal transient in titanium dioxide powder by diffuse reflectance laser flash photolysis, 273

Oxazoles

photoluminescence and radioluminescence of 1,4-dioxane-water solutions of 2,5-diphenyloxazole, 181

Ozone

the chemiluminescent reaction of ozone with ketene, 137

Pentene

decomposition of highly excited butenyl and pentenyl radicals, 145

Phenylglyoxylic acid

a new liquid phase actinometer: quantum yield and photo-CIDNP study of phenylglyoxylic acid in aqueous solution, 237

Phosphorescence

phosphorescence and photochemical studies of some benzophenone dicarboxylic acid esters, 291

photochemical and photophysical behaviour of benzoylpyridines: remarks on the dual phosphorescence emission of benzoylpyridines at 77 K, 261

temperature dependence of the phosphorescence lifetime of nitrobenzopyrans: the role of the lowest triplet state in the reaction of pyran ring opening, 81

triplet lifetime of dichlorobenzenes in the vapour phase studied by time-resolved and stationary observations of photosensitized phosphorescence, 173

vibrational relaxation of triplet dichlorobenzenes studied by photosensitized phosphorescence of biacetyl, 49

Photocatalysis

efficient photochemical conversion of aqueous sulphides and sulphites to hydrogen using a rhodium-loaded CdS photocatalyst, 35

Photochromism

photoisomerization and thermoisomerization II: steric requirements for photochromism and thermochromism of *N,N'*-bis(salicylidene)diamines, 199

photophysics, photochemistry and kinetics of photochromic *2H*-pyrans and chromenes, 187

Photo-CIDNP

a new liquid phase actinometer: quantum yield and photo-CIDNP study of phenylglyoxylic acid in aqueous solution, 237

Photocyclization

photoisomerization and photocyclization of styrylphenanthrenes, as compared with dinaphthylethylenes, yielding identical photo-oxidation products, 297

Photodissociation

photodissociation of β -carboline, 219

Photoenolization

the importance of photoenolization as a route for radiationless decay in β -alkyl- α,β -unsaturated carbonyl compounds, 113

Photoisomerization

photochemistry of phenylfulgides XX: absence of activation barriers for photoisomerization reactions in the excited singlet state of extremely sterically hindered α,δ -di-(4-alkoxyphenyl)-fulgide isomers, 333

photochemistry of phenylfulgides XXI: ultrafast photoisomerization and radiationless deactivation processes in α,δ -di-(4-alkoxyphenyl)-fulgides and α,δ -bifluorenylfulgides, 349

photoisomerization and photocyclization of styrylphenanthrenes, as compared with dinaphthylethylenes, yielding identical photo-oxidation products, 297

photoisomerization and thermoisomerization II: steric requirements for photochromism and thermochromism of *N,N'*-bis(salicylidene)diamines, 199

Photoluminescence

photoluminescence and radioluminescence of 1,4-dioxane-water solutions of 2,5-diphenyloxazole, 181

Photo-oxidation

applications of Fourier transform IR spectroscopy to the determination of photo-oxidation quantum yield for halocarbons, 1

photoisomerization and photocyclization of styrylphenanthrenes, as compared with dinaphthylethylenes, yielding identical photo-oxidation products, 297

Photoreduction

photoreductions of α -chloroanthraquinones followed by photochemical dehydrochlorination in ethanol at room temperature, 99

Pyrans

photophysics, photochemistry and kinetics of photochromic *2H*-pyrans and chromenes, 187

temperature dependence of the phosphorescence lifetime of nitrobenzopyrans: the role of the lowest triplet state in the reaction of pyran ring opening, 81

Pyridine compounds

photochemical and photophysical behaviour of benzoylpyridines: remarks on the dual phosphorescence emission of benzoylpyridines at 77 K, 261

the 1-hydro-2,6-dimethyl-3,5-dicyanopyridinyl radical in solution: mechanisms of photochemical formation and kinetics of disappearance by self-combination, 321

Pyruvates

photochemistry of alkyl pyruvates, 229

Quencher distribution function

kinetics of partly diffusion-controlled reactions XV: non-uniform quencher distribution function resulting from double energy transfer, 13

Radiationless deactivation

photochemistry of phenylfulgides XXI: ultrafast photoisomerization and radiationless deactivation processes in α,δ -di-(4-alkoxyphenyl)-fulgides and α,δ -bifluorenylfulgides, 349

- Radiationless decay**
the importance of photoenolization as a route for radiationless decay in β -alkyl- α,β -unsaturated carbonyl compounds, 113
- Radicals**
decomposition of highly excited butenyl and pentenyl radicals, 145
laser flash photolysis of 1-alkenes at 193 nm in the gas phase: effect of molecular size on the formation yield of alkyl radical, 179
the 1-hydro-2,6-dimethyl-3,5-dicyanopyridinyl radical in solution: mechanisms of photochemical formation and kinetics of disappearance by self-combination, 321
- Radioluminescence**
photoluminescence and radioluminescence of 1,4-dioxane-water solutions of 2,5-diphenyloxazole, 181
- Rhodium**
efficient photochemical conversion of aqueous sulphides and sulphites to hydrogen using a rhodium-loaded CdS photocatalyst, 35
- Ring opening**
temperature dependence of the phosphorescence lifetime of nitrobenzopyrans: the role of the lowest triplet state in the reaction of pyran ring opening, 81
- Salicylidene**
photoisomerization and thermoisomerization II: steric requirements for photochromism and thermochromism of *N,N'*-bis(salicylidene)diamines, 199
- Selectivity**
selectivity in the photochemistry of β -ionyl and β -ionylidene derivatives in β -cyclodextrin: microsolvent effect, 123
- Self-combination**
the 1-hydro-2,6-dimethyl-3,5-dicyanopyridinyl radical in solution: mechanisms of photochemical formation and kinetics of disappearance by self-combination, 321
- Shpol'skii matrix**
emission spectra of dibenzothiophene in a Shpol'skii matrix at 10 K, 67
- Solvent effects**
solvent effect and activation parameters for the photoinduced electron transfer between $\text{Ru}(\text{bpy})_3^{2+}$ and aromatic amines, 257
- Solvent shifts**
solvent shift and excited state geometries of benzil, 61
- Stationary observations**
triplet lifetime of dichlorobenzenes in the vapour phase studied by time-resolved and stationary observations of photosensitized phosphorescence, 173
- Steric effects**
photochemistry of phenylfulgides XX: absence of activation barriers for photoisomerization reactions in the excited singlet state of extremely sterically hindered α,δ -di-(4-alkoxyphenyl)-fulgide isomers, 333
photoisomerization and thermoisomerization II: steric requirements for photochromism and thermochromism of *N,N'*-bis(salicylidene)diamines, 199
- Styrylphenanthrenes**
photoisomerization and photocyclization of styrylphenanthrenes, as compared with dinaphthylethylenes, yielding identical photo-oxidation products, 297
- Sulphides**
efficient photochemical conversion of aqueous sulphides and sulphites to hydrogen using a rhodium-loaded CdS photocatalyst, 35
- Sulphites**
efficient photochemical conversion of aqueous sulphides and sulphites to hydrogen using a rhodium-loaded CdS photocatalyst, 35
- Temperature dependence**
temperature dependence of the phosphorescence lifetime of nitrobenzopyrans: the role of the lowest triplet state in the reaction of pyran ring opening, 81
- Thermal transients**
optical detection of a photoinduced thermal transient in titanium dioxide powder by diffuse reflectance laser flash photolysis, 273
- Thermochromism**
photoisomerization and thermoisomerization II: steric requirements for

photochromism and thermochromism of *N,N'*-bis(salicylidene)diamines, 199

Thermoisomerization

photoisomerization and thermoisomerization II: steric requirements for photochromism and thermochromism of *N,N'*-bis(salicylidene)diamines, 199

Time-resolved observations

triplet lifetime of dichlorobenzenes in the vapour phase studied by time-resolved and stationary observations of photosensitized phosphorescence, 173

Titanium dioxide

optical detection of a photoinduced thermal transient in titanium dioxide powder by diffuse reflectance laser flash photolysis, 273

Uranyl ion

ground state association and fluorescence quenching of aromatic molecules by uranyl ion in alcohols, 209

Vibrational relaxation

vibrational relaxation of triplet dichlorobenzenes studied by photosensitized phosphorescence of biacetyl, 49
