

Subject Index

- Acetone**
laser photolysis of acetone at 308 nm, 165
- Acetylene**
quantum yield of vinylidene (3B_2) from the vacuum UV photolysis of acetylene and ethylene, 261
- Acid-base behaviour**
fluorescence spectra of 3-aminocoumarin and its acid-base behaviour in the excited singlet state, 55
- Actinometers**
solid state actinometers based on the photorearrangement of aromatic azoxy compounds in poly(methyl methacrylate), 105
- Alcohols**
solvent isotope effects on the quenching of porphyrin fluorescence by electron acceptors in alcohols or water, 289
- Alkane chains**
intramolecular photochemical hydrogen abstraction rates in doubly anchored alkane chains, 281
- Alkyl chlorides**
the reaction of ground state lead atoms, $Pb(6^3P_0)$, with CH_3Cl , C_2H_5Cl , $n-C_3H_7Cl$ and SF_6 at elevated temperatures by time-resolved atomic resonance absorption spectroscopy, 245
- Aluminium**
the photophysics and photostability of zinc(II) and aluminium(III) sulphonated naphthalocyanines, 187
- Anthracenes**
reactions originating from different upper excited singlet states: the photocycloreversion of the endoperoxides of 1,4-dimethyl-9,10-diphenylanthracene, 197
- Anthraquinones**
spectroscopic studies on the primary processes in the photoreduction of α -chloroanthraquinones in ethanol at room temperature, 73
- Azoxy compounds**
solid state actinometers based on the photorearrangement of aromatic azoxy compounds in poly(methyl methacrylate), 105
- 7,8-Benzoquinoline**
hydrogen-atom transfer reaction from phenol to excited 7,8-benzoquinoline, 63
- Benzylidene**
photochemical *Z-E* isomerization of benzylidenephthalides: influence of oxygen on the course of isomerization, 333
- Carbonyl ylide**
inverse temperature dependence of the dipolarophilic reactivity of carbonyl ylide photogenerated from *trans*-stilbene oxide, 35
- Carboxylic acids**
ionization equilibria and electronic spectroscopy of 5-hydroxyindole-2-carboxylic acid, 209
- Chloroform**
analysis of the products of photochemistry using tunable diode lasers, with application to the multiphoton dissociation of chloroform, 267
- Chromatography**
photochemical degradation mechanisms of stilbene-1 examined by spectroscopic and chromatographic methods, 339
- Cinnamates**
modification of the photochemical behaviour of organic molecules by cyclodextrin: geometric isomerization of stilbenes and alkyl cinnamates, 219
- Complex formation**
complex formation of spiropyrans with metal cations in solution: a study by laser flash photolysis, 323
- Coumarins**
fluorescence spectra of 3-aminocoumarin and its acid-base behaviour in the excited singlet state, 55

- Cyclodextrin**
 modification of the photochemical behaviour of organic molecules by cyclodextrin: geometric isomerization of stilbenes and alkyl cinnamates, 219
- Degradation**
 photochemical degradation mechanisms of stilbene-1 examined by spectroscopic and chromatographic methods, 339
- Dipolarophilic reactivity**
 inverse temperature dependence of the dipolarophilic reactivity of carbonyl ylide photogenerated from *trans*-stilbene oxide, 35
- Electron acceptors**
 solvent isotope effects on the quenching of porphyrin fluorescence by electron acceptors in alcohols or water, 289
- Endoperoxides**
 comparison of the photochemical and thermal rearrangement reaction of endoperoxides, 1
 reactions originating from different upper excited singlet states: the photocycloreversion of the endoperoxides of 1,4-dimethyl-9,10-diphenylanthracene, 197
- Ethanol**
 spectroscopic studies on the primary processes in the photoreduction of α -chloroanthraquinones in ethanol at room temperature, 73
- Ethers**
 intramolecular excimer formation in 2-(1-naphthyl)-ethyl 1-naphthylmethyl ether: kinetic and thermodynamic results, 305
- Ethylene**
 quantum yield of vinylidene (3B_2) from the vacuum UV photolysis of acetylene and ethylene, 261
- Excimer formation**
 intramolecular excimer formation in 2-(1-naphthyl)-ethyl 1-naphthylmethyl ether: kinetic and thermodynamic results, 305
- Guanine**
 intermediates and quantum yields in the photolysis of guanine and its derivatives in neutral glasses at 77 K, 89
- Glasses**
 intermediates and quantum yields in the photolysis of guanine and its derivatives in neutral glasses at 77 K, 89
- Hydrogen**
 hydrogen-atom transfer reaction from phenol to excited 7,8-benzoquinoline, 63
 intramolecular photochemical hydrogen abstraction rates in doubly anchored alkane chains, 281
- Imidazoles**
 evidence for the dihydrophenanthroimidazole intermediate in the photocyclization of 4,5-diphenylimidazole, 349
- Imides**
 photochemistry of 3,4,9,10-perylene-tetracarboxylic dianhydride dyes: visible absorption and fluorescence spectra and fluorescence quantum yields of the mono(*n*-octyl)imide derivative in aqueous and non-aqueous solutions, 43
- Indoles**
 ionization equilibria and electronic spectroscopy of 5-hydroxyindole-2-carboxylic acid, 209
- Indolinospiropyran**
 photophysics, photochemistry and kinetics of indolinospiropyran derivatives and an indolinthiospiropyran, 83
- Intermediates**
 evidence for the dihydrophenanthroimidazole intermediate in the photocyclization of 4,5-diphenylimidazole, 349
 intermediates and quantum yields in the photolysis of guanine and its derivatives in neutral glasses at 77 K, 89
- Ionization equilibria**
 ionization equilibria and electronic spectroscopy of 5-hydroxyindole-2-carboxylic acid, 209
- Iron**
 photochemical behaviour of Fe^{2+} and Fe^{3+} ions in the presence of $(C_4H_9)_4P^+$ ions, 175

Isomerization

- modification of the photochemical behaviour of organic molecules by cyclodextrin: geometric isomerization of stilbenes and alkyl cinnamates, 219
- photochemical *Z-E* isomerization of benzylidenephthalides: influence of oxygen on the course of isomerization, 333

Kinetics

- intramolecular excimer formation in 2-(1-naphthyl)-ethyl 1-naphthylmethyl ether: kinetic and thermodynamic results, 305
- photophysics, photochemistry and kinetics of indolinospiropyran derivatives and an indolinthiospiropyran, 83

Ketones

- photochemical substitution of haloaryl ketones by phenylthiolate anion, 231

Lead

- the reaction of ground state lead atoms, $\text{Pb}(6^3\text{P}_0)$, with CH_3Cl , $\text{C}_2\text{H}_5\text{Cl}$, $n\text{-C}_3\text{H}_7\text{Cl}$ and SF_6 at elevated temperatures by time-resolved atomic resonance absorption spectroscopy, 245

Metal cations

- complex formation of spiropyrans with metal cations in solution: a study by laser flash photolysis, 323
- photochemical behaviour of Fe^{2+} and Fe^{3+} ions in the presence of $(\text{C}_4\text{H}_9)_4\text{P}^+$ ions, 175

Multiphoton dissociation

- analysis of the products of photochemistry using tunable diode lasers, with applications to the multiphoton dissociation of chloroform, 267

Naphthyl compounds

- intramolecular excimer formation in 2-(naphthyl)-ethyl 1-naphthylmethyl ether: kinetic and thermodynamic results, 305
- the photophysics and photostability of zinc(II) and aluminium(III) sulpho-nated naphthalocyanines, 187

Oxygen

- photochemical *Z-E* isomerization of benzylidenephthalides: influence of oxygen on the course of isomerization, 333
- reactivity of sydnones with singlet oxygen, 13

Perylenetetracarboxylic dianhydride dyes

- photochemistry of 3,4,9,10-perylene-tetracarboxylic dianhydride dyes: visible absorption and fluorescence spectra and fluorescence quantum yields of the mono(*n*-octyl)imide derivative in aqueous and non-aqueous solutions, 43

Phenanthrenes

- evidence for the dihydrophenanthroimidazole intermediate in the photocyclization of 4,5-diphenylimidazole, 349

Phenol

- hydrogen-atom transfer reaction from phenol to excited 7,8-benzoquinoline, 63

Phenylthiolate

- photochemical substitution of haloaryl ketones by phenylthiolate anion, 231

Phosphonium ions

- photochemical behaviour of Fe^{2+} and Fe^{3+} ions in the presence of $(\text{C}_4\text{H}_9)_4\text{P}^+$ ions, 175

Photocyclization

- evidence for the dihydrophenanthroimidazole intermediate in the photocyclization of 4,5-diphenylimidazole, 349

Photocycloreversion

- reactions originating from different upper excited singlet states: the photocycloreversion of the endoperoxides of 1,4-dimethyl-9,10-diphenylanthracene, 197

Photolysis

- complex formation of spiropyrans with metal cations in solution: a study by laser flash photolysis, 323
- intermediates and quantum yields in the photolysis of guanine and its derivatives in neutral glasses at 77 K, 89
- laser photolysis of acetone at 308 nm, 165

- quantum yield of vinylidene (3B_2)
from the vacuum UV photolysis of
acetylene and ethylene, 261
- Photo-oxidation**
the photo-oxidation of *i*-C₃H₇CHO
vapour, 137
the temperature and wavelength depen-
dence of the photo-oxidation of
propionaldehyde, 117
- Photorearrangement**
solid state actinometers based on the
photorearrangement of aromatic
azoxy compounds in poly(methyl
methacrylate), 105
- Photoreduction**
spectroscopic studies on the primary
processes in the photoreduction of
 α -chloroanthraquinones in ethanol
at room temperature, 73
- Photostability**
the photophysics and photostability
of zinc(II) and aluminium(III)
sulphonated naphthalocyanines, 187
- Phthalides**
photochemical *Z-E* isomerization of
benzylidenephthalides: influence of
oxygen on the course of isomeriza-
tion, 333
- Poly(methyl methacrylate)**
solid state actinometers based on the
photorearrangement of aromatic
azoxy compounds in poly(methyl
methacrylate), 105
- Porphyryns**
solvent isotope effects on the quen-
ching of porphyrin fluorescence by
electron acceptors in alcohols or
water, 289
- Primary processes**
spectroscopic studies on the primary
processes in the photoreduction of
 α -chloroanthraquinones in ethanol
at room temperature, 73
- Propionaldehyde**
the photo-oxidation of *i*-C₃H₇CHO
vapour, 137
the temperature and wavelength depen-
dence of the photo-oxidation of
propionaldehyde, 117
- Quenching**
solvent isotope effects on the quen-
ching of porphyrin fluorescence by
electron acceptors in alcohols or
water, 289
- Rearrangement**
comparison of the photochemical and
thermal rearrangement reaction of
endoperoxides, 1
- Solvents**
effect of solvents on the photochem-
istry of *trans*-4,4'-diaminostilbene-
2,2'-disulphonic acid, 23
- Solvent isotope effects**
solvent isotope effects on the quen-
ching of porphyrin fluorescence by
electron acceptors in alcohols or
water, 289
- Spiropyrans**
complex formation of spiropyrans with
metal cations in solution: a study
by laser flash photolysis, 323
photophysics, photochemistry and
kinetics of indolinospiropyran deriv-
atives and an indolinthiospiro-
pyran, 83
- Stilbenes**
effect of solvents on the photochem-
istry of *trans*-4,4'-diaminostilbene-
2,2'-disulphonic acid, 23
inverse temperature dependence of the
dipolarophilic reactivity of carbonyl
ylide photogenerated from *trans*-
stilbene oxide, 35
modification of the photochemical
behaviour of organic molecules by
cyclodextrin: geometric isomeriza-
tion of stilbenes and alkyl cinna-
mates, 219
photochemical degradation mechanisms
of stilbene-1 examined by spectro-
scopic and chromatographic meth-
ods, 339
- Sulphonates**
the photophysics and photostability
of zinc(II) and aluminium(III)
sulphonated naphthalocyanines, 187
- Sulphonic acids**
effect of solvents on the photochem-
istry of *trans*-4,4'-diaminostilbene-
2,2'-disulphonic acid, 23
- Sulphur hexachloride**
the reaction of ground state lead atoms,
Pb(6^3P_0), with CH₃Cl, C₂H₅Cl,
n-C₃H₇Cl and SF₆ at elevated tem-
peratures by time-resolved atomic
resonance absorption spectroscopy,
245

Sydnonones

reactivity of sydnones with singlet oxygen, 13

Temperature dependence

inverse temperature dependence of the dipolarophilic reactivity of carbonyl ylide photogenerated from *trans*-stilbene oxide, 35

the temperature and wavelength dependence of the photo-oxidation of propionaldehyde, 117

Thermodynamics

intramolecular excimer formation in 2-(1-naphthyl)-ethyl 1-naphthyl-methyl ether: kinetic and thermodynamic results, 305

Time-resolved atomic resonance absorption spectroscopy

the reaction of ground state lead atoms, $Pb(6^3P_0)$, with CH_3Cl , C_2H_5Cl , $n-C_3H_7Cl$ and SF_6 at elevated temperatures by time-resolved atomic resonance absorption spectroscopy, 245

Transfer reactions

hydrogen-atom transfer reaction from

phenol to excited 7,8-benzoquinoline, 63

Tunable diode lasers

analysis of the products of photochemistry using tunable diode lasers, with applications to the multiphoton dissociation of chloroform, 267

Vinylidene

quantum yield of vinylidene (3B_2) from the vacuum UV photolysis of acetylene and ethylene, 261

Wavelength dependence

the temperature and wavelength dependence of the photo-oxidation of propionaldehyde, 117

Water

solvent isotope effects of the quenching of porphyrin fluorescence by electron acceptors in alcohols or water, 289

Zinc

the photophysics and photostability of zinc(II) and aluminium(III) sulfonated naphthalocyanines, 187
