Arantxa Irigoras, Joseph E. Fowler, and Jesus M. Ugalde*: On the Reactivity of Ti⁺(⁴F,²F): Reaction of Ti⁺ with OH₂

Page 293. Two figures need be ammended. The second transition state (TS2⁺) has been reexamined. The proper four-centered transition state is depicted here

TS2+(2A")

and its relative energy in Figure 4 of the article should be -0.713 eV. Additionally eqs 4 and 5 should read as follows:

$$Ti^{+}(^{4}F) + H_{2}O \rightarrow TiOH^{+}(^{3}\Delta) + H + \Delta E_{4}$$
 (4)

$$Ti^{+}(^{4}F) + H_{2}O \rightarrow TiH^{+}(^{3}\Phi) + OH + \Delta E_{5}$$
 (5)

T. Yamaguchi, Y. Kimura,* and N. Hirota*: Solvent and Solvent Density Effects on the Spectral Shifts and the Bandwidths of the Absorption and the Resonance Raman Spectra of Phenol Blue

Page 9056. The *Y*-axis of Figure 10 should be multiplied by the factor $(\ln 2)^{-0.5} \cong 1.20$. This modification does not affect the discussions in this paper.
