

Publications of Michael Kasha

1. Phosphorescence and the Triplet State, G. N. Lewis and M. Kasha, *J. Am. Chem. Soc.*, 66, 2100 (1944).
2. Phosphorescence in Fluid Media and the Reverse Process of Singlet–Triplet Absorption, G. N. Lewis and M. Kasha, *J. Am. Chem. Soc.*, 67, 994 (1945).
3. Ionic Equilibria and Reaction Kinetics of Plutonium Ions in Hydrochloric Acid Solution, M. Kasha and G. E. Sheline, Chapter 3.14, pp. 180–226.
4. The Pentapositive Oxidation State of Plutonium, R. E. Connick, M. Kasha, W. H. McVey and G. E. Sheline, Chapter 3.15, pp. 227–240.
5. Reactions between Plutonium Ions in Perchloric Acid Solution: Rates, Mechanisms, and Equilibria, M. Kasha, Chapter 3.100, pp. 295–334.
6. Spectrophotometric Studies of Plutonium in Aqueous Solution, R. E. Connick, M. Kasha, W. H. McVey and G. E. Sheline, Chapter 4.20, pp. 559–601.
7. Magnetic Susceptibilities of Plutonium in Various Oxidation States in Aqueous Solution, M. Calvin, M. Kasha and G. E. Sheline, Chapter 4.23, pp. 632–634.
8. (Note) On the Correlation of the Spectroscopic and Thermal Energy Differences between the Fluorescence and Phosphorescence Levels of Dye Molecules, M. Kasha and R. E. Powell, *J. Am. Chem. Soc.*, 69, 2909 (1947).
9. Phosphorescence and the Role of the Triplet State in the Electronic Excitation of Complex Molecules, M. Kasha, *Chem. Rev.*, 41, 401 (1947).
10. (Note) On the Properties of Gelatin-Dye Phosphors and the Continuum Theory of Szent-Györgyi, M. Kasha, *Science*, 107, 556 (1948).
11. Chemical Notes on the Coloring Matter of Chihuahua Textiles of Pre-Columbian Mexico, M. Kasha (*Textiles of Pre-Columbian Chihuahua by Lila M. O'Neale*), Carnegie Institution of Washington, Publication 574, Contribution 45, p 151 (1948).
12. Transmission Filters for the Ultraviolet, M. Kasha, *J. Opt. Soc. Am.*, 38, 929 (1948).
13. Fabrication of Boric Acid Glass for Luminescence Studies, M. Kasha, *J. Opt. Soc. Am.*, 38, 1908 (1948).
14. (Note) Vibrational Fine Structure in the Absorption Spectra of Uranyl and Plutonyl Ions in Aqueous Solution, M. Kasha, *J. Chem. Phys.*, 17, 349 (1949).
15. The Metastability of the Lowest Excited Singlet Level of Naphthalene, M. Kasha and R. V. Nauman, *J. Chem. Phys.*, 17, 516 (1949).
16. Photomagnetism. Determination of the Paramagnetic Susceptibility of a Dye in its Phosphorescent State, G. N. Lewis, M. Calvin and M. Kasha, *J. Chem. Phys.*, 17, 804 (1949).
17. Research papers in *The Transuranium Elements*, edited by Seaborg, Katz and Manning (National Nuclear Energy Series; Plutonium Project Record, Division IV), Vol. 14B, Part I, McGraw-Hill Book Co., Inc., 1949. (Original dates of Manhattan District papers, July 1944–August 1946.)
18. Characterization of Electronic Transitions in Complex Molecules, M. Kasha, *Discuss. Faraday Soc.*, No. 9, 14–19 (1950).
19. Collisional Perturbation of Spin–Orbital Coupling and the Mechanism of Fluorescence Quenching. A Visual Demonstration of the Perturbation, M. Kasha, *J. Chem. Phys.*, 20, 71 (1952).
20. Discussion on Basic Mechanisms in Radiobiology, M. Kasha, National Research Council Publication No. 305, Nuclear Science Series, edited by Magee, Kamen, and Platzman, Washington, D. C. (1953).
21. (Note) Lowest Triplet Levels of the Polyacenes, S. P. McGlynn, M. R. Padhye and M. Kasha, *J. Chem. Phys.*, 23, 593 (1955).
22. Luminescence Spectroscopy of Molecules and the Photosynthetic System, R. S. Becker and M. Kasha, in *The Luminescence of Biological Systems*, edited by F. H. Johnson, American Association for the Advancement of Science, Washington, D.C., 25–47 (1955).
23. (Note) Luminescence Spectroscopy of Porphyrin-like Molecules Including the Chlorophylls, R. S. Becker and M. Kasha, *J. Am. Chem. Soc.*, 77, 3669 (1955).
24. The Role of Hydrogen Bonding in the $n \rightarrow \pi^*$ Blue-Shift Phenomenon, G. J. Brealey and M. Kasha, *J. Am. Chem. Soc.*, 77, 4462 (1955).
25. (Note) Interpretation of the Lowest Frequency Electronic Absorption Bands of Inorganic Molecules of Type $XO_3^{Z(-)}$ as $n \rightarrow \pi^*$ Transitions, S. P. McGlynn and M. Kasha, *J. Chem. Phys.*, 24, 481 (1956).
26. Confirmation of the Anomalous Fluorescence of Azulene, G. Viswanath and M. Kasha, *J. Chem. Phys.*, 24, 574 (1956).
27. The Lowest Triplet State of Anthracene, M. R. Padhye, S. P. McGlynn and M. Kasha, *J. Chem. Phys.*, 24, 588 (1956).
28. Spin Intercombinations in Molecules, M. Kasha and S. P. McGlynn, *Annu. Rev. Phys. Chem.*, 7, 403–424 (1956).
29. (Note) Spin–Orbital Perturbation in Cyanine Dyes Absorbed on Surfaces Containing High-Z Atoms, E. Clementi and M. Kasha, *J. Chem. Phys.*, 26, 967 (1957).
30. Review: Quantum Chemistry, An Introduction (by Walter Kauzmann), M. Kasha and G. A. Crosby, *J. Chem. Educ.*, 34, 412 (1957).
31. Intramolecular Energy Transfer in Ytterbium Organic Chelates, G. A. Crosby and M. Kasha, *Spectrochim. Acta*, 10, 377 (1958).
32. The Observation and Assignment of the Lowest Multiplicity-Forbidden Transition in Pyrazine, L. Goodman and M. Kasha, *J. Mol. Spectrosc.*, 2, 58 (1958).
33. *Molecular Electronic Bibliography, Vol. I*, L. Kasha and M. Kasha, Publishers Press (Rose Printing Co.), Tallahassee, Florida (1958).
34. (Note) The Enhancement of Phosphorescence Ability Upon ****atfgKm;aaofDDCykebo/e*s2E,0.71Nq5~.
35. Spin–Orbital Interaction in N–Heterocyclic Molecules. General Results in a Cylindrical Potential Approximation, E. Clementi and M. Kasha, *J. Mol. Spectrosc.*, 2, 297 (1958).
36. Review: Excited States in Chemistry and Biology (by C. Reid), M. Kasha, 1. *Chem. Educ.*, 35, 583 (1958).

37. Relation between Exciton Bands and Conduction Bands in Molecular Lamellar Systems, M. Kasha, *Rev. Mod. Phys.*, 31, 162 (1959). (Also in *Biophysical Science*, [edited by Oncley, Schmitt, Williams, Rosenberg and Bolt], Wiley and Sons, New York, p 162 [1959].)
38. Paths of Molecular Excitation, M. Kasha, in *Bioenergetics*, edited by L. G. Augenstein, *Radiat. Res.*, Supplement 2, 243–275 (1960).
39. Ultraviolet Radiation Effects: Molecular Photochemistry, M. Kasha, in *Comparative Effects of Radiation*, edited by M. Burton, J. S. Kirby-Smith and J. L. Magee, John Wiley and Sons, New York, pp. 72–96 (1960).
40. (Note) Basic Theories of Energy and Electron Transfer, M. Kasha, in *Fast Fundamental Transfer Processes in Aqueous Biomolecular Systems*, edited by F. O. Schmitt, Bulletin, Dept of Biology, Mass. Inst of Tech., Cambridge, MA, pp. 3–6 (1960).
41. The $n \rightarrow \pi^*$ Transition in Nucleic Acids and Polynucleotides, A. Rich and M. Kasha, *J. Am. Chem. Soc.*, 82, 6197 (1960).
42. Introductory Remarks, Symposium on Molecular Electronic Spectroscopy, *J. Mol. Spectrosc.*, 6, (1961).
43. The Nature and Significance of $n \rightarrow \pi^*$ Transitions, M. Kasha, in *Light and Life*, edited by W. D. McElroy and B. Glass, Johns Hopkins University Press, Baltimore, MD, pp. 31–64 (1961).
44. (Note) Ionization Potentials of Benzene, Hexadeuteriobenzene, and Pyridine from their Observed Rydberg Series in the Region 600–2000 Å, M. F. A El-Sayed, M. Kasha and Y. Tanaka, *J. Chem. Phys.*, 34, 334 (1961).
45. (Note) Solvent Effects on the Spectra of Halide Ions, S. J. Strickler and M. Kasha, *J. Chem. Phys.*, 34, 1077 (1961).
46. (Note) Energy Transfer in Hydrogen-Bonded N–Heterocyclic Complexes and Their Possible Role as Energy Sinks, M. A El-Bayoumi and M. Kasha, *J. Chem. Phys.*, 34, 2181 (1961).
47. (Note) Intramolecular Charge-Transfer Bands Observed in the Spectra of Some Aryl Boron Compounds, B. Ramsey, M. A El-Bayoumi and M. Kasha, *J. Chem. Phys.*, 35, 1502 (1961).
48. Excited States of Nitrogen Base-Pairs and Polynucleotides, M. Kasha, M. A El-Bayoumi and W. Rhodes, *J. Chim. Phys.*, 58, 816 (1961).
49. (Note) Commentary on the Scheme of the Semiempirical Molecular Orbital Calculation, M. Kasha, *J. Chim. Phys.*, 58, 914 (1961).
50. *Theory of Molecular Excitons*, A. S. Davydov, McGraw-Hill Book Co., New York, 184 pp. (1962). (Translated from the Russian text by M. Oppenheimer, Jr. and M. Kasha.)
51. (Note) Molecular Memory Models, M. Kasha in *Macromolecular Specificity and Biological Memory*, edited by F. O. Schmitt, MIT Press, Cambridge, MA, pp. 17–20 (1962).
52. *Horizons in Biochemistry*, edited by M. Kasha and B. Pullman, Academic Press, New York, 606 pp. (1962).
53. Quantum Chemistry in Molecular Biology, M. Kasha, in *Horizons in Biochemistry*, edited by M. Kasha and B. Pullman, Academic Press, New York, pp. 583–599 (1962).
54. Solvent Effects on the Electronic Absorption Spectrum of Nitrite Ion, S. J. Strickler and M. Kasha, *J. Am. Chem. Soc.*, 85, 2899 (1963).
55. Introductory Remarks to the Exciton Symposium, M. Kasha, *Radiat. Res.*, 20, 53 (1963).
56. Energy Transfer Mechanisms and the Molecular Exciton Model for Molecular Aggregates, M. Kasha, *Radiat. Res.*, 20, 55 (1963).
57. The Red Chemiluminescence of Molecular Oxygen in Aqueous Solution, A U. Khan and M. J. Kasha, *J. Chem. Phys.*, 39, 2105 (1963).
58. The External Heavy-Atom Spin–Orbital Coupling Effect V. Absorption Studies of Triplet States, S. P. McGlynn, T. Azumi and M. Kasha, *J. Chem. Phys.*, 40, 507 (1964).
59. The Molecular Exciton Model, E. G. McRae and M. Kasha, in *Physical Processes in Radiation Biology*, edited by Augenstein, Rosenberg and Mason, Academic Press, New York, pp. 23–42 (1964).
60. Classification of Excitons, M. Kasha, in *Physical Processes in Radiation Biology*, edited by Augenstein, Rosenberg and Mason, Academic Press, New York, pp. 17–22 (1964).
61. Electronic Structure and Absorption Spectra of the Nitrate Ion, S. J. Strickler and M. Kasha, in *Molecular Orbitals in Chemistry, Physics and Biology*, edited by B. Pullman and P.-O. Lowdin, Academic Press, New York, pp. 240–261 (1964).
62. Rotational Structure in the Chemiluminescence Spectrum of Molecular Oxygen in Aqueous Solution, A. U. Khan and M. Kasha, *Nature*, 204, 241 (1964).
63. Application of the Exciton Model to Molecular Lamellar Systems, R. Hochstrasser and M. Kasha, *Photochem. Photobiol.*, 3, 317 (1964).
64. The Exciton Model in Molecular Spectroscopy, M. Kasha, H. R. Rawls and M. A El-Bayoumi, *Pure Appl. Chem.*, IUPAC, Butterworths, London, 11, 371 (1965).
65. (Note) Physical Theory of Chemiluminescence in Systems Evolving Molecular Oxygen, A U. Khan and M. Kasha, *J. Am. Chem. Soc.*, 88, 1574 (1966).
66. Triplet–Triplet Absorption Studies on Aromatic and Heterocyclic KgtlkmS/G/te71. h.,R7Hdd).
67. Theory of Molecular Luminescence, M. Kasha, in *Proceedings of the International Conference on Luminescence*, IUPA Physics, edited by G. Szigeti, Akademiai Kiado, Budapest, 1968, Vol. I, pp. 166–182.
68. Radiationless Molecular Electronic Transitions, B. R. Henry and M. Kasha, *Annu. Rev. Phys. Chem.*, 19, 161–192 (1968).
69. Criteria for Maximizing Steady-State Population of the Lowest Excited Triplet State, B. R. Henry and M. Kasha, *J. Mol. Spectrosc.*, 26, 536 (1968).
70. Luminescence Spectra of Transition Metal Complexes, F. Zuloaga and M. Kasha (Caracas Symposium), *Photochem. Photobiol.*, 7, 549 (1968).
71. Correlation of Orbital Classification of Molecular Electronic Transitions with Transition Mechanism: The Aromatic Amines, M. Kasha and H. R. Rawls, *Photochem. Photobiol.*, 7, 561 (1968).
72. A New Look at the History of the Classic Guitar, M. Kasha, in *Guitar Rev.*, 30, 2–12 (1968).
73. Electronic Consequences of Vibrational Deficiency in Polyatomic Molecules, P. J. Gardner and M. Kasha, *J. Chem. Phys.*, 50, 1543 (1969).
74. (Note) Intraconfigurational Spin-Forbidden Transitions in Cr(III), Mn(II), and Ni(II) Complexes in Aqueous Glass Solutions at 77 K, G. Santiago and M. Kasha, *J. Am. Chem. Soc.*, 91, 757 (1969).

75. A Stationary State Approach to Radiationless Transition. Radiation Bandwidth Effect on Excitation Processes in Polyatomic Molecules, W. Rhodes, B. R. Henry and M. Kasha, *Proc. Nat. Acad. Sci. U.S.A.*, 63, 31 (1969).
76. Excited-State Two-Proton Tautomerism in Hydrogen-Bonded N-Heterocyclic Base Pairs, C. A Taylor, M. A El-Bayoumi and M. Kasha, *Proc. Nat. Acad. Sci. U.S.A.*, 63, 253 (1969).
77. (Note) Observation of Phosphorescence in Pyridines, R. J. Hoover and M. Kasha, *J. Am. Chem. Soc.*, 91, 6508 (1969).
78. Chemiluminescence Arising from Simultaneous Transitions in Pairs of Singlet Oxygen Molecules, A. U. Khan and M. Kasha, *J. Am. Chem. Soc.*, 92, 3293 (1970).
79. Observation of Simultaneous Electronic Transitions for Rare-Earth Ion Pairs in Aqueous Solution, J. M. Marrs and M. Kasha, *Chem. Phys. Lett.*, 6, 235 (1970).
80. The Physics, Chemistry, and Biology of Singlet Molecular Oxygen, M. Kasha and A. U. Khan, *Ann. N.Y. Acad. Sci.*, 171, 5 (1970).
81. An Optical-Residue Singlet-Oxygen Theory of Photocarcinogenicity, A. U. Khan and M. Kasha, *Ann. N.Y. Acad. Sci.*, 171, 24 (1970).
82. The Competition among Biprotic Phototautomerism, Excimer Formation, and Proton Tunneling in DNA Base-Pairs, M. Kasha, P. Horowitz and M. A El-Bayoumi, in *Molecular Spectroscopy, Modern Research*, edited by K N. Rao and C. W. Mathews, Academic Press, New York, pp. 287–296 (1972).
83. Photoexcitation Effects in Molecules Concealed in Normal Action Spectra, M. Kasha, in *Horizons of Bioenergetics*, edited by A. San Pietro and H. Gest, Academic Press, New York, pp. 171–172 (1972).
84. Multi-Conformational Compounds with Two Absorbing Groups: Some Observations on the Ultraviolet Spectrum of Cyclopropyl Ketones, A. Y. Meyer, B. Muel and M. Kasha, *J. Mol. Spectrosc.*, 43, 262 (1972).
85. The Charge-Transfer Band in the Ultraviolet Spectrum of Cyclopropyl Ketones, A. Y. Meyer, B. Muel and M. Kasha, *J. Chem. Soc., Chem. Commun.*, 401–402 (1972).
86. Role of Photons in the Storage of Energy and Resonance Transfer, M. Kasha, in *From Theoretical Physics to Biology*, edited by M. Marois, S. Karger, Basel, pp. 156–164 (1973).
87. Multiple Excitation in Composite Molecules: Biprotic Phototautomerism, M. Kasha, in *Excited States of Matter*, edited by C. W. Shoppee, Grad. Studies Texas Tech University, pp. 5–19 (1973).
88. A Survey of Multiple Excitation in Composite Molecules, M. Kasha and M. A El-Bayoumi, in *Physical Mechanisms in Radiation Biology*, edited by R. D. Cooper and R. W. Wood, U.S. Atomic Energy Commission, CONF-721001, pp. 126–130 (1974).
89. A Novel Sensitized Chemiluminescence: Infrared Emissions from Thiazine Dyes Sensitized by Singlet Oxygen, D. E. Brabham and M. Kasha, *Chem. Phys. Lett.*, 29, 159 (1974).
90. Physics and the Perfect Sound, M. Kasha, in *Britannica Yearbook of Science and the Future, Encyclopedia Britannica*, Chicago, pp. 128–143 (1974).
91. Intermolecular Perturbation of Molecular Potentials, B. Dellinger and M. Kasha, *Chem. Phys. Lett.*, 36, 410 (1975).
92. Molecular Dimensionality in Relation to Phenomenology: From the Atom to the Living Cell, M. Kasha, in *Search and Discovery*, edited by B. Kaminer, (Albert Szent-Györgyi 82nd Birthday Symposium), Academic Press, New York (1976).
93. Phenomenology of Solvent Matrix Spectroscopic Effects, B. Dellinger and M. Kasha, *Chem. Phys. Lett.*, 38, 9 (1976).
94. Molecular Excitons in Small Aggregates, M. Kasha, in *Spectroscopy of the Excited State*, edited by B. DiBartolo, Plenum Press, New York, pp. 337–363 (1976).
95. Oxygen-Interaction Luminescence Spectroscopy, G.-E. Khalil and M. Kasha, *Photochem. Photobiol.*, 28, 435 (1978).
96. New Insights for the Amateur and Professional Hemerocallis Hybridizer, M. Kasha, *J. Am. Hemerocallis Soc.*, 32, 45–60 (1978).
97. Introductory Remarks: The Renaissance of Research on Singlet Molecular Oxygen, M. Kasha, in *Singlet Oxygen*, edited by H. H. Wasserman and R. W. Murray, Academic Press, New York, pp. xiii–xviii (1979).
98. Singlet Oxygen Electronic Structure and Photosensitization, M. Kasha and D. E. Brabham, in *Singlet Oxygen*, edited by H. H. Wasserman and R. W. Murray, Academic Press, New York, pp. 1–33 (1979).
99. Commentary on Long-Range Energy Transfer with Z-Dependence, M. Kasha, *Photochem. Photobiol.*, 30, 185–187 (1979).
100. Excited-State Proton-Transfer Spectroscopy of 3-Hydroxyflavone and Quercetin, P. K. Sengupta and M. Kasha, *Chem. Phys. Lett.*, 68, 382 (1979).
101. Direct Spectroscopic Observation of Singlet Oxygen Emission at 1268-nm Excited by Sensitizing Dyes of Biological Interest in Liquid Solution, A. U. Khan and M. Kasha, *Proc. Nat. Acad. Sci. U.S.A.*, 76, 6047 (1979).
102. Spectroscopy of the Solvent Cage. Generation and Properties of Excited States, M. Kasha, B. Dellinger and C. W. Brown, *International Conference on Bioluminescence and Chemiluminescence*, edited by M. DeLucca and W. D. McElroy, Academic Press, New York, 1981, pp. 3–16.
103. Propagation of Hemerocallis Offshoots by Cytokinin-Auxin Treatment of Sheared Ramets, J. S. Kirby-Smith and M. Kasha, *Daylily J.*, 36, 90–99 (1981).
104. The Molecular and Genetic Basis for Evolving a Blue Hemerocallis, M. Kasha, K. Bisset and P. K. Sengupta, *Daylily J.*, 36, 68–81 (1982).
105. Applied Mechanics and the Modern String Instrument—Classical Guitar, M. Kasha and N. Kasha, *J. Guitar Acoustics*, Issue No. 6, September 1982, pp. 104–121.
106. Molecular Translational-Rovibronic Hamiltonian. I. Non-Linear Molecules, R. Islampour and M. Kasha, *Chem. Phys.*, 74, 67–76 (1983).
107. Molecular Translational-Rovibronic Hamiltonian. II. Linear Molecules, R. Islampour and M. Kasha, *Chem. Phys.*, 75, 157–164 (1983).
108. Mechanism of Four-Level Laser Action in Solution Excimer and Excited-State Proton-Transfer Cases, A. U. Khan and M. Kasha, *Proc. Nat. Acad. Sci., U.S.A.*, 80, 1767–1770 (1983).
109. Proton-Transfer Spectroscopy of 3-Hydroxychromones. Extreme Sensitivity to Hydrogen-Bonding Perturbations, D. McMorro and M. Kasha, *J. Am. Chem. Soc.*, 105, 5133–5134 (1983).

110. The Triplet State—An Example of G. N. Lewis' Research Style, M. Kasha, *J. Chem. Educ.*, 61, 204–21 (1984).
111. Intramolecular Excited-State Proton Transfer of 3-Hydroxyflavone. H-Bonding Solvent Perturbations, D. McMorrow and M. Kasha, *J. Phys. Chem.*, 88, 2235–2243 (1984).
112. Proton-Transfer Spectroscopy of 3-Hydroxyflavone in an Isolated-Site Crystal Matrix, D. McMorrow and M. Kasha, *Proc. Nat. Acad. Sci. U.S.A.*, 81, 3375–3378 (1984).
113. The Proton-Transfer Laser. Gain Spectrum and Amplification of Spontaneous Emission of 3-Hydroxyflavone, P. Chou, D. McMorrow, T. J. Aartsma and M. Kasha, *J. Phys. Chem.*, 88, 4596 (1984).
114. Singlet Oxygen Electronic Structure and Energy Transfer, M. Kasha in *Singlet O₂*, (Vol. I–IV), edited by A. A. Frimer, CRC Handbook Series, CRC Press, Inc. 1985, Vol. I, pp. 2–11.
115. Analytical Applications of Proton-Transfer Spectroscopy Detection of Trace H–Bonding Impurities in Hydrocarbon Solvents Using 3-Hydroxyflavone as a Fluorescence Probe, D. McMorrow and M. Kasha, in *Adv. Lumin. Spectrosc.*, edited by L. J. Cline-Love and D. Eastwood, ASTM, STP 863, American Society for Testing of Materials, 16–25 (1985).
116. Proton-Transfer Spectroscopy. Perturbation of the Tautomerization Potential, M. Kasha, *J. Chem. Soc., Faraday Trans. 2*, 82, 2379–2392 (1986).
117. Proton-Transfer Spectroscopy of Benzanilide. The Amide-Imidol Tautomerism, G.-Q. Tang, J. MacInnis and M. Kasha, *J. Am. Chem. Soc.*, 109, 2531–2533 (1987).
118. Fifty Years of the Jablonski Diagram, M. Kasha, Proceedings of the International Symposium on Molecular Luminescence and Photophysics: Half a Century of the Jablonski Diagram, *Acta Phys. Pol.*, A 71, 661–670 (1987).
119. Proton-Transfer Spectroscopy and Proton-Transfer Lasers, M. Kasha, Proceedings of the International Symposium on Molecular Luminescence and Photophysics: Half a Century of the Jablonski Diagram, *Acta Phys. Pol.*, A 71, 717–729 (1987).
120. Coherent Pulse and Environmental Characteristics of the Intramolecular Proton-Transfer Lasers Based on 3-Hydroxyflavone and Fisetin, D. A. Parthenopoulos and M. Kasha, *Chem. Phys. Lett.*, 146, 77–82 (1988).
121. The Triple Fluorescence of Benzanilide and the Dielectric Medium Modulation of its Competitive Excitation, J. Heldt, D. Gormin and M. Kasha, *Chem. Phys. Lett.*, 150, 433–436 (1988).
122. The Role of the Anionic Potential in Excited-State Proton Transfer in Lumichrome Picosecond Spectroscopy, J. M. MacInnis and M. Kasha, *Chem. Phys. Lett.*, 151, 375–378 (1988).
123. Intramolecular Charge-Transfer Transition in Benzanilides and Its Dielectric Medium Modulation, J. Heldt, D. Gormin and M. Kasha, *J. Am. Chem. Soc.*, 110, 8255–8256 (1988).
124. Fast Optically-Induced Molecular Changes. The Proton-Transfer Laser, M. Kasha, *Proceedings of the Third International Symposium on Molecular Electronic Devices*, edited by F. L. Carter, R. E. Siatkowski and H. Wohltjen, Elsevier Science Publishers, Amsterdam, 107–121 (1988).
125. Triple Fluorescence in Aminosalicylates. Modulation of Normal, Proton-Transfer, and Twisted Intramolecular Charge-Transfer (TICT) Fluorescence by Physical and Chemical Perturbations, D. Gormin and M. Kasha, *Chem. Phys. Lett.*, 153, 574–576 (1988).
126. Science, Art, and a Box with the Sound You Dream About, M. Kasha, *Proceedings of the 1984 Biology of Music Making Conference*, edited by F. L. Roehmann and F. R. Wilson, MMB Music Inc., St. Louis, MO, 205–207 (1989).
127. A Comparative Picosecond Spectroscopic Study of the Competitive Triple Fluorescence of Aminosalicylates and Benzanilides, J. Heldt, D. Gormin and M. Kasha, *Chem. Phys.*, 136, 321–334 (1989).
128. Dielectric Medium Interactions in Proton-Transfer and Charge-Transfer Molecular Electronic Excitation, J. Heldt and M. Kasha, *J. Mol. Liq.*, 41, 305–313 (1989).
129. A Life in Molecular Orbital Theory (Review of Robert Mulliken's Autobiography), M. Kasha, *Chem. Eng. News*, 68, 29–30 (1990).
130. Molecular Electronic Criteria for Selection of Radiation-Hard Scintillators, M. Kasha, A. Kubicki and H. R. Rawls, *Workshop on Radiation-Hardness of Plastic Scintillators* (USDOE, Kurtis F. Johnson, Ed.), Department of Physics, Florida State University, Tallahassee, FL, March, 19021, 49–60 (1990).
131. Molecular Phosphorescence Enhancement via Tunneling through Proton-Transfer Potentials, D. Gormin, J. Heldt and M. Kasha, *J. Phys. Chem.*, 94, 1185–1189 (1990).
132. Four Great Personalities of Science, G. N. Lewis, J. Franck, R. S. Mulliken and A. Szent-Györgi (Porter Medal Address), M. Kasha, Symposium on Photochemistry, IUPAC *Pure Appl. Chem.*, 62, 1615 (1990).
133. Ground-State Anion Formation and Picosecond Excitation Dynamics of 3-Hydroxyflavone in Formamide, D. A. Parthenopoulos and M. Kasha, *Chem. Phys. Lett.*, 173, 303 (1990).
134. Comparative Study of Stimulated Proton-Transfer Luminescence of Three Chromones, D. Parthenopoulos, D. McMorrow, and M. Kasha, *J. Phys. Chem.*, 95, 2668–2674 (1991).
135. Energy Transfer, Charge Transfer, and Proton Transfer in Molecular Composite Systems, M. Kasha, in *Physical and Chemical Mechanisms in Molecular Radiation Biology*, edited by W. A. Glass and M. N. Varma, Plenum Press, New York, 1991, 231–255.
136. The Proton-Transfer Laser, M. Kasha, *Proceedings of the LASER '92 Conference*, January 20–24, 1992, edited by D. Eastwood and T. Vo-Dinh, *Int. Soc. Opt. Eng.* 1637, 2–7 (1992).
137. Monohydrate Catalysis of Excited-State Double-Proton Transfer in 7-Azaindole, P.-T. Chou, M. L. Martinez, W. C. Cooper, S. T. Collins, D. McMorrow and M. Kasha, *J. Phys. Chem.*, 96, 5203–5205 (1992).
138. Challenges to Computational Quantum Chemistry from Contemporary Advances in Polyatomic Molecular Electronic Spectroscopy, M. Kasha, D. Parthenopoulos and B. Dellinger, *Int. J. Quantum Chem.*, 45, 689–708 (1993).
139. Spectroscopic Criteria for Wavelength Shifting, Fast, and Red-infrared Scintillators, A. Sytnik and M. Kasha, in Proceedings of the International Symposium on Radiation-Tolerant Scintillators and Detectors, edited by R. L. Clough and K. F. Johnson, *Radiat. Phys. Chem.*, 41, No. 112, 331–349 (1993).

140. Solvent Cage Spectroscopy, M. Kasha, A. Sytnik and B. Dellinger, *IUPAC Pure Appl. Chem.*, **65**, 16441–1646 (1993).
141. Excited-State Intramolecular Proton Transfer as a Fluorescence Probe for Protein Binding-Site Static Polarity, A. Sytnik and M. Kasha, *Proc. Natl. Acad. Sci. U.S.A.*, **91**, 8627–8630 (1994).
142. Interplay Between Excited-State Intramolecular Proton Transfer and Charge Transfer in Flavonols and Their Use as Protein-Binding-Site Fluorescence Probes, A. Sytnik, D. Gormin and M. Kasha, *Proc. Natl. Acad. Sci. U.S.A.*, **91**, 11968–11972 (1994).
143. Singlet Molecular Oxygen Evolution upon Simple Acidification of Aqueous Hypochlorite: Application to Studies on the Deleterious Health Effects of Chlorinated Drinking Water, A. U. Khan and M. Kasha, *Proc. Natl. Acad. Sci. U.S.A.*, **91**, 12362–12364 (1994).
144. Singlet Molecular Oxygen in the Haber-Weiss Reaction, A. U. Khan and M. Kasha, *Proc. Natl. Acad. Sci. U.S.A.*, **91**, 12365–12367 (1994).
145. Triplet State Potentials in the Competitive Excitation Mechanisms of Intramolecular Proton Transfer, D. Gormin, J. Heldt and M. Kasha, *J. Phys. Chem.*, **99**, 7281–7284 (1995).
146. Chemical Physics of Excitation Dynamics via Amplified Spontaneous Emission (ASE) Laser Spike Spectroscopy in Substituted Phenylloxazoles, J.-C. del Valle, M. Kasha and J. Catalan, *Chem. Phys. Lett.*, **263**, 154 (1996).
147. Spectroscopy of Amplified Spontaneous Emission (ASE) Laser Spikes in Polyhydroxyflavones, D. Gormin, A. Sytnik and M. Kasha, *J. Phys. Chem. A*, **101**, 672–677 (1997).
148. Spectroscopy of Amplified Spontaneous Emission (ASE) Laser Spikes in Phenylloxazoles. Prototype Classes, J. C. del Valle, M. Kasha and J. Catalan, *J. Phys. Chem. A*, **101**, 3260–3272 (1997).
149. Inter-ring Torsional Modulation in Molecular Lasers. Ultraviolet Lasing via Amplified Spontaneous Emission (ASE) Spectroscopy of Phenylimidazoles, J. Catalan, J. L. G. De Paz, J. C. del Valle and M. Kasha, *J. Phys. Chem.*, **101**, 5284–5291 (1997).
150. Photochemical Induction of Dual Fluorescence of Quercetin and Hydroxyflavones upon Intermolecular H-Bonding to Solvent Matrix, E. Falkovskaia, P. K. Sengupta and M. Kasha, *Chem. Phys. Lett.*, **297**, 109–114 (1998).
151. From Jablonski to Femtoseconds. Evolution of Molecular Photophysics, M. Kasha, *Acta Phys. Pol.*, **A**, **95**, 15–36 (1999).
152. Solvatochromism of Fluorophores with an Intramolecular Hydrogen Bond and Their Use as Probes in Biomolecular Cavity Sites, J. Catalan, J. C. del Valle, C. Diaz, J. Palomar, J. L. G. De Paz and M. Kasha, *Int. J. Quantum Chem.*, **72**, 421–438 (1999).
153. Competition Between Dipolar Relaxation and Double Proton Transfer in the Electronic Spectroscopy of Pyrroloquinolines, J. C. del Valle, E. Dominguez and M. Kasha, *J. Phys. Chem. A*, **103**, 2467–2475 (1999).
154. Resolution of Concerted versus Sequential Mechanisms in Photoinduced Double-Proton-Transfer Reaction in 7-Azaindole H-Bonded Dimer, J. Catalan, J. C. del Valle and M. Kasha, *Proc. Natl. Acad. Sci. U.S.A.*, **96**, 8338–8343 (1999).
155. Conformity of the 7-Azaindole Dimer Cationic Potential with Photoionization/Coulomb-Explosion MS Observations and the Concerted Biprotonic Transfer Mechanism, J. Catalan, J. C. del Valle and M. Kasha, *Chem. Phys. Lett.*, **318**, 629–636 (2000).
156. The Singular Coincidence of Fluorescence Spectra of the Anionic and Cationic Species Formed by the Respective Deprotonated and Protonated Pyrido-Pyrrolo Bases, J. C. del Valle, M. Kasha and J. Catalan, *Int. J. Quantum Chem.*, **77**, 118–127 (2000).
157. Photophysics of 7-Azaindole, Its Doubly-H-Bonded Base-Pair, and Corresponding Proton-Transfer-Tautomer Dimeric Species, via Defining Experimental and Theoretical Results, J. Catalan and M. Kasha, *J. Phys. Chem. A*, **104**, 10812–10820 (2000).
158. The Concerted Mechanism of Photoinduced Biprotonic Transfer in 7-Azaindole Dimers: A Model for the Secondary Evolution of the Classic C2h Dimer and Comparison of Four Mechanisms, J. Catalan, P. Perez, J. C. del Valle, J. L. G. De Paz and M. Kasha, *Proc. Natl. Acad. Sci. U.S.A.*, **99**, 5799–5803 (2002).
159. The Concerted Mechanism of Photoinduced Biprotonic Transfer in 7-Azaindole Dimers: Structure, Quantum-Theoretical Analysis, and Simultaneity Principles, J. Catalan, P. Perez, J. C. del Valle, J. L. G. De Paz and M. Kasha, *Proc. Natl. Acad. Sci. U.S.A.*, **99**, 5793–5709 (2002).
160. H-Bonded N-Heterocyclic Base-Pair Photoautomerizational Potential Barrier and Dynamics: The 7-Azaindole Dimer, J. Catalan, P. Pérez, J. C. del Valle, J. L. G. de Paz and M. Kasha (Submitted, November 2002).
161. Blocking Biprotonic Phototautomerism in 7-Azaindole Base-Pair Dimers by Dipolar Solvent Perturbation, J. Catalan, J. C. del Valle, and M. Kasha (Submitted, November 2002).
162. Geomagnetically Directed Solar Proton Polar Storms. The Lower Latitude Secondary Red Auroras as Singlet Molecular Oxygen Pair Simultaneous Transitions, M. Kasha, A. U. Khan, and Wade B. Clark, Jr. (Submitted, December 2002).
163. Geomagnetically Directed Solar Proton Polar Storms. The Earth as a Nuclear Reactor Chamber and the Global Consequences, M. Kasha, A. U. Khan, and Garth Arsenault (Submitted, December 2002).
164. Electronic Mechanisms of Fluorescence Quenching and Recovery by Photo-Physical Induction in 5-Hydroxyflavones. The Role of the 5-Hydroxy Group, E. Falkovskaia and M. Kasha (Submitted, December 2002).
165. Electronic Mechanisms of Fluorescence Quenching and Recovery by Photo-Physical Induction in 5-Hydroxyflavones. Polyhydroxyflavones: Fisetin, Kaempferol, Quercetin, and Myricetin, E. Falkovskaia and M. Kasha (Submitted, December 2002).
166. A Photon-Antenna, Energy Trap Model. The Intersection of Davydov and Förster Models of Resonance Energy Transfer, M. Kasha (Submitted, December 2002).
