Corrigendum

Cluster size distribution above the percolation threshold

Lubensky T C and McKane A J 1981 *J. Phys A: Math. Gen.* **14** L157-61

On page L160, the right-hand side of equation (24) should be multiplied by $(p - p_c)^{\nu d}$ where ν is the correlation length exponent. This factor was omitted in the paper from which this equation was taken (Houghton and Lubensky 1980). No other results are affected by this change, and in particular the values for θ' quoted in equation (26) are correct.

We are grateful to Daniel Grempel for pointing out this omission.
