Corrigendum

Products and compositions with the Dirac delta function

Raju C K 1982 *J. Phys. A: Math. Gen.* **15** 381-96

Equation (2.43) should read

$$f \cdot \delta^{(k)} \cong (-1)^k \sum_{i=0}^k (-1)^i \binom{k}{i} f^{(k-i)}(0) \delta^{(i)}$$

so that (2.44) reads

$$x^{-n} \cdot \delta^{(k)} \cong \sum_{i=0}^k \binom{k}{i} \frac{(n+k-1-i)!}{(n-1)!} x^{-n-k+i} \delta^{(i)}.$$

Also, (2.16) and (2.29) should respectively read

$$f(\delta\delta') \cong -[f(0)\delta'_\omega(0) + f'(0)\delta_\omega(0)]\delta + f(0)\delta_\omega(0)\delta'$$

$$PV \int \frac{g(x)}{x} dx = \lim_{\epsilon \rightarrow 0} \int_{|x| > \epsilon} \frac{g(x)}{x} dx.$$

In the last of (3.17), the exponent of z_+ should be $(i - 2mr - 2m - r)/(2m + 1)$.
