## Corrigendum

### **Closed similarity solutions for a class of stationary nonlinear Boltzmann-like equations**

Cornille H, Gervois A and Protopopescu V 1983 *J. Phys. A: Math. Gen.* **16** L343–50

We notice that the solution (11*a*) satisfies the Schwarz inequality  $(\sigma_4/\sigma_6)^2 \leq \sigma_2/\sigma_6$ , whereas the solution (11*b*) which violates this inequality cannot correspond to a  $\sigma(\theta) > 0$ .
