Self-avoiding walks attached to triangular and face centred cubic lattice surfaces: extended

exact enumeration data

CORRIGENDUM

Self-avoiding walks attached to triangular and face centred cubic lattice surfaces: extended exact enumeration data
De'Bell K and Lookman T 1985 *J. Phys. A: Math. Gen.* **18** L457-61

The coefficient in table 1 printed as 4160 should have read 4610.

The authors note that A J Guttmann (1984 *J. Phys. A: Math. Gen.* **17** 455-68) has previously estimated

$$p_c = 0.240\,920 \pm 0.000\,018 \qquad \text{(triangular)}$$

from an analysis of SAWs in the bulk.

The above misprint was noticed as a result of correspondence from Professor A J Guttmann, whom the authors thank for his interest.
