CORRIGENDUM

Logarithmic corrections to finite-size scaling in strips
Cardy J L 1986 *J. Phys. A: Math. Gen.* **19** L1093-8

The correct value for the integral $I_3(2, 0)$ is $-2\pi^2$, not $-\pi^2$ as stated. Consequently the appropriate terms in (21) and (22) should be multiplied by 2. In the numerical comparison shown in table 1, the figures in the columns headed $g(\ln L)$, Δ_ε and Δ_σ should all be multiplied by $2^{-1/3}$. The details of the calculation of the integral will be given in a forthcoming paper by A Ludwig and the author.
