## ADDENDUM

### Cluster-weighted percolation—a novel approach to the Potts model

T A Larsson 1986 *J. Phys. A: Math. Gen.* **19** 2383-94

The general  $q$ -state Potts model has previously been formulated as a percolation model by Hu (1983, 1984a, b, c, d, 1986), and also by Kaufman and Andelman (1984). The geometrical implications of this picture have been extensively studied by Hu. A very readable review has been written by Hu (1986).

I am grateful to C-K Hu and M Kaufman for drawing my attention to these references.
