CALL FOR PAPERS

Special Issue on ‘Trends in Quantum Chaotic Scattering’

This is a call for contributions to a special issue of *Journal of Physics A: Mathematical and General* entitled ‘Trends in Quantum Chaotic Scattering’. This issue should be a repository for high quality original work. We are interested in having the topic interpreted broadly, that is, to include contributions clearly related to quantum chaotic scattering in any of its repercussions, in particular dealing with resonance phenomena, delay times, survival probability, S-matrix statistics, absorption from random media, random lasers, atoms in optical lattices and chaotic cavities as well as scattering and transport in mesoscopic and/or disordered quantum systems. We believe that this issue is timely, and hope that it will stimulate further development of this new and exciting field.

The Editorial Board has invited Y V Fyodorov, T Kottos and H-J Stöckmann to serve as Guest Editors for the special issue. Their criteria for acceptance of contributions are the following:

- The subject of the paper should relate to quantum chaotic scattering in the sense described above.
- Contributions will be refereed and processed according to the usual procedure of the journal.
- Papers should be original; reviews of a work published elsewhere will not be accepted.

The guidelines for the preparation of contributions are the following:

- The DEADLINE for submission of contributions is 1 July 2005. This deadline will allow the special issue to appear in December 2005 or early 2006.
- There is a strict page limit of 16 printed pages (approximately 9600 words) per contribution. For papers exceeding this limit the Guest Editors reserve the right to request a reduction in length. Further advice on publishing your work in *Journal of Physics A: Mathematical and General* may be found at www.iop.org/Journals/jphysa.
- Contributions to the special issue should if possible be submitted electronically by web upload at www.iop.org/Journals/jphysa or by e-mail to jphysa@iop.org, quoting ‘JPhysA Special Issue—Trends in quantum chaotic scattering’. Submissions should ideally be in standard LaTeX form; we are, however, able to accept most formats including Microsoft Word. Please see the web site for further information on electronic submissions.
- Authors unable to submit electronically may send hard copy contributions to: Publishing Administrators, *Journal of Physics A*, Institute of Physics Publishing, Dirac House, Temple Back, Bristol BS1 6BE, UK, enclosing the electronic code on floppy disk if available and quoting ‘JPhysA Special Issue—Trends in quantum chaotic scattering’.

CALL FOR PAPERS

- All contributions should be accompanied by a read-me file or covering letter giving the postal and e-mail addresses for correspondence. The Publishing Office should be notified of any subsequent change of address.

This special issue will be published in the paper and online version of the journal. The corresponding author of each contribution will receive a complimentary copy of the issue.

Y V Fyodorov, T Kottos and H-J Stöckmann
Guest Editors
