Two misprints in referencing have occurred in the published version of this article. They are both on page 4.

- After equation 12, after the phrase 'the generating function for all moments in this limit was first computed in', reference [24] (Brouwer) should be cited rather than reference [26].

- After equation 15, after the phrase 'the integral above can be computed for $m > -\mu - 1$', reference [25] (Gradshteyn) should be cited rather than reference [24].
