Corrigendum

Photon-emission rate from atomic systems in the CSL model

Stephen L Adler and Fethi M Ramazanoglu 2007 *J. Phys. A: Math. Theor.* **40** 13395–13406

The use of the term ‘power’ and the symbol P in equations (20), (21), (36), (38), (39), (42), (43), and (55) was inadvertent; we should have used the term ‘rate’ and the conventional symbol Γ . These formulas all give the photon radiation rate, and do not include the energy per photon factor $\hbar c p$ needed to convert them to radiated power. We wish to thank Angelo Bassi for pointing this out to us.
