The existence of a plastic phase and a solid–liquid dynamical bistability region in small fullerene cluster (C₆₀)₇: molecular dynamics simulation

A Piatek, A Dawid and Z Gburski 2006 *J. Phys.: Condens. Matter* **18** 8471–8480

The values of the mean square displacement $\langle \Delta \mathbf{r}^2(t) \rangle$ of the centre of mass of fullerene in (C₆₀)₇ cluster (see figure 10) should be multiplied by a factor 6. The label D[10⁻⁶ cm²/s] (vertical axis of figure 11) should read D[10⁻⁵ cm²/s]. These corrections do not change the merit of the paper.
