

Announcement

Advances in the Chemical Manipulation of Plant Tissue Culture, conference and workshop, will be held at Wye College, Kent, England, July 6–10, 1987. The meeting is sponsored by the British Plant Growth Regulator Group and the Association of Applied Biologists, in collaboration with the Unit for Advanced Propagation Systems. Topics will include regulation of tissue culture development by polyamines, chemical basis of cell-to-cell contact and its role in differentiation, and hormonal basis of multi-apexing in micro-propagated *Gerbera*. The residential conference (July 6–7) will accommodate 200 delegates but unfortunately numbers for the workshop (July 7–10) will be restricted to the first 20 applicants. *For further information, please contact: Dr. G. Goldwin, Department of Horticulture, Wye College, Wye, Nr. Ashford, Kent, TN25 5AH, England.*
