Fourth International Symposium on Frontiers of Electrochemistry	Madras, India	November 14 - 16, 1989	The Secretary, Society for Advancement of Electrochemical Science and Technology, Karaikudi 623 006, India

## Obituary

The death occurred on October 25th 1988 of Dr. E. J. (Jerry) Casey at the early age of 64. In the fall of 1983 Dr. Casey suffered a severe asthmatic attack which resulted in cardiac arrest and left him almost totally incapacitated. For most of the time from then until his death he was nursed devotedly by his wife Mary to whom we extend our sympathy and respect.

Dr. Casey was a man of deep religious convictions which were expressed practically by the help and guidance he gave to people and by the burdens he shared.

To delegates to the U.S. and U.K. Power Sources Symposia and to readers of this journal Dr. Casey will be remembered as the former Director of the Energy Conversion Laboratory, Department of National Defence, Canada, and as a member of the original editorial board of this journal, as well as for his work on many power source systems, particularly the nickel-cadmium system.
