

Subject Index of Volume 48

- Alkaline cell systems
 electrical properties of nickel hydroxide for alkaline cell systems, 361
- Antimony phosphoric acid
 kinetics of hydrogen-evolution reaction on lead and lead-alloy electrodes in sulfuric acid electrolyte with phosphoric acid and antimony additives, 371
- ASEAN Free-Trade Area
 the ASEAN Free-Trade Area and its implications on the battery industry, 7
- Automotive batteries
 superiority and failure mode of automotive batteries insulated with polyethylene separators, 129
- Automotive lead/acid batteries
 updated status of conductance/capacity correlation studies to determine the state-of-health of automotive and stand-by lead/acid batteries, 135
- Batteries
 recovery of zinc and manganese from spent batteries, 389
- Battery alloys
 trends in battery alloy demand from a European perspective, 49
- Battery industry
 the ASEAN Free-Trade Area and its implications on the battery industry, 7
 does lead have a future? A twenty-year vision, 17
 regulatory trends in the battery industry, 29
- Bismuth
 battery performance enhancement with additions of bismuth, 113
- Blood-lead levels
 regulatory trends in the battery industry, 29
- Capacity
 updated status of conductance/capacity correlation studies to determine the state-of-health of automotive and stand-by lead/acid batteries, 135
- Catalyst plugs
 technical trends in industrial lead/acid batteries in Japan, 55
- Charging
 effects of fast charging on hybrid lead/acid battery temperature, 163
- Conductance
 updated status of conductance/capacity correlation studies to determine the state-of-health of automotive and stand-by lead/acid batteries, 135
- Conductive glass-flakes
 seeking enhanced lead/acid battery performance through the use of conductive tin-dioxide-coated glass-flakes, 83
- Corrosion layers
 effect of corrosion layer on phenomena that cause premature capacity loss in lead/acid batteries, 179
 effects of grid alloy on the properties of positive-plate corrosion layers in lead/acid batteries. Implications for premature capacity loss under repetitive deep-discharge cycling service, 195
- Deep-discharge cycling
 effects of grid alloy on the properties of positive-plate corrosion layers in lead/acid batteries. Implications for premature capacity loss under repetitive deep-discharge cycling service, 195
- Differential scanning calorimetry
 thermal analysis of active materials for the lead/acid battery, 77
- Dopants
 minor elements in lead materials used for lead/acid batteries. 1. Hydrogen- and oxygen-gassing characteristics, 219
- Electric motor cycle
 development of electric motor cycle technologies in Taiwan, 243
- Environment
 does lead have a future? A twenty-year vision, 17

- Europe**
 changing corporate culture within the European lead/acid battery industry, 39
 trends in battery alloy demand from a European perspective, 49
- Failure mode**
 superiority and failure mode of automotive batteries insulated with polyethylene separators, 129
- Flow distribution**
 development of a 0.1 kW power accumulation pilot plant based on an Fe/Cr redox flow battery. Part 1. Considerations on flow-distribution design, 293
- Glass fibre**
 glass-fibre separators for valve-regulated batteries, 233
- Graphite fluorides**
 graphite oxyfluoride: behaviour as electrode material in lithium batteries, 311
- Graphite oxides**
 graphite oxyfluoride: behaviour as electrode material in lithium batteries, 311
- Graphite oxyfluoride**
 graphite oxyfluoride: behaviour as electrode material in lithium batteries, 311
- Grid alloys**
 effects of grid alloy on the properties of positive-plate corrosion layers in lead/acid batteries. Implications for premature capacity loss under repetitive deep-discharge cycling service, 195
- Hybrid lead/acid batteries**
 effects of fast charging on hybrid lead/acid battery temperature, 163
- Hydrogen-evolution reaction**
 kinetics of hydrogen-evolution reaction on lead and lead-alloy electrodes in sulfuric acid electrolyte with phosphoric acid and antimony additives, 371
- Hydrogen gassing**
 minor elements in lead materials used for lead/acid batteries. 1. Hydrogen- and oxygen-gassing characteristics, 219
- Hydrogen sulfide**
 hydrogen sulfide and sulfur dioxide evolution from a valve-regulated lead/acid battery, 277
- Iron/chromium**
 development of a 0.1 kW power accumulation pilot plant based on an Fe/Cr redox flow battery. Part 1. Considerations on flow-distribution design, 293
- Japan**
 technical trends in industrial lead/acid batteries in Japan, 55
- Lead/acid batteries**
 technical trends in industrial lead/acid batteries in Japan, 55
 thermal analysis of active materials for the lead/acid battery, 77
 seeking enhanced lead/acid battery performance through the use of conductive tin-dioxide-coated glass-flakes, 83
 updated status of conductance/capacity correlation studies to determine the state-of-health of automotive and stand-by lead/acid batteries, 135
 effects of fast charging on hybrid lead/acid battery temperature, 163
 effect of corrosion layer on phenomena that cause premature capacity loss in lead/acid batteries, 179
 effects of grid alloy on the properties of positive-plate corrosion layers in lead/acid batteries. Implications for premature capacity loss under repetitive deep-discharge cycling service, 195
 minor elements in lead materials used for lead/acid batteries. 1. Hydrogen- and oxygen-gassing characteristics, 219
 aspects of lead/acid battery manufacture and performance, 257
 hydrogen sulfide and sulfur dioxide evolution from a valve-regulated lead/acid battery, 277
- Lead/acid battery industry**
 changing corporate culture within the European lead/acid battery industry, 39
 modern technology for the preparation of battery paste, 71

- Lead electrodes
 - kinetics of hydrogen-evolution reaction on lead and lead-alloy electrodes in sulfuric acid electrolyte with phosphoric acid and antimony additives, 371
- Lead-in-air levels
 - regulatory trends in the battery industry, 29
- Lead-producing industry
 - does lead have a future? A twenty-year vision, 17
- Lead oxide production
 - aspects of lead/acid battery manufacture and performance, 257
- Lithium batteries
 - graphite oxyfluoride: behaviour as electrode material in lithium batteries, 311
- Manganese dioxide
 - rechargeability of manganese dioxide/zinc cell using zinc sulfate electrolyte, 303
- Multilayer
 - multilayer thin-film batteries with poly(vinyl alcohol), 285
- Nickel hydroxide
 - electrical properties of nickel hydroxide for alkaline cell systems, 361
- Oxygen gassing
 - minor elements in lead materials used for lead/acid batteries. 1. Hydrogen- and oxygen-gassing characteristics, 219
- Paste mixing
 - aspects of lead/acid battery manufacture and performance, 257
- Performance
 - seeking enhanced lead/acid battery performance through the use of conductive tin-dioxide-coated glass-flakes, 83
 - aspects of lead/acid battery manufacture and performance, 257
- Plate curing
 - aspects of lead/acid battery manufacture and performance, 257
- Plate formation
 - aspects of lead/acid battery manufacture and performance, 257
- Polyethylene separators
 - superiority and failure mode of automotive batteries insulated with polyethylene separators, 129
- Poly(vinyl alcohol)
 - multilayer thin-film batteries with poly(vinyl alcohol), 285
- Porosimetry
 - the method of standard porosimetry.
 1. Principles and possibilities, 327
 - the method of standard porosimetry.
 2. Investigation of the formation of porous structures, 339
- Portable power stations
 - portable power stations, 247
- Power accumulation
 - development of a 0.1 kW power accumulation pilot plant based on an Fe/Cr redox flow battery. Part 1. Considerations on flow-distribution design, 293
- Power stations
 - portable power stations, 247
- Premature capacity loss
 - effect of corrosion layer on phenomena that cause premature capacity loss in lead/acid batteries, 179
 - effects of grid alloy on the properties of positive-plate corrosion layers in lead/acid batteries. Implications for premature capacity loss under repetitive deep-discharge cycling service, 195
- Protonic batteries
 - is 'protode' a new name for composite anodes in solid-state protonic batteries?, 385
- Rechargeable cells
 - rechargeability of manganese dioxide/zinc cell using zinc sulfate electrolyte, 303
- Recovery
 - recovery of zinc and manganese from spent batteries, 389
- Redox flow batteries
 - development of a 0.1 kW power accumulation pilot plant based on an Fe/Cr redox flow battery. Part 1. Considerations on flow-distribution design, 293
- Regulations
 - regulatory trends in the battery industry, 29
- Separators
 - glass-fibre separators for valve-regulated batteries, 233

- Sodium/nickel chloride cells**
 effects of sulfur additive on the performance of Na/NiCl₂ cells, 349
- Solid-state batteries**
 multilayer thin-film batteries with poly(vinyl alcohol), 285
 is 'protode' a new name for composite anodes in solid-state protonic batteries?, 385
- Spent batteries**
 recovery of zinc and manganese from spent batteries, 389
- Stand-by lead/acid batteries**
 updated status of conductance/capacity correlation studies to determine the state-of-health of automotive and stand-by lead/acid batteries, 135
- State-of-health**
 updated status of conductance/capacity correlation studies to determine the state-of-health of automotive and stand-by lead/acid batteries, 135
- Sulfide dioxide**
 hydrogen sulfide and sulfur dioxide evolution from a valve-regulated lead/acid battery, 277
- Sulfur**
 effects of sulfur additive on the performance of Na/NiCl₂ cells, 349
- Sulfuric acid**
 kinetics of hydrogen-evolution reaction on lead and lead-alloy electrodes in sulfuric acid electrolyte with phosphoric acid and antimony additives, 371
- Temperature**
 effects of fast charging on hybrid lead/acid battery temperature, 163
- Thermal analysis**
 thermal analysis of active materials for the lead/acid battery, 77
- Thermogravimetry**
 thermal analysis of active materials for the lead/acid battery, 77
- Thin-film batteries**
 multilayer thin-film batteries with poly(vinyl alcohol), 285
- Tin dioxide**
 seeking enhanced lead/acid battery performance through the use of conductive tin-dioxide-coated glass-flakes, 83
- Vacuum technology**
 modern technology for the preparation of battery paste, 71
- Valve-regulated head/acid batteries**
 battery performance enhancement with additions of bismuth, 113
- Valve-regulated lead/acid batteries**
 technical trends in industrial lead/acid batteries in Japan, 55
 glass-fibre separators for valve-regulated batteries, 233
 hydrogen sulfide and sulfur dioxide evolution from a valve-regulated lead/acid battery, 277
- Zinc**
 recovery of zinc and manganese from spent batteries, 389
- Zinc sulfate**
 rechargeability of manganese dioxide/zinc cell using zinc sulfate electrolyte, 303
