

Subject Index of Volume 75

- AB₂-type metal hydride
Vanadium solid solution; Electrode cycle life; Vanadium dissolution (Kim, J.S. (75) 1)
- Activation
Zirconium- and vanadium-substituted TiNi alloy; Phase structure; Hydrogen absorbing–desorbing capacity (Zhang, Q.A. (75) 288)
- Additives
Secondary alkaline batteries; Zinc electrodes; High hydrogen overpotential; Corrosion behaviour (Shivkumar, R. (75) 90)
- Anode
Lithium-ion battery; Tin-oxide material; Irreversible capacity (Wan, K. (75) 9)
Lithium secondary battery; Carbon powder; Capacity; Particle size effect (Sato, Y. (75) 271)
- Anode materials
Carbon; Electrochemical behaviour; Lithium ion batteries (Mochida, I. (75) 214)
- Aqueous electrolytes
Hydrogen and lithium storage; Electrochemical performance (Wang, C.S. (75) 122)
- Batteries
Metal hydride; Capacity; Rate capability; Morphology (Zhang, W. (75) 84)
- Battery
Nickel oxide electrode; Metal hydride electrode; Charge and discharge; Hybrid electric vehicle (Yang, Y.-F. (75) 19)
- Capacity
Metal hydride; Batteries; Rate capability; Morphology (Zhang, W. (75) 84)
Lithium secondary battery; Anode; Carbon powder; Particle size effect (Sato, Y. (75) 271)
- Capacity utilization
Sintered nickel electrode; Cobalt additive; KOH electrolyte; Stress test; Loading level; Electrochemical impregnation current density (Russell, P.G. (75) 261)
- Carbon
Lithium secondary battery; V₂O₅; Effect (Wu, Y. (75) 167)
Anode materials; Electrochemical behaviour; Lithium ion batteries (Mochida, I. (75) 214)
- Carbon anodes
Lithium secondary battery; PAN; Phosphoric acid (Wu, Y. (75) 201)
- Carbon nanotube
Lithium insertion; Copper oxide; Lithium–ion batteries (Wu, G.T. (75) 175)
- Carbon powder
Lithium secondary battery; Anode; Capacity; Particle size effect (Sato, Y. (75) 271)
- Cathode/anode ratio
Lithium insertion; Lithium-ion cells (Shi, H. (75) 64)
- Cathode dissolution
Cell life; Molten carbonate; Fuel cell; Performance (Mugikura, Y. (75) 108)
- Cell life
Cathode dissolution; Molten carbonate; Fuel cell; Performance (Mugikura, Y. (75) 108)
- Ceria
Extrusion; Electrolyte; Mechanical strength; Solid oxide fuel cell (Bellon, O. (75) 116)
- Charge and discharge
Nickel oxide electrode; Metal hydride electrode; Battery; Hybrid electric vehicle (Yang, Y.-F. (75) 19)
- Charging load-levelling
Lead/acid battery; Electric vehicles; Cycle life; Energy efficiency (Ikeya, T. (75) 101)
- Cobalt additive
Sintered nickel electrode; KOH electrolyte; Capacity utilization; Stress test; Loading level; Electrochemical impregnation current density (Russell, P.G. (75) 261)
- Cobalt compounds
Metal hydrides; Impedance; Mathematical modelling; Diffusion (Haran, B.S. (75) 56)
- Composite
Tin oxides; Irreversible loss; Li-ion batteries; Phase diagram (Wolfenstine, J. (75) 180)
- Computer simulation
Electric vehicle batteries; Dynamic testing (Gu, W.B. (75) 151)
- Conductivity
Solid polymer electrolyte; Plasticizer; Dibutylphthalate; Temperature studies; X-ray analysis (Benedict, T.J. (75) 171)
- Constituent water
Fourier transform infrared spectroscopy; Manganese dioxides; Electrochemical activity; Nstutite phase (Ananth, M.V. (75) 278)
- Copper oxide
Carbon nanotube; Lithium insertion; Lithium–ion batteries (Wu, G.T. (75) 175)
- Corrosion behaviour
Secondary alkaline batteries; Zinc electrodes; High hydrogen overpotential; Additives (Shivkumar, R. (75) 90)
- Corrosion inhibitors
Corrosion kinetics; Electrolyte solutions; Surface structure; Zinc alloys (Szcześniak, B. (75) 130)
- Corrosion kinetics
Corrosion inhibitors; Electrolyte solutions; Surface structure; Zinc alloys (Szcześniak, B. (75) 130)
- CV
Nickel hydroxide; Ultrafine powder; Preparation; EIS (Zhang, Y. (75) 283)
- Cycle life
Lead/acid battery; Electric vehicles; Charging load-levelling; Energy efficiency (Ikeya, T. (75) 101)

- Deposition current density
Pulse electrodeposition; Platinum deposits; Electrode performance; Proton exchange membrane; Fuel cell; Surface roughness (Choi, K.H. (75) 230)
- Dibutylphthalate
Solid polymer electrolyte; Plasticizer; Conductivity; Temperature studies; X-ray analysis (Benedict, T.J. (75) 171)
- Diffusion
Metal hydrides; Impedance; Mathematical modelling; Cobalt compounds (Haran, B.S. (75) 56)
- Diffusion coefficients
Lithium solid polymer battery; FeOOH(an); Impedance parameters (Hwang, K.S. (75) 13)
- Direct observation
In situ oxidation; Lithiation; Molten carbonate; Fuel cell; Nickel oxide cathode (Izaki, Y. (75) 236)
- Discharge capacity
Silver vanadate; Sodium; Ion exchange; Lithium (Kawakita, J. (75) 244)
- Doped lanthanum gallate
Nitrate route synthesis; SOFC performance; Ni-ceria anode; LCFC and LSC cathodes (Maffei, N. (75) 162)
- Drying temperature
Polymer electrolyte fuel cells; Transport applications; Water management (Picot, D. (75) 251)
- Dynamic testing
Electric vehicle batteries; Computer simulation (Gu, W.B. (75) 151)
- Effect
Lithium secondary battery; Carbon; V₂O₅ (Wu, Y. (75) 167)
- EIS
Nickel hydroxide; Ultrafine powder; Preparation; CV (Zhang, Y. (75) 283)
- Electric vehicle batteries
Dynamic testing; Computer simulation (Gu, W.B. (75) 151)
- Electric vehicles
Lead/acid battery; Charging load-levelling; Cycle life; Energy efficiency (Ikeya, T. (75) 101)
- Electrochemical activity
Fourier transform infrared spectroscopy; Manganese dioxides; Nstutite phase; Constituent water (Ananth, M.V. (75) 278)
- Electrochemical behaviour
Anode materials; Carbon; Lithium ion batteries (Mochida, I. (75) 214)
- Electrochemical characterization
Lithium battery; Sol-gel synthesis; Lithium nickel oxide; Lithium nickel cobalt oxide (Chang, C.-C. (75) 44)
- Electrochemical impregnation current density
Sintered nickel electrode; Cobalt additive; KOH electrolyte; Capacity utilization; Stress test; Loading level (Russell, P.G. (75) 261)
- Electrochemical performance
Hydrogen and lithium storage; Aqueous electrolytes (Wang, C.S. (75) 122)
- Electrode cycle life
AB₂-type metal hydride; Vanadium solid solution; Vanadium dissolution (Kim, J.S. (75) 1)
- Electrode performance
Pulse electrodeposition; Platinum deposits; Proton exchange membrane; Fuel cell; Surface roughness; Deposition current density (Choi, K.H. (75) 230)
- Electrolysis
Methanol; Polypyrrole; Platinum microparticles; Modified electrode (Xue, K.H. (75) 207)
- Electrolyte
Ceria; Extrusion; Mechanical strength; Solid oxide fuel cell (Bellon, O. (75) 116)
- Electrolyte matrix
Molten carbonate fuel cells; Particle growth; Phase transformation (Terada, S. (75) 223)
- Electrolyte solutions
Corrosion inhibitors; Corrosion kinetics; Surface structure; Zinc alloys (Szcześniak, B. (75) 130)
- Energy efficiency
Lead/acid battery; Electric vehicles; Charging load-levelling; Cycle life (Ikeya, T. (75) 101)
- Extrusion
Ceria; Electrolyte; Mechanical strength; Solid oxide fuel cell (Bellon, O. (75) 116)
- FeOOH(an)
Lithium solid polymer battery; Diffusion coefficients; Impedance parameters (Hwang, K.S. (75) 13)
- Float service life
VRLA battery; Lead acid battery (Burgess, W.L. (75) 28)
- Fourier transform infrared spectroscopy
Manganese dioxides; Electrochemical activity; Nstutite phase; Constituent water (Ananth, M.V. (75) 278)
- Fuel cell
Cell life; Cathode dissolution; Molten carbonate; Performance (Mugikura, Y. (75) 108)
Impedance spectroscopy (Mueller, J.T. (75) 139)
Pulse electrodeposition; Platinum deposits; Electrode performance; Proton exchange membrane; Surface roughness; Deposition current density (Choi, K.H. (75) 230)
Direct observation; In situ oxidation; Lithiation; Molten carbonate; Nickel oxide cathode (Izaki, Y. (75) 236)
- Galvanostatic polarization
Lead electrode; Oxidation of lead; Kinetics (Abd El Aal, E.E. (75) 36)
- Graphite
Lithium-ion battery; Pyrocarbonate (Coowar, F. (75) 144)
- High hydrogen overpotential
Secondary alkaline batteries; Zinc electrodes; Corrosion behaviour; Additives (Shivkumar, R. (75) 90)
- Hybrid electric vehicle
Nickel oxide electrode; Metal hydride electrode; Battery; Charge and discharge (Yang, Y.-F. (75) 19)
- Hydrogen absorbing-desorbing capacity
Zirconium- and vanadium-substituted TiNi alloy; Phase structure; Activation (Zhang, Q.A. (75) 288)
- Hydrogen and lithium storage
Aqueous electrolytes; Electrochemical performance (Wang, C.S. (75) 122)
- Impedance
Metal hydrides; Mathematical modelling; Diffusion; Cobalt compounds (Haran, B.S. (75) 56)
- Impedance parameters
Lithium solid polymer battery; FeOOH(an); Diffusion coefficients (Hwang, K.S. (75) 13)
- Impedance spectroscopy
Fuel cell (Mueller, J.T. (75) 139)
- In situ oxidation
Direct observation; Lithiation; Molten carbonate; Fuel cell; Nickel oxide cathode (Izaki, Y. (75) 236)
- Ion exchange
Silver vanadate; Sodium; Lithium; Discharge capacity (Kawakita, J. (75) 244)
- Irreversible capacity
Anode; Lithium-ion battery; Tin-oxide material (Wan, K. (75) 9)
- Irreversible loss
Tin oxides; Composite; Li-ion batteries; Phase diagram (Wolfenstine, J. (75) 180)

- Kinetics**
Lead electrode; Galvanostatic polarization; Oxidation of lead (Abd El Aal, E.E. (75) 36)
- KOH electrolyte**
Sintered nickel electrode; Cobalt additive; Capacity utilization; Stress test; Loading level; Electrochemical impregnation current density (Russell, P.G. (75) 261)
- LCFC and LSC cathodes**
Doped lanthanum gallate; Nitrate route synthesis; SOFC performance; Ni-ceria anode (Maffei, N. (75) 162)
- Lead acid battery**
VRLA battery; Float service life (Burgess, W.L. (75) 28)
- Lead/acid battery**
Electric vehicles; Charging load-levelling; Cycle life; Energy efficiency (Ikeya, T. (75) 101)
- Lead electrode**
Galvanostatic polarization; Oxidation of lead; Kinetics (Abd El Aal, E.E. (75) 36)
- Li-ion batteries**
Tin oxides; Composite; Irreversible loss; Phase diagram (Wolfenstine, J. (75) 180)
- Lithiation**
Direct observation; In situ oxidation; Molten carbonate; Fuel cell; Nickel oxide cathode (Izaki, Y. (75) 236)
- Lithium**
Silver vanadate; Sodium; Ion exchange; Discharge capacity (Kawakita, J. (75) 244)
- Lithium battery**
Sol-gel synthesis; Lithium nickel oxide; Lithium nickel cobalt oxide; Electrochemical characterization (Chang, C.-C. (75) 44)
Polymer electrolyte; Vanadium pentoxide; Xerogel (Prosini, P.P. (75) 73)
- Lithium insertion**
Cathode/anode ratio; Lithium-ion cells (Shi, H. (75) 64)
Carbon nanotube; Copper oxide; Lithium-ion batteries (Wu, G.T. (75) 175)
- Lithium-ion batteries**
Carbon nanotube; Lithium insertion; Copper oxide (Wu, G.T. (75) 175)
- Lithium ion batteries**
Anode materials; Carbon; Electrochemical behaviour (Mochida, I. (75) 214)
- Lithium-ion battery**
Anode; Tin-oxide material; Irreversible capacity (Wan, K. (75) 9)
Graphite; Pyrocarbonate (Coowar, F. (75) 144)
- Lithium-ion cells**
Cathode/anode ratio; Lithium insertion (Shi, H. (75) 64)
- Lithium nickel cobalt oxide**
Lithium battery; Sol-gel synthesis; Lithium nickel oxide; Electrochemical characterization (Chang, C.-C. (75) 44)
- Lithium nickel oxide**
Lithium battery; Sol-gel synthesis; Lithium nickel cobalt oxide; Electrochemical characterization (Chang, C.-C. (75) 44)
- Lithium secondary battery**
Carbon; V₂O₅; Effect (Wu, Y. (75) 167)
Carbon anodes; PAN; Phosphoric acid (Wu, Y. (75) 201)
Anode; Carbon powder; Capacity; Particle size effect (Sato, Y. (75) 271)
- Lithium solid polymer battery**
FeOOH(an); Diffusion coefficients; Impedance parameters (Hwang, K.S. (75) 13)
- Loading level**
Sintered nickel electrode; Cobalt additive; KOH electrolyte; Capacity utilization; Stress test; Electrochemical impregnation current density (Russell, P.G. (75) 261)
- Manganese dioxides**
Fourier transform infrared spectroscopy; Electrochemical activity; Nstutite phase; Constituent water (Ananth, M.V. (75) 278)
- Mathematical modelling**
Metal hydrides; Impedance; Diffusion; Cobalt compounds (Haran, B.S. (75) 56)
- Mechanical strength**
Ceria; Extrusion; Electrolyte; Solid oxide fuel cell (Bellon, O. (75) 116)
- Metal hydride**
Batteries; Capacity; Rate capability; Morphology (Zhang, W. (75) 84)
- Metal hydride electrode**
Nickel oxide electrode; Battery; Charge and discharge; Hybrid electric vehicle (Yang, Y.-F. (75) 19)
- Metal hydrides**
Impedance; Mathematical modelling; Diffusion; Cobalt compounds (Haran, B.S. (75) 56)
- Methanol**
Electrolysis; Polypyrrole; Platinum microparticles; Modified electrode (Xue, K.H. (75) 207)
- Modified electrode**
Electrolysis; Methanol; Polypyrrole; Platinum microparticles (Xue, K.H. (75) 207)
- Molten carbonate**
Cell life; Cathode dissolution; Fuel cell; Performance (Mugikura, Y. (75) 108)
Direct observation; In situ oxidation; Lithiation; Fuel cell; Nickel oxide cathode (Izaki, Y. (75) 236)
- Molten carbonate fuel cells**
Electrolyte matrix; Particle growth; Phase transformation (Terada, S. (75) 223)
- Morphology**
Metal hydride; Batteries; Capacity; Rate capability (Zhang, W. (75) 84)
- Ni-ceria anode**
Doped lanthanum gallate; Nitrate route synthesis; SOFC performance; LCFC and LSC cathodes (Maffei, N. (75) 162)
- Nickel hydroxide**
Ultrafine powder; Preparation; CV; EIS (Zhang, Y. (75) 283)
- Nickel oxide cathode**
Direct observation; In situ oxidation; Lithiation; Molten carbonate; Fuel cell (Izaki, Y. (75) 236)
- Nickel oxide electrode**
Metal hydride electrode; Battery; Charge and discharge; Hybrid electric vehicle (Yang, Y.-F. (75) 19)
- Nitrate route synthesis**
Doped lanthanum gallate; SOFC performance; Ni-ceria anode; LCFC and LSC cathodes (Maffei, N. (75) 162)
- Nstutite phase**
Fourier transform infrared spectroscopy; Manganese dioxides; Electrochemical activity; Constituent water (Ananth, M.V. (75) 278)
- Oxidation of lead**
Lead electrode; Galvanostatic polarization; Kinetics (Abd El Aal, E.E. (75) 36)
- PAN**
Lithium secondary battery; Carbon anodes; Phosphoric acid (Wu, Y. (75) 201)
- Particle growth**
Molten carbonate fuel cells; Electrolyte matrix; Phase transformation (Terada, S. (75) 223)
- Particle size effect**
Lithium secondary battery; Anode; Carbon powder; Capacity (Sato, Y. (75) 271)

- Performance
Cell life; Cathode dissolution; Molten carbonate; Fuel cell (Mugikura, Y. (75) 108)
- Phase diagram
Tin oxides; Composite; Irreversible loss; Li-ion batteries (Wolfenstine, J. (75) 180)
- Phase structure
Zirconium- and vanadium-substituted TiNi alloy; Hydrogen absorbing-desorbing capacity; Activation (Zhang, Q.A. (75) 288)
- Phase transformation
Molten carbonate fuel cells; Electrolyte matrix; Particle growth (Terada, S. (75) 223)
- Phosphoric acid
Lithium secondary battery; Carbon anodes; PAN (Wu, Y. (75) 201)
- Plasticizer
Solid polymer electrolyte; Dibutylphthalate; Conductivity; Temperature studies; X-ray analysis (Benedict, T.J. (75) 171)
- Platinum deposits
Pulse electrodeposition; Electrode performance; Proton exchange membrane; Fuel cell; Surface roughness; Deposition current density (Choi, K.H. (75) 230)
- Platinum microparticles
Electrolysis; Methanol; Polypyrrole; Modified electrode (Xue, K.H. (75) 207)
- Polymer electrolyte
Lithium battery; Vanadium pentoxide; Xerogel (Prosini, P.P. (75) 73)
- Polymer electrolyte fuel cells
Transport applications; Water management; Drying temperature (Picot, D. (75) 251)
- Polypyrrole
Electrolysis; Methanol; Platinum microparticles; Modified electrode (Xue, K.H. (75) 207)
- Preparation
Nickel hydroxide; Ultrafine powder; CV; EIS (Zhang, Y. (75) 283)
- Proton exchange membrane
Pulse electrodeposition; Platinum deposits; Electrode performance; Fuel cell; Surface roughness; Deposition current density (Choi, K.H. (75) 230)
- Pulse electrodeposition
Platinum deposits; Electrode performance; Proton exchange membrane; Fuel cell; Surface roughness; Deposition current density (Choi, K.H. (75) 230)
- Pyrocarbonate
Graphite; Lithium-ion battery (Coowar, F. (75) 144)
- Rate capability
Metal hydride; Batteries; Capacity; Morphology (Zhang, W. (75) 84)
- Secondary alkaline batteries
Zinc electrodes; High hydrogen overpotential; Corrosion behaviour; Additives (Shivkumar, R. (75) 90)
- Silver vanadate
Sodium; Ion exchange; Lithium; Discharge capacity (Kawakita, J. (75) 244)
- Sintered nickel electrode
Cobalt additive; KOH electrolyte; Capacity utilization; Stress test; Loading level; Electrochemical impregnation current density (Russell, P.G. (75) 261)
- Sodium
Silver vanadate; Ion exchange; Lithium; Discharge capacity (Kawakita, J. (75) 244)
- SOFC performance
Doped lanthanum gallate; Nitrate route synthesis; Ni-ceria anode; LCFC and LSC cathodes (Maffei, N. (75) 162)
- Sol-gel synthesis
Lithium battery; Lithium nickel oxide; Lithium nickel cobalt oxide; Electrochemical characterization (Chang, C.-C. (75) 44)
- Solid oxide fuel cell
Ceria; Extrusion; Electrolyte; Mechanical strength (Bellon, O. (75) 116)
- Solid polymer electrolyte
Plasticizer; Dibutylphthalate; Conductivity; Temperature studies; X-ray analysis (Benedict, T.J. (75) 171)
- Stress test
Sintered nickel electrode; Cobalt additive; KOH electrolyte; Capacity utilization; Loading level; Electrochemical impregnation current density (Russell, P.G. (75) 261)
- Surface roughness
Pulse electrodeposition; Platinum deposits; Electrode performance; Proton exchange membrane; Fuel cell; Deposition current density (Choi, K.H. (75) 230)
- Surface structure
Corrosion inhibitors; Corrosion kinetics; Electrolyte solutions; Zinc alloys (Szcześniak, B. (75) 130)
- Temperature studies
Solid polymer electrolyte; Plasticizer; Dibutylphthalate; Conductivity; X-ray analysis (Benedict, T.J. (75) 171)
- Tin-oxide material
Anode; Lithium-ion battery; Irreversible capacity (Wan, K. (75) 9)
- Tin oxides
Composite; Irreversible loss; Li-ion batteries; Phase diagram (Wolfenstine, J. (75) 180)
- Transport applications
Polymer electrolyte fuel cells; Water management; Drying temperature (Picot, D. (75) 251)
- Ultrafine powder
Nickel hydroxide; Preparation; CV; EIS (Zhang, Y. (75) 283)
- Vanadium dissolution
AB₂-type metal hydride; Vanadium solid solution; Electrode cycle life (Kim, J.S. (75) 1)
- Vanadium pentoxide
Polymer electrolyte; Lithium battery; Xerogel (Prosini, P.P. (75) 73)
- Vanadium solid solution
AB₂-type metal hydride; Electrode cycle life; Vanadium dissolution (Kim, J.S. (75) 1)
- V₂O₅
Lithium secondary battery; Carbon; Effect (Wu, Y. (75) 167)
- VRLA battery
Lead acid battery; Float service life (Burgess, W.L. (75) 28)
- Water management
Polymer electrolyte fuel cells; Transport applications; Drying temperature (Picot, D. (75) 251)
- Xerogel
Polymer electrolyte; Lithium battery; Vanadium pentoxide (Prosini, P.P. (75) 73)
- X-ray analysis
Solid polymer electrolyte; Plasticizer; Dibutylphthalate; Conductivity; Temperature studies (Benedict, T.J. (75) 171)
- Zinc alloys
Corrosion inhibitors; Corrosion kinetics; Electrolyte solutions; Surface structure (Szcześniak, B. (75) 130)
- Zinc electrodes
Secondary alkaline batteries; High hydrogen overpotential; Corrosion behaviour; Additives (Shivkumar, R. (75) 90)
- Zirconium- and vanadium-substituted TiNi alloy
Phase structure; Hydrogen absorbing-desorbing capacity; Activation (Zhang, Q.A. (75) 288)
